THOMAS A. SCHWEICH
Missouri State Auditor

The Citizens of Missouri

This report was compiled from follow-up reports issued in 2013. The State Auditor's office conducted 19 follow-up reviews pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the auditee about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Auditors conduct follow-up work for any audit receiving an overall "Poor" rating, significant or serious findings in audits receiving a "Fair" rating when determined necessary, and any other audits at the discretion of the State Auditor.

Of 177 recommendations included in the follow-up reports 96 had a status of implemented, 62 had a status of in progress, 14 had a status of partially implemented, and 5 had a status of not implemented.

Thomas A. Schweich
State Auditor

Summary of 2013 Follow-Up Reports
Status of Recommendations

1.	Missouri State Public Defender Report number 2013-027	The Missouri State Public Defender received a "Fair" overall audit rating. The follow-up report focused on 5 recommendations. Status determined: In Progress 5
2.	Fortieth Judicial Circuit City of Diamond Municipal Division Report number 2013-029	The Fortieth Judicial Circuit City of Diamond Municipal Division received a "Poor" overall audit rating. The follow-up report focused on 9 recommendations. Status determined: Implemented 7 Partially Implemented 2
3.	Henry County Report number 2013-030	Henry County received a "Poor" overall audit rating. The follow-up report focused on 10 recommendations. Status determined: Implemented 1 In Progress 7 Partially Implemented 2
4.	Economic Development Division of Business and Community Services Report number 2013-031	Economic Development Division of Business and Community Services received a "Fair" overall audit rating. The follow-up report focused on 1 recommendation. Status determined: Implemented 1
5.	Polk County Report number 2013-040	Polk County received a "Fair" overall audit rating. The follow-up report focused on 5 recommendations. Status determined: Implemented 4 Partially Implemented 1

6. Carter County

Report number 2013-042

Carter County received a "Poor" overall audit rating. The follow-up report focused on 12 recommendations.

Status determined:

Implemented	9
In Progress	3

7. Knox County

Report number 2013-043

Knox County received a "Poor" overall audit rating. The follow-up report focused on 13 recommendations.

Status determined:

Implemented	7
In Progress	5
Not Implemented	1

8. McDonald County

Report number 2013-044

McDonald County received a "Poor" overall audit rating. The follow-up report focused on 16 recommendations.

Status determined:

Implemented	7
In Progress	8
Partially Implemented	1

9. City of Clarksdale

Report number 2013-054

The City of Clarksdale received a "Poor" overall audit rating. The follow-up report focused on 14 recommendations.

Status determined:

Implemented	13
In Progress	1

10. Barton County

Report number 2013-055

Barton County received a "Poor" overall audit rating. The follow-up report focused on 15 recommendations.

Status determined:

Implemented	3
In Progress	11
Partially Implemented	1

11. Wayne County

Report number 2013-056

Wayne County received a "Poor" overall audit rating. The follow-up report focused on 9 recommendations.

Status determined:

Implemented	5
In Progress	2
Partially Implemented	1
Not Implemented	1

12. Fortieth Judicial Circuit City of Pineville Municipal Division

Report number 2013-058

The Fortieth Judicial Circuit City of Pineville Municipal Division received a "Poor" overall audit rating. The follow-up report focused on 10 recommendations.

Status determined:

Implemented	2
In Progress	8

13. Rockwood R-VI School District

Report number 2013-064

The Rockwood R-VI School District received a "Fair" overall audit rating. The follow-up report focused on 12 recommendations.

Status determined:

Implemented	8
In Progress	4

14. Missouri Quality Jobs Tax Incentive Program

Report number 2013-073

The Missouri Quality Jobs Tax Incentive Program received a "Poor" overall audit rating. The follow-up report focused on 7 recommendations.

Status determined:

Implemented	2
Partially Implemented	3
Not Implemented	2

15. City of Diamond

Report number 2013-074

The City of Diamond received a "Fair" overall audit rating. The follow-up report focused on 9 recommendations.

Status determined:

Implemented	8
Partially Implemented	1

16.	City of Brentwood Report number 2013-109	The City of Brentwood received a "Poor" overall audit rating. The follow-up report focused on 16 recommendations. Status determined: Implemented 14 In Progress 1 Partially Implemented 1
17.	Early Childhood Development, Education, and Care Fund Report number 2013-114	The Early Childhood Development, Education, and Care Fund received a "Poor" overall audit rating. The follow-up report focused on 1 recommendation. Status determined: In Progress 1

St. Clair County

January 2014

Report No. 2014-002

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of St. Clair County

Sheriff Controls and Procedures	The Sheriff has not adequately segregated accounting duties for the inmate account, and adequate supervisory reviews of accounting records are not performed. Sheriff's office personnel do not prepare monthly lists of liabilities to reconcile to the available cash balances for inmate and canteen bank accounts. Clerks do not timely deposit monies received into the inmate and fee bank accounts. The Sheriff's office does not maintain complete and accurate logs or conduct periodic inventories of seized properties. Some items were not included in the logs, some were stored in unsecured locations, one item could not be located, several items were not tagged for identification to a specific case, and several other items had been held for more than a decade, with some dated back to 1989.
Jail Operations	The Sheriff does not adequately track the profit and loss from sales of commissary items. Audit staff noted errors in the commissary ledger, including a check for $1,332 and the related profits of $200 which were not included in the ledger so the profits were not disbursed to the County. The Sheriff purchases telephone cards for $5 each and sells them to inmates for $10 each but does not maintain adequate records for cards purchased, sold, and on hand. As noted in our prior audit report, the Sheriff's office does not maintain a running inventory of commissary items which could be compared to actual inventory on hand. Neither the county nor the current Sheriff solicited bids for prisoner meals or performed a cost analysis comparing the cost of preparing the prisoner meals versus outsourcing the meals. The county holds some inmates for other counties and cities but does not adequately bill, pursue collection of, or track amounts due from other counties and does not bill cities within St. Clair County for the boarding of prisoners. Amounts due from other counties for billings made prior to August 2012 totaling $2,515 had not been collected as of June 30, 2013. Due to a computer crash in February 2013 the Sheriff's office was unable to document amounts due for prisoners boarded between August 2012 and February 2013, and $1,785 is due from other counties from March through June 2013 which has not been billed.
Prosecuting Attorney Segregation of Duties and Adjustments	As noted in our prior audit reports, the Prosecuting Attorney does not adequately segregate the duties of receiving, recording, and transmitting monies. The Prosecuting Attorney does not account for the numerical sequence of receipt slips, and there is no independent approval of, or adequate documentation for, adjustments posted to the computerized accounting system.
Addition and Abatement Process	The County Collector enters additions and abatements into the property tax system, but neither the County Clerk nor the County Commission adequately reviews the additions and abatements entered or reconciles them to the addition and abatement information prepared by the County Assessor.

Moreover the County Collector has unlimited access rights in the property tax system, which allows changes to be made to individual tax records, but, because she is responsible for collecting tax monies, good internal controls require she not be able to alter or delete tax rates, assessed values, and property tax billings.

Public Administrator's Salary

The Public Administrator has been receiving both a salary and fees, but statutory provisions require public administrators to decide whether to receive either a salary or fees.

Additional Comments

Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 14

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of St. Clair County

We have audited certain operations of St. Clair County in fulfillment of our duties under Section 29.230, RSMo. In addition, Davis, Lynn & Moots, Certified Public Accountants, was engaged to audit the financial statements of St. Clair County for the 2 years ended December 31, 2012. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2012. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of St. Clair County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Pamela Allison Tillery, CPA
In-Charge Auditor:	Lori Bryant
Audit Staff:	Amanda Messick
	Katelyn Crosson

1. Sheriff Controls and Procedures

Significant weaknesses exist in the Sheriff's accounting controls and procedures.

During the year ended December 31, 2012, the Sheriff's office personnel deposited approximately $292,000 collected for civil and criminal process fees, bonds, and other miscellaneous fees into the fee account. For the same period, deposits into the inmate account maintained by the former Sheriff totaled approximately $225,000.

When the current Sheriff took office in January 2013, he opened a new inmate bank account and discontinued using the former Sheriff's inmate account, but did not distribute the remaining balance. In June 2013, the Sheriff's office implemented a new computer program to track inmate and commissary monies, and another bank account (the canteen account) was opened and the Sheriff discontinued using the inmate account opened in January 2013, but did not distribute the remaining balance.

1.1 Segregation of duties

The Sheriff has not adequately segregated accounting duties for the inmate account, and adequate supervisory reviews of accounting records are not performed. One clerk maintains the inmate account and is primarily responsible for maintaining the accounting records and preparing the checks and deposit slips for the account. Another clerk prepares the bank reconciliation and reconciles the bank balance to the checkbook register, but does not reconcile these records to the electronic inmate records maintained. As a result, there is less assurance inmate records are correct and unresolved differences exist as noted in section 1.2. The current Sheriff indicated he scans the inmate bank statements and checkbook register.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are safeguarded. If proper segregation of duties cannot be achieved, the Sheriff should implement an adequate independent or supervisory review of bank and accounting records.

1.2 Inmate bank accounts

Sheriff's office personnel do not prepare monthly lists of liabilities to reconcile to the available cash balances for the former Sheriff's inmate bank account, or the current Sheriff's inmate and canteen bank accounts.

We requested the office personnel prepare lists of liabilities for these three accounts as of June 30, 2013. The reconciled bank balance of the former Sheriff's inmate account was $16,341, but no list of liabilities could be prepared. There is no documentation to support the current Sheriff's belief that the remaining balance is commissary profits. In addition, office personnel did not follow up on and resolve 61 old outstanding checks totaling $302 in the account.

The list of liabilities prepared for the current Sheriff's inmate bank account totaled $16,880 while the reconciled bank balance was $16,579, resulting in a shortage of $301. The liabilities included amounts that need to be turned over to the County Treasurer for commissions on commissary items ($4,548) and telephone cards ($750), and $2,000 kept in the account as extra monies.

The list of liabilities prepared for the canteen bank account agreed to the bank statement balance as of June 30, 2013.

Liabilities should be identified monthly and reconciled to cash balances to ensure sufficient cash is available for the payment of all amounts due and all monies in the bank account can be identified. Prompt follow up on discrepancies is necessary to resolve errors and ensure monies are properly disbursed. Old outstanding checks should be followed up on timely. In addition, Section 221.102, RSMo (effective August 28, 2013), requires each county jail to keep revenues from its canteen or commissary in a separate account and pay for goods and other expenses from that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (profits) into the county Inmate Prisoner Detainee Security Fund.

1.3 Deposits

Clerks in the Sheriff's office are not depositing monies received into the Sheriff's fee and inmate accounts timely. For example, $330 received from April 4 through 6, 2012, was not deposited until April 11, 2012, in the fee account. In another example, $519 on hand during a cash count performed May 16, 2013, was not deposited until May 22, 2013. For the inmate account, $3,326 received from June 29 through July 3, 2012, was not deposited until July 6, 2012, and included cash receipts totaling $2,114.

Timely depositing procedures are necessary to adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds.

1.4 Seized property

Adequate controls over seized property have not been established. The Sheriff's office does not maintain complete and accurate logs, and periodic inventories of seized property are not conducted. Some seized property items were stored in unsecured locations within the Sheriff's office. Of 5 items selected for review from storage areas, 3 items were not included in the logs. One of these items, a fishing tackle bag, was stored in the basement in an unsecure location accessible by Sheriff's office employees. In a separate test, of the 5 items selected for review from the log of seized property, 1 item could not be located. As part of the test work we also identified several seized property items that were not tagged for identification to a specific case and several other items had been held for more than a decade with some dated back to 1989.

Considering the often sensitive nature of seized property, adequate internal controls are essential and would significantly reduce the risk of loss, theft, or misuse of the stored items. Complete and accurate inventory control records should be maintained and periodic physical inventories should be performed and the results compared to the inventory records to ensure seized property and evidence are accounted for properly. In addition, proper disposal of items no longer needed would eliminate the risks of unauthorized access, use, or theft, and the related potential liability of the county.

Similar conditions previously reported

Similar conditions to sections 1.1, 1.2, and 1.3 were noted in our prior audit report.

Recommendations

The Sheriff:

1.1 Adequately segregate accounting duties to the extent possible or ensure an adequate independent or supervisory review of bank and accounting records is performed and documented.

1.2 Prepare a monthly list of liabilities for all accounts and compare to the available cash balances, and promptly investigate and resolve differences. The Sheriff should work with the County Commission and County Treasurer to establish the Inmate Prisoner Detainee Security Fund and ensure all existing and future commissary profits are deposited to this fund. The Sheriff should dispose of old outstanding checks in accordance with state law and close inmate bank accounts no longer used.

1.3 Deposit all monies in a timely manner.

1.4 Maintain complete and accurate inventory records of all items in the evidence room, and perform periodic physical inventories and compare the results to the inventory records. The Sheriff should perform a complete review of all items and take action to dispose of items no longer needed.

Auditee's Response

The Sheriff provided the following written responses:

1.1 The Sheriff's office will have a third party review the bank and accounting records. From time to time, I, Sheriff Keeler, or the person I assign will actually receive and review the monthly bank statements prior to them going to the individual who normally is assigned this duty. I will also periodically appoint someone to fill in for the clerk or clerks assigned those duties to detect unusual actions or trends. The findings will be documented.

1.2 A list of liabilities for all accounts at the Sheriff's office will be created and available cash balances will be compared with those accounts monthly. Any differences will be investigated and resolved. An Inmate Prisoner Detainee Security Fund has been established and a process has been implemented to have all profits from the commissary deposited into that account. Old outstanding checks were all marked "void" and placed in the Sheriff's office 2012 records. Checks were issued to the County Treasurer as unclaimed property. The former Sheriff's inmate bank account has been closed and the current Sheriff's inmate account which is no longer being used will be closed by the year's end.

1.3 A deposit will be made on a daily basis as needed when funds are received.

1.4 The Sheriff's office is currently in the process of conducting a complete inventory of the evidence room. Over the past three months, many items have been documented and disposed of by order of the court. Several items remain and are awaiting further action by the court. A new inventory process and evidence recording is being implemented that includes periodic physical inventory compared with the actual items in the evidence rooms.

2. Jail Operations

Controls and procedures over the commissary, telephone cards, prisoner meals, and board of prisoners need improvement.

2.1 Commissary and telephone cards

Improvement is needed in the Sheriff's handling of the commissary and telephone cards. During the year ended December 31, 2012, the Sheriff's office paid approximately $135,000 to vendors for commissary items and telephone cards from the inmate account and earned over $50,000 in commissions.

Tracking of commissary activity

The Sheriff does not have an adequate system for tracking the profit and loss from the sales of commissary items. Errors were made in the ledger maintained to track commissary commissions received and disbursed. For example, our review of this ledger for January 2012 indicated a check totaling $1,332 issued to the commissary company and the related commissary profits of approximately $200 were not included in the ledger, and as a result, these commissary profits were not disbursed to the County Treasurer. To adequately account for commissary activity, complete and accurate records should be maintained in a manner to allow for the tracking of profit and loss on all commissary sales.

Telephone card sales

Records are not maintained to account for prepaid telephone cards purchased and sold to inmates, and on hand. Batches of telephone cards are periodically purchased from a telephone card vendor for $5 per card and

held by the Sheriff's office until sold to inmates for $10 per card. The vendor provided the Sheriff's office with $10,000 (1,000 cards sold for $10 each) in telephone cards in January 2012, January 2013, and May 2013 for a total sales value of $30,000 at no cost. The Sheriff's office purchased or received telephone cards valued at $82,500 (8,250 cards sold for $10 each) during the year ended December 31, 2012.

Detailed records are necessary to adequately account for telephone cards. Loss, theft, or misuse of the telephone cards and receipts may go undetected without adequate telephone card records and procedures.

Inventory of commissary items

A running inventory (perpetual inventory) of commissary items is not maintained. While the Sheriff's office contracts with an outside company to provide the majority of commissary items, the Sheriff's office also purchases some additional commissary items that are sold to the inmates. A detailed inventory ledger is necessary to adequately account for commissary inventory. To ensure commissary items are properly recorded and handled, purchases and sales should be compared to actual inventory on hand. Loss, theft, or misuse of commissary inventory may go undetected without adequate inventory records.

A similar condition was noted in our prior audit report.

2.2 Prisoner meals

Neither the county nor the current Sheriff solicited bids for prisoner meals costing approximately $31,000 for May and June 2013, and a cost analysis comparing the cost of the county preparing the prisoner meals versus outsourcing the meals was not performed. Prior to May 2013, prisoner meals were prepared by cooks employed by the county.

Section 50.660, RSMo, provides bidding requirements. Routine use of a competitive procurement process for major purchases ensures the county has made every effort to receive the best and lowest price and all interested parties are given an equal opportunity to participate in county business. Documentation of the various proposals received, the selection process, and criteria should be retained to demonstrate compliance with applicable laws or regulations and support decisions made. Additionally, a cost analysis would allow the Sheriff's office and the County Commission to determine if the services are being provided in the most economical way.

2.3 Board of prisoners

The Sheriff's office does not adequately bill, pursue collection of, or track amounts due from other counties and does not bill cities within St. Clair County for the boarding of prisoners. While most inmates held in the county jail are federal prisoners, the county holds some inmates for other counties and cities.

Since July 2012, the Sheriff's office has not taken any action related to amounts due from other counties for board of prisoners. In addition, amounts due for billings made prior to August 2012 totaling $2,515 had not been collected as of June 30, 2013. Due to a computer crash in February 2013 and failure to prepare billings to other counties, the Sheriff's office was unable to document amounts due for board of prisoners for August 2012 through February 2013. A new software program was purchased after the system crash and those records indicate $1,785 is due from other counties from March through June 2013, which has not been billed.

Procedures such as independent reconciliations of board bill records to jail records and payments received should be established to ensure prisoner housing is properly and timely billed, and payments received are proper. Unpaid board bills should be monitored and appropriate follow-up action should be taken to ensure payment is properly received. Failure to monitor unpaid amounts due may result in a loss of revenue to the county. By not charging cities within the county for housing prisoners, the county is subsidizing the cost to house other political subdivisions' prisoners.

Recommendations

The Sheriff:

2.1 Develop records to adequately track commissary activity and procedures to account for the sale of all telephone cards. In addition, inventory records of commissary items and telephone cards should be maintained and reconciled to purchases, sales, and a physical inventory count.

2.2 Work with the County Commission to prepare a cost analysis to determine the most cost-effective method of providing prisoner meals and then, if needed, perform a competitive procurement process and maintain documentation of decisions made.

2.3 Establish procedures to ensure all amounts owed for prisoner board are properly and timely billed, and implement procedures to track and pursue collection of amounts owed.

Auditee's Response

The Sheriff provided the following written responses:

2.1 The jail has contracted with an outside vendor for the jail commissary. Through the company and its inmate bank system, transactions by each inmate are documented including all funds distributed to vendors as well commissions sent to the County Treasurer for deposit. Accounting reports from the inmate bank system are reviewed on a daily basis by the jail administrator or his designee. All differences are investigated and resolved.

Inmate phone cards are sold through the jail's commissary. Invoices from the company, who sells the cards to the jail, are reviewed for any discrepancies. Procedures have been put into place to review payments made to the company from the inmate bank system for the phone cards. A record-keeping procedure has also been initiated to maintain PIN numbers received from the company and forwarded to the inmate bank system. Through the reports received by the inmate bank system, there is also a record of all checks written for invoices and sales of phone PIN cards sold to inmates. The company that sells the phone cards has also updated its system and paper phone cards are no longer used or issued. The inmate bank system keeps a current log of phone cards issued and a check is conducted randomly.

The jail is currently in the process of developing an inventory of inmate supplies and sale of items purchased by the Sheriff's office.

2.2 A cost report regarding inmate meals was conducted and bids were gathered from different food service companies prior to choosing the current contractor providing meals. Regrettably, supporting documentation cannot be located. Unfortunately, since the change to the contractor was made in May, the cost savings have not been what I expected and a change back to the inmate meals being prepared by cooks employed by the county is expected within the next couple of months. A cost analysis was completed and documented by the jail administrator.

2.3 Procedures have been put into place creating a report documenting outstanding board bills of inmates. Bills are sent to agencies responsible for each inmate on a monthly basis. Procedures are currently being put in place to purse collection of these amounts owed. 2013 has been billed and will and has been reviewed by myself. City inmates being held on city charges will be billed accordingly. No bill will be issued if city inmates are being held on state charges.

The County Commission provided the following written response:

2.2 A cost analysis was verbally presented to the Commission by the Sheriff. The Commissioners will work with the Sheriff in the future to see that the bidding process is followed for the purchase of food and a cost analysis is formally prepared and reviewed.

3. Prosecuting Attorney Segregation of Duties and Adjustments

As similarly noted in our prior audit reports, the duties of receiving, recording, and transmitting monies are not adequately segregated. The legal assistant performs all of these duties. The Prosecuting Attorney does not account for the numerical sequence of receipt slips issued to ensure all receipts are properly recorded on the monthly collection reports. The Prosecuting Attorney indicated she reviews the monthly collection reports and compares them to the money orders received for fees. The Prosecuting Attorney's office collected approximately $17,400 during the year ended December 31, 2012.

In addition, there is no independent approval to support adjustments posted to the computerized accounting system, and adequate documentation of such adjustments is not retained. During the year ended December 31, 2012, the legal assistant or other office personnel made reduction adjustments totaling $2,964 to the system. These adjustments occurred without obtaining independent approval. Adjustments are sometimes needed because defendants pay vendors directly, amounts are deemed uncollectible, or insufficient information is provided on the complaint.

Thorough supervisory reviews help ensure all transactions are accounted for properly, adjustments are valid, and assets are adequately safeguarded. Internal controls would be improved by the Prosecuting Attorney performing a supervisory review of accounting records and a documented review of adjustments made to the accounting system.

Recommendation

The Prosecuting Attorney ensure supervisory reviews of accounting records are performed and documented, all adjustments are reviewed and approved, and ensure adequate documentation is retained to support such adjustments.

Auditee's Response

The Prosecuting Attorney provided the following written response:

I approve adjustments prior to them being made. Reports are now generated monthly for the receipts, which I review. I will review the reports of adjustments as well and retain documentation supporting adjustments made.

4. Addition and Abatement Process

The County Clerk and County Commission do not provide adequate reviews of additions and abatements entered into the property tax system by the County Collector. The County Clerk and County Commission do not perform a reconciliation of the additions and abatements information prepared by the County Assessor and the additions and abatements entered into the property tax system by the County Collector.

In addition, property tax system access is not adequately restricted. The County Collector has unlimited access rights in the property tax system, which allows changes to be made to individual tax records throughout the tax year. Because the County Collector is responsible for collecting tax

monies, good internal controls require she not have unlimited system access rights to be able to alter or delete tax rates, assessed values, and property tax billings.

Sections 137.260, RSMo, assigns responsibility to the County Clerk for making corrections to the tax books with the approval of the County Commission. If it is not feasible for the County Clerk to make corrections to the tax books, periodic reviews and timely approvals of court orders, along with a comparison of additions and abatements information to actual changes made to the property tax system, would help ensure changes are proper. To prevent unauthorized changes to the property tax records, access should be limited based on user needs. Unrestricted access can result in the deletion or alteration of data files and programs.

Recommendation

The County Clerk and County Commission restrict access to the property tax system to ensure the County Collector cannot make changes. In addition, the County Clerk and the County Commission should compare additions and abatements information prepared by the Assessor to actual changes made to the property tax system.

Auditee's Response

The County Clerk and County Commission provided the following written response:

Changes have already been implemented to alleviate these concerns. The County Commission does not plan to restrict access, but will review the records to ensure all changes are appropriate and accurate. The County Clerk's office has started comparing addition and abatement information prepared by the Assessor to actual changes to the property tax system. The County Commission will be reviewing the monthly reconciliations of the additions and abatements.

5. Public Administrator's Salary

The Public Administrator's salary has not been set according to state law. The Public Administrator has received both a salary and fees as compensation since 2001, based on Section 473.739, RSMo, which allowed public administrators to receive annual compensation in addition to fees. However, this law was revised and a new law, Section 473.742, RSMo, enacted in 2000, which requires public administrators to make a determination within 30 days after taking office whether to receive either a salary or fees. Shortly after the Public Administrator took office in January 2001, she filed a memo with the county electing to receive fees. However, the Public Administrator has received fees and annual salary compensation (ranging from $10,100 to $11,392), since she first took office in 2001. Salary commission meeting minutes of meetings held in 2001 and subsequent years did not address revisions to statutory provisions regarding public administrator compensation. After we brought this issue to the county's attention in the prior audit, the County Commission obtained a written legal opinion from the Prosecuting Attorney dated October 28, 2009,

which concluded the public administrator was entitled to receive the compensation that was currently being paid by the county in accordance with Section 473.739, RSMo. Our legal counsel reviewed the county Prosecuting Attorney's legal opinion, various statutes, and case law, and came to a different opinion. He concluded a public administrator must choose between receiving a salary or fees and may not receive both because Section 473.742, RSMo, is more specific than Section 473.739, RSMo, and would therefore apply.

Recommendation

The County Commission should re-evaluate this situation with legal counsel, determine and document the appropriate method for compensating the Public Administrator.

Auditee's Response

The County Commission provided the following written response:

The Public Administrator is going to elect to be put on salary starting January 1, 2014 for the rest of her term of office. This will be presented to the Salary Commission for their review.

The Public Administrator provided the following written response:

I will notify the County Clerk by written letter that I elect to choose a "salary" as my compensation for the Public Administrator's office. This is in accordance to MO Statute 473.742. This will start January 1, 2014, and continue for the rest of my term. I understand the office will stay salary and cannot return to a fee based office.

St. Clair County
Organization and Statistical Information

St. Clair County is a county-organized, third-class county. The county seat is Osceola.

St. Clair County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 74 full-time employees and 9 part-time employees on December 31, 2012.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2013	2012
Robert Salmon, Presiding Commissioner	$	27,080
Leroy D. Strope, Associate Commissioner		26,849
Gerald R. Willams, Associate Commissioner		26,849
Pat Speight Terry, Recorder of Deeds		40,322
Debbie Peden, County Clerk		39,080
Joleene V. Simmons, Prosecuting Attorney		46,290
Ron Snodgrass, Sheriff		46,330
Rhonda Shelby, County Treasurer		38,000
C. Randy Sheldon, County Coroner		11,696
Laurie Stinnett, Public Administrator (1)		26,751
Sharon K. Foster, County Collector (2), year ended February 28,	40,945	
Gladys J. Smith, County Assessor, year ended August 31,		40,710

(1) Includes $15,359 of fees from probate cases.

(2) Includes $235 of commissions earned for collecting city property taxes.

Administration

January 2014

Report No. 2014-003

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Insurance, Financial Institutions, and Professional Registration, Division of Professional Registration, Administration

Board Appointments

The Division of Professional Regulation has not timely filled board vacancies, which has resulted in a lack of a quorum for some boards. Sixty-eight of a total of 256 appointments (27 percent) were vacant at June 30, 2013, and multiple board vacancies resulted in the lack of a quorum at 5 of the 37 boards (14 percent). Sixty-three percent of the 188 active board members were serving beyond their term expiration date, with 30 serving more than 5 years beyond their term expiration date. A member of the State Committee for Social Workers has served more than 11 years, although state law limits these committee members to no more than 10 years of service.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
John M. Huff, Director
Department of Insurance, Financial Institutions, and Professional Registration
and
Jane A. Rackers, Director
Division of Professional Registration
Jefferson City, Missouri

We have audited certain operations of the Department of Insurance, Financial Institutions, and Professional Registration, Division of Professional Registration - Administration, in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2013 and 2012. The objectives of our audit were to:

1. Evaluate the division's internal controls over significant management and financial functions.

2. Evaluate the division's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the division; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) no significant deficiencies in internal control, (2) noncompliance with legal provisions, and (3) the need for improvements in management practices and procedures. The accompanying Management Advisory Report presents our finding arising from our audit of the Department of Insurance, Financial Institutions, and Professional Registration, Division of Professional Registration - Administration.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Mark Ruether, CPA
In-Charge Auditors:	Robert McArthur II
	Joyce Thomson
Audit Staff:	Mariam Ahmedbani

Board Appointments

The Division of Professional Registration should improve procedures to ensure board vacancies are filled timely. Vacancies resulted in a lack of a quorum for some boards.

The division oversees 27 regulatory and 10 advisory boards. Advisory boards advise and support applicable regulatory boards and offices. Each board is governed by state laws and regulations that define the number, term length, and qualifications of members. Regulatory board members are generally appointed by the Governor with advice and consent of the Senate. Advisory board members are appointed by the Governor, the applicable regulatory board, or the Division Director. Names of proposed board members are usually submitted to the Governor by the division or related professional organizations.

Member vacancies

Various state laws require the appointment of a total of 256 board members. However, the division had not ensured the appointing authority filled vacant positions in a timely manner, and as of June 30, 2013, 68 appointments (27 percent) remained vacant. Multiple board vacancies resulted in the lack of a quorum at 5 of the 37 boards. The following tables list the number of members, vacancies, and quorum status at each board.

ADVISORY BOARD	Members	Vacancies	Quorum
Advisory Commission for Anesthesiologist Assistants (1)	5	0	Yes
Advisory Commission for Clinical Perfusionists (1)	7	1	Yes
Advisory Commission for Dental Hygienists (2)	5	1	Yes
Advisory Commission for Physician Assistants (1)	5	3	No
Advisory Commission for Professional Physical Therapists (1)	5	0	Yes
Advisory Commission for Speech Language Pathologists and Audiologists* (1)	7	0	Yes
Behavior Analyst Advisory Board (3)	7	2	Yes
Endowed Care Cemetery Advisory Committee** (4)	5	3	No
Missouri Acupuncturists Advisory Committee (5)	5	2	Yes
Missouri Athletic Trainer Advisory Committee* (1)	5	0	Yes
Totals, Advisory Boards	56	12	

* Members appointed by applicable regulatory board

** Members appointed by Division Director

(1) Advises the State Board of Registration for the Healing Arts

(2) Advises the Missouri Dental Board

(3) Advises the State Committee of Psychologists

(4) Advises the Office of Endowed Care Cemeteries

(5) Advises the Missouri State Board of Chiropractic Examiners

REGULATORY BOARD	Members	Vacancies	Quorum
Board of Cosmetology and Barber Examiners	11	5	Yes
Board of Private Investigator and Private Fire Investigator Examiners	7	1	Yes
Board of Therapeutic Massage	8	4	No
Committee for Professional Counselors	6	2	Yes
Interior Design Council	5	1	Yes
Missouri Board for Architects, Professional Engineers, Professional Land Surveyors and Landscape Architects	15	4	Yes
Missouri Board for Respiratory Care	7	2	Yes
Missouri Board of Examiners for Hearing Instrument Specialists	8	2	Yes
Missouri Board of Geologist Registration	8	4	No
Missouri Board of Occupational Therapy	6	2	Yes
Missouri Board of Pharmacy	7	3	Yes
Missouri Dental Board	7	1	Yes
Missouri Real Estate Appraisers Commission	7	2	Yes
Missouri Real Estate Commission	7	0	Yes
Missouri State Board of Accountancy	7	1	Yes
Missouri State Board of Chiropractic Examiners	6	2	Yes
Missouri State Board of Nursing	9	3	Yes
Missouri State Committee of Interpreters	7	1	Yes
Missouri Veterinary Medical Board	6	1	Yes
State Board of Embalmers and Funeral Directors	6	0	Yes
State Board of Optometry	6	1	Yes
State Board of Podiatric Medicine	5	1	Yes
State Board of Registration for the Healing Arts	9	3	Yes
State Committee for Social Workers	10	5	No
State Committee of Dietitians	6	2	Yes
State Committee of Marital and Family Therapists	6	1	Yes
State Committee of Psychologists	8	2	Yes
Totals, Regulatory Boards	200	56	

Vacancies result in boards that contain fewer members than authorized or required by state law. Although the day-to-day operation of boards is overseen by the Division Director and each board's executive director, multiple vacancies resulting in the lack of a quorum prevent impacted boards from conducting business.

Term limits

The division should improve monitoring procedures to ensure members do not serve longer than allowed by state law. While state laws and regulations generally allow board members to continue to serve until reappointed or a replacement is named, some boards have limits on the total length of service or the number of terms. For example, a member of the State Committee for Social Workers whose term expired in 2005 has served more than 11 years, while state law limits these committee members to no more than 10 years of service.[1]

In addition, of 188 active board members, 118 (63 percent) were serving beyond their expiration date as of June 30, 2013, with 30 members serving more than 5 years beyond their term expiration date.

Board members who serve significant years beyond their term expirations could result in members serving beyond the maximum time allowed by state laws and regulations.

Recommendation

The Division of Professional Registration work with the Governor's office and boards with appointing authority to fill board vacancies timely.

Auditee's Response

The Division of Professional Registration will continue to work toward the appointment of superior candidates that meet the specific statutory qualifications who are willing to expend the time needed to prepare for and attend board meetings. The Division commends the hundreds of dedicated professionals serving on the boards, including the 128 individuals appointed or reappointed since 2009.

[1] Report No. 2013-148, *Department of Insurance, Financial Institutions, and Professional Registration, Division of Professional Registration, State Committee for Social Workers*, issued in December 2013.

The Division of Professional Registration was established by the Omnibus State Reorganization Act of 1974. By Executive Order 06-04, the division moved from the Department of Economic Development to the reorganized Department of Insurance, Financial Institutions and Professional Registration on August 28, 2006.

The division provides administrative support to 20 administrative and 20 non-administrative professional licensing boards and offices responsible for licensing and regulating the activities of approximately 430,000 Missourians. The members of the boards are generally appointed by the Governor with the advice and consent of the Senate.

The division's administrative section establishes a system of accounting and budgeting and provides various clerical services to the various boards and offices. The division director assigns an executive director for each of the administrative boards and offices and provides staff needed for clerical and other staff services relating to the issuance and renewal of licenses. The non-administrative boards hire an executive director to oversee the day-to-day operations and hire staff to provide clerical and other staff services relating to the issuance and renewal of licenses. Some non-administrative boards utilize centralized services, including investigation services, provided by the administrative section.

The division is responsible for the administration and staffing of the following administrative boards and offices:

Behavior Analyst Advisory Board
Board of Private Investigator and Private Fire Investigator Examiners
Board of Therapeutic Massage
Committee for Professional Counselors
Interior Design Council
Missouri Acupuncturists Advisory Committee
Missouri Board for Respiratory Care
Missouri Board of Examiners for Hearing Instrument Specialists
Missouri Board of Geologist Registration
Missouri Board of Occupational Therapy
Missouri Office of Athlete Agents **
Missouri Real Estate Appraisers Commission
Missouri State Committee of Interpreters
Office of Athletics **
Office of Endowed Care Cemeteries (Endowed Care Cemetery Advisory Committee)
Office of Tattooing, Body Piercing and Branding **
State Committee for Social Workers
State Committee of Dietitians
State Committee of Marital and Family Therapists
State Committee of Psychologists

Non-administrative boards include the following:

Advisory Commission for Anesthesiologist Assistants
Advisory Commission for Clinical Perfusionists
Advisory Commission for Dental Hygienists
Advisory Commission for Physician Assistants
Advisory Commission for Professional Physical Therapists
Advisory Commission for Speech Language Pathologists and Audiologists
Board of Cosmetology and Barber Examiners
Missouri Athletic Trainer Advisory Committee
Missouri Board for Architects, Professional Engineers, Professional Land Surveyors and Landscape Architects *
Missouri Board of Pharmacy *
Missouri Dental Board *
Missouri Real Estate Commission *
Missouri State Board of Accountancy *
Missouri State Board of Chiropractic Examiners
Missouri State Board of Nursing *
Missouri Veterinary Medical Board
State Board of Embalmers and Funeral Directors
State Board of Optometry
State Board of Podiatric Medicine

State Board of Registration for the Healing Arts *

* Board has its own personal service appropriations
** Offices not served by a board

The division is headed by a director who is appointed by the Governor with the advice and consent of the Senate. Jane A. Rackers serves as Director of the Division of Professional Registration. At June 30, 2013, the division and the non-administrative boards had 222 employees.

THOMAS A. SCHWEICH
Missouri State Auditor

INDEPENDENT AUDITOR'S REPORT

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the state of Missouri, as of and for the year ended June 30, 2014, and the related notes to the financial statements, which collectively comprise the state's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of certain entities that comprise the state of Missouri. Those statements were audited by other auditors whose reports have been furnished to us, and our opinions, insofar as they relate to the amounts included for those entities, are based solely on the reports of the other auditors. Those entities were:

1. The Missouri Road Fund, a major fund; the Missouri Road Bond Fund; the Conservation Employees' Insurance Plan; the Transportation Self-Insurance Plan; the Missouri State Employees' Insurance Plan; the Missouri Consolidated Health Care Plan; and the Missouri Department of Transportation and Missouri State

Highway Patrol Medical and Life Insurance Plan, which represent 79 percent and 12 percent of the assets and revenues, respectively, of the governmental activities.

2. The State Lottery and the Petroleum Storage Tank Insurance Fund, which are both major funds and represent 34 percent and 54 percent of the assets and revenues, respectively, of the business-type activities.

3. The aggregate discretely presented component units.

4. The pension (and other employee benefit) trust funds and the Missouri Department of Transportation Local Fund, which represent 94 percent and 99 percent of the assets and additions, respectively, of the fiduciary funds.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards,* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. The financial statements of the Conservation Employees' Insurance Plan, the Missouri State Employees' Insurance Plan, and the Missouri Consolidated Health Care Plan, internal service funds; the Missouri Development Finance Board and the Missouri Agricultural and Small Business Development Authority, discretely presented component units; and the pension (and other employee benefit) trust funds were not audited in accordance with *Government Auditing Standards*.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinions on the governmental activities and General Fund opinion units and our unmodified opinions on all remaining opinion units.

Basis for Qualified Opinions on the Governmental Activities and General Fund

We were not allowed access to tax returns and related source documents for income taxes. Access was denied based on the Director of Revenue's interpretation of the decision rendered by the Missouri Supreme Court in the case of *Director of Revenue v. State Auditor 511 S.W.2d 779 (Mo. 1974).* Approximately 27 percent of governmental activity revenues and 32

percent of General Fund revenues are from this source. We were unable to satisfy ourselves by appropriate audit procedures as to the income tax revenue beyond the amounts recorded.

Qualified Opinions

In our opinion, based on our audit and the reports of other auditors, and except for the possible effects of the matter described in the "Basis for Qualified Opinions on the Governmental Activities and General Fund" paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of the governmental activities and the General Fund of the state of Missouri, as of June 30, 2014, and the changes in financial position thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Unmodified Opinions

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the business-type activities, the aggregate discretely presented component units, each major fund excluding the General Fund, and the aggregate remaining fund information of the state of Missouri, as of June 30, 2014, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 2 to the financial statements, for the fiscal year ending June 30, 2014, the state of Missouri implemented Governmental Accounting Standards Board (GASB) Statement No. 65, *Items Previously Reported as Assets and Liabilities,* and Statement No. 70, *Accounting and Financial Reporting for Nonexchange Financial Guarantees*. In addition, the University of Missouri, a discretely presented component unit, early implemented Statement No. 68, *Accounting and Financial Reporting for Pensions—an amendment of GASB Statement No. 27*. Statement No. 68 is not required to be implemented until fiscal year 2015. Our opinions are not modified with respect to this matter.

As discussed in Note 17 to the financial statements, the 2013 financial statements have been restated to correct misstatements. Our opinions are not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis on pages 1-13 and the Budgetary Comparison Schedule-General Fund, Major Special Revenue Funds on pages 104-105 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial

statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We and other auditors have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary and Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the state of Missouri's basic financial statements. The supplementary information, as listed in the table of contents, and the other information, which consists of the introductory and statistical sections, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The supplementary information, as listed in the table of contents, is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the audit procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America by us and other auditors. In our opinion, based on our audit, the procedures performed as described above, and the reports of the other auditors, and except for the possible effects on the supplementary information of the matter discussed in the "Basis for Qualified Opinions on the Governmental Activities and General Fund" paragraph, the supplementary information, as listed in the table of contents, is fairly stated in all material respects, in relation to the basic financial statements as a whole.

The information in the introductory and statistical sections has not been subjected to the audit procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, our report dated January 12, 2015, on our consideration of the state of Missouri's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters is issued under separate cover in the Single Audit Report. The purpose of our report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal

control over financial reporting or on compliance. Our report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the state of Missouri's internal control over financial reporting and compliance.

CITIZENS SUMMARY

Findings in the audit of the Poplar Bluff Conference Center Transportation Development District

Background	The Poplar Bluff Conference Center Transportation Development District (TDD) was created in 2004 and is located in the City of Poplar Bluff. The qualified voters of the TDD, in this case the property owner, approved a 1-cent sales tax on all taxable transactions within the TDD. The TDD was formed for the purpose of constructing a parking lot adjacent to the new hotel and conference center, along with necessary landscaping, irrigation, and lighting for the proposed project. The project was completed in November 2004, and the city accepted dedication of the project in December 2004. The Poplar Bluff Regional TDD is in the process of absorbing the Poplar Bluff Conference Center TDD. On October 23, 2012, the TDD Board of Directors approved resolutions formalizing its intent to dissolve the TDD and notified the State Auditor's office in June 2013.
Statutory Requirement	Section 238.275, RSMo, requires the State Auditor to determine the financial status of a TDD before it may be abolished. The law prohibits the abolition of a TDD while there are outstanding claims or causes of action pending against it, if its liabilities exceed its assets or while the TDD is insolvent, in receivership or under the jurisdiction of a bankruptcy court.
Financial Status	The cash balance of the Poplar Bluff Conference Center TDD at September 30, 2013, was $146, which it subsequently remitted to the Poplar Bluff Regional TDD, and there were no other costs or obligations due from the Poplar Bluff Conference Center TDD. Based upon our audit, the Board of Directors may proceed with the abolishment of the district in accordance with Section 238.275, RSMo.

Because of the limited objective of this audit, no overall rating is provided.

State Auditor's Report 2

Management Advisory Report - State Auditor's Findings

Financial Status 4

THOMAS A. SCHWEICH
Missouri State Auditor

Ken McVey, Chairman
and
Board of Directors
Poplar Bluff Conference Center Transportation Development District
Poplar Bluff, Missouri

The State Auditor is required under Section 238.275, RSMo, to audit a transportation development district prior to the question of abolishment being submitted to a vote. On October 23, 2012, the Board of Directors of the Poplar Bluff Conference Center Transportation Development District approved a resolution of its intent to dissolve the district and request an audit as required by statute. The State Auditor was subsequently notified of this resolution.

The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2012, and the period from January 1 through September 30, 2013. The objectives of our audit were to evaluate the financial status of the district and determine whether it may be abolished pursuant to law.

Our methodology included reviewing minutes of meetings, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The audit determined the district's Board of Directors may proceed with abolishment of the district in accordance with Section 238.275, RSMo.

The accompanying Management Advisory Report presents our findings arising from our audit of the Poplar Bluff Conference Center Transportation Development District.

Thomas A. Schweich
State Auditor

In-Charge Auditor:	Wayne Kauffman, MBA

Poplar Bluff Conference Center
Transportation Development District
Management Advisory Report - State Auditor's Findings

Financial Status

Our audit of the Poplar Bluff Conference Center Transportation Development District (TDD) indicates the financial condition of the district is such that it may be abolished.

The Poplar Bluff Conference Center TDD is located in the City of Poplar Bluff. The district was organized in April 2004 by petition of the property owner within the proposed TDD. The members of the Board of Directors are representatives of the property owner. The district has a fiscal year end of December 31 and did not obtain independent audits.

In May 2004, the qualified voters of the Poplar Bluff Conference Center TDD, in this case the property owner, approved the imposition of a 1-cent (1 percent) sales tax on all taxable transactions within the boundaries of the district. The Board of Directors subsequently passed a resolution formally establishing that sales tax rate to be effective June 1, 2004, for 40 years unless terminated sooner. The retail establishments within the district collected and remitted the sales tax to the Missouri Department of Revenue (DOR). In turn, the DOR distributed the sales tax monies to the district.

The Poplar Bluff Conference Center TDD was formed for the purpose of constructing a parking lot adjacent to the new hotel and conference center, along with necessary landscaping, irrigation, and lighting for the proposed project. The City of Poplar Bluff is the public entity with jurisdiction over the project and serves as the Local Transportation Authority. The project was completed in November 2004 and the city accepted dedication of the project in December 2004.

The Poplar Bluff Conference Center TDD entered into a promissory note for approximately $800,000 in June 2005 to reimburse the developer for the project costs. The developer was listed as a guarantor on the note. In May 2012, the Cripple Creek TDD and the City of Poplar Bluff jointly filed a petition to create the Poplar Bluff Regional TDD, which includes the entire area encompassed by the Poplar Bluff Conference Center TDD. The Poplar Bluff Regional TDD was formed for the purpose of paying the cost of financing or refinancing certain transportation-related improvements, including the refinancing of the outstanding debt obligations of the Poplar Bluff Conference Center TDD and Cripple Creek TDD. In December 2012, the Poplar Bluff Regional TDD issued revenue bonds and is in the process of absorbing the Poplar Bluff Conference Center TDD.

The creation of the Poplar Bluff Regional TDD served to effectively consolidate the activities and the debt of the Poplar Bluff Conference Center TDD and the Cripple Creek TDD, as well as add other projects.

On October 23, 2012, the Poplar Bluff Conference Center TDD Board approved resolutions formalizing its intent to dissolve the district and repealing its sales tax effective upon the satisfaction of the district's loan and

the implementation of the Poplar Bluff Regional TDD sales tax. The Poplar Bluff Regional TDD began collecting its sales tax in January 2013. In June 2013, the Poplar Bluff Conference Center TDD's legal counsel advised the State Auditor's office (SAO) of the Board's intent to dissolve and requested the SAO proceed with all necessary actions as required pursuant to Section 238.275, RSMo.

The SAO has performed an audit of the Poplar Bluff Conference Center TDD as required by Section 238.275, RSMo. That statute requires the State Auditor to audit the district to determine its financial status, and determine whether it may be abolished pursuant to law. That law also states the board shall not propose the question to abolish the district while there are outstanding claims or causes of action pending against it, if its liabilities exceed its assets, or while the district is insolvent, in receivership, or under the jurisdiction of a bankruptcy court.

The following table presents the financial activity and cash balances of the Poplar Bluff Conference Center TDD for the year ended December 31, 2012, and the period from January 1 through September 30, 2013.

		Period January 1, 2013 to September 30, 2013	Year Ended December 31, 2012
RECEIPTS			
Sales taxes	$	2,327	29,304
Contributions from property owner		0	18,916
Total Receipts		2,327	48,220
DISBURSEMENTS			
Debt service		2,321	53,361
Bank fees		54	48
Total Disbursements		2,375	53,409
RECEIPTS OVER (UNDER) DISBURSEMENTS		(48)	(5,189)
BEGINNING CASH		194	5,383
ENDING CASH	$	146	194

Based on our audit, the cash balance of the Poplar Bluff Conference Center TDD at September 30, 2013, is $146. The district's legal counsel has indicated legal costs associated with abolishing the district are being paid by the Poplar Bluff Regional TDD and no other costs or obligations are due from the Poplar Bluff Conference Center TDD. The Poplar Bluff Conference Center TDD closed its checking account on October 22, 2013, and remitted the $146 to the Poplar Bluff Regional TDD.

Based on our audit, the Board of Directors may proceed with the abolishment of the district in accordance with Section 238.275, RSMo.

Compilation of 2012 Federal Forfeiture Reports

January 2014

Report No. 2014-006

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Compilation of 2012 Federal Forfeiture Reports

Background

Section 513.653.1, RSMo, requires law enforcement agencies involved in using the federal forfeiture system under federal law to file a report regarding federal seizures and the proceeds received therefrom with the Department of Public Safety (DPS) and the State Auditor's office (SAO). State law forbids the DPS from issuing funds to any law enforcement agency that fails to abide by these provisions. Intentional or knowing failure to comply with any reporting requirement is a Class A misdemeanor punishable by a fine of up to $1,000.

Reporting

For the year ended 2012, the DPS identified 613 law enforcement agencies that may need to submit reports. Of these agencies, 411 did not file a federal forfeiture report and conclusions regarding reporting compliance and whether these agencies participated in the federal forfeiture system cannot be made. Of the 202 agencies reporting, 14 failed to report to the SAO and only reported to the DPS, while 3 failed to report to the DPS and only reported to the SAO. The SAO received 28 of the reports after the January 31, 2013, deadline.

Because of the compound nature of this report, no overall rating is provided.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
Jefferson City, Missouri

Section 513.653.1, RSMo, requires law enforcement agencies involved in using the federal forfeiture system under federal law to file a report regarding federal seizures and the proceeds therefrom to the Department of Public Safety and the State Auditor's office. We have compiled the information presented in the 2012 Equitable Sharing Proceeds from Federal Forfeitures reports filed by law enforcement agencies. The compilation is limited to presenting information that is submitted. We have not audited the reports submitted and, accordingly, do not express an opinion or any other form of assurance on them. The primary objectives of this compilation were to:

1. Identify those law enforcement agencies that submitted federal forfeiture reports to the State Auditor's office.

2. Summarize the federal seizure information reported.

The Department of Public Safety provided the State Auditor's office with a list of 613 law enforcement agencies. This list may or may not represent a complete list of all law enforcement agencies. Section 513.653.1, RSMo, requires law enforcement agencies to file federal forfeiture reports by January 31 for the previous calendar year with both the Department of Public Safety and the State Auditor's office. Of 202 reports received, 174 were submitted by the January 31, 2013, deadline. Some reports were incorrectly filed with only the Department of Public Safety or the State Auditor. Conclusions regarding compliance cannot be made regarding the 411 law enforcement agencies that did not report, but results suggest the majority of law enforcement agencies did not use the federal forfeiture system during 2012.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
In-Charge Auditor:	Becky Webb, CPA, CFE
Audit Staff:	Dana Wansing, MPA

Compilation of 2012 Federal Forfeiture Reports
Executive Summary

Law Enforcement Agencies Required to Submit a Federal Forfeiture Report to the State Auditor's office

Section 513.653.1, RSMo, requires law enforcement agencies involved in using the federal forfeiture system under federal law to annually file a report regarding federal seizures and the proceeds received therefrom with the Department of Public Safety (DPS) and the State Auditor's office (SAO). The DPS shall not issue funds to any law enforcement agency that fails to comply with the provisions in this section. See Appendix A for a copy of Section 513.653, RSMo.

The DPS utilized the Missouri Sheriffs' Association and the Missouri Police Chiefs Association to notify law enforcement agencies of the requirement to submit reports if the law enforcement agencies participated in the federal forfeiture system. The notification also included the federal forfeiture report form developed by the DPS. See Appendix B for a copy of this form. In an effort to ensure all law enforcement agencies were notified of the reporting requirement, the DPS also sent the notification and report form to Justice Assistance Grants Drug Task Forces, Deputy Sheriff Salary Supplementation Fund recipients, and Local Law Enforcement Block Grant recipients. The DPS provided the SAO with a list of 613 law enforcement agencies the DPS compiled using information from the Missouri State Highway Patrol and federal forfeiture forms received. This list may or may not represent a complete list of all law enforcement agencies.

The following table summarizes reports submitted for 2012.

Reporting Status	Number	Percentage
Agencies reporting participation by providing activity (Appendix C)	120	19.58 %
Agencies reporting only beginning and/or ending balance, no activity (Appendix D)	8	1.30
Agencies reporting no participation (Appendix E)	74	12.07
Number of agencies reporting	202	32.95
Number of agencies that did not report	411	67.05
Total Possible Reports	613	100.00 %

The majority of law enforcement agencies on the list did not respond and were not required to respond if they did not participate in the federal forfeiture system. The other 202 agencies mailed or faxed a report indicating their agency either did not participate in the federal forfeiture system or did participate and provided applicable reporting data. Of these 202 agencies, 14 failed to report to the SAO and reported only to the DPS, while 3 failed to report to the DPS and reported only to the SAO.

Section 513.653.1, RSMo, requires reports to be filed annually by January 31 for the previous calendar year. We received 28 reports after the reporting deadline.

Eighteen law enforcement agencies indicated they participated in the federal forfeiture system, but were late submitting the required report to the SAO.

Law Enforcement Agency
Bollinger County Sheriff's Office
Buckner Police Department
Cass County Sheriff's Office
Christian County Sheriff's Office
Ferguson Police Department
Fulton Police Department
Hazelwood Police Department
Jackson County Sheriff's Office
Joplin Police Department
Kansas City International Airport Police Department
Laurie Police Department
Lincoln County Sheriff's Office
Maryland Heights Police Department
Normandy Police Department
Overland Police Department
St. Ann Police Department
St. Charles Police Department
St. Peters Police Department

Two additional law enforcement agencies also reported late but reported only beginning and ending balances.

Law Enforcement Agency
Grain Valley Police Department
St. Robert Police Department

Eight additional law enforcement agencies also reported late, but their reports indicate no participation in the federal forfeiture system.

Law Enforcement Agency
Dade County Sheriff's Office
Hawk Point Police Department
Jasper Police Department
Lamar Police Department
Louisiana Police Department
Maries County Sheriff's Office
Sedalia Police Department
Shelby County Sheriff's Office

Law Enforcement Agencies Not Reporting

In addition, 411 law enforcement agencies did not file a federal forfeiture report. Conclusions regarding compliance cannot be made for these law enforcement agencies. This compilation work is not an audit and as such, no verification was performed as to whether these agencies did or did not participate in the federal forfeiture system. Section 513.653.2, RSMo, states intentional or knowing failure to comply with any reporting requirement shall be a class A misdemeanor punishable by a fine of up to $1,000.

Missouri Revised Statutes

Chapter 513
Executions and Exemptions
Section *513.653*

Law enforcement agencies using federal forfeiture system, report of federal seizure proceeds--violation, penalty.

513.653. 1. Law enforcement agencies involved in using the federal forfeiture system under federal law shall file a report regarding federal seizures and the proceeds therefrom. Such report shall be filed annually by January thirty-first for the previous calendar year with the department of public safety and the state auditor's office. The report for the calendar year shall include the type and value of items seized and turned over to the federal forfeiture system, the beginning balance as of January first of federal forfeiture funds or assets previously received and not expended or used, the proceeds received from the federal government (the equitable sharing amount), the expenditures resulting from the proceeds received, and the ending balance as of December thirty-first of federal forfeiture funds or assets on hand. The department of public safety shall not issue funds to any law enforcement agency that fails to comply with the provisions of this section.

2. Intentional or knowing failure to comply with the reporting requirement contained in this section shall be a class A misdemeanor, punishable by a fine of up to one thousand dollars.

(L. 1993 H.B. 562 § 7, A.L. 2001 S.B. 5 & 21, A.L. 2003 S.B. 5, A.L. 2012 S.B. 628)

Law Enforcement Report:
Equitable Sharing Proceeds from Federal Forfeitures

Calendar Year: 2012

Under Section 513.653.1, RSMo 2012, each agency involved in using the federal forfeiture system is required to file a report regarding federal seizures and the proceeds therefrom. Your agency is required to complete and file this report with the Department of Public Safety and the State Auditor's Office ***no later than January 31st*** *of the year following the Calendar Year identified above. Completed reports may be mailed or faxed to the following:*

MO Department of Public Safety
Attn: CJ/LE Section
PO Box 749
301 W. High Street, Room 870
Jefferson City, MO 65102
Fax: (573) 522-1908

State Auditor of Missouri
Attn: Webb
PO Box 869
301 W. High Street, Room 880
Jefferson City, MO 65102
Fax: (573) 751-7984

Under Section 513.653.1, the Department of Public Safety shall not issue funds to any law enforcement agency that fails to comply with the reporting requirements of this section.

Under Section 513.653.2, the intentional or knowing failure of a law enforcement agency involved in using the federal forfeiture system under federal law to comply with the reporting requirement contained in this section shall be a Class A misdemeanor, punishable by a fine of up to one thousand dollars.

Report

1. **Did your agency participate in the federal forfeiture system, during the reporting period?** (check all that apply)

   ☐ Submitted a request for forfeited assets (TD F 92-22.46 or Form DAG-71)
   ☐ Received federal sharing funds (cash)
   ☐ Received federal sharing assets (non-cash)
   ☐ None of the above

2. **Please list, by category, the type and value of the item(s) seized and turned over to the federal forfeiture system, during the reporting period.**

NOTE: The items listed shall be a result of a turnover order or seizure warrant and shall be items seized and turned over to the federal forfeiture system by the local law enforcement agency. Items seized by a federal officer shall not be included. In addition, items which have been seized and retained, seized but returned, and/or seized and considered a state seizure shall not be included.

	Type:	**Value:**
A	Cash	
B	Computers/Electronics	
C	Drugs/Alcohol	
D	Jewelry	
E	Land/Real Estate	
F	Vehicles/Boats/Trailers	
G	Weapons	
H	Other	
	TOTAL =	**$0.00**

3. Please list your agency's equitable sharing fund balance (cash and assets), as of January 1:

_____

4. Please list your agency's equitable sharing activity, during the reporting period:

	Category:	**Amount:**
A	Federal sharing funds received	
B	Federal sharing funds received from other law enforcement agencies	
C	Non-cash assets received	
D	Other income (e.g. proceeds from sale of non-cash assets)	
E	Interest income accrued (from interest-bearing account)	
	TOTAL =	**$0.00**

5. Please list, by category, your agency's expenditures during the reporting period:

	Category:	**Amount:**
A	Salaries	
B	Overtime	
C	Informants, "buy money", and rewards	
D	Travel and training	
E	Communications and computers	
F	Weapons and protective gear	
G	Electronic surveillance equipment	
H	Buildings and improvements	
I	Transfers to other state and local law enforcement agencies	

J	Other law enforcement expenses	
K	Community-based programs	
L	Windfall transfers	
M	Matching grants	
	TOTAL =	**$0.00**

6. Please list your agency's equitable sharing fund balance (cash and assets), as of December 31:

Thomas A. Schweich

Missouri State Auditor

Twenty-Ninth Judicial Circuit

Jasper County

January 2014

Report No. 2014-007

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Twenty-Ninth Judicial Circuit, Jasper County

Accounting Controls and Procedures

The Circuit Clerk has not adequately segregated accounting duties or limited user access rights in the Justice Information System (JIS). Six employees assigned primary cash receipting and disbursement responsibilities also have the ability to assess fees, receipt monies, void transactions, adjust costs, and approve cashier sessions in the JIS, and can print and sign checks, which require only 1 signature. The Circuit Clerk does not review daily cashier sessions or document her review of monthly bank reconciliations. The Circuit Clerk does not have adequate receipting and depositing procedures in place. Manual receipt slips do not provide all details and are not timely recorded in the JIS, and the court does not timely deposit some monies. The Circuit Clerk does not account for the numerical sequence of receipt numbers and cashier sessions, adequately secure monies until deposited, record monies received in the mail on a mail log, restrictively endorse checks immediately upon receipt, or reference a JIS receipt number on manual receipt slips issued for copy monies. Neither the Circuit Clerk nor a supervisor reviews non-monetary, voided, and adjusting transactions in the JIS, and supporting documentation is not always adequate. The court does not adequately review cases with liabilities and timely disburse monies as appropriate. As of December 31, 2012, the court held approximately $183,000 related to 257 disposed cases. The Circuit Clerk does not periodically review accrued case costs owed to the court, and audit staff noted several errors on the JIS list of accrued case costs. The court did not timely resolve reconciling items identified on bank reconciliations, and the Circuit Clerk lacks adequate procedures to follow up on outstanding checks.

Circuit Court Procedures

The Circuit Clerk's office prepares and submits billings for certain incarceration costs to the state, but it lacks procedures to ensure billings are correct. Overbillings totaling $4,060 were identified. The court does not prepare budgets for the Circuit Clerk's Interest Fund, the Law Library Fund, and the Time Payment Fee Fund.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 12

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge and Court en Banc
and
Circuit Clerk of the
Twenty-Ninth Judicial Circuit
Jasper County, Missouri

We have audited certain operations of the Twenty-Ninth Judicial Circuit, Jasper County in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2012. The objectives of our audit were to:

1. Evaluate the court's internal controls over significant financial functions.

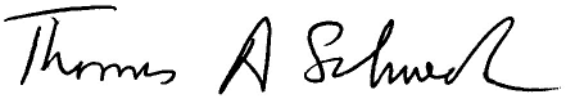
2. Evaluate the court's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the court, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the court's management, the Office of State Courts Administrator, and Jasper County and was not subjected to the procedures applied in our audit of the court.

For the areas audited, we identified (1) deficiencies in internal controls, and (2) noncompliance with legal provisions. The accompanying Management Advisory Report presents our findings arising from our audit of the Twenty-Ninth Judicial Circuit, Jasper County.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Donna Christian, CPA, CGFM
In-Charge Auditor:	Candi Copley
Audit Staff:	Alex R. Prenger, M.S.Acct., CPA

1. Accounting Controls and Procedures

Significant weaknesses were identified with accounting controls and procedures.

The Jasper County Circuit has court buildings located in Joplin and Carthage. Cases can be filed and fines and court costs can be paid at either location. Court cases are assigned to a specific location.

The Circuit Clerk, Linda Williams, resigned effective July 24, 2013. Successor, Melissa Holcomb was appointed as interim Circuit Clerk on July 30, 2013, and later sworn into office effective October 10, 2013.

According to court records, receipts collected during the year ended December 31, 2012, totaled approximately $3.1 million at the Joplin location and approximately $1.3 million at the Carthage location. Fines, court costs, and bonds are collected; recorded in the Justice Information System (JIS), the Missouri Courts automated case management system; and deposited into one main consolidated bank account by personnel of the Circuit Clerk's office.

1.1 Segregation of duties and supervisory review

The Circuit Clerk has not adequately segregated accounting duties or limited user access rights in the JIS, and supervision is not adequate to identify errors.

Receipts are collected at the Circuit Court in Joplin by an accounting supervisor and 3 clerks and receipts are collected at the Circuit Court in Carthage by 2 clerks. These 6 employees can also print and sign checks, which require only 1 signature. While these 6 employees are assigned primary cash receipting and disbursement responsibilities, they and all other clerks have been given access in the JIS to assess fees, receipt monies, void transactions, adjust costs, and approve cashier sessions. Further, monthly reconciliations of court records are completed by the accounting supervisor. As a result, there are instances where some clerks are responsible for monetary transactions from initial receipt to disbursement without involvement from other clerks. The Circuit Clerk does not review daily cashier sessions to ensure all monies are properly recorded and deposited, and her review of the monthly bank reconciliations is not documented.

To reduce the risk of loss, theft, or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls could be improved by segregating duties to the extent possible, limiting user access rights within the JIS. If proper segregation of duties is not possible, a documented independent review of work performed by the clerks is necessary.

1.2 Receipting and depositing

The Circuit Clerk does not have adequate receipting and depositing procedures in place.

- Manual receipt slips issued are not recorded in the JIS in a timely manner and these monies are not deposited timely. Additionally, the method of payment (cash, check, or money order) or initials of the clerk who issued the receipt is not denoted on some manual receipt slips. Receipts are only included in daily deposits if they are recorded in the JIS as monetary transactions. Of the 42 total manual receipt slips issued by the Joplin and Carthage locations during March 2012, 27 (64 percent) were not recorded in the JIS for 2 or more days. One manual receipt slip issued on March 20, 2012, was not recorded in the JIS and deposited until April 5, 2012.

- Monies received for small claim judgments are not recorded in the JIS or deposited. Small claim judgments, some of which are received in cash, are held until disbursed to the payee at a later date. According to manual receipt slip records, the court collected and disbursed $1,692 in small claim judgments during 2012.

- The Circuit Clerk does not account for the numerical sequence of receipt numbers and cashier sessions assigned by the JIS, and some cashier sessions are not closed in a timely manner. JIS receipt and cashier session numbers are assigned sequentially as accessed by each clerk, with the Joplin and Carthage locations having separate numbering sequences. Court personnel indicated cashier sessions were accounted for until September 2012, when the procedure was discontinued. Since that date, we noted instances where cashier sessions remained open for several days. For example, Carthage cashier session number 20336 was opened on June 10, 2013, and not closed until June 17, 2013, with cash totaling $1,320 not being deposited for 6 days. In another example, Joplin cashier session number 20346 was opened on January 8, 2013, to issue a check and was not closed until June 19, 2013. Closing cashier sessions untimely can result in delays in depositing and completing reconciliations, hinders the ability to account for numerical sequence of cashier sessions, and increases the possibility that errors will go undetected.

- Monies received are not always adequately secured until deposited. The accounting supervisor, who is responsible for making daily deposits for the Joplin location, will occasionally take a deposit home at night and make the deposit the following morning. We calculated the average daily deposit to be approximately $12,000.

- Monies received in the mail are not recorded on a mail log and checks are not restrictively endorsed immediately upon receipt. A clerk initially opens and delivers the mail to various clerks; however, that individual

does not record the payments or restrictively endorse the checks. Instead, various clerks record and process the monies received. Additionally, monies received at one court location are sometimes transmitted to the other location by court employees and procedures have not been established to document the transmittals of monies from one court location to the other court location.

- Manual receipt slips issued for copy monies do not always reference a related JIS receipt number when recorded in the JIS and deposited and are not reconciled to the JIS. Approximately $7,000 in copy monies were recorded for the year ended December 31, 2012.

Failure to implement adequate receipting, recording, transmitting, and depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected.

1.3 Non-monetary, voided, and adjusting transactions

The Circuit Clerk or a supervisor does not review non-monetary, voided, and adjusting transactions in the JIS, and supporting documentation is not always adequate. Non-monetary transactions recorded during the year ended December 31, 2012, at the Joplin and Carthage locations were approximately $2.2 million and $780,000, respectively, and included case fee adjustments of $51,427 and $163,141 at each respective location.

Adjusting and non-monetary transactions, including judicial orders, garnishment payouts, and application of bonds, are transactions where no monies are received; however, a credit is applied or the amount due is changed. All clerks are allowed to enter non-monetary transactions, adjust costs, and void receipts in the JIS without supervisory review or approval. Also, documentation was not adequate for some of these transactions. The JIS can generate various reports to monitor these transactions; however, these reports are not generated and reviewed. We identified one case where an adjustment was posted to amend the defendant's charges; however, the wrong charge code was entered when the adjustment was posted resulting in $300 in fines not being properly assessed. The accounting supervisor corrected the case fees after we discussed the issue with her.

To ensure all non-monetary, voided and adjusting transactions are valid and reduce the risk of loss, theft, or misuse of funds, proper documentation should be maintained and someone independent of receipting and recording functions should review and approve these transactions. In addition, a report of these transactions should be periodically generated and reviewed to ensure posted transactions match the supporting documentation.

1.4 Liabilities

Cases with liabilities are not adequately reviewed to ensure monies are disbursed in a timely manner. As of December 31, 2012, the court held approximately $5.5 million of which approximately $183,000 related to 257 cases that had been disposed.

Court personnel indicated the liabilities list is reviewed at month end; however, of the 28 cases we reviewed (14 from each court location), 14 cases had monies that should have been disbursed and another 5 cases were disbursed untimely. For example, 12 cases had bonds totaling $17,027 that should be disbursed. For one of these cases, the court received in 1994 a $1,500 bond from the county on a condemnation action. Following a 1997 entered judgment no further activity has occurred on the case. The bond should be returned to the county. In two other cases, with bonds totaling $4,250, the defendants have active warrants for failure to appear, but the bonds have not been forfeited by the court. One of these bonds has been held since 2008.

The court is also holding monies in over 100 juvenile adoption cases, some with no case activity since 2005. In addition, the court is holding $11,193 from two bank accounts opened for court activities that were closed in 2005, and there has been no attempt to identify or properly dispose of these monies.

Procedures to routinely investigate monies remaining on the liabilities list over a specific period of time are necessary to properly monitor and ensure monies are appropriately disbursed as provided by state law. In addition, the Circuit Clerk should attempt to identify and distribute the funds held and dispose of any unclaimed or unidentified funds.

1.5 Accrued case costs

The Circuit Clerk does not periodically review accrued case costs owed to the court (court costs, incarceration costs, court-ordered restitution, fines, and other), which totaled approximately $10.8 million at the Joplin location and $1.6 million at the Carthage location as of December 31, 2012.

We noted several cases in which costs were not accurately reflected on the JIS list of accrued case costs. For example, the JIS list included one case with an outstanding board bill fee of $8,052 listed as due the state; however, the defendant was only committed to the county jail. In another case, a defendant was overcharged $960 for costs related to board bills due to a calculation error.

To ensure the accuracy of the accrued case costs, and to provide the Circuit Clerk with the necessary information to ensure amounts owed are collected and make a determination about collectability, accrued case costs should be reviewed at least monthly.

1.6 Bank reconciliations

Reconciling items identified on bank reconciliations are not resolved timely and there are no procedures to follow up on outstanding checks.

- Reconciling items totaling approximately $2,000 identified on the December 31, 2012, bank reconciliation were not resolved in a timely manner. For example, the largest reconciling item was $990 transferred

from an old court account, but not posted in the JIS until 9 months after the transfer. The oldest reconciling item dates back to November 2011. Additionally, interest earned on investments and directly deposited into the Circuit Clerk's main bank account is not recorded in the JIS in a timely manner, and is listed as a reconciling item on the bank reconciliations for several months. For example, interest earned monthly from April through December 2012 totaling $5,481, was not posted to the accounting records until March 2013.

- The Circuit Clerk has not developed adequate procedures to follow up on outstanding checks. As of December 31, 2012, JIS records indicate 71 checks totaling $11,062 had been outstanding for over a year. Some checks have remained outstanding since 2003.

Routine investigation and follow up procedures for reconciling items are necessary to decrease the risk that errors or misstatements will not be detected on a timely basis. Additionally, to properly monitor disbursements and ensure monies are appropriately disbursed to the payee or as otherwise provided by state law, procedures should be established to routinely investigate outstanding checks.

Recommendations

The Circuit Clerk:

1.1 Segregate accounting duties to the extent possible, limit user access rights within the JIS to only those necessary for the user to perform job duties, and implement appropriate reviews and monitoring procedures.

1.2 Record all receipts in the JIS timely; ensure manual receipt slips include method of payment, clerk's initials and a related JIS receipt number; account for the numerical sequence of JIS receipt numbers and cashier sessions; secure court monies until deposited; improve controls over mail receipts; restrictively endorse all checks immediately upon receipt; and reconcile manual receipt slips issued for copy monies to amounts posted in the JIS.

1.3 Ensure adequate documentation is maintained to support all non-monetary, voided and adjusting transactions, and ensure an independent review and approval of these transactions is performed and documented. In addition, the Circuit Clerk should periodically generate and review reports of these transactions.

1.4 Establish procedures to review the status of liabilities monthly to determine the appropriate disposition of funds held on closed and inactive cases.

1.5 Maintain and review a complete and accurate list of accrued costs at least monthly.

1.6 Resolve reconciling items timely and establish procedures to routinely follow up on outstanding checks and reissue them if necessary or dispose of these monies in accordance with state law.

Auditee's Response

The Circuit Clerk provided the following written responses:

1.1 After my appointment as Interim Circuit Clerk on July 30, 2013, I implemented the appropriate supervisory review and segregation of duties consistent with the recommendations made. JIS user access rights have been changed or limited for clerks, with the exception of the Circuit Clerk, accounting supervisor and accounting clerks. Any authorized clerk who now makes a fee adjustment must document the reason within the JIS system. I am now reviewing monthly reports related to the receipt and disbursement of money that comes through the office. My accounting supervisor and I are reviewing cashier sessions and monitoring deposits to ensure timely and accurate transactions. Up-to-date written cash handling and accounting procedures have been put in place and are specific to each accounting clerk and their duties.

1.2 After my recent appointment to the office, the implementation of electronic filing and new Missouri Supreme Court Operating Rule 4 effective January 1, 2014, this court will no longer issue manual receipts unless the JIS system is unavailable. My office is in the process of obtaining the recommended format of manual receipts in the event they must be used. New cash handling procedures have been created to comply with the recommendations.

1.3 After my appointment to the office, appropriate changes were implemented as non-monetary, voided and adjusting transactions are currently being documented, reviewed and approved by me and the accounting supervisor. Changes in the user access rights limit access to a selected number of clerks, which will ensure good checks and balances that can be monitored by me and the accounting supervisor.

1.4 After my recent appointment to the office, I made the appropriate changes for liabilities. I have developed a plan that assigns specific duties to the accounting supervisor, which includes generating current liabilities reports to be reviewed on a weekly and monthly basis to ensure prompt disbursement of funds on disposed cases in accordance with proper procedure of the Court.

1.5 After my recent appointment to the office, I made appropriate changes to the office, to ensure the accuracy of case costs are reviewed on a monthly basis. This Court currently participates in debt collection and Missouri State Tax offset for all accrued cases costs due. An accrued case cost report will be generated on a monthly basis and reviewed for any amounts deemed non-collectable. Those cases will be presented to the Presiding Judge or Division Judge to determine the proper course of action.

1.6 After my appointment to the office, additional staff was hired and new procedures were implemented to routinely follow up on reconciling items and outstanding checks. Outstanding checks are now reviewed periodically and are reissued or forwarded to unclaimed property as required by law.

2. Circuit Court Procedures

Circuit court procedures related to criminal cost reimbursements, budgeting, and written agreements need improvement.

2.1 Reimbursed criminal costs

The Circuit Clerk's office does not have adequate procedures to ensure criminal costs are accurately assessed and billed. The Circuit Clerk's office prepares and submits billings for incarceration costs to the state. Section 221.105, RSMo, allows for the reimbursement of certain costs in criminal cases where the state has been rendered liable.

Some costs billed were incorrect, and errors were not identified and corrected until we discussed the issues with court personnel. We noted two instances where incarceration costs, totaling approximately $4,060, were billed twice. For example, one overbilling resulted when incarceration time was billed twice for the same defendant on two different cases. The overpayments were received by the court and submitted to the county. As a result, the court should work with the county to reimburse the state for the overpayment.

To ensure billings are correct, procedures should be established to review amounts billed.

2.2 Budgets

Budgets are not prepared for the Circuit Clerk's Interest Fund, the Law Library Fund, and the Time Payment Fee Fund. The Circuit Clerk maintains separate bank accounts for the Law Library Fund and Time Payment Fee Fund, and maintains the interest monies in the court's main bank account along with other court monies. At December 31, 2012, these accounts maintained an aggregate balance of approximately $300,000, and approximately $25,000 was disbursed through these funds in 2012.

Preparing a budget for public funds aids in the fiscal management of the monies, provides a means to effectively monitor actual costs and revenues,

and helps inform both the county and the public of the court's financial picture.

Recommendations

The Circuit Clerk:

2.1 Work with the county to repay the state for reimbursed costs overbilled and develop procedures to ensure all criminal costs are accurately billed to the state.

2.2 And the Circuit Judge prepare annual budgets for the Circuit Clerk's Interest Fund, the Law Library Fund, and the Time Payment Fee Fund.

Auditee's Response

The Circuit Clerk provided the following written responses:

2.1 After my appointment to the office, I have endeavored to identify overbilled costs to reimburse the state. I am now fully staffed and have appropriately delegated duties to accomplish this task. This Court has implemented a new method of tracking each criminal reimbursement billing. This includes additional oversight by another department, before the billings are sent to the state, to ensure accuracy and avoid any over or under billing. All instances known to this Court of overbilling have now been resolved and documented.

2.2 The Court en Banc will establish appropriate budgets as recommended.

Twenty-Ninth Judicial Circuit
Jasper County
Organization and Statistical Information

The Twenty-Ninth Judicial Circuit consists only of Jasper County. The Twenty-Ninth Judicial Circuit has a court building located in Carthage and a court building located in Joplin. There are no jurisdictional lines and cases can be filed at either location.

The Twenty-Ninth Judicial Circuit consists of three circuit judges, three associate circuit judges and a Family Court Commissioner.

Personnel

At December 31, 2012, the judges, Circuit Clerk, Family Court Commissioner, and Juvenile Officer of the Twenty-Ninth Judicial Circuit, Jasper County, were as follows:

Title	Name
Circuit Judge, Division 1	Gayle Crane
Circuit Judge, Division 2	David C Dally
Circuit Judge, Division 3, Probate	David B. Mouton
Associate Circuit Judge, Division 4	Joseph Schoeberl
Associate Circuit Judge, Division 5	Richard D. Copeland
Associate Circuit Judge, Division 6	Stephen P. Carlton
Family Court Commissioner	Jerry Holcomb
Circuit Clerk	Linda Williams
Juvenile Officer	Dana Sanders

Financial Information

Receipts of the Twenty-Ninth Judicial Circuit, Jasper County, were as follows:

	Year Ended December 31, 2012
Court deposits, fee, bonds, and other	$4,357,906
Family Court	38,538
Interest Income	8,315
Total	$4,404,759

Caseload Information

From the Office of State Courts Administrator Missouri Judicial Reports, case filings of the Twenty-Ninth Judicial Circuit, Jasper County, were as follows:

	Year Ended June 30, 2012
Civil	7,366
Criminal	7,901
Juvenile	986
Probate	998
Total	17,251

Lee's Summit R-VII School District

February 2014

Report No. 2014-008

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Lee's Summit R-VII School District

Procurement Procedures

The district did not competitively bid several purchases in accordance with district administrative procedure and state law, including travel services ($29,172), installation of technology equipment ($21,866), and printing ($20,357), and did not always document in writing single feasible source justifications. District administrative procedures require competitive, advertised, sealed bids for construction of facilities costing $15,000 and above and require bids for individual non-construction purchases projected to cost $5,000 or more and quotes for non-construction purchases under $5,000. The district does not always document the evaluation and selection of architectural/construction management services for non-bond issue projects as required by board policy and state law. The district has not periodically solicited proposals for some professional services and has used the same vendors for several years. The district has used the same auditor for 15 years, diversity initiative provider for 6 years, and primary legal counsel for 4 years without periodically soliciting proposals.

Written Agreements

The district does not have written agreements with the entities providing legal services or the communications audit, and district officials did not sign an education services contract for the 2012-2013 school year until March 28, 2013. The district pays $25,000 to the Lee's Summit Economic Development Council for membership, but the council's website indicates maximum membership benefits are available for $10,000, and it is unclear what additional benefits the district receives for the additional contribution. The district subsidizes a significant portion of the operating expenses of the Lee's Summit Educational Foundation, a legally separate not-for-profit corporation, and has not entered into a written agreement with the foundation. The foundation's employees, its Director, and Administrative Assistant are housed in the district's main administration building free of charge, and the district pays their salaries and fringe benefits and other foundation expenses even though they spend only 10 percent of their time working on district activities.

Disbursements

The district did not adequately monitor contract payments, and a contractor overcharged the district $4,095 in the 2012-2013 school year. The contractor subsequently reimbursed the district. The district does not competitively bid significant changes to construction projects and does not always timely approve construction change orders. The district paid a $25,340 change order for a paving project at Lee's Summit North High School that was not included in the vendor's original bid proposal, and the Board did not approve and district officials did not sign the change order until at least a week after the work was complete. The district paid a $60,616 change order for carpet removal and replacement at Meadow Lane Elementary that was not included in the vendor's original bid proposal and approved by the Board. The district does not monitor purchasing card transaction limits, and limits for some individuals are excessive. The district has over 900 purchasing cards assigned to various personnel with monthly limits ranging from $1,000 to $600,000.

Vehicle Allowances	The district has historically paid a vehicle allowance to several employees who use their personal vehicles to conduct official business within the district, but, other than for the superintendent, the district does not include vehicle allowances in employee contracts, and the Board does not approve the allowances as additional compensation. The district has not performed an analysis to ensure the vehicle allowances meet the needs of these positions or are reasonable. Using the IRS-allowed mileage rate, the superintendent would need to travel over 26,000 business-related miles to earn the $15,000 vehicle allowance he would have been paid for the year ended June 30, 2014. This number of miles is considerably more than the 4,284 business-related miles he drove his district-provided vehicle during calendar year 2012. The Board indicated in its response to our recommendation that it will no longer provide the superintendent with the vehicle allowance.
Land Purchase	The district purchased approximately 51 acres of land in December 2012 for $775,000 to be used for the district's fourth middle school, but it did not obtain an independent appraisal, so it has less assurance it paid the fair value of the property.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 20

THOMAS A. SCHWEICH
Missouri State Auditor

To the Board of Education
Lee's Summit R-VII School District

The State Auditor conducted an audit of the Lee's Summit R-VII School District under authority granted in Section 29.205, RSMo. We have audited certain operations of the district in fulfillment of our duties. The district engaged Marr and Company, P.C., Certified Public Accountants (CPAs), to audit the district's financial statements for the year ended June 30, 2013. To minimize duplication of effort, we reviewed the report of the CPA firm for the year ended June 30, 2012, audit, since the year ended June 30, 2013, audit, had not been completed. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2013. The objectives of our audit were to:

1. Evaluate the district's internal controls over significant management and financial functions.

2. Evaluate the district's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties; performing site visits during Missouri Assessment Program testing; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the district's management and was not subjected to the procedures applied in our audit of the district.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Lee's Summit R-VII School District.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Kelly Davis, M.Acct., CPA, CFE
In-Charge Auditor:	Robert L. McArthur II
Audit Staff:	Angela M. McFadden
	Shannon Spicer

1. Procurement Procedures

Several purchases were not bid or documentation of bidding was not retained and the selection process for professional services was not always adequate.

1.1 Bidding

The district did not competitively bid several purchases in accordance with district administrative procedure and state law.

District administrative procedure DJC-AP1 requires competitive, advertised, sealed bids for construction of facilities costing $15,000 and above (based on Section 177.086, RSMo). The administrative procedure also requires bids for individual non-construction purchases that are projected to cost $5,000 or more and quotes are required for non-construction purchases under $5,000. The administrative procedure requires district staff to compare and document prices from at least two vendors or service providers, but allows for single feasible source purchases when it is documented in writing. Examples of purchases not bid or for which quotes were not requested in accordance with district administrative procedures during the year ended June 30, 2013, include:

Item	Cost
Travel services	$ 29,172
Installation of technology equipment	21,866
Printing	20,357
Student lockers	17,104
Aquatic Center flooring	9,735
Picnic tables and trash cans	9,301
Rough-in and installation of two sinks	5,750
Design, production, and mailing of post cards	2,932

For the student lockers purchase, bids were obtained but the purchase was not advertised in accordance with the district administrative procedure. The district identified the technology installation purchase as a single feasible source procurement because the vendor was the preferred vendor of the technology manufacturer. This justification was not documented in writing as required by the administrative procedure.

Competitive bidding helps ensure the school district receives fair value by contracting with the lowest and best bidders. In addition, bidding helps ensure all parties are given an equal opportunity to participate in the district's business. Written documentation of bids also provides evidence the district complied with its administrative procedure.

1.2 Architectural/ Construction management services

The district does not always document the evaluation and selection of architectural/construction management services for non-bond issue projects as required by board policy and state law.

Per a district official, the district formally evaluates firms upon the issuance of each new district bond issue for construction, the last of which was in 2010. Since then, the district has worked extensively with four firms for services generally including design, preparation of construction documents, bidding and negotiating contracts with subcontractors, and construction administration. The district does not always document the selection process when choosing these contracted services for non-bond issue projects and cannot demonstrate compliance with board policy and state law. Payments for these services totaled approximately $247,800 during the year ended June 30, 2013, for projects including the Lee's Summit High School serving line, Meadow Lane Elementary classroom remodeling, and roofing projects at Trail Ridge Elementary and Summit Lakes Middle School.

Board Policy FEB states that when considering the need for architectural services, interested firms may be requested to submit statements of their qualifications, performance data and also a fee schedule. The policy also states one of the top three qualified firms is to be hired based on demonstrated competence and qualifications for the services specified at a fair and reasonable price. Board Policy FEC states construction management service proposals should be solicited by advertisement and evaluated based on established criteria. In addition, Sections 8.285 to 8.291, RSMo, provide requirements for the selection of architectural services.

1.3 Professional services

The district has not periodically solicited proposals for some professional services, and the district has used the same vendors for several years. Examples of professional services selected without a competitive process during the year ended June 30, 2013, include:

Item	Cost
Disabled student transportation	$ 211,072
Additional student transportation	179,209
Behavioral support and consulting	149,679
Primary legal counsel	114,005
Audit	27,999
Diversity initiative	12,000

The district has used the same auditor for 15 years, diversity initiative provider for 6 years, and primary legal counsel for 4 years without periodically soliciting proposals. For other examples noted above, the district identified the purchase as a single feasible source procurement, but did not document this information in writing in accordance with district administrative procedure DJF-AP1. A district official also acknowledged the behavioral support provider was the only provider at the time the district originally procured the services, but the behavioral support and consulting field has expanded.

Periodically soliciting proposals for professional services is a good business practice, helps provide a range of possible choices, and allows the district to make better-informed decisions to ensure necessary services are obtained from the best qualified provider, taking expertise, experience, and/or cost into consideration. Documentation of sole source procurements is necessary to ensure the validity and propriety of such procurements, and demonstrate compliance with district administrative procedures.

Recommendations

The School Board:

1.1 Competitively bid for purchases in accordance with district administrative procedure and state law.

1.2 Ensure the district complies with board policies and state law when evaluating and selecting architectural/construction management services and document the evaluation and selection process.

1.3 Periodically solicit proposals for professional services in accordance with district administrative procedures.

Auditee's Response

The School Board provided the following written responses:

1.1 The District agrees, in accordance with District administrative procedures and state law, documentation, identified selection process, competitive bidding, and single feasible source purchase accompanied by written documentation ensures the District will receive fair value and lowest best bid considerations.

The District will utilize the Director of Purchasing and Distribution Services to review the items as presented to determine the circumstances that suggest discrepancies in the bidding practices, unit price extension, contract amendments, contingencies and/or expanded scope projects that may be exceptions to routine bid and documentation activities. This position will facilitate a Superintendent chartered process action team to align, in the Spring of 2014, various bidding and change order policies, practices, and procedures. The various Budget Managers will be responsible to follow these District policies, practices, and procedures, document the same, and clearly identify areas where single source purchase may be deemed necessary. Budget Managers will attend annual training sessions hosted by Purchasing and Distribution Services and Business Services and will be responsible for compliance with all applicable policies and state law. Enhancements to the purchasing website are scheduled and will provide more interactive FAQ's. Site leadership will also

have increased access to the Site Purchasing Specialist for larger scale procurement items.

Travel Services: The payment was for travel services provided to the District for the student trip to China. This vendor has provided similar services to the District since the inception of the China program. The itinerary for the student-based trip is complex in terms of coordination of activities in the multiple cities visited during the trip. This agency has provided excellent services to the District resulting in the on-going use of this agency for these specific travel services. The District agrees adequate bidding and documentation is not available. Budget Managers and other staff with procurement responsibilities and authorization will be made aware of the requirement to solicit and document bids.

Installation of Technology Equipment: The District has used services and purchased materials, supplies and equipment from Kansas City Audio Visual (KCAV) since 2011. Technology staff did check pricing and installation methods of various companies available to perform services and furnish the technology supplies/equipment needed. Each company's pricing was comparable. The District selected Kansas City Audio Visual because they partner with Smart Technologies (impacting pricing and service ability) and they are a member of the State of Kansas Purchasing Contract #36416, which the District was able to leverage per state statute. The Kansas Purchasing Contract includes hardware, labor and installation. In addition, KCAV has provided pricing below the rates stated in the Kansas Purchasing Contract resulting in lower rates for the purchase of Smart Boards and more efficient logistical equipment installation. The District agrees adequate documentation is not available. Budget Managers and others with procurement authorization will be made aware of the requirement to document bids.

Printing: This item noted in the report represented the payment of five invoices from two high schools for school year start-up supplies, including student planners. School staff indicated the vendor was selected several years ago following the solicitation of telephone, on-line, and catalog pricing. The District agrees adequate documentation is not available. Budget Managers and others with procurement authorization will be made aware of the requirement to document bids.

Student lockers: Academic and athletic student lockers were installed at Summit Lakes Middle School to accommodate increased attendance. Debourgh lockers were specified as "sole source" to match existing athletic lockers already installed at SLMS. Bids,

documented by quotes from the vendors and retained in Facility Services office, were received from the local dealer Carroll Seating and the next nearest dealer in Wichita, Kansas Contract Design. The contract was awarded in the amount of $17,104 to Carroll Seating based on the low bid. This bid was not processed in accordance with District guidelines for advertising and bidding.

Aquatic Center flooring: Existing concrete flooring at the Aquatic Center was a base cured concrete surface that was somewhat slippery and also difficult to clean. Site visits were made to various aquatic centers in the Kansas City metro area to evaluate a desired epoxy flooring installation and performance. Desco Flooring was awarded this project based on the quality of their finished product. Square foot pricing was evaluated by the architect, pool consultant, and construction manager and was found to be competitive within industry standards. The District agrees adequate bidding and documentation is not available. Budget Managers and others with procurement authorization will be made aware of the requirement to solicit and document bids.

Picnic tables and trash cans: The items noted in the report represent the payment of an invoice from one high school for the purchase of tables and trash cans to match existing furnishings. School staff indicated the vendor was selected due to the need to provide a visually appealing courtyard area for students and to procure these items from the same manufacturer used to purchase the existing furnishings. The District agrees adequate bidding and documentation is not available. Budget Managers and other staff with procurement responsibilities and authorization will be made aware of the requirement to solicit and document bids.

Rough-in and installation of two sinks: The installation of two sinks was requested as a Non-Allocated Capital Project by Summit Technology Academy to accommodate program growth in the bio-medical area. This scope of work was part of a larger renovation project and due to Lexington Plumbing being in-district when the work was needed to ensure timely completion; Facility Services secured pricing from Lexington Plumbing. The pricing for Lexington Plumbing was evaluated based on prevailing wage information and supplied materials. This project was awarded to Lexington due to pricing and responsiveness. The District agrees adequate bidding and documentation is not available. Budget Managers and other staff with procurement responsibilities and authorization will be made aware of the requirement to solicit and document bids.

Design, production, and mailing of post cards: The items noted in the report represented the payment of one invoice for the design, production, and mailing of postcards inviting parents to the school. School staff indicated the vendor was selected several years ago following efforts to identify one source to provide the entire range of services. The District agrees adequate bidding and documentation is not available. Budget Managers and other staff with purchasing responsibilities and authorization will be made aware of the requirement to solicit and document bids.

1.2 The District agrees that, in accordance with the specific requirements in state statute and Board Policy, the District process and procedures should be followed for the selection of Construction Management services and various Architectural services.

The District has reviewed the Construction Management and Architectural services selection process used in all four previous bond issues since 2002, for future construction of a proposed Elementary #19, and various other capital improvements in the areas of Performance Contracting, construction, remodeling and renovation, and Non-Allocated Capital Requests. The district has available the documentation to support proper advertisement when appropriate, specifications, selection methodology, and selection team composite rankings. A member of the school board is always a part of this team activity. Board of Education approval of the selection team recommendations for construction management occurred in each instance. Board of Education approval of Bond Issue recommendations for Architectural services also occurred. From the approved Architect selection pool, depending on the minor project location, scope of work, fee comparison, demonstrated competence, and experience, the best qualified Architectural services provider is then identified by Facility Services and assigned to a specific minor projects responsibility. The District will in the future require that the Facility Services assignment is supported by appropriate documentation.

1.3 The District agrees that bids and proposals should be solicited for all goods and services and sole source procurements should be adequately documented.

Disabled Student/Additional Student Transportation: Special and Student Services staff responsible for procurement will be made aware of the requirement to solicit and document pricing.

Behavioral Support and Consulting: Special Services staff have implemented a process with the assistance of legal counsel to develop a standardized contract template for a wide range of

student services within Special Services. Special Services staff responsible for procurement will be made aware of the requirement to solicit and document pricing.

The District has now developed a legal services agreement outlining expectations and costs of services from each legal firm providing services to the District. Prior to payment, legal invoices are reviewed by the appropriate administrator and approved for payment. The Accounts Payable staff also review invoices for compliance with the pricing submitted by the legal firm and appropriate general ledger coding prior to payment.

Audit: Prior to the last service agreement renewal, the District evaluated the audit costs for surrounding districts and compared the costs to the proposed fees from Marr and Company. The district determined the pricing from Marr and Company provided competitive pricing for audit services and Marr and Company provide satisfactory services to the District. The details of the audit services agreement were provided to the Board of Education prior to the approval on June 14, 2012.

Diversity Initiative: The Diversity initiative is an individualized program developed specifically for the District. This program's administrators have determined, to ensure on-going continuity within the diversity initiative, a sole-source vendor will provide services. The District agrees adequate documentation is not available. The program administrators will document the sole-sourcing of this service consistent with District policy. The program administrators understand and agree bids, quotes, and proposals will be solicited and documented for other services required for the program.

2. Written Agreements

Improvement is needed in the district's handling of written agreements.

2.1 Written agreements

The district did not always enter into formal written agreements defining services provided and benefits received, or enter into written agreements in a timely manner.

- The district does not have a written agreement with its primary legal counsel. The district paid this firm $114,005 in the year ended June 30, 2013.

- The district did not enter into a written agreement for an audit evaluating its communication strategies, community relations, branding, etc. The cost of this service was $11,700.

- The district annually pays $25,000 to the Lee's Summit Economic Development Council for membership. However, according to the council's website only a $10,000 investment by the district is required to receive the maximum benefits of membership (i.e. the Angel investment category).

  The district does not have a written agreement with this entity; therefore, it is unclear what additional benefits, if any, the district receives as a result of these additional contributions.

- District officials did not sign an educational services contract for the 2012-2013 school year until March 28, 2013. These services were required by student individualized education plans.

Clear, detailed, and timely written agreements are necessary to ensure both parties are aware of the services to be performed and the compensation to be paid for the services, provide a means for the district to monitor compliance with the agreement terms, and protect the district in the event of a dispute over the terms of the agreement. In addition, Section 432.070, RSMo, requires contracts for political subdivisions be in writing.

2.2 Foundation subsidization

The district subsidizes a significant portion of the operating expenses of the Lee's Summit Educational Foundation and has not entered into a written agreement with the foundation.

The foundation's employees, its Director and Administrative Assistant, are housed in the district's main administration building free of charge and their salaries, totaling approximately $119,400, and fringe benefits are paid by the district. However, according to district officials, these employees spend the majority of their time, approximately 90 percent, working on foundation activities and only 10 percent of their time working on district related activities. Foundation supplies, software and equipment, travel expenses, and other miscellaneous expenses are also paid by the district. For the year ended June 30, 2013, these expenses totaled approximately $22,800.

The foundation is a legally separate charitable not-for-profit corporation established to raise private funds to help support programs within the district. The foundation is governed by a 10-member board of directors. A district board member, the superintendent, and other district administrators serve on the foundation's advisory board.

The district has not entered into a written agreement with the foundation to address office space, services, and financial support provided, or a requirement to reimburse the district for the expenses paid on behalf of the foundation. A written agreement that clearly indicates the benefit to the district for these subsidizations is necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings.

Recommendations

The School Board:

2.1 Enter into timely written agreements defining services provided and benefits received, and monitor these agreements for compliance with the terms of the agreement.

2.2 Discontinue the practice of subsidizing operations and activities of foundation or enter into written agreements that clearly indicate the benefit to the district for these subsidizations.

Auditee's Response

The School Board provided the following written responses:

2.1 Legal Services: The District has now developed a legal services agreement outlining expectations and costs of services from each legal firm providing services to the District. Prior to payment, legal invoices are reviewed by the appropriate administrator and approved for payment. The Accounts Payable staff also review invoices for compliance with the pricing submitted by the legal firm and appropriate general ledger coding prior to payment.

Communication Audit Services: The District utilized the services of a local company familiar with the Lee's Summit school community. Understanding the Lee's Summit school community culture was determined to be a critical component in securing input from various focus groups within and outside the District. Budget managers and other staff with purchasing responsibilities and authorization will be made aware of the requirement to solicit and document bids or document sole sourcing of services, and entering into written agreements.

Lee's Summit Economic Development Council (LSEDC): The payment is established and approved annually by the Board of Education. LSEDC is a public/private partnership formed in 1986 by the District, the City of Lee's Summit, and the Chamber of Commerce. LSEDC by-laws establish the District Superintendent as a board member and Executive Committee member along with the Mayor and City Manager of Lee's Summit, and five private sector business leaders. LSEDC's purpose is to attract and retain

investment which creates jobs and a consumer economy characterized by residential and commercial development. Quality economic development requires qualitative and quantitative services, resulting in the building of a great community to attract and retain local investment. The District will develop a written "Memorandum of Understanding" with LSEDC.

2.2 The Lee's Summit Educational Foundation (Foundation) was officially established in February 1993. The initial establishment of the Foundation developed from the District's Strategic Plan. At the direction of former and current superintendents and the partnership with community stakeholders, the Foundation has expanded and provides significant alternate resources for district-wide instructional programs. For example, the Foundation was able to provide $4 million in alternative resources in a capital campaign and partially funded the construction of the District's early childhood center. In addition, the Foundation provides annual resources to fund additional learning opportunities and technology for students and staff. During the 2012-2013 school year, the Foundation contributed approximately $250,000 for these purposes through its Annual Fund Drive and nearly $151,000 for before and after school tutoring, robotics, music, and other school programs. Additionally, the Foundation awarded 51 continuing education scholarships to graduating seniors in the amount of $47,550 and raised another $25,000 for the Excellence in Education Endowment, which is the Foundation's long-range strategic effort to ensure future alternative resources for district staff and students. The Foundation Board includes the Superintendent, a Board of Education member, and several other district-level administrators. The Foundation annually prepares a report detailing their efforts and impact on District students and staff. The District will develop a written "Memorandum of Understanding" with the Foundation.

3. Disbursements

District disbursement procedures need improvement.

3.1 Transportation services

The district overpaid a transportation service provider. District personnel did not perform a sufficient comparison of invoice billing rates to contractually agreed upon billing rates. For one student the contracted billing rate was $100 per day, but the contractor billed the district $130 per day. This error resulted in an overpayment to the contractor of $510 for January 2013 services provided. After our review, a district official confirmed in April 2013 the contractor billed the district the incorrect amount for the 2012-2013 school year to-date and the contractor planned to reimburse the district for the entire amount overcharged. The district was subsequently reimbursed $4,095 in June 2013.

Adequate monitoring of contract payments is necessary to ensure agreement with contracted amounts and prevent overpayments.

3.2 Change orders

The district does not competitively bid significant changes to construction projects when appropriate and does not always approve construction change orders in a timely manner. In addition, the Board does not approve all change orders.

- A paving project completed at Lee's Summit North High School at a cost of $25,340 was not included in the vendor's original bid proposal. The original bid for $216,662 was for paving projects at 10 other schools and a waterline project at an eleventh school. A district official indicated unit pricing from the original bid proposal was used as a basis for the change order. While similar to the work originally bid, the Board did not approve the change order and district officials did not sign this change order indicating their approval until at least a week after the work was complete.

- Carpet removal and replacement completed at Meadow Lane Elementary (MLE) third through sixth grade classrooms, totaling $60,616, was not included in the vendor's original bid proposal. The original $788,000 bid included a serving line project at Lee's Summit High School and classroom modifications at MLE (estimated to cost $296,222, including only $250 for carpet work). A district official indicated replacement of the third through sixth grade classroom carpet was previously identified as a need; however, the carpeting replacement was not included in the original MLE classroom modification proposal. The Board did not approve this change order.

The district does not have a formal written change order policy; however, district officials stated and board meeting minutes indicate the Board made a decision in 2000 to require all change orders exceeding $10,000 go before the Board.

While change orders often occur on construction contracts, they are normally used to make adjustments for minor problems, which are unknown when construction projects are originally bid. Change orders should be kept to a minimum to ensure the maximum amount of construction costs are competitively bid. Change orders should not be used to make significant changes to existing contracts. If the scope of a project changes substantially, consideration should be given to bidding those parts of the project. As noted above, district administrative procedure DJC-AP1 requires school districts to advertise bids for construction of facilities that may exceed a disbursement of $15,000. Bidding of construction of facilities is also required by Section 177.086, RSMo.

3.3 Purchasing cards

The district does not monitor purchasing card transaction limits and limits for some individuals are excessive. The district determines the transaction limits when the cards are issued, but does not periodically review the limits.

The district currently has over 900 purchasing cards assigned to various personnel throughout the district and annual purchasing card expenditures exceed $6 million. Individual transaction limits range from $500 to $50,000 and monthly cycle limits range from of $1,000 to $600,000. However, a review of 15 employees' purchasing card transactions determined 10 employees had individual transaction and monthly cycle limits significantly greater than necessary to cover their actual credit card purchases. For example, we noted five employees that had individual transaction limits of $10,000 each, but the largest single purchase by any of these employees between July 1, 2011, and December 31, 2012, was $1,620. In addition, the monthly cycle limits for these same five employees was $15,000 each, but between July 1, 2011, and December 31, 2012, none of the employees made more than $7,300 in purchases, respectively.

Excessive or unneeded limits and purchasing ability create greater risk of abuse and potential large liabilities for the district. To strengthen controls over purchasing cards, the district should periodically compare the actual purchasing card activity of each employee to established individual transaction and monthly cycle limits. Adjustments to the limits should be made accordingly to reduce the district's risk to an acceptable level.

Recommendations

The School Board:

3.1 Monitor contracts to ensure compliance with contract terms.

3.2 Monitor change orders, give consideration to bidding when substantial project changes are needed, and ensure change orders are approved timely.

3.3 Evaluate and adjust employee purchasing card limits as deemed appropriate.

Auditee's Response

The School Board provided the following written responses:

3.1 Special services staff responsible for procurement of transportation services have been made aware of the requirement to secure and document pricing and to verify invoices are consistent with service agreements prior to payment authorization.

3.2 The District agrees change orders should be documented, and signed off by the contractor/vendor, Director of Facility Services,

appropriate Central Office administrator, and/or the Board of Education in a timely manner and current practices and proposed policies should be reviewed for consideration and implementation by the Board of Education.

The District has had a long history of minimizing costs on major and minor capital projects due to change orders. There is documentation to that effect for all Bond Issue projects from 2004 to the present. The work within the scope of Change Orders is not bid, rather a negotiation of existing unit prices along with Architect and Construction Manager market price analysis supported the added (or reduced) project cost.

The District will review, in Spring 2014, through a Superintendent charted process action team, the existing change order practices to ensure compliance and consistency with Board Policy and administrative procedures and practices that provide staff the ability to complete projects in a timely manner to avoid additional costs of goods and services. The current District practices consider the cost or value of the change, unit price extensions, unforeseen conditions, impact on the scope of work progress, impact on the targeted completion date(s), and whether or not a contingency situation may exist.

District teams are used to identify preferred providers of similar services and prior and current unit pricing. Consideration is also given to other capital projects reviewed and approved through the Non-Allocated Request Process that may "piggy back" on earlier bids. Field judgment and Central Office review, in unusual circumstances, may cause an occasional bypass of accepted change order practice. This could then result in follow up after the work is completed.

As presented, all change orders are processed in as timely a manner as possible. They are, however, dependent on both the contractor/vendor and professional services provider processing activities. Change orders, amended contracts, and contingency provisions are monitored on a regular basis, including the District Finance Committee and/or Board of Education review or approval.

The Lee's Summit North High School paving was publicly bid and awarded to Calvert's Paving as a part of our annual Capital Projects paving long-range plan. These unit costs were used as a basis for this paving change order. However, staff did not properly process these bids for approval and signature.

The Meadow Lane Elementary classroom modifications were bid by the District, awarded to Heartland Construction, and funded by the Operations Special Capital Projects budget. Limited carpet replacement was included in the original project bid. Additional replacement of deteriorated carpet was previously identified as a need by the site and administrative team. Favorable contractor bids allowed for additional carpet replacement in the third through sixth grade classrooms. A competitive material pricing was provided by Heartland Construction through two flooring suppliers. The Board, in this case, accepted the amendment to the Heartland contract for the additional project work.

3.3 The District agrees with the recommendation to annually review Purchasing Card utilization and is agreeable to reviewing suggested adjustments to purchasing card limits as may deemed appropriate. The Business Services department annually prepares a comprehensive report for review by the Board of Education. Current limits have not resulted in any fraudulent or excessive expenditure based on internal review of each transaction. All usage of Purchasing Cards and each transaction, is audited internally and no limit concerns have been noted by District Business office staff. The District has received rebates in the amount of $847,499 over the past nine years. Annually, a Purchasing Card usage report is presented to both the District Finance Committee and the Board of Education.

4. Vehicle Allowances

The district does not include vehicle allowances paid to several district employees, mostly administrators, in their contracts and the Board does not approve the vehicle allowances. In addition, the district has no documentation to support that vehicle allowance amounts are reasonable compared to actual expenses incurred.

The district has historically paid a vehicle allowance to several employees who use their personal vehicles to conduct official business within the school district. When employees use their personal vehicles to travel outside the district, they receive a separate mileage reimbursement. For the year ended June 30, 2013, the superintendent was provided a district vehicle and his personal usage of that vehicle in calendar year 2012 was reported on his W-2 in accordance with IRS guidelines. Effective with the 2013-2014 school year the superintendent no longer uses a district vehicle, but uses his personal vehicle and receives a vehicle allowance. Our review of vehicle allowances noted the following concerns:

- The district does not include vehicle allowances, other than for the superintendent, in employee contracts and the Board does not approve the allowances as additional compensation. In addition, the district has

not performed an analysis to ensure the vehicle allowances meet the needs of these positions or are reasonable.

According to district officials, individuals in certain positions (e.g. facility maintenance and operations) typically travel a significant number of miles each month. The district established these vehicle allowances several years ago and they range from $47 - $266 per month and totaled $27,657 for the year ended June 30, 2013.

District officials indicated they have discussed performing an analysis of vehicle allowances.

- The $15,000 vehicle allowance the superintendent will receive for the year ended June 30, 2014, appears unreasonable. Using the mileage rate allowed by the IRS for business travel during 2013 (56.5 cents per mile), the superintendent would have to travel over 26,000 business-related miles within the school district during the year to earn this vehicle allowance reimbursement. This number of miles is considerably more than the 4,284 actual business-related miles he drove his district-provided vehicle during calendar year 2012.

In order to fully disclose the total compensation of each employee, vehicle allowances provided should be included in annual employment contracts and approved by the Board. In addition, vehicle allowances should be based on a reasonable estimate of miles driven for in-district business purposes.

Recommendation

The School Board ensure vehicle allowances are included in employee contracts. In addition, the School Board should review vehicle allowances and set the allowances to reasonably reflect the actual expenses incurred by the applicable employees.

Auditee's Response

The School Board provided the following written response:

Beginning in April 2013 through June 30, 2013, the District required staff who received the vehicle allowance during the 2012-13 to document their business mileage to determine the appropriateness of the vehicle allowance amount. The analysis was reviewed resulting in the need for additional study to comprehensively address vehicle allowances. District administrative staff is currently investigating options to provide an adequate level of compensation for vehicle allowances while attending to the recommendations within this report. The Board of Education negotiates the Superintendent's contract and no longer provides the Superintendent with a vehicle allowance.

5. Land Purchase

The district purchased land without properly obtaining an appraisal. In December 2012, after consulting with applicable parties concerning the identification and evaluation of potential sites, the district purchased approximately 51 acres of land to be used for the district's fourth middle school at a cost of $775,000. The district negotiated this purchase with the seller, and comparable sales pricing and past district site purchase costs were utilized to validate the purchase price. However, without an independent appraisal of property purchased, the district has less assurance the price paid represents the fair value of the property.

To ensure a reasonable price is paid for land, good business practice requires the Board obtain formal appraisals prior to purchase for all potential sites under serious consideration.

Recommendation

The School Board obtain appraisals prior to purchase for any sites under serious consideration for purchase.

Auditee's Response

The School Board provided the following written response:

The District agrees that an appraisal, where appropriate, may provide an assurance of reasonable prices for land purchases.

The District utilizes a site selection process, under the supervision of the Comprehensive Facility Master Plan (CFMP) Team, to work with individuals, the development community, various municipalities, private property owners, architectural consultants and other organizations and agencies to procure future school sites. The most recently purchased property, a site for a proposed Middle School #4, was compared to five other site options, negotiated for sale, and presented by the CFMP Team to the Board of Education for approval. The budget was estimated at $1.3 million and purchased at a price of $750,000. The purchase price per acre was $15,196 as compared to the $28,031 average per acre cost of the last three District sites purchased. The District realtor and consultant did not recommend an appraisal. Two school board members serve on the selection team.

Lee's Summit R-VII School District
Organization and Statistical Information

The Lee's Summit R-VII School District is located in the southeast portion of the Kansas City metropolitan area. The district covers approximately 117 square miles and serves the communities of Lee's Summit, Greenwood, Lake Lotawana, Lake Winnebago, and a portion of Kansas City, as well as unincorporated areas of eastern Jackson County.

The school district operates 3 senior high schools (grades 9-12); 3 middle schools (grades 7-8); 18 elementary schools (grades K-6); an alternative secondary school; a secondary technology academy; an early education center; and a special-education, day-treatment school. Enrollment was 17,534 for the 2012-2013 school year. The district employed 2,343 regular full- and 159 regular part-time employees at June 30, 2013.

The Lee's Summit R-VII School District has been classified under the Missouri School Improvement Program as "Accredited" by the Missouri Department of Elementary and Secondary Education.

School Board

An elected board acts as the policy-making body for the district's operations. The board's seven members serve 3-year terms without compensation. Members of the board at June 30, 2013, were:

Ron Baker, President
Jack Wiley, Vice-President
Patti Buie, Member
Phyllis Balagna, Member
Terri Harmon, Member
Chris Storms, Member
Bob White, Member

Superintendent

The district's superintendent at June 30, 2013, was Dr. David McGehee. His annual compensation was $258,660, which included a deferred compensation allowance of $19,716, family medical insurance of $15,377, and association expenses of $12,000. He was also provided a district vehicle for business and personal use. The superintendent's compensation is established by the Board.

Missouri State Auditor

Olive Graeser Transportation Development District

February 2014

Report No. 2014-009

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Olive Graeser Transportation Development District

Supervision	The Olive Graeser Transportation Development District (TDD) Board does not provide adequate oversight of the TDD's financial transactions. The Board does not receive monthly financial statements, copies of bank account statements, or copies of bank reconciliations performed by the development firm.
Compliance with Legal Provisions	The TDD's budgets do not contain all elements required by state law, and the Board did not obtain documentation from the contractor demonstrating compliance with prevailing wage provisions on the district's project.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Management Advisory Report - State Auditor's Findings
1. Supervision....4
2. Compliance with Legal Provisions....4

Organization and Statistical Information 6

THOMAS A. SCHWEICH
Missouri State Auditor

Steve Heitz, Chairman and Executive Director
and
Board of Directors
Olive Graeser Transportation Development District
Creve Coeur, Missouri

We have audited certain operations of the Olive Graeser Transportation Development District in fulfillment of our duties under Section 238.272, RSMo. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2012. The objectives of our audit were to:

1. Evaluate the district's internal controls over significant management and financial functions.

2. Evaluate the district's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the district's management and was not subjected to the procedures applied in our audit of the district.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Olive Graeser Transportation Development District.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditors:	Rex Murdock, M.S.Acct.
	Wayne Kauffman, MBA

Olive Graeser Transportation Development District
Management Advisory Report
State Auditor's Findings

1. Supervision

The Olive Graeser Transportation Development District (TDD) Board does not provide adequate oversight of the financial transactions of the TDD. The Board is not receiving monthly financial statements, copies of bank account statements, or copies of bank reconciliations performed by the development firm.

District resolution 12-008 authorizes the City of Creve Coeur to perform accounting and bookkeeping services for the Board, but requires the Board to receive monthly financial reports and copies of bank reconciliations performed of district accounts. Without adequate reviews of financial documents, the Board has little assurance TDD financial transactions are proper.

Recommendations

The TDD Board review and approve financial records and bank reconciliations.

Auditee's Response

The TDD Board provided the following written response:

The District sales tax revenue is collected by the State of Missouri, and remitted directly to the Trustee. The Trustee makes all distributions of funds in accordance with the trust indenture. In addition, the Board reviews and approves the annual financial statements of the District. In addition, the City of Creve Coeur has been appointed by the Board to provide accounting services for the District. As such the City reviews and approves monthly bank reconciliations. Although we believe the aforementioned controls are sufficient to ensure accuracy of the District's financial records, monthly financial records and bank reconciliations will be distributed to Board members beginning with the month ended January 31, 2014.

2. Compliance with Legal Provisions

Budgets are not in compliance with state law and documentation for prevailing wages was not obtained.

2.1 Budgets

Budgets prepared and adopted by the Board do not contain all elements required by state law. The budgets for the years ended December 31, 2012 and 2011, did not include a budget message or a comparative statement of actual or estimated revenues or expenditures for the preceding 2 years.

Section 67.010, RSMo, requires the budget present a complete financial plan for the ensuing budget year and outlines the various information to be included in the budget. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool.

2.2 Prevailing wage

The Board did not receive documentation from the contractor to demonstrate compliance with prevailing wage provisions on the district's project. The Board Chairman indicated the Board did not believe monitoring

prevailing wage requirements was necessary because a union labor force was utilized on the project.

The cooperative agreement between the TDD and the Missouri Department of Transportation requires the district and its subcontractor to pay the prevailing hourly rate of wages for each craft or type of worker required to complete the roadway project as determined by the Missouri Department of Labor and Industrial Relations. In addition, Sections 290.210 to 290.340, RSMo, provide requirements regarding prevailing wages.

Recommendations

The TDD Board:

2.1 Ensure budgets contain all information required by state law.

2.2 Ensure adequate documentation is submitted to substantiate prevailing wages are paid on construction projects as required by state law.

Auditee's Response

The TDD Board provided the following written responses:

2.1 The District is now aware of the requirement to include a budget message and a comparative statement of actual or estimated revenues and expenditures for the preceding two years in its annual budget. This information was included in the 2013 Budget, and will be included in future years.

2.2 The District required in its contract with the general contractor that performed the TDD work that the general contractor comply with all laws pertaining to prevailing wages and that the general contractor include in all of its contracts with subcontractors the same provision. The District will require in any future construction projects performed by the District, in addition to the aforementioned requirement, a requirement that the contractor certify to the District that the contractor and its subcontractors have complied with all laws pertaining to prevailing wages.

Olive Graeser Transportation Development District
Organization and Statistical Information

The Olive Graeser Transportation Development District (TDD) is located in the City of Creve Coeur. The TDD was organized in December 2009 by petition of the property owners within the proposed TDD. The members of the Board of Directors of the district are elected by the property owners and include a property owner, a representative from both the City of Creve Coeur and St. Louis County, and other members representing the property owners.

In December 2009, the qualified voters of the TDD, in this case the property owners, approved the imposition of a sales tax of up to 1-cent (1 percent) on all taxable transactions within the boundaries of the district. The Board of Directors subsequently passed a resolution that set the sales tax rate at 1-cent (1 percent), effective April 1, 2010, for 40 years, unless terminated sooner. The retail establishments within the district collect and remit the sales tax to the Missouri Department of Revenue (DOR). In turn, the DOR distributes the sales tax monies to the district.

The TDD was formed for the purpose of installing traffic signals at the intersection of Olive Boulevard and the Dautel Lane/Graeser Road alignment, widening Olive Boulevard, and installing medians within Olive Boulevard. The Missouri Department of Transportation, the City of Creve Coeur, and St. Louis County are the public entities with jurisdiction over these projects. These projects were completed in February 2011.

The TDD has a fiscal year end of December 31, and did not have independent audits performed during the 2 years ended December 31, 2012.

District Board

An elected board acts as the policy-making body for the district's operations. The board's eight members serve 3-year terms without compensation. Members of the board at December 31, 2012, were:

Steve Heitz, Chairman and Executive Director (1)
Bill Bierman, Member (1)
Denise Chomicki, Member (1)
Rick Matejka, Member (1)
Stacey Manolakas, Member (1)
Jeffrey Gershman, Member (2)
Garry Earls, Member (3)
Les Steinberg, Member (4)

(1) Property owner representative
(2) Property owner
(3) County representative
(4) City representative

Financial Activity

Project costs of approximately $2.6 million were paid by the developer, City of Creve Coeur, and St. Louis County. In February 2010, the TDD issued a $1.2 million revenue note (Series 2010A) pledging future sales tax collections to the developer. In November 2012, the TDD issued revenue notes (Series 2012A and 2012B) of approximately $1.3 million each, pledging sales tax collections for the payment of these notes. The Series 2012A note replaces the Series 2010A note and was issued to the City of Creve Coeur due to the city paying the developer the value of the Series 2010A note. The Series 2012B note consists of 3 notes with approximately $900,000 issued to the developer and approximately $200,000 issued to both the city and county, representing their monetary contributions to the project. No payments will be made toward the Series 2012B note until the Series 2012A note has been repaid. The principal and interest payments reflected in the summary of financial activity presented below represent payments currently being made to the City of Creve Coeur related to the Series 2012A note.

A summary of the district's financial activity for the 2 years ended December 31, 2012, follows:

		Year Ended December 31,	
		2012	2011
RECEIPTS			
Sales taxes	$	87,589	84,640
Acceptance fees		655	0
Interest		1	4
Other		42	0
Total Receipts		88,287	84,644
DISBURSEMENTS			
Administrative fees		12,000	15,233
Principal and interest		74,203	56,711
Trustee expenses		1,885	0
Total Disbursements		88,088	71,944
RECEIPTS OVER (UNDER) DISBURSEMENTS		199	12,700
BEGINNING CASH		41,812	29,112
ENDING CASH	$	42,011	41,812

THOMAS A. SCHWEICH
Missouri State Auditor

To the Special Administrative Board
and
The Board of Education
St. Louis Public School District

We have conducted follow-up work on audit report findings contained in Report No. 2013-085, *St. Louis Public School District*, issued in September 2013, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the district about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the district, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. As part of the AFTER work conducted, we reviewed the district's action plan, which was created in response to our audit report and is available on the district's website. We also reviewed supporting documentation submitted by district officials and held meetings with district officials. Documentation provided by the district included policies, contracts, and various financial records. This report is a summary of the results of this follow-up work, which was substantially completed during December 2013.

Thomas A. Schweich
State Auditor

St. Louis Public School District
Follow-Up Report on Prior Audit Findings
Status of Findings

1. Financial Condition

Although the district cut over $50 million in overall expenses from 2009 to 2011, the district had a deficit fund balance of approximately $55 million in its General (incidental) Fund at June 30, 2011. In November 2011, the district reached a settlement agreement to resolve school desegregation litigation with the state. The settlement provided funds to eliminate the district's deficit balance and provided additional revenues of $40.2 million through June 30, 2014, for several existing, new, or expanded programs.

Primarily as a result of the settlement agreement funding, at June 30, 2012, the district had a positive balance in its General Fund of approximately $12 million; however, the settlement agreement funding ends June 30, 2014, at which time the district may have to propose significant cuts or seek additional funding sources.

Proposed solutions were discussed in the district's 5-year financial plan, and included pursuing voter approval on a proposed property tax levy increase for operations and a bond issue, as well as continuing efforts to reduce workforce, and fixed and non-academic costs.

Recommendation

The Special Administrative Board closely monitor the district's financial condition due to the pending reduction in funding, and take appropriate actions as necessary.

Status

Implemented

At June 30, 2013, the district reported an unrestricted positive fund balance of $17.9 million. The district approved a fund balance policy with a goal of achieving an unrestricted fund balance in the General Fund equal to 10 percent of the aggregate expenditures in the General and Teachers Funds. If the unrestricted fund balance should fall below 3 percent, the Special Administrative Board (SAB) will develop a plan to replenish the unrestricted fund balance back to the designated minimum level within 12 to 24 months. Monthly financial statements and budget-to-actual reports are provided to the SAB.

2. Student Promotion and Retention

District policies and procedures regarding the promotion and retention of "at-risk" students were not fully compliant with state law.

The district's Office of Accountability performed an evaluation of 2011 summer school implementation and outcome data. This study concluded that the district's passing of "at-risk" elementary students who either failed to attend summer school or failed to progress enough during summer school to escape the "at-risk" category contradicted the intent of Section 167.645, RSMo, commonly referred to by the Department of Elementary and Secondary Education (DESE) and many school districts as Senate Bill 319.

Also, upon being classified as an unaccredited school district by the DESE in 2007, the district became subject to Section 162.1100.6, RSMo. When asked about the district's responsibility to comply with Section 162.1100.6, RSMo, a district official indicated the district did not have the resources to retain all students who were not reading at the required grade level, and full compliance with state law would place the district in undue financial hardship. The district adopted a new student promotion and retention regulation effective June 2012 to ensure compliance with Senate Bill 319, but did not address compliance with Section 162.1100.6, RSMo.

Recommendation

The Special Administrative Board comply with the recently adopted retention policy, continue to monitor the district's policies and procedures related to student promotion and retention, and work toward full compliance with state laws regarding student promotion and retention.

Status

In Progress

The district prepared a document titled Strategies and Timeline for Compliance, which details action steps to be implemented, estimated completion dates, and evidence available to support action step completion. The district provided professional development for school principals regarding promotion/retention policies, state laws, and the Strategies and Timeline for Compliance. The district has conducted reading assessments for students in grades 1-8 to determine reading levels and developed Individual Academic Plans for those students who are not reading at least one level below grade level. Completion of all action steps is expected by June 30, 2014.

3. Educational Programs

The district had not adequately evaluated numerous educational programs to determine their impact on student achievement. District policies, procedures, and regulations regarding the evaluation of educational programs were not followed or were out of date. In addition, the district's Accountability Plan was not adequately updated in a timely manner.

3.1 Curriculum management audit

A 2010 audit of the district's curriculum management included a review of program evaluation policies, plans, reports, and data pertaining to student assessment and program evaluation. The audit noted the existence of approximately 1,000 district programs, many of which were unknown to district administrators. The audit also noted that many programs were not subject to routine evaluation, and some applicable program evaluation policies were out of date or not being followed. The district reduced its Accountability Office staff from eight to two, limiting its ability to conduct program evaluations.

Recommendation

The Special Administrative Board identify all educational activities and programs and implement established policies which require regular reports

on the evaluation of programs. All evaluations should be coordinated and maintained by the Accountability Office. In addition, conflicting and/or out-of-date policies should be updated for consistency and accurately included on the district's website. Procedures should include written guidance for the continuation, modification, or termination of programs and require documented corrective action of formal evaluation findings and recommendations.

Status

In Progress

The district has updated its Evaluation Procedural Plan and various policies to be consistent with Missouri School Improvement Program 5 standards. The updated plan and policies have been placed on an upcoming meeting agenda for approval by the SAB. The district has also prepared updated lists of programs in place at elementary (205 programs), middle (147 programs), and alternative/secondary schools (188 programs). Selected program evaluations will be performed by the district Accountability Office and are due by September 30, 2014.

3.2 Accountability plan

The district's Accountability Plan was not always accurately updated in a timely manner. The district approved the plan in November 2009 to address action needed to fix issues identified during the Missouri School Improvement Program review, regain accreditation, and support the district's comprehensive long-range plan.

Due dates were established for the implementation of plan action steps, and progress was tracked throughout the year by the achievement of various benchmarks. The district's Project Management Office (PMO) periodically requested scorecards from action step owners to update the progress of each action step. Our review noted that owners of action steps did not always submit scorecard updates to the PMO in a timely manner, and evidence of completion of action steps was not always requested and reviewed by the PMO to ensure the accuracy of scorecard updates.

Recommendation

The Special Administrative Board ensure procedures are in place to accurately update the Accountability Plan in a timely manner, and ensure adequate documentation of completion of action steps is received and verified.

Status

In Progress

When the district achieved provisional accreditation in 2012, it was no longer required to maintain the Accountability Plan. The district has since created a Comprehensive District Improvement Plan, similar to the Accountability Plan, but with new goals and objectives. The draft 2013-2014 plan builds on prior plans, focusing on changes at the classroom level.

This plan is expected to be approved by the SAB after completion in February 2014.

4. Missouri Assessment Program Testing

The district did not perform timely follow up of Missouri Assessment Program (MAP) testing quality assurance monitoring. In addition, the district does not have a formal process in place to identify and investigate unusual fluctuations in MAP test scores.

In response to both national and local news articles regarding MAP testing irregularities, the district authorized monitoring procedures exceeding DESE requirements to help ensure 2012 MAP testing integrity. These steps included significantly increasing the number of testing monitors as well as the frequency of monitoring visits.

4.1 Quality assurance monitors

The district assigned at least one employee to each school to serve as Quality Assurance Monitors (QAM) for the 2012 MAP testing, and hired seven independent QAMs to provide additional monitoring at selected schools.

In early June 2012, we performed a review of Quality Assurance Assessment District Self-Monitoring Forms (monitoring forms) completed and submitted by QAMs to the district Accountability Office. At that time, the district had not received approximately 100 required monitoring forms from several QAMs for approximately 30 schools. At our request, the Accountability Office contacted the QAMs in an attempt to collect the missing monitoring forms. We performed a follow-up review in late June 2012 and noted no monitoring forms had been submitted for three schools, and less than the minimum four monitoring forms had been submitted for another 12 schools. In addition, two of the independent QAMs paid by the district had not submitted any monitoring forms. Per a district official, no monitoring tool was developed to determine if the independent QAMs complied with the agreed-upon procedures.

Recommendation

The Special Administrative Board ensure monitoring provided for future MAP testing is adequately documented, and follow up is performed to ensure all monitoring forms are submitted in a timely manner.

Status

In Progress

District officials indicated they will ensure monitoring provided for the Spring 2014 MAP testing is adequately documented and all monitoring forms are submitted in a timely manner. The district follows DESE-required procedures for MAP testing monitoring.

4.2 Analysis of test results

The district did not have a formal proactive process to identify and investigate unusual fluctuations in school MAP test scores from year to

year. In addition, the district did not adequately utilize test data to identify schools that should have been monitored more closely in subsequent years.

Recommendation

The Special Administrative Board adopt a formal proactive process to annually identify and investigate unusual testing occurrences.

Status

Partially Implemented

The district sent a survey to the St. Louis Assessment Resource Association requesting MAP testing follow-up procedures from area school districts. Of the 30 districts that responded most indicated they review test results and drill down after results are received; however, no districts reported a method for conducting investigations based on those results. District officials indicated they will implement a proactive process to identify and review unusual testing occurrences for the Spring 2014 MAP testing, and plan to use this analysis for instructional planning purposes, but they currently do not plan to perform investigations of unusual occurrences unless directed to do so by the DESE.

5. Purchasing Policies and Procedures

District procedures for procuring and selecting contractors for goods and services needed improvement.

5.1 Procurement procedures

The district did not always competitively bid purchases of goods or services or routinely solicit requests for proposals (RFP) for professional services. Multiple purchases in 2012 did not undergo competitive bidding, as required by the district's Purchasing Guide. In addition, we noted concerns with the documentation of sole source procurements.

Recommendation

The Special Administrative Board ensure bids and proposals are periodically solicited for all goods and services, and sole source procurements are adequately documented as required by district policy.

Status

In Progress

The district updated its Purchasing Manual to include additional guidance on procurement, bidding, and bid evaluations; contract payments; and monitoring vendor performance. This update includes the development of a Procurement Process Audit to be performed quarterly by the Chief Financial Officer. The updated manual also includes detailed procedures and flowcharts outlining each phase of the process, as well as several new or updated forms and reports to be utilized to more adequately document each phase of the process. Standard contract language has also been developed to be included in all district agreements. The district has developed a schedule to train approximately 800 staff and principals on the updated procedures. Training is expected to be completed in March 2014. A contract database is

also currently in development and will be used to identify the appropriate term/duration of all contracts and monitor the RFP/bid process.

5.2 Bidding procedures and evaluations

The district received only one bid for each of several large construction projects. The district had little response to bid solicitations for several construction projects at various schools related to the district's recent $155 million bond issue (Prop-S bonds). Bidding procedures for these projects included RFPs posted on the district's website, and mass email notifications sent out to a large number of vendors identified by the district. However, for one such mass email, recipients included non-construction companies and did not include other construction companies awarded previous district projects. For another project, the district could not provide documentation of sending a mass email notification to identified vendors.

The district received several proposals from vendors for employee benefit enrollment and eligibility services and employee benefit management services; however, the district could not locate the evaluation sheets and evaluation summary for this procurement decision.

In addition, district staff did not always complete evaluation sheets or a summary documenting the scoring of evaluation criteria for procurement decisions.

Recommendation

The Special Administrative Board implement improved bidding procedures, and ensure adequate documentation is maintained to support procurement decisions.

Status

In Progress

In addition to updating the Purchasing Manual and developing a training schedule as indicated in the status of finding number 5.1, district officials indicated the district has begun advertising bid opportunities in local publications on a weekly basis.

6. Contracts and Disbursements

District procedures for contracting for goods and services, classification of independent contractors, and payment of vehicle allowances needed improvement.

6.1 Legal services

The district had not performed a cost analysis to determine if it would be more economical to hire employees to provide legal services. In addition, the district used the same law firm as its primary legal counsel since 2007 without periodically soliciting proposals for these services. Legal services expenses averaged $2.46 million annually for the past 4 years.

Recommendation

The Special Administrative Board perform a cost analysis for legal services and consider appropriate action as necessary.

Status	**In Progress** A cost analysis prepared by the district indicates cost savings of over $500,000 annually could eventually be realized by hiring its own attorneys. The analysis suggests; however, that this transition would be made over time. The analysis highlights advantages and disadvantages for both hiring its own attorneys and continuing to contract with legal firms, and makes recommendations for implementation. District officials indicated further action is on hold until the State Board of Education makes a decision regarding reappointment of the members of the SAB, whose current tenure ends June 2014.
6.2 Contract payments	While board resolutions were adopted for the authority to spend money on certain contracts, the district made several payments to contractors prior to obtaining a signed contract or contract amendment.
Recommendation	The Special Administrative Board enter into timely written agreements and contract amendments prior to the commencement of services.
Status	**In Progress** See status of finding number 5.1 regarding updates to the district's Purchasing Manual and development of a training schedule and contract database.
6.3 Monitoring of vendor performance	The district did not adequately monitor some service contracts, and some contracts had vague or non-existent monitoring criteria. In addition, evaluation of prior year performance by vendors was not always documented, or was not documented prior to contract renewal as required by the district Purchasing Guide.
Recommendation	The Special Administrative Board enter into detailed written agreements defining the services to be provided and the benefits to be received. In addition, the SAB should ensure contracts are monitored for compliance and vendor performance is adequately documented.
Status	**In Progress** See status of finding number 5.1 regarding updates to the district's Purchasing Manual and development of a training schedule and contract database.
6.4 Contracts with former employees	The district may not have been following Internal Revenue Service (IRS) rules when hiring former employees as independent contractors.

For the year ended June 30, 2012, four former district employees who retired from the district and were receiving retirement benefits were paid as independent contractors to perform similar duties to the ones they previously performed as employees. Considering IRS rules and the district's control over the working hours of these individuals, it appears these persons should have been considered employees and paid wages with applicable taxes withheld, and the earnings reported on Forms W-2.

Recommendation

The Special Administrative Board follow IRS guidelines when hiring employees.

Status

Implemented

The four former employees who retired from the district and were working as independent contractors are no longer working for the district. District officials indicated IRS guidelines will be followed in future situations.

6.5 Vehicle allowances

The district did not properly report to the IRS monthly vehicle allowances paid to the Superintendent and the former Chief Financial Officer. Neither was required to submit to the district documentation of mileage incurred for district purposes, and these allowances were not reported on their W-2 forms. In addition, the vehicle allowances did not appear to be reasonable.

Recommendation

The Special Administrative Board follow IRS guidelines when paying vehicle allowances. In addition, the SAB should review all vehicle allowances and set the allowances to reasonably reflect actual expenses incurred.

Status

Implemented

The district no longer provides vehicle allowances to any district employees and provides reimbursements for actual mileage incurred for official district business.

7. Closed Session and Committee Meeting Minutes

The district did not publicly report some decisions made in closed SAB meetings or document how some issues discussed in closed meetings were allowable under the Sunshine Law. In addition, committee meeting minutes are not always prepared and approved in a timely manner.

7.1 Closed session minutes

The district did not announce in an open meeting, or otherwise publicly disclose, items that were approved in closed sessions as required by the Sunshine Law. Those approved items included the sale of school buildings and an amendment to a district lease agreement. In addition, we identified some instances where the closed meeting minutes disclosed discussion of issues not allowable under the Sunshine Law, such as approval of a

licensing agreement and an easement, the district budget, and lobbying and legislative issues.

Recommendation

The Special Administrative Board ensure all closed session votes and the related actions are publicly disclosed as and when required, and items discussed in closed meetings are allowable topics under the Sunshine Law.

Status

Implemented

District officials indicated they would ensure all closed session votes and the related actions are publicly disclosed as and when required, and items discussed in closed meetings are allowable topics under the Sunshine Law. The results of closed session meetings are now posted on the district's website along with comments explaining a record of each member's vote on certain matters is available to the public upon request and how to obtain this information.

7.2 Committee meeting minutes

Some SAB committee meeting minutes are not prepared and approved in a timely manner. For example, the Finance Committee minutes from March through June 2012 were not prepared until July 2012 and had not been approved as of July 31, 2012.

Recommendation

The Special Administrative Board ensure minutes are prepared and approved in a timely manner and maintained for all applicable committee meetings in accordance with the Sunshine Law.

Status

Implemented

Meeting minutes for district committee meetings are now available on the district's website.

8. Henry Elementary Follow-up

The district had not fully implemented all audit report recommendations cited in our audit report No. 2011-66, *St. Louis Public School District, Patrick Henry Downtown Academy - Enrollment and Attendance Recording and Reporting*, issued in September 2011. This audit was performed in response to concerns that school attendance and enrollment data were being falsified at the Patrick Henry Downtown Academy (Henry Elementary). From the evidence collected, it appeared enrollment and attendance data was manipulated; however, the district had not updated and corrected attendance data submitted to the Department of Elementary and Secondary Education, and had not fully implemented an audit trail logging feature to monitor changes to the student information system database.

Recommendation

The Special Administrative Board continue to review attendance data and update, correct, and approve the data submitted to the DESE for Henry Elementary as appropriate. In addition, the Board should ensure the audit

trail log is reviewed periodically and applicable changes to attendance investigated if necessary.

Status

In Progress

The district is in the process of quantifying the discrepancies noted in the audit, and the SAB has approved authorization to repay DESE up to $145,000 (the initial estimate of the potential liability) for any excess funds received. The district has formed an Attendance Committee to review attendance for every school on a weekly basis, identifying and examining major fluctuations and recommending any corrective action. The district is in the process of hiring an internal auditor whose job functions will include performing periodic audits of attendance records. The district's Student Information System was enhanced in 2012 to keep information on changes to any attendance records, including who made the change and the date of the change. The system does not produce an audit trail log, but allows the district to audit this additional information for any school or individual student attendance record.

9. Audit Functions

The district had not implemented many recommendations made by the district's independent auditor, some of which had been repeated for several years. In addition, the district did not have an internal audit function.

9.1 Annual independent audits

Numerous recommendations were made by the district's independent auditor in the district's financial statement audit report for the year ended June 30, 2012. Many of the recommendations had not been fully implemented and had been repeated from prior years, including several material internal control weaknesses over financial reporting. The auditors also identified material weaknesses in internal controls over compliance related to the district's federally funded programs. District officials indicated some of the audit recommendations had not been implemented due to accounting system, staffing, and/or budgetary constraints.

Recommendation

The Special Administrative Board ensure corrective action plans for audit findings are implemented in a timely manner.

Status

In Progress

The independent audit for the year ended June 30, 2013, indicates several of the prior recommendations have been fully or partially implemented. However, district officials indicated some of the recommended improvements would require additional financial commitments that would have to be approved by the SAB before further progress is made.

9.2 Internal audit

The district had financial activity of more than $370 million annually, and numerous compliance and policy requirements. Several control weaknesses

were noted by the district's independent auditor. However, the district did not have an internal audit function. The district had an internal auditor as recently as December 2011 and in the past had an employee that performed some internal audit functions; however, this employee was also assigned several non-audit related tasks. As a result, internal audits were limited mainly to emergency requests and fraud allegations. Interviews for the internal audit position were held in 2012 and a candidate was identified; however, contract terms could not be finalized. Also in 2012, the District issued a request for proposal and received bids for an internal business review; however, district officials indicated that project was put on hold when our audit began.

Recommendation

The Special Administrative Board consider hiring an internal auditor to conduct audits of district operations and activities and who reports directly to the Board.

Status

In Progress

The district has posted the opening for an Internal Auditor on its website and is in the process of receiving applications. District officials indicated they are considering hiring a search firm to help identify additional qualified applicants.

Thomas A. Schweich

Missouri State Auditor

Compilation of 2013 Criminal Activity Forfeiture Act Seizures

February 2014

Report No. 2014-011

auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Compilation of 2013 Criminal Activity Forfeiture Act Seizures

Compliance with Submitting Required Reports	For property seized during calendar year 2013, the State Auditor received all of the total possible 116 Criminal Activity Forfeiture Act (CAFA) reports from prosecuting attorneys and the Attorney General. All but two counties, Carroll and Cedar, submitted the required copy of the CAFA report to the State Auditor by the January 31, 2014, deadline, although Carroll County did timely submit its report to the Department of Public Safety (DPS). Five counties submitted the required copy of the report to the State Auditor but did not submit a copy of the report to the DPS as is also required.
Disposition of Seizures Reported	Of the $4,615,518 reported seized in 2013, the disposition was reported as follows: $1,776,653 pending, $384,568 returned, $2,300,764 transferred to a federal agency, $116,220 transferred to the state, $2,513 other, and $34,800 disposition not reported.
Compliance with Reporting Required Information	The 116 reports received reported 615 total cases. Some of the reports did not include all of the required information, such as date, time, and place of seizure, estimated value of property seized, criminal charges filed, and disposition of criminal actions.

Because of the nature of this compilation, no overall rating is provided.

II. 2013 CAFA Seizures Required Information Reported.....9

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
Jefferson City, Missouri

As required by Section 513.607, RSMo, we have compiled the 2013 Criminal Activity Forfeiture Act (CAFA) seizure reports submitted to the State Auditor by prosecuting attorneys and the Attorney General. The compilation is limited to presenting information that is submitted. We have not audited the reports submitted and, accordingly, do not express an opinion or any other form of assurance on them. The primary objectives of this compilation were to:

1. Compile the 2013 CAFA seizure information reported.

2. Identify those officials who submitted 2013 CAFA seizure reports to the State Auditor.

Section 513.607, RSMo, requires prosecuting attorneys and the Attorney General to report CAFA seizures for the previous calendar year by January 31, to both the Director of the Department of Public Safety and the State Auditor. Of the 116 potential reporting entities, we received 116 CAFA seizure reports; 114 of these reports were submitted by the required due date of January 31, 2014.

Compliance with Section 513.653, RSMo, which requires law enforcement agencies involved in using the federal forfeiture system to submit reports regarding federal seizures and the proceeds therefrom to both the Department of Public Safety and the State Auditor's office, will be separately reported.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
In-Charge Auditor:	Becky Webb, CPA, CFE
Audit Staff:	Dana Wansing, MPA

Compilation of 2013 Criminal Activity Forfeiture Act Seizures Executive Summary

Compliance with Submitting CAFA Seizure Reports

The State Auditor received all of the total possible 116 CAFA seizure reports from prosecuting attorneys and the Attorney General for property seized during calendar year 2013. All but two of the 116 reports were received by the January 31, 2014, deadline. The following table lists the total number of CAFA seizure reports submitted to the State Auditor for 2013, 2012, and 2011.

Reporting Status	2013		2012 [1]		2011 [1]	
By January 31	114	98.3 %	114	98.3 %	95	81.9
After January 31	2	1.7	2	1.7	19	16.4
Total Reported	116	100.0	116	100.0	114	98.3
Did Not Report	0	0.0	0	0.0	2	1.7
Total Possible Reports	116	100.0 %	116	100.0 %	116	100.0

[1] Includes CAFA seizure reports submitted by prosecuting attorneys to the State Auditor after the annual compilation reports were issued.

Two counties (Carroll and Cedar) submitted the required copy of the CAFA seizure report to the State Auditor after the reporting deadline. The Carroll County report was submitted to the Missouri Department of Public Safety (DPS) prior to the deadline, but was not received by the State Auditor until after the deadline. Both agencies received the Cedar County report after the deadline.

In addition, we contacted the DPS to determine CAFA seizure reports received by the DPS. We determined five counties (Caldwell, Christian, Crawford, Dunklin and Howard) submitted the required copy of the CAFA seizure report to the State Auditor, but did not submit a report to the DPS.

Section 513.607.10, RSMo, states intentional or knowing failure to comply with any reporting requirement shall be a class A misdemeanor punishable by a fine of up to $1,000.

Disposition of the Seizures ReportedSeizures Reported

We compiled the disposition of all seizures as reported by prosecuting attorneys and the Attorney General for property seized during calendar year 2013. The following table lists the overall dollar value of the dispositions by category as reported to the State Auditor for 2013, 2012, and 2011.

Reported Disposition	2013		2012 [1]		2011 [1]	
Pending	$ 1,776,653	38 %	$ 1,982,551	32 %	$ 1,410,410	21 %
Returned	384,568	8	311,430	5	391,258	6
Transferred to Federal Agency	2,300,764	50	3,734,293	62	4,707,994	70
Transferred to State	116,220	3	83,868	1	158,589	3
Other	2,513	0	2,290	0	14,808	0
Disposition Not Reported	34,800	1	20,186	0	0	0
Total	$ 4,615,518	100 %	$ 6,134,618	100 %	$ 6,683,059	100 %

[1] Includes CAFA seizure reports submitted by prosecuting attorneys to the State Auditor after the annual compilation reports were issued. Reports of 2011 seizures that were received after the annual compilation report was issued did not include the dollar value of seizures; therefore, the 2011 information in this table did not change.

See Appendix I for a list of the 2013 CAFA seizures disposition reported by each prosecuting attorney and the Attorney General.

Compliance with Reporting the Required Information

Section 513.607.8, RSMo, requires prosecuting attorneys and the Attorney General to report the date, time, and place of the seizure; property seized; estimated value of the property seized; person(s) from whom the property was seized; criminal charges filed; and disposition of the seizure, forfeiture, and criminal actions. For the 615 cases reported in the CAFA seizure reports received, the following table lists the required information and the number of cases that reported each required item. Some reports did not include all of the required information; therefore, our compilation includes only the information reported.

Required Information	2013		2012 [1]		2011 [1]	
Date	614	99.8 %	556	99.6 %	510	100.0 %
Time	472	76.7	433	77.6	395	77.5
Place of Seizure	614	99.8	555	99.5	508	99.6
Property Seized	615	100.0	558	100.0	506	99.2
Estimated Value of Property Seized	604	98.2	536	96.1	493	96.7
Person(s) Property Seized From	615	100.0	558	100.0	510	100.0
Criminal Charges Filed	357	58.0	330	59.1	266	52.2
Disposition of Seizure	615	100.0	558	100.0	510	100.0
Disposition of Criminal Actions	498	81.0	425	76.2	412	80.8
Total Cases Reported	615	100.0 %	558	100.0 %	510	100.0 %

[1] Includes CAFA seizure reports submitted by prosecuting attorneys to the State Auditor after the annual compilation reports were issued.

See Appendix II for a list of the number of 2013 CAFA seizure cases that contained the required information reported for each prosecuting attorney and the Attorney General.

This appendix compiles only the information reported to the State Auditor by prosecuting attorneys and the Attorney General. We did not verify this data. In analyzing this appendix, some disparity may result due to different methods used by the various prosecuting attorneys and the Attorney General in presenting essentially the same information. In addition, not all seizure reports included an estimated value of the property seized.

* One case reported listed a dollar range for the estimated value of property seized. We used the higher value for this report.

** The prosecuting attorney refused the case, but the sheriff has not returned the seizure.

*** A seizure was reported as turned over to the county treasurer for distribution to schools.

This appendix compiles the total number of 2013 CAFA seizure cases, the total estimated value of cases reported, and the number of cases that reported the required information by each prosecuting attorney and the Attorney General. We did not verify this data. In analyzing this appendix, some disparity may result due to different methods used by the various prosecuting attorneys and the Attorney General in presenting essentially the same information. In addition, not all seizure reports included an estimated value of property seized.

Missouri State Auditor

Hickman Mills C-1
School District

March 2014

Report No. 2014-012

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Hickman Mills C-1 School District

Financial Condition	The district's financial condition has improved but is still below the minimum recommended level. While further reductions in expenditures may be necessary, some reductions can be accomplished through more efficient management practices and more effective controls and procedures.
Superintendent Search Process	The Board did not follow its policies or state law when selecting a new superintendent. The Board did not solicit proposals for a search firm and allowed the search firm to participate in negotiating the new superintendent's contract, even though its fee was contingent on the starting salary. The search process was not well planned and the fee arrangement was significantly higher than it would have been had the Missouri School Board Association been used to conduct the superintendent search.
Superintendent's Leave Usage and Payout	The district did not solicit proposals for auditing and legal services related to former Superintendent Dr. Marjorie Williams' leave balances and did not make the completed audit public or share it with the full Board. District records showed Dr. Williams was owed $195,000 in leave payout, the formal audit determined she was owed $150,000, but the Board paid only $72,000. Subsequently, Dr. Williams sued and the district had to pay an additional $90,000. The Board did not monitor Dr. Williams' absences or leave, and, according to district records, she used only 3 days of vacation leave during her last 7 years of employment, the accuracy of which some Board members have questioned.
Board Oversight and Contract Payments	Board members have not been providing adequate oversight. The Board made several decisions with less than a majority of members' approval and failed to obtain written contracts with some vendors. In addition, some contracts were not provided to district administrative personnel and the failure to compare supporting documentation to a contract resulted in an overpayment to one vendor.
Sunshine Law	The district did not always comply with the Sunshine Law and held numerous improper closed meetings.
Capital Assets	The district's capital assets records are not complete, accurate and up to date, and the district cannot account for all iPads purchased and assigned to district personnel.
Procurement Cards	The district needs to improve controls over procurement cards. Approval of procurement card statements and supporting documentation is not done in accordance with administrative procedure, numerous purchases were unallowable or appear unreasonable, and the district lacks policies and controls for the use and distribution of student incentives.
Staff and Board Meals	The district does not separately account for meals and food purchases for the Board or employees, and food purchases were often made without documenting the purpose or those in attendance.
Employee Attendance	Board policy prohibits teachers from using more than 10 professional leave days in a year, but 25 teachers used more than 10 days and two teachers used more than 20 days. Board policy also prohibits employees from using more than 20 days of leave in a year, but 23 employees exceeded 20 days.

Questionable Transactions	The district made several disbursements that did not have a clear school district or educational purpose.
Travel	Board members and/or employees traveled to numerous conferences in out-of-state locations. The district spent $26,000 for all 7 members of the Board, the former Interim Superintendent, and former Board Secretary to attend a 3-day conference in Boston, during which former Board President Anderson attended only one training session, Board member Mims attended only 2 training sessions, and the former Board Secretary attended 5 sessions, none of which covered board secretary duties. Four Board members attended the same 3-day conference in San Diego, CA in 2013, at which former Board President Anderson received only 181 minutes of training. Meal advances were not calculated correctly, and audit staff found a net overpayment of $515 for the tested transactions. Former Superintendent Dr. Marjorie Williams was on travel 39 days during her last year before retirement, including two out-of-state conferences during her last month of employment with the district. The district has no policy in place for employees traveling by car to the same destination on the same dates.
Purchases and Contracts	District personnel did not always solicit bids or proposals for purchases when required by district policy. The district has used the same provider to serve as financial advisor and bond underwriter for several general obligation bond issues, and sold these using a negotiated sale, which violates district policy. In addition, the district does not adequately monitor employment contracts with several employees retired under the Public School Retirement System.
MAP Testing	The district did not ensure all Missouri Assessment Program testing administrators completed the required training prior to administering tests in April 2012.
Backup Data	Some backup data is not stored at a secure off-site location, which could impair the district's ability to recover in the event of a disaster.
Mileage and Fuel Logs	The district has not established effective monitoring procedures regarding fuel and vehicle use, increasing the risk of loss, theft or misuse.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

To the Board of Education
Hickman Mills C-1 School District

The State Auditor conducted an audit of the Hickman Mills C-1 School District under authority granted in Section 29.205, RSMo. We have audited certain operations of the district in fulfillment of our duties. The district engaged Westbrook & Co., P.C., Certified Public Accountants (CPAs), to audit the district's financial statements for the year ended June 30, 2012. To minimize duplication of effort, we reviewed the CPA firm's audit report. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2012. The objectives of our audit were to:

1. Evaluate the district's internal controls over significant management and financial functions.

2. Evaluate the district's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties; site visits; inspection of capital assets; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the district's management and audited financial reports and was not subjected to the procedures applied in our audit of the district.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the district.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Richard Stuck
Audit Staff:	Richard Mosha, MBA
	Lindsay Pearson, CPA

Hickman Mills C-1 School District
Management Advisory Report
State Auditor's Findings

1. Financial Condition

The financial condition of the district has improved over the last 3 years, but is still below the minimum level recommended by the district's independent auditor, which is a cash balance as a percentage of expenditures of 24 percent. An already low unrestricted cash balance, along with falling revenues, required reductions in district expenditures to improve the district's reserve balance. These reductions in expenditures were primarily accomplished through reductions in the numbers of teachers and teachers' aides. The following table depicts actual school years 2010 through 2012 financial information for the unrestricted operating funds (General Fund and Special Revenue Fund):

	School Year		
	2011-2012	2010-2011	2009-2010
Beginning Balance	$ 7,107,231	6,102,149	5,372,536
Revenues	73,941,219	73,274,447	79,459,043
Less: Expenditures	71,290,694	71,469,721	77,716,696
Less: Net Transfers	167,151	799,644	1,012,734
Ending Balance	$ 9,590,605	7,107,231	6,102,149
Ending Balance as Percentage of Disbursements	13.45%	9.94%	7.85%

Source: District's Annual Secretary to the Board Report (ASBR)

During school year 2012-2013, the district continued to make improvement in its overall financial condition. The district ASBR report shows revenues remained fairly steady, increasing to $74.1 million, while expenditures decreased to $68.6 million, resulting in an unrestricted fund balance of $15.1 million at June 30, 2013. Reductions in the number of teachers and teachers' aides were again one of the reasons for the decrease in expenditures.

Enrollment has fluctuated, going from 6,445 students in school year 2009-2010 to 6,131 in school year 2010-2011 to 6,052 in school year 2011-2012, and then rising to 6,348 in school year 2012-2013. The ratio of students to classroom teachers has gone from 16 to 20 during this same period. While improvement in the financial condition of the district is underway, our audit identified numerous instances of inefficient spending and a general lack of regard for procurement/purchasing policies, or in some instances override of district policies by the elected Board members and administration. Ensuring district funds are spent in the most efficient and effective manner should be a top concern of the Board to avoid further reductions in teaching resources.

The district was downgraded to provisional accreditation in September 2012 for failing to meet the number of accreditation standards required for full accreditation. While improvement in the areas discussed in this report will not affect the accreditation status of district, it will likely make available valuable resources that can be used in addressing the district's educational

deficiencies. These areas include questionable selection methods for some consulting contracts done in a less than transparent manner, lack of bids or proposals for many purchases, lack of accountability over capital assets, and inappropriate or unreasonable purchases and expenditures. The Board needs to take action to ensure policies, procedures, and records are in place to address the areas of concern included in this report.

While further reductions in expenditures may be necessary, some of these reductions can be accomplished through more efficient management practices and more effective controls and procedures.

Recommendation

The School Board closely monitor and take appropriate action to ensure the long-term stability of the district's financial condition.

Auditee's Response

The School Board provided the following written response:

The district accepts the State Auditor's findings. The Board will closely monitor the financial condition of the district. Prior to the receipt of the audit report, the current Superintendent and Board enacted processes to prevent the cited instances of questionable conduct from continuing to occur. The specific measures undertaken are discussed in more detail as responses to specific concerns cited later in this audit.

2. Superintendent Search Process

The district's former Superintendent, Dr. Marjorie Williams, retired in June 2012 and the process followed by the Board to select a new superintendent was not conducted in a public manner, did not adhere to established Board policies or state laws, and was likely more costly than necessary.

Some Board actions taken during school year 2012-2013 regarding this transition and the review of the former Superintendent's leave balance, were not conducted in public or with the full knowledge of all Board members. The State Auditor's office was forced to issue a subpoena to obtain many of the documents discussed in this finding and Management Advisory Report (MAR) finding number 3, some of which should have been approved or disclosed publicly. In addition, we deposed former Board President Anderson in October 2012 to answer questions under oath regarding the matters discussed in sections 2.1 and 2.2 and MAR finding number 3.

As early as March 2011, the meeting minutes document Board discussion of former Superintendent Dr. Marjorie Williams' intent to retire as of June 30, 2012. A succession plan was orally presented by the former Superintendent to the Board in August 2011. This plan called for the promotion of Dr. Everlyn Williams to Deputy Superintendent in September 2011, and her to become the Interim Superintendent in July 2012. The minutes of the August 2011 meeting indicate there was some discussion at this meeting about performing a superintendent search at that time, but ultimately the Board approved the succession plan presented and delayed the search process. The

former Superintendent submitted her official resignation to the Board in December 2011. Deputy Superintendent Dr. Everlyn Williams took over as Interim Superintendent in July 2012. However, just 4 months later in October 2012 the Board, without any documented open or closed meeting discussions regarding the Interim Superintendent's performance, took action to hire Acting Superintendent Barbara Tate (see MAR finding number 4.1). Former interim Superintendent Dr. Everlyn Williams was reassigned in October 2012 within the district to other duties, which remained unspecified as of December 2012, and without a change in salary ($150,000) or title. She was assigned to a district elementary school to assist the principal, whose salary was approximately 60 percent of her salary. It is unclear how this action benefited the school or the principal since Dr. Williams' official duties were never documented.

The current Superintendent, Dennis L. Carpenter, Ed.D., who was identified by a search firm, officially started on July 1, 2013.

The manner in which the Board went about replacing the former superintendent lacked clear direction and was not well planned. The decision-making process and the availability of information and documents were less than transparent and casts doubt on the integrity of the search process.

2.1 Superintendent search

The district did not solicit proposals for superintendent search services. In addition, the fee arrangement with the selected search firm was significantly higher than it would have been had the Missouri School Board Association (MSBA) been used to conduct the superintendent search.

While the district knew in March 2011 the former Superintendent was retiring, no public discussion of finding a permanent replacement for the superintendent was held by the Board until July 2012. At its July 26, 2012, closed meeting, the minutes indicate the Board voted to suspend its rules and immediately voted to approve a contract with Gallagher Benefit Services, Inc. (Gallagher) for superintendent search services. At the previous Board meeting, held on July 19, 2012, former Interim Superintendent Dr. Everlyn Williams distributed information to the Board on the superintendent search services offered through the MSBA. It is unclear why the Board took no action to solicit a proposal from the MSBA or even contact the association about these services. In sworn testimony, former Board President Anderson stated Gallagher was recommended to him, he determined the firm performed search services, and no other proposals were sought regarding these services.

Considering the length of time the district had to prepare for the search process, suspending rules for procuring professional services and not acting on the Interim Superintendent's suggestion of contacting the MSBA to seek

a proposal points to poor decision making and appears unjustified. A thoughtful, well-documented process, obtained at a reasonable cost, is important to ensure quality candidates are identified and taxpayer dollars are spent wisely.

2.2 Conflict of interest and search fee

Gallagher, the search firm which performed the superintendent search for the district, was involved in the contract negotiations with the new superintendent. Allowing the search firm to be involved in contract negotiations gives the appearance of a conflict of interest, as the firm's fee was contingent on the starting salary. In addition, the amount actually paid to Gallagher exceeded the contractual fee and was significantly higher than the MSBA's estimated fee to perform the superintendent search.

The contract with Gallagher, which was among the documents subpoenaed by our office, called for a fee of 20 percent of the successful candidate's first year compensation. A Gallagher representative was allowed to participate in the contract negotiations discussed at the November 20, 2012, closed meeting of the Board. Discussion at this Board meeting included salary amounts, which would appear to be a conflict since Gallagher's fee would later be based on the negotiated starting salary. In addition, we discussed the selection of and fee structure for the Gallagher contract with several Board members in April 2013 and most of those members we spoke with recalled both the Gallagher proposal and a firm representative stating a set fee of $30,000. They indicated they were not allowed to keep a copy of the proposal from Gallagher and had not seen the contract with this firm (see MAR finding number 4.2). The compensation for the new Superintendent is $180,000, which based on contract terms should have resulted in a fee of $36,000. However, the actual amount paid to Gallagher was $36,490 (see MAR finding number 4.2).

We contacted the MSBA to determine its fee structure for superintendent search services. A MSBA representative told us the charge would have been a fee of 8 percent of the first year compensation ($14,400 in this situation) plus a maximum of $1,500 in expenses. The representative also stated MSBA searches typically identify at least 15 to 20 qualified candidates for a district this size. One Board member, who served on the committee reviewing applications submitted to the district, told us in his opinion only 2 of 9 applicants were actually qualified for the position.

Having a contingency contract and allowing the contractor to be involved in the negotiation of salary, upon which the fee is based, appears to be a conflict of interest. In addition, approving a contract where the terms and compensation are not clear to all Board members can result in misunderstandings and potentially lead to the district paying more for services than was anticipated.

Recommendations

The School Board:

2.1 Ensure Board policy is followed in procuring professional services and Board decisions and votes on contracts are appropriately publicly disclosed.

2.2 Ensure vendors paid through contingency contracts are not involved in associated contract negotiations.

Auditee's Response

The School Board provided the following written responses:

2.1 The District accepts the State Auditor's findings. While deficiencies were noted in past conduct, the District has a renewed focus on accountability. The current Superintendent has implemented procedures to ensure that contracts for professional services are publicly bid. Additionally, the current Superintendent added a monthly Work Session to discuss contract issues and other related items that were previously included under the Consent agenda and consequently not discussed.

Most recently, Requests for Proposals for legal services and architectural services were published, publicly discussed and approved at properly noticed public meetings.

2.2 The District accepts the State Auditor's findings. Prior to receiving this audit, the District began working with MSBA to review and revise its policies. By June 2014, the District will adopt modified MSBA policies. The District will include a policy that prohibits contingency contracts with vendors.

3. Superintendent's Leave Usage and Payout

The former Superintendent, Dr. Marjorie Williams, accumulated a significant amount of accrued leave (vacation and sick) that she was to be paid for upon retirement per her employment contract. In December 2011 she provided written notice to the Board of her intent to retire on June 30, 2012, and indicated she would be requesting a payout of her accrued leave upon retirement. The district hired an audit firm to review the leave balances of the former Superintendent and a law firm to handle the legal aspects of this matter. The actions taken by the Board related to this payout request were not transparent and were often not done in accordance with district policies or state laws. Our review of these actions revealed the following concerns.

3.1 Audit of former Superintendent Dr. Marjorie Williams' leave balance

Proposals were not taken to select a firm to conduct a human resource audit of the former Superintendent Dr. Marjorie Williams' leave balances. In addition, upon completion of the audit, the final report was not issued publicly and, in fact, was not provided to the full Board. Former Board President Anderson received the audit from People Wise of Missouri, Inc., (People Wise), a human resource management firm hired to do the audit, and did not provide it to the other members of the Board.

At the closed Board meeting on May 17, 2012, a request was made to the district's general counsel to provide information regarding the superintendent's accumulated leave balances at the next Board meeting in June 2012. The minutes indicate the board then voted to suspend its rules to allow approval of a contract with People Wise to audit the leave balances of the former Superintendent. No reason was given for suspending the bidding rules, although the amount paid exceeded the threshold established by Board policy when solicitation of bids or proposals would be required. In addition, the contract was not disclosed in any subsequent Board meeting and had to be subpoenaed by our office (see MAR finding number 4 for further discussion of this contract).

The audit report issued by this firm was dated June 25, 2012, but was not presented to the Board. The results of the audit indicated that all uses of leave by the former Superintendent were not reflected in the district's leave records and various audit adjustments were made. The audit concluded the adjusted records equated to an accrued payout of approximately $150,000 and recommended the district negotiate a settlement and address deficiencies in its leave record keeping procedures. The cost of the audit was approximately $5,200.

Section 610.021(17), RSMo, states all final audit reports are to be considered open records. Board policy 1075 requires bids or proposals for all goods or services in excess of $5,000. In addition, Board policy 1230 indicates no one Board member has the authority to act on his/her own in making decisions for the Board.

3.2 Superintendent leave payout

Proposals were not solicited for legal services related to the leave payout of former Superintendent Dr. Marjorie Williams. In addition, there was no contract or engagement letter detailing the scope and cost of the services (see MAR finding number 4.2). Former Board President Anderson was authorized at the June 12, 2012, Board meeting, in closed session, to work with the district's legal counsel to select an attorney to review the requested leave payout. A law firm, Holman Schiavone, LLC, was identified and selected by the former Board President to provide legal services for matters involving the former Superintendent, but there is no documentation this action was voted on and approved by the Board.

In the closed Board meeting held on June 26, 2012, an attorney from this firm presented her findings and opinion regarding the leave payout and orally recommended paying the former Superintendent approximately $72,000. This amount is significantly lower than the amount due according to district records, approximately $195,000, and the approximately $150,000 leave payout determined by the audit. Board members received no documentation supporting this recommended payout. Board members we interviewed indicated the attorney made reference to reviewing the leave audit report in her presentation, but they were not provided a copy of it. The Board approved paying approximately $72,000 to the former Superintendent for her accrued leave in this closed meeting on the oral advice of the attorney, apparently without knowing the leave audit reported significantly different conclusions.

We requested the district provide us the documentation prepared by the attorney to support the payout, but we were originally denied access to it. We issued a subpoena to the district for this documentation and received the document the attorney prepared. A comparison of the calculations made by the attorney and calculations in the leave audit report identified a mathematical error regarding the leave balance. This error carried forward to the attorney's documentation of the payout amount. While this error only overstated the accrual by one day, or approximately $700 (one day's pay for the former Superintendent), it may have been identified had the Board been provided the documents in question prior to approving the payout.

The district paid Holman Schiavone, LLC $16,770 for its work on this matter. Dr. Marjorie Williams filed a lawsuit against the district in May 2013 and the matter was turned over to the district's insurance carrier to handle all legal aspects of the lawsuit. A settlement was reached between Dr. Marjorie Williams and the district in November 2013. The settlement terms called for the district to make 3 payments totaling $90,000 to Dr. Marjorie Williams or her representatives. These payments are in addition to the approximately $72,000 previously paid to her. Considering the amount spent for the attorney and leave audit, the total amount expended by the district to settle this matter was approximately $184,000. In addition to the settlement payments made to Dr. Marjorie Williams, the district also paid its share of the payroll taxes and benefits on the gross settlement amounts. Had the results of the leave audit been shared with the Board and the recommendation to pursue a settlement been followed, the district may have been able to settle this matter for less money and without incurring additional legal costs.

3.3 Leave monitoring

The Board did not monitor former Superintendent Dr. Marjorie Williams' absences, approve leave requests, or monitor vacation and sick leave used by the former Superintendent. The contracts between the former Superintendent and the district allowed her to accumulate a significant

amount of leave days. District records show the former Superintendent used only 3 days of vacation leave during her last 7 years of employment. Several Board members indicated they believe this number of days was inaccurate based on their knowledge of her absences. Failing to require anyone to approve or monitor the former Superintendent's leave balances resulted in the district not knowing the accuracy of the balances. Had district personnel or the Board been actively monitoring leave usage and balances, this issue could likely have been settled without expending additional taxpayer dollars for an audit and without litigation.

Recommendations

The School Board:

3.1 Ensure all district documents are made available to the full Board and release the final audit of the former superintendent's leave balance as required by state law.

3.2 Ensure proposals are sought for legal services in the future and approval of contracts for services are clearly documented.

3.3 Develop procedures to ensure leave usage and balances of the superintendent are monitored.

Auditee's Response

The School Board provided the following written responses:

3.1 The District accepts the State Auditor's findings. By June 2014, the Board will adopt a policy to ensure that all public documents are available for review by Board members. Further, the District will make public the audit of leave days conducted by People Wise of Missouri, Inc.

3.2 The District accepts the State Auditor's findings. In September 2013, the District published a Request for Proposal for Legal Services. In October 2013, the District selected legal counsel and entered into a three-year contract for legal services. The contract sets forth the duties and responsibilities of legal counsel as well as the rates for said services.

3.3 The District accepts the State Auditor's findings. The District has implemented a procedure for the Superintendent to submit leave requests to the Board President for approval. By contract, the Superintendent will use vacation in the year accrued or be paid for accrued days at the end of the year.

4. Board Oversight and Contract Payments

Board members have not provided adequate oversight to ensure established controls are in place and followed. Deviations from normal procedures were allowed and controls were circumvented by certain members of the board.

4.1 Board decisions

We identified instances where decisions were made on behalf of the Board by less than a majority of the members, which overrides Board policy. Some decisions were made by a single member of the Board, or based on discussions between multiple Board members, but not a quorum. The following instances were noted where decisions were either made by less than a quorum, or if made by a quorum, there is no supporting documentation:

- The minutes of the closed session on May 17, 2012, indicate a contract with People Wise was approved on that date; however, an invoice indicates the firm charged the district 1.5 hours for work on May 15, 2012, two days prior to the meeting and contract approval. There is no documented discussion of this topic in any previous meeting, and during sworn testimony the former Board President stated he acted on his own in identifying this audit firm. This leaves us to conclude the work was authorized to start prior to obtaining Board approval.

- During discussions with several Board members, we learned they were unaware former Board President Anderson was planning to propose reassigning Interim Superintendent Dr. Everlyn Williams and hire an Acting Superintendent at the October 15, 2012, closed session of the Board. A review of the minutes shows no discussion on this topic was held in the months prior to this action. It is unclear who on the board contacted the former Acting Superintendent to gauge her interest in the job, but this matter was placed on the agenda of that meeting by the former Board President.

- A letter dated July 16, 2012, was sent to the district's health insurance company informing it the district was changing its insurance broker, even though this action was not approved by the Board until a July 19, 2012, public meeting. Committee minutes noted discussion among the finance committee members regarding making a change, but the change in broker appears to have occurred before being approved by the Board.

- A payment of $250 was made in October 2012 to the Alpha Kappa Alpha debutante ball fundraiser for a one page ad in its brochure advertising the event. This payment was made on behalf of the former Board Secretary's daughter, who was not a student in the district. This request was identified as questionable by district administrative staff and was not originally paid when requested. District staff stated to us

they were instructed by former Board President Anderson to prepare the check and have it ready to be picked up by him. Several Board members we interviewed indicated they were unaware this payment was made. This payment is an improper use of district funds and should not have been paid.

Allowing less than a majority of the Board to make decision undermines the authority of the Board and violates district policy. Board policy 1230 states the Board shall act as a committee-of-the-whole and no individual members or group comprised of less than the full membership shall exercise the powers of the full Board. In addition, Board policy 1050 states no contract shall be let, teacher employed, bill approved, or warrant ordered unless a majority of the whole board shall vote therefore.

4.2 Contracts and payments

Controls requiring district personnel to compare documentation supporting disbursements to a written contract were overridden by former Board President Anderson, resulting in an overpayment to one vendor. Written contracts were not obtained with some vendors or were not provided to district personnel in some instances.

- The district does not possess a signed contract with People Wise, the firm hired to audit the leave records of former Superintendent Dr. Marjorie Williams (see MAR finding number 3.1). While the minutes of the closed meeting on May 17, 2012, indicate a contract was presented for review, we were informed, and later confirmed during discussions with several Board members, that former Board President Anderson was the only Board member who had seen or had a copy of the contract. We made repeated requests for this contract with district officials who informed us they did not have the contract for this service. Eventually, after attempting to get a copy of this contract for months, we were forced to issue a subpoena to obtain the contract from the former Board President. The copy provided to us is unsigned.

- The contract with Gallagher, the firm selected to perform the superintendent search (see MAR finding number 2.1), was not provided to district administrative officials. The contract called for a fee of $36,000, or 20 percent of the first year compensation paid to the Superintendent, which was $180,000. The contract states all expenses will be covered in the overall fee and there would be no additional costs. The district received and paid 5 invoices from Gallagher totaling $36,490. The invoices also included reimbursement for expenses of $1,958. Based on the allowable fee per the contract, the vendor was overpaid $490. Four of these 5 invoices documented approval for payment by former Board President Anderson. The normal expenditure approval process does not involve Board members reviewing and signing off on invoices. Board members indicated to us they had

concerns that the proposal they were provided to review when considering approval of this agreement included different terms than the actual contract possessed by the former Board President. One Board member was actually forced to make a Sunshine Law request to obtain the signed contract with this firm. Our office made repeated requests for this contract and eventually had to issue a subpoena before being provided a copy by the former Board President. Had this contract been provided to district personnel, the overpayment likely would have been identified.

- The Board, subsequent to the superintendent search contract, voted to hire Gallagher to audit the district's human resources personnel files, but again, no contract was provided to administrative personnel. In August 2012, Former Board President Anderson expressed concerns about the way the former Human Resources (HR) Director was handling personnel files and indicated to former Interim Superintendent Dr. Everlyn Williams his intent to have the former HR Director reassigned and hire Gallagher to audit the personnel files. The former Interim Superintendent provided us an email she sent to all board members prior to the August 23, 2012, closed meeting reminding them of bidding policies and that the state offered assistance in identifying firms with expertise in human resources matters. She stated to us she informed the Board members she was against reassignment of the HR Director, and stated an audit of HR was unnecessary, the selection of Gallagher was in conflict with board policy 1075, and was a potential conflict of interest. The Board subsequently voted to reassign the former HR Director to another school and approved hiring Gallagher. We had to subpoena the district to obtain a copy of this contract. The contract called for a payment of $3,000 for the HR audit, but the district stated no invoice was ever presented for these services. The audit report was not provided to Board members or administrators for their review.

- The district paid the law firm selected to review the leave matters related to former Superintendent Dr. Marjorie Williams $16,770 (see MAR finding number 3.2) without administrative personnel being provided a contract for these legal services. There is no documentation in the minutes to indicate hiring this firm was approved by the board. Former Board President Anderson reviewed and approved 5 of the 6 invoices submitted by this firm. The normal expenditure approval process does not involve Board members reviewing and approving individual invoices.

Section 432.070, RSMo, requires all contracts be in writing. Written agreements should clearly specify the services to be rendered and the amount of compensation to be paid. Such written contracts lessen the opportunity for misunderstandings between the parties involved. In addition,

those contracts should be on hand for review by district personnel when invoices are submitted to be paid ensuring the district is receiving the services for which it is being billed.

Recommendations

The School Board:

4.1 Ensure decisions are not made by less than a majority of Board members and ensure all contracts are signed and in writing in accordance with state law.

4.2 Ensure written contracts exist for all services and are provided to district administrative officials.

Auditee's Response

The School Board provided the following written responses:

4.1 The District accepts the State Auditor's findings. The District conducts all business in duly called and noticed meetings. All contracts are approved by a majority of Board members and are available to Board members, staff and the public for reference and review.

4.2 The District accepts the State Auditor's findings. The District recognizes that contracts provide a framework for services and allow the District and the public to understand the scope and nature of services provided to the District. RSMo §432.070 states that all contracts shall be in writing; however, the vendor bears the ultimate risk in not having a contract as that vendor may have no redress against the District.

Prior to receiving this audit, the District began working with MSBA to review and revise its policies. By June 2014, the District will adopt modified MSBA policies. The District will include a policy that will require written contracts for professional services and will ensure that all written contracts are available to Board members, staff and the public for reference and review.

5. Sunshine Law

The district did not always comply with the Sunshine Law and held numerous improper closed meetings.

5.1 Closed meetings

The Board held 28 closed meetings from July 2011 through December 2012, but did not always follow various requirements in Chapter 610, RSMo (the Sunshine Law).

- The Board did not provide evidence that notice was provided to the public of the time, date, place, and specific reason for the closed meeting regarding any of the 28 closed meetings as required by state

law. Agendas for these closed meetings were either not available publicly or did not disclose the specific reason for the closed meeting.

- The Board discussed some topics in closed meetings that are not allowable under the Sunshine Law. According to minutes of closed meetings, unallowable topics included the information technology (IT) director discussing the need for additional network storage, budget issues and amendments, and the need to improve Missouri Assessment Program (MAP) scores.

- The Board voted on and approved several contracts in closed session and did not subsequently disclose those votes in an open meeting. In several instances, such as the Superintendent search contract and the Superintendent leave records audit contract; the approved contracts were not treated as public records and were handled by former Board President Anderson as closed records. As a result, there are various contracts the district is a party to that the public has no knowledge of.

- The district did not notify former Interim Superintendent Dr. Everyln Williams she was being reassigned in October 2012 before notifying the public of this decision.

To ensure compliance with state law, the Board should give advance notice of its closed meetings and the specific reason for the closure, restrict discussion in closed meetings to the allowable topics listed in the Sunshine Law, disclose in open session the approval of all contracts, and ensure employees are properly notified of personnel actions taken against them.

5.2 Public disclosure

The Board does not always make public the final disposition of legal matters discussed in closed meetings. Three lawsuits were approved for settlement by the district during school year 2011-2012. The district's financial responsibility in these settlements was $205,000. The final resolutions were not publicly disclosed as required by law.

Section 610.021(1), RSMo, requires any minutes, vote or settlement agreement relating to legal actions, causes of action or litigation involving the school district or any agent or entity representing its interests or acting on its behalf or with its authority, including any insurance company acting on behalf of the district as its insured, shall be made public upon final disposition of the matter voted upon or upon the signing by the parties of the settlement agreement, including the terms of the settlements.

5.3 Custodian of records and sunshine law requests

The district has not developed a policy regarding public access to district records and does not maintain a log of public requests for records. A formal policy regarding access to district records would establish guidelines for the district to make the records available to the public. This policy should establish a custodian of records, allowable methods for submitting a request

for access to records, and a fee schedule for document retrieval and research. Without a log of public requests, the district cannot ensure or document all requests are handled in compliance with the Sunshine Law. In addition, the district did not maintain the minutes of board and committee meetings in an orderly manner. Minutes of meetings were not always readily available upon request. For example, some minutes we requested in June 2012 were not provided by the former Board Secretary until December 2012.

Section 610.023, RSMo, lists requirements of making district records available to the public and provides each request for access to public records shall be acted upon as soon as possible, but in no event later than the end of the third business day following the date the request was received by the custodian of records of a public governmental body. To ensure compliance with state law, the district should document adequate information in a log to determine if requests are completed timely and all requests are adequately filled. Necessary information includes, but is not limited to, the date of request, a brief description of the request, the date the request is completed or reason why the request cannot be completed, and any associated costs of filling the request.

Recommendations

The School Board:

5.1 Ensure notice and the specific reasons for a closed meeting is given to the public, items discussed in closed meetings are allowable topics under state law, all votes to approve contracts are announced publicly, and the guidelines for notifying personnel of decisions made in closed session are followed.

5.2 Ensure the final disposition of legal matters discussed at closed meetings is made public as required by state law.

5.3 Establish written policies and procedures regarding public access to district records, maintain a public request log, and maintain minutes of all meetings in an orderly manner so they are readily available when requested.

Auditee's Response

The School Board provided the following written responses:

5.1 The District accepts the State Auditor's finding. The District uses Electronic School Board (ESB) that does not allow the posting of a closed agenda without disclosure of the full agenda and attached items. Because of that, ESB does not contain the District's public notice of closed meetings. The District posts agendas of closed meetings in its lobby consistent with State law. It is the only notice required by State law. The copies of agendas for the period in

question were not kept by the former Board Secretary and consequently weren't available to provide to the State Auditor.

The minutes reflect that some items were discussed in closed session that were not allowed by the Sunshine Law; however, no action was taken on any such item and these items were related to items properly on the closed meeting agenda. The District will ensure that discussions during future closed meetings relate only to items properly on the agenda.

The District did not notify Dr. Everlyn Williams of her change of assignment prior to former Board President Anderson announcing the decision at an open Board meeting immediately following the decision. Under the current Superintendent employees will be informed of personnel actions within 72-hours of the action and prior to public disclosure of the personnel action in accordance with State law.

In response to a complaint investigated by the Missouri Attorney General's office regarding Sunshine Law violations from a meeting led by former Board President Anderson in April 2013 to terminate legal counsel, the District received training on requirements of the Missouri Sunshine Law. Recommendations were implemented to ensure that the District currently complies with the Missouri Sunshine Law.

5.2 *The District accepts the State Auditor's findings, but disputes the legal conclusion drawn from the District's conduct. The District does not publish a list of settled or resolved lawsuits, but treats the information as public and provides such information upon request. The District believes that its practice complies with the Sunshine Law requirement that such information shall be made public.*

5.3 *Prior to receiving this audit, the District began working with MSBA to review and revise its policies. By June 2014, the District will adopt modified MSBA policies. The District will adopt a policy that designates the Board Secretary as the Custodian of Records and requires a log of all Sunshine Law requests. Currently, all Sunshine Law requests received by persons other than the Board Secretary are treated as received by the appropriate records custodian.*

The current Superintendent has directed the Board Secretary to keep a log of all Sunshine Law requests that includes a copy of the response.

Auditor's Comment

5.2 The meaning of the phrase "shall be made public" in Section 610.021(1) RSMo, is not defined in Missouri case law or through an Attorney General's opinion. However, employing the normal rules of statutory construction of giving words their plain and ordinary meaning, the phrase "shall be made public upon final disposition" is in active voice requiring a more affirmative action rather than just a passive response of making settlement agreements available only upon a request. Our interpretation of the meaning of the phrase "shall be made public upon final disposition" as it relates to settlement agreements leads us to conclude some action is required by the district to meet this requirement. Had the legislature's intent been for the final disposition of legal settlements to only be made available to the public upon request, we believe the language would convey that, since other sections of Chapter 610 use similar language in referencing disclosure of matters discussed and voted on in closed meetings. The district is using taxpayer money to settle lawsuits and should err on the side of full disclosure once all parties agree to a settlement and it is finalized.

6. Capital Assets

District personnel have not implemented adequate procedures to ensure property records are complete and accurate, and provide a basis for determining proper insurance coverage and accountability.

6.1 Records and procedures

The district's capital asset listing is inaccurate, is not always updated timely when purchases are made, and does not include some important information. In addition, an annual physical inventory of district assets has not been performed since at least 2006. As a result, district assets are more susceptible to theft or misuse. The capital asset listing as of September 30, 2012, included over 16,000 property items, which are located at the various schools and buildings within the district. It is unclear the total value of district capital assets because the listing does not include information on cost or market value of assets. During school year 2011-2012, the district purchased approximately $2 million in capital assets.

Of 60 items selected from the listing, only 24 items were present at the location the asset listing indicated. District personnel followed up on the remaining 36 items and located 14 of those items in different locations. Twenty-two items were not found, 3 of which were laptop computers. Based on our work documented in section 6.2, we determined iPads are not added to the capital assets records when purchased.

District administrative procedure 2012 details procedures for inventorying, disposing, and tracking asset transfers/movements. Board policy 2055 requires departments/schools to notify the administrative office when capital assets are disposed of so a listing can be presented before the Board for approval. Administrative directive 4000 (inventory instructions) states that

district building contents are to be updated annually and that the administrator in charge of each site will keep the purchasing agent informed of all building content changes in location. This directive does not indicate how the agent is to be notified and does not refer to any specific property movement forms.

Adequate capital asset records are necessary to secure better internal control over district property and provide a basis for determining proper insurance coverage on district property. Capital asset records should be maintained on a perpetual basis, accounting for property acquisitions and dispositions as they occur, and include a detailed description of the assets such as acquisition cost, descriptions, make and model numbers, and asset identification numbers; the physical location of the assets; and the date and method of disposition of the assets. All capital assets should be identified with a tag or other similar device, and the district should conduct annual physical inventories and compare the results to detailed records.

6.2 iPads

The district does not enforce its policy regarding the ordering of electronic equipment for the district. Administrative directive 9000 states to ensure compatibility, timely installation, training, and support, all orders for computer systems/software will be processed through the information technology (IT) department. Due to the lack of inventory procedures, discussed in section 6.1, and failure to ensure all electronic equipment is ordered through the IT department and added to the capital asset records, the district cannot account for all iPads purchased and assigned to district personnel.

As of September 30, 2012, asset records indicated the district owned 79 iPads and had an additional 25 iPads on loan from another school district as part of the Science Matters program. Based on discussions with personnel in the IT department, who expressed concerns that all electronic devices were not being ordered through their department, we requested the district provide an updated listing of iPads. District personnel then went through purchasing records and determined the district owned 139 iPads and had 47 on loan at that time. Based on this information, the initial district asset records only accounted for approximately half of the purchased and borrowed iPads. An additional 10 iPads were identified as being purchased by the district in October and November 2012.

We performed an inventory test of all iPads purchased by and on loan to the district as of November 30, 2012, which totaled 149 iPads purchased and 47 loaned iPads. Each school in the district was contacted and requested to make all district owned or borrowed iPads available for our review. After visiting all schools, some several times, we were able to locate only 83 of the 149 iPads purchased by the district (leaving 66 unaccounted for) and 25 of the 47 iPads on loan for the Science Matters program (leaving 22

unaccounted for). We were told at many schools that teachers did not have their iPads with them when we visited, even though we made multiple visits to some schools and notified the schools of our plans to locate the various iPads.

We provided a list of the unaccounted for iPads to district personnel for further follow up, and after several weeks district personnel were able to locate 58 of the 66 unaccounted for district owned iPads and all 22 of the borrowed iPads. Personnel indicated they believed at least 2 of the 8 missing iPads were stolen, but had no documentation to support this claim, such as a police report.

Other concerns identified during our test included:

- One employee informed us her iPad, purchased by the district, was her personal iPad and was given to her by the district in lieu of a monetary stipend for serving on a development committee. We followed up with district administrative personnel who indicated the district had originally planned to give the committee members iPads in lieu of compensation, but the stipends were instead paid and the iPads were district owned. Apparently there was a miscommunication in informing this teacher about the change in plans.

- Several iPad accessories, such as external keyboards and mice were purchased on procurement cards (P cards) without knowledge of the IT Department. We noted during our site visits some of these accessories were not being utilized and in fact some were still in their original packaging and had not been opened. If all accessories were purchased and distributed through the IT department, ensuring staff have the accessories necessary for their jobs would be more efficient and less wasteful.

- Many iPads did not have a district tag identifying them as district property.

Similar tests were not performed for other types of electronic equipment purchased by the district. Based on the poor results of our iPad accountability test work, the district needs to consider whether similar problems exist with accountability of other types of electronic equipment.

To reduce the risk of loss, misuse, or theft of district property, the district should complete an inventory of all assets, update capital assets records timely, tag all assets as district property, and ensure compliance with district policy regarding centralized purchasing of electronic equipment.

Recommendations

The School Board:

6.1 Ensure complete and detailed capital asset records are maintained, assets are properly tagged for identification, and annual physical inventories are performed and compared to detailed records. In addition, follow established policies and procedure when capital asset items are disposed of or moved to a different location.

6.2 Enforce district policy over how electronic devices and accessories in the district are purchased and ensure all those devices have a district tag attached. In addition, the administration should evaluate needs when determining who will be issued electronic devices, including iPads.

Auditee's Response

The School Board provided the following written response:

In March 2014, the District will ask the Board to approve a new inventory management system that will allow the District to create an inventory and track capital asset location and perform physical inventories to compare to the database in the inventory management system. The District will tag and identify all capital assets. The Superintendent will ensure district policy is followed regarding the purchase of electronic devices and will evaluate the issuance of devices in the future.

7. Procurement Cards

Controls over district P cards need improvement. The district had 44 P cards in use during school year 2011-2012. Approximately $328,000 was spent on P cards during this period. P cards are primarily assigned to board members, administrators, principals, and department heads. We reviewed P card purchases for 21 employees during school year 2011-2012, which included 945 transactions totaling over $132,000. District administrative procedure 2010 sets forth district policies for use of P cards. Several concerns were identified during our review.

7.1 Approval

Approval of purchase orders detailing P card purchases is not done in accordance with administrative procedure. The Associate Superintendent of Business is required by administrative procedure 2010 to approve all purchase orders prepared for P card purchases, except for purchase orders for purchases on his card, which are to be reviewed by the Superintendent. He was not always documenting a review of the purchase orders and supporting documentation for P card purchases.

Failure to follow district policy in the review and approval process for P cards has allowed some unnecessary and unreasonable charges to be paid with district funds.

7.2 Purchases

We identified numerous purchases that either are not allowed under district administrative procedures or appear unreasonable and do not appear to benefit the school district.

- District personnel used P cards to purchase numerous items specifically prohibited by administrative procedure 2010. These purchases included airline tickets ($7,870), car rentals ($1,557) and numerous capital expenditures (computer equipment and digital camera - $2,577), all of which are prohibited purchases with a P card.

- The former Superintendent had a recurring monthly charge for a data plan for her tablet computer, totaling $350 during school year 2011-2012. Recurring charges are prohibited by administrative procedure.

- We identified three district employees who parked a total of 11 times in the circle parking garage at Kansas City International airport, at a cost of $794, rather than the less expensive satellite parking lot, which is approximately half the cost of the garage.

- Flower and plant purchases totaling $682, including twelve dozen roses for the former Superintendent's retirement party at a cost of $180.

- A bath products purchase totaling $80 for a gift on administrative assistant's day.

- Teacher birthday celebration purchases totaling $403.

- Teacher appreciation dinners held by several principals totaling $1,317.

- iPad accessory purchases for 7 individuals totaling $901.

Enforcement of P card policies help prevent unnecessary or unreasonable charges. Public funds should be spent only on items which are necessary and beneficial to the district. District residents have placed a fiduciary trust in their public officials to spend district revenues in a prudent and necessary manner.

7.3 Incentives

The district has not developed policies regarding the use of student incentives and does not maintain documentation to support the distribution of student incentives purchased by teachers and school administrators. We identified approximately $6,100 P card purchases for student incentives during school year 2011-2012. Student incentives included electronics such as digital cameras, karaoke machines, Kindle tablets, laptop computers, and printers. Students are given these incentives for academic and athletic achievements, but the district maintains no records identifying the students,

the achievements met, the date of distribution, or evidence of receipt by the student.

Student incentives can be a valuable tool in improving attendance or other achievement standards set by the district. Adopting an overall district policy, including setting limits and procedures for issuing incentives, as well as documentation requirements for the distribution, will help ensure all gifts and awards are distributed equitably to students and used for the intended purposes.

Recommendations

The School Board:

7.1 Ensure policies and procedures are followed in regards to proper review of P card statements and supporting documentation.

7.2 Ensure prohibited purchases are not made on P cards and all purchases made on P cards are reasonable and prudent uses of public funds.

7.3 Develop a district-wide policy regarding the awarding of student incentives and ensure adequate documentation is maintained for the distribution of student incentives.

Auditee's Response

The School Board provided the following written responses:

7.1 The District accepts the State Auditor's findings. At the direction of the current Superintendent, the District reduced the number of procurement cards from forty-four (44) to four (4) to ensure better oversight and control of use of procurement cards. One card is utilized in the office of the Superintendent. The second card is utilized in the Robotics program at Ruskin High School. This card is "pre-loaded" by the business office with designated funds before purchases can be made. The third card is utilized in the business office and is only used upon the approval of the Comptroller. The fourth card is utilized in the business office for grant-related expenditures. This card is kept in the business office under the authority of the Comptroller and is used only after approval by the Assistant Superintendent or Superintendent, depending upon the type of expenditure.

7.2 The District accepts the State Auditor's findings. At the direction of the current Superintendent, the District reduced the number of procurement cards from forty-four (44) to four (4) to ensure better oversight and control of use of procurement cards. This oversight and control includes establishing and enforcing spending limits on the four procurement cards retained by the District.

7.3 The District accepts the State Auditor's findings. In response to a similar concern raised by the District's internal auditor, Westbrook and Co., P.C., the District instituted internal controls to verify that student incentives are actually received by the students. These controls include record keeping and reporting requirements confirming what incentives were purchased and to whom the incentives were given. Parents/guardians are required to sign a form acknowledging that the incentive was received by the student. The signed forms are kept in the business office.

8. Staff and Board Meals

The district does not separately account for meals and food purchases for the Board prior to meetings, employee meetings, training sessions, retirement receptions, employee recognition events, or lunches at local restaurants. As a result, total actual disbursements for food and meals cannot be determined, and the district's ability to monitor such purchases is hampered. In addition, food purchases were often made without documenting the purpose or those in attendance, and the district does not have comprehensive policies regarding district provided food and meals.

Our test work on expenditures to local restaurants, catering businesses, or grocery stores indicated a significant amount of money is spent for food and meals paid for through the accounts payable process. We reviewed 16 expenditures, totaling $10,700, for catered meals for staff or board meetings and retreats or other staff functions during school year 2011-2012. For example, in August 2011, the district spent $3,330 on breakfast and lunch for a 3 day staff retreat and $788 in June 2012 for a building and grounds staff meeting luncheon. Two of the 16 expenditures ($202) tested were for meals preceding Board meetings. The same vendor provided these services. Further review of food purchases from this vendor identified approximately $2,300 in additional expenditures for Board meeting related meals during school year 2011-2012.

We also identified a significant amount of food purchases from local grocery stores or local restaurants on P cards during school year 2011-2012. During our review of the 21 administrators' P card purchases (see MAR finding number 7.2), we found approximately $10,400 was for food or snacks for teachers or staff. These purchases included catered meals, pizza, sandwiches, bagels, donuts, etc., which appeared to be for groups of teachers or staff at various schools. Since we did not review all P card purchases, there could have been additional amounts spent for food.

To effectively monitor meals and food purchases, the district should implement an effective and accurate tracking system. Adequate documentation of food purchases including a list of attendees and/or general information stating who was served should be provided to substantiate food costs and these costs should be tracked by the district. In addition, the

district should develop comprehensive policies regarding food purchases in an effort to control and reduce these expenditures.

Recommendation

The School Board develop comprehensive policies regarding district-provided food purchases. These policies should establish specific guidelines regarding proper and allowable disbursements in this area along with documentation requirements for these expenditures.

Auditee's Response

The School Board provided the following written response:

The District accepts the State Auditor's findings. For the 2014-15 school year, the District will identify approved vendors from whom food/meals may be purchased. By establishing approved vendors, the administration will be better able to track and account for food/meal purchases.

As part of its policy review, the District will attempt to develop guidelines for when and how food/meals are provided for in-district meetings including but not limited to Board meetings, staff development and training.

9. Employee Attendance

The district needs to improve its enforcement of leave policies and monitoring of leave usage. According to district leave records, as of June 30, 2012, the district had an accrued leave liability of approximately $1.2 million for accrued sick/personal days and vacation for certain employees.

We reviewed sick/personal, vacation, and professional leave usage for all 984 staff members during school year 2011-2012, and identified the following violations of Board policy:

- Twenty five teachers used more than 10 professional days during the school year. Two teachers used more than 20 professional days, with one using 24.5 days. The district hires a substitute to work on days regular personnel are absent from the classroom.

  Board policy 3136 states no teacher will be absent for more than 10 days for professional leave during any school year.

- Twenty three staff members, 11 being teachers, used more than 20 days of leave during school year 2011-2012. None of these violations involved special circumstances, such as teachers covered under the Family Medical Leave Act (FMLA).

  Board policy 3025 states employees will not utilize more than 20 cumulative leave days during a school year unless the absences qualify for coverage under FMLA.

These violations of policy occurred because principals and/or other district administrative staff do not adequately monitor leave usage. The district explained that some violations of policies were necessitated to meet grant training requirements. However, our concern was that some district personnel were not aware of the policy limits, or the policies were simply disregarded.

Recommendation

The School Board ensure policies and procedures regarding employee attendance are followed or revised as necessary with supervisory review performed periodically to evaluate compliance.

Auditee's Response

The School Board provided the following written response:

The District accepts the State Auditor's findings. Prior to receiving this audit, the District began working with MSBA to review and revise its policies. By June 2014, the District will adopt modified MSBA policies. The District will review and update its policies and procedures regarding employee attendance as needed. Further, the District will include training for its administrators at its annual administrator training prior to the start of the 2014-15 school year.

10. Questionable Transactions

The district made various disbursements that did not have a clear school district or educational purpose; and in some cases there was no documentation to show that district personnel or students attended the event. In addition, the district may have improperly used federal Title I funds, which are restricted for improving the education of disadvantaged children, for some of these disbursements.

- The district purchased four tickets in April 2012 for the AdHoc Group Against Crime President's birthday party at a cost of $720. The invoice indicated no district personnel attended the function.
- The district paid $2,000 for a sponsorship for the 5th Annual Urban Summit - Youth Conference.
- The district paid $250 in October 2012 to the Alpha Kappa Alpha debutante ball fundraiser for an advertisement in its brochure for the former Board Secretary's daughter (see MAR finding number 4.1).
- The Board purchased flowers and plants for employees at a cost of $2,186
- The district paid for 50 parent registration fees for a charitable Restoration Walk/Run in May 2012 at a cost of $1,000. These registration fees were allocated to the federal Title I program.

- A sponsorship for the 2011 Kansas City Black Expo was purchased in September 2011 at a cost of $7,500, of which $5,000 was federal Title I funds. District personnel indicated the expenditure was for 2 booths at the Expo, at which Special Education tutors for the district were to recruit prospective students into their Special Education program. It is unclear why the district felt this Expo would be the most efficient way to identify students needing Title I services; however, a booth at the Expo only cost $500. The district also purchased a sponsorship, which included: VIP passes, advertisement on all Expo materials; and multiple booth spaces. The district maintained no records of personnel/individuals who used the VIP passes to attend this event. In addition, the district did not have documentation of how many students were contacted at the Expo or its method for determining what portion of the cost should be allocated to the federal Title I program was determined.

The Title I program is designed to help disadvantaged children meet high academic standards by participating in either a school-wide or a targeted assistance program.

Article VI, Section 25 of the Missouri State Constitution prohibits the use of public money or property to benefit an individual, association, or corporation, except as provided by the Constitution. In addition to being prohibited by the Constitution, these types of expenditures do not appear to clearly benefit the school district.

Recommendation

The School Board refrain from expending district funds on items that do not clearly benefit the district. In addition, ensure Title I funding is used in the manner for which it is intended and documentation is maintained for those expenditures.

Auditee's Response

The School Board provided the following written response:

The District accepts the State Auditor's findings. The current Superintendent has instructed the Comptroller and business office staff on protocols to determine the appropriate expenditure of funds. Further, the current Superintendent and current Board President will monitor requests for payment to outside groups to ensure an educational component exists and that the expenditure is reasonable for the educational benefit received.

The District will continue its practice of sending flowers or a plant upon the death of a staff member or the immediate family of a staff member because it is the District's belief that such an action demonstrates concern for its team and general decency.

11. Travel

During the fiscal year ending June 30, 2012, Board members and/or employees traveled to conferences in many out-of-state cities including: Alexandria, Virginia; Anaheim, California; Huntington Beach, California; Dana Point, California; Washington D.C.; Charlotte, North Carolina; Phoenix, Arizona; Knoxville, Tennessee; Salt Lake City, Utah; Orlando, Florida; New Orleans, Louisiana; Las Vegas, Nevada; Houston, Texas; and Boston, Massachusetts. In-state travel locations included: Lake of the Ozarks, Jefferson City, St. Louis, Sedalia, Columbia, Osage Beach, and Union.

As part of our testing, we reviewed travel expenses paid for 16 individuals (7 Board members, 1 secretary, 4 administrators, and 4 teachers) during the 2011-2012 school year.

11.1 Board travel

Travel costs for the Board more than doubled during the 2011-2012 school year from the previous year, primarily due to the increased attendance by Board members at the 2012 National School Board Association (NSBA) conference. District records indicate Board travel costs of approximately $36,000, $16,000, and $13,000 during the 2011-2012, 2010-2011, and 2009-2010 school years, respectively. We had concerns regarding the NSBA conference trips in both 2013 and 2012.

In April 2012, all 7 members of the Board, along with the former Interim Superintendent Dr. Everlyn Williams and the former Board Secretary traveled to Boston for the NSBA annual 3-day conference. There were multiple sessions offered for individuals to attend each of the 3 days of the conference and it was up to each individual attending to determine the sessions attended. The cost to the district for that trip was approximately $26,000, or almost $3,000 per attendee. These costs included approximately $1,500 spent for 3 rental cars for attendees to use while in Boston, even though the training sessions were held at the same hotel where the district representatives were staying.

We obtained the attendance data for each of the district representatives from the NSBA and noted the following:

- Former Board President Anderson only attended one session of training for less than one hour (56 minutes), which was not long enough to qualify for credit, during the 3-day conference. This session was on the morning of the first day of the conference.

- Board Member Mims only attended 2 sessions on the final conference day, for a total of 160 minutes of training.

- The former Board Secretary attended 5 sessions, completing 4, for 332 minutes of training. We also noted none of the courses she attended

were specifically designed for duties generally performed by board secretaries. It is unclear why the former Board Secretary attended this conference.

- Board members Curls, Cushing, Brown, Lowe, and Osman, and former Interim Superintendent Everlyn Williams attended from 7 to 9 sessions, averaging 583 minutes of training.

Based upon these concerns related to the 2012 NSBA conference, we applied limited procedures to determine the participation by Board members at the April 2013 conference held in San Diego, California. The 3-day conference was attended by 4 Board members, at a cost of approximately $2,000 per member. The 2013 NSBA conference attendance records showed the following:

- Former Board President Anderson attended 5 training sessions, although 2 of the sessions were at the same day and time. He attended one session for just 4 minutes and went to a different session. He completed 3 of the other 4 sessions, receiving just 181 minutes of training during the 3-day conference.

- Board members Curls, Osman, and Lowe, who also attended the conference, each attended 9 or 10 sessions, receiving an average of 710 minutes of training.

To incur significant costs to attend conferences and have certain Board members not use the opportunity to the fullest advantage possible does not seem reasonable and calls into question the necessity of attendance by some Board members.

11.2 Travel meals

Meals advances paid to district employees and Board members were not calculated correctly for some items we tested. The district typically prepays for meals at a per diem rate, which is established by Board policy, when employees and Board members travel. We reviewed various meal advances paid to certain district employees and Board members and identified numerous under and overpayments. There was a net overpayment of $515 for the individuals we tested. For example, the Board members and former Board Secretary were each advanced $225 for the NSBA conference in Boston in April 2012, although the advance allowable by policy was $200 for each attendee. The majority of the incorrect advances involved Board members or Superintendents, who apparently were not completing their own travel request forms, but were instead relying on the former Board Secretary to complete them.

To ensure compliance with Board policy regarding meal costs advanced for travel trips, each district employee or Board member should complete

his/her own travel per diem request form and the amounts should be checked for accuracy.

11.3 Former Superintendent's travel

Former Superintendent Dr. Marjorie Williams was out of the district offices 39 days for travel while attending conferences in various states during the school year 2011-2012. There is no limit set on the amount of travel a Superintendent can incur, but the travel incurred seems excessive considering she was retiring from the district on June 30, 2012. She attended training sessions or other conferences in Virginia, California (twice), Washington, D.C., Arizona, North Carolina, and Tennessee, as well as several events held in Missouri. Two of these out-of-state trips occurred during her last month of employment with the district.

District travel should be limited to necessary trainings or conferences to ensure district funds are spent wisely and teachers and administrators are making the best use of their time.

11.4 Former Board Secretary

The former Board Secretary attended both the NSBA training in Boston in April 2012 and the MSBA training held at the Lake of the Ozarks in September/October 2011. As indicated in section 11.1, the Board Secretary attended 5 training sessions in Boston, at a cost of approximately $3,000, although all 5 were geared toward Board members, not administrative personnel. It is unclear how many sessions were attended at the MSBA training, but former Interim Superintendent Dr. Everlyn Williams indicated only a part of one day's training was pertinent to a Board Secretary and in past years the Board Secretary only attended the MSBA trainings for the sessions applicable to her work. She also indicated she was unaware of the Board Secretary ever attending the NSBA training in the past several years.

Having a district employee travel unnecessarily for training is neither a prudent use of district funds nor efficient use of employee time.

11.5 Car pooling

The district does not have a policy in place for employees traveling by car to the same destination on the same dates. The district could operate more economically by limiting the number of personal cars for which mileage will be paid. We noted multiple instances where Board members and administrators attended trainings and most, if not all, of the attendees drove their own car and were reimbursed for mileage. A few examples include:

- The district reimbursed mileage of $177 each to 5 Board members, the former Interim Superintendent and the former Board Secretary when attending the MSBA conference at the Lake of the Ozarks in September and October 2011. Two Board members carpooled for this trip.

- The former Interim Superintendent and the former Associate Superintendent of Secondary Education traveled to the Lake of the

Ozarks for the same conference in June 2012 and were each reimbursed $177 for mileage.

- The former Superintendent and former Interim Superintendent traveled to Jefferson City for a legislative dinner in February 2012 and were each reimbursed $162 for mileage.

- The former Superintendent, former Interim Superintendent, and the former Associate Superintendent of Secondary Education traveled to the same meeting in Columbia in July/August 2011 and were each reimbursed $144 each for mileage.

To ensure districts funds are spent efficiently, the Board should evaluate the travel costs of attending educational conferences and consider requiring that employees carpool, if applicable.

Recommendations

The School Board:

11.1 Re-evaluate the amount of Board travel incurred and ensure Board members attending future trainings provide evidence of participation.

11.2 Ensure meal advances are calculated correctly and consider seeking reimbursement for overpayments.

11.3 Considering limiting and more closely monitoring the amount of travel allowed by the Superintendent.

11.4 Reconsider the amount of training required for the Board Secretary.

11.5 Adopt a policy for efficient travel by multiple district employees attending the same functions.

Auditee's Response

The School Board provided the following written responses:

11.1 The District accepts the State Auditor's findings. The District believes that attendance at the NSBA conference is important to Board member education and to understand and develop strategies necessary to effectively educate children. The District believes that its membership in the Council of Urban Boards of Education ("CUBE") is important in establishing relationships with other member districts and will assist the Board in providing effective leadership of an urban district. The current Board President will develop a protocol for Board member attendees to report on the sessions attended and for publication of attendance data for Board members.

11.2 The District accepts the State Auditor's findings. In the past, meal and mileage expenses were paid prior to attendance at the conference or seminar attended. The current Superintendent requires Board and staff members to seek reimbursement after attendance at a conference or seminar. Further, the attendees are required to submit agendas. If the agenda states that a meal is provided, the appropriate meal cost is deducted from the per diem. The current Board Secretary has been trained on this procedure and on the appropriate per diem amount. Also, each attendee is responsible for submitting his or her own request. The Board will consider whether the amounts in question are significant enough to warrant seeking reimbursement.

The amount of the meal allowance mirrors state and federal guidelines for travel.

11.3 The District accepts the State Auditor's findings. The current Superintendent recognizes the need to balance financial resources with the opportunity to participate in conferences and activities that will provide educational benefit to the District. The current Superintendent will submit to the Board President information on out-of-district and out-of-state conferences so that the amount of time and travel can be monitored by the Board.

11.4 The District accepts the State Auditor's findings. The current Superintendent and current Board President agree that it is not necessary for the Board Secretary to attend the NSBA conference; however, the MSBA conference has specific training for board secretaries. It is a one-day training and occurs prior to the start of the MSBA conference. The current Board President will monitor the Board Secretary's attendance at this conference to ensure that the Board Secretary attends only that portion of the conference necessary for appropriate training commensurate with her duties.

11.5 The District accepts the State Auditor's findings. Where possible, the District will ensure the most efficient use of travel by Board members and staff attending conferences and training; however, the District recognizes that many different factors go in to travel arrangements and it is not possible to adopt a single policy or procedure to effectively govern the travel of multiple attendees at the same function.

12. Purchases and Contracts

Bids or requests for proposals are not solicited for some major purchases and "550-Retiree" employment contracts are not monitored adequately. In addition, terms of bond sales are negotiated rather than bid.

12.1 Bids and proposals

District personnel made several purchases of goods or services without utilizing a bid or request for proposal (RFP) process in violation of district policy. The district bidding policy states competitive bids shall be sought in the purchase of supplies, goods, or services exceeding $5,000. The district did not competitively bid or solicit proposals for the following purchases made during school year 2011-2012:

Item	Amount
Transportation services - taxies for students	$776,758
After school activity program	207,915
Family resources specialist	290,000
Computers	264,565
Library books - Smith Hale Middle School	242,440
Leadership consulting services	157,000
Legal services	142,489
Star Academy program - reduce dropouts	59,534
Athletic trainer services	34,917
Professional development	24,488
iPads	23,980

In addition to being required by district policy, periodically soliciting proposals or bids for goods and services is a good business practice, helps provide a range of possible choices, and allows the district to make better informed decisions to ensure necessary goods or services are obtained from the best qualified provider, taking expertise, experience, and/or cost into consideration. To ensure the validity and propriety of procurements, sole source procurement documents should be completed in accordance with district procedures. Soliciting proposals and bidding helps ensure all parties are given an equal opportunity to participate in district business.

12.2 "550-Retiree" contracts

The terms of employment agreements with several employees retired under the Public School Retirement System of Missouri (PSRS) are not clearly defined and the hours worked by each is not monitored to ensure compliance with state law. For the 2011-2012 school year the district contracted with ten "550-Retiree" employees who received compensation totaling about $276,000.

Per Section 169.560, RSMo, a teacher or school employee retired and currently receiving a retirement allowance may be employed in any capacity in a school district on either a part-time or temporary-substitute basis not to exceed a total of 550 hours in any one school year, and through such employment may earn up to 50 percent of the annual compensation payable under the employing district's salary schedule for the position or positions filled by the retiree, given such person's level of experience and education, without a discontinuance of the person's retirement allowance. The district

typically pays 40 percent of the normal salary for the position filled by a "550-Retiree" employee.

None of these employees submitted documentation supporting the number of hours worked. In general, employees of the district who are exempt from the overtime requirements of the Fair Labor Standards Act are not required to prepare time sheets. However, because the "550-Retirees" employees are restricted to working 550 hours, it is necessary to document the hours worked and provide the district with a method to monitor the hours worked, regardless of position. These employees worked as counselors, speech therapists, and instructional coaches. In addition, the contracts do not clearly define work to be performed by these employees during the 550 hours. Each of the ten contracts reviewed indicate the individual will perform duties as assigned by the district and will be paid in equal installments.

The PSRS requires employers to track retiree hours and salary to ensure compliance with state law. The PSRS can request to review records and if limits are exceeded a person's retirement benefits can be put on hold. Contracts should be written to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings.

12.3 Bonds

The district used the same provider to serve as both financial advisor and bond underwriter for several general obligation bond issues, and sold these bonds using a negotiated sale rather than a competitive bid process, which violates district policy.

During fiscal years 2003 through 2012, the district sold four general refunding bond issues totaling approximately $29 million and two general obligation bond issues totaling approximately $35 million through negotiated sales in which the bond underwriter also served as a financial advisor to the district. Using the same provider to act in the dual capacity of underwriter and financial advisor for a bond issue creates an inherent conflict of interest. In addition, the district relied on the advice of the bond underwriter instead of seeking open bids to assure the most competitive rate of return for taxpayers. The district's bond underwriter, who also acted as the financial advisor received underwriter fees for the six bond issues totaling approximately $460,000.

The lack of independent financial advice could result in the district not being adequately informed of bond issuance options or being unable to adequately evaluate bond proposals. The underwriter does not have a fiduciary responsibility to the district.

District policy 2030 requires all bonds issued in the district to be competitively bid. While Missouri law does not require competitive sales of these types of financing instruments or competition in selecting bond underwriters and financial advisors, competitive sales would likely result in

lower interest costs for the district, and competition in selecting bond underwriters and financial advisors is important to ensure services are obtained from the best qualified providers at a fair price.

Recommendations

The School Board:

12.1 Ensure district policy is followed by soliciting bids or requests for proposals for all services over $5,000. Documentation of bids received and the bid process should be retained. If sole source procurement is necessary, the district should retain documentation of the circumstances.

12.2 Require "550-Retiree" employees submit supporting documentation of time worked to support compensation and more clearly define the duties of these employees.

12.3 Discontinue using an underwriter who also acts in a dual capacity as financial advisor and follow district policy to competitively bid interest rates for any future bond sales.

Auditee's Response

The School Board provided the following written responses:

12.1 The District accepts the State Auditor's findings. Prior to receiving this audit, the District published RFPs for both Legal Services and Transportation Services – taxies for students. Contracts for these services were approved by the Board following the RFP process.

The District believes that certain contracted services are not amenable to the bid process. As an example, professional development services were contracted for the current school year based upon the District's knowledge and experience with a provider. To seek bids or an RFP in this instance would have been a waste of taxpayer money and District staff time.

The District will document sole source procurement.

At times, the District has contacted vendors to seek the costs on goods and services so as to ensure that prices paid by the District are reasonable and customary. This more informal bid process ensures the timely purchase of goods and services while ensuring costs are within an acceptable norm.

The District will endeavor to seek bids and RFPs where appropriate in accordance with its policy and in accordance with state law.

12.2 The District accepts the State Auditor's finding. The District uses a standard contract for employing all certificated employees including 550-hour employees. The contract provides that the employees will perform duties as assigned by the District. This general description is used so that the District has flexibility in assigning staff. In the past, employees objected to changes of assignment based upon language in their contracts specifying their job duties.

Prior to receiving this audit, the District changed its practice to pay all 550-hour employees by the hour as those hours are submitted to ensure that the employees do not work more than 550 hours in a school year. Further, the District now participates in the OASIS program through the Public School Retirement System that uploads the number of hours worked by 550-hour employees directly to the retirement system.

12.3 The District accepts the State Auditor's findings. The District will seek bids for any future underwriting services and will consider separating the roles of financial advisor and underwriter.

Prior to receiving this audit, the District began working with MSBA to review and revise its policies. By June 2014, the District will adopt modified MSBA policies. The District will consider adopting a policy that does not require bidding future bond sales, but leaves the option to conduct a negotiated sale if that is determined to be in the best interest of the District.

Auditor's Comment

12.1 Unless a sole source provider is utilized and this fact is clearly documented and the only option, a competitive procurement of services would not be a waste of taxpayer money.

12.3 Based on extensive work done by our office regarding this topic and most recently reported in our Report No. 2013-116, *General Obligation Bond Sales Practices*, issued in November 2013, it would not be in the best interest of the district to change its policy allowing negotiated sales.

13. MAP Testing

The district did not ensure all MAP testing administrators completed the training required by the Department of Elementary and Secondary Education (DESE) prior to administering tests in April 2012. We identified two special education teachers at the Junior High School who signed out MAP tests, but did not take the test examiners training prior to administering tests. District officials indicated they believed the Special Education department administered the training for teachers in that department.

Pre-test training for all test examiners is required by the DESE quality assurance program to ensure the integrity of MAP testing in school districts in the state.

Recommendation

The School Board work with district administrators to ensure all MAP test administrators complete the training required by DESE.

Auditee's Response

The School Board provided the following written response:

The District accepts the State Auditor's findings. The current Superintendent will work with District administrators to ensure that all MAP test administrators complete training required by DESE.

14. Backup Data

Some backup data is not stored at a secure off-site location. While backup of all district data is performed daily, only the backup of financial data is stored at a secure offsite location. Backup of other data, such as student attendance records, student grades, and teachers attendance is stored in the same building as the original data. The effect of the loss of this type of data would be significant and detrimental to the district accomplishing its mission.

Failure to store computer backup data at a secure off-site location results in the backup data being susceptible to the same damage as the data on the computer. Preparation of backup data, preferably on a daily or at least weekly basis, periodic testing to ensure it is adequate, and off-site storage would provide increased assurance district data could be recreated if necessary.

Recommendation

The School Board work with district officials to ensure backup data is stored in a secure off-site location and tested on a regular, predefined basis.

Auditee's Response

The School Board provided the following written response:

The District accepts the State Auditor's findings. The District currently maintains two "off-site" back-ups from the main data storage at Baptiste Education Center. One off-site storage is with Net Standard, a company in Overland Park, Kansas. The second off-site storage is located at the District's Administration Center. Net Standard verifies the back-up nightly and reports any errors to the District's Information Technology department.

15. Mileage and Fuel Logs

The district has not established effective monitoring procedures regarding fuel and vehicle use. Without effective procedures, fuel could be purchased by employees for non-district use and the district's vehicle fleet may not be used in an efficient and appropriate manner. The district maintains 31 vehicles for various district services including building and grounds, food

service, technology, security, and the band. During school year 2011-2012, the district incurred fuel costs of approximately $64,000.

Fuel purchases were charged at a local gas station per a district contract. Usage and fuel logs are not maintained for some district vehicles. Building and grounds and security personnel indicate mileage is recorded in a log weekly, but these logs do not indicate when fuel purchases are made and no comparison of miles driven to fuel used is made to ensure fuel purchases and vehicle usage are reasonable. No fuel or usage logs are maintained for vehicles in the other departments. In October 2012, the district began using credit cards assigned to each vehicle for fuel purchases.

Mileage and fuel logs are necessary to document the appropriate use of equipment and vehicles and to support fuel charges. The logs should include sufficient information to determine reasonableness of miles driven and allow reconciliations of fuel use to fuel purchases. Failure to document and monitor fuel use could result in loss, theft, or misuse going undetected.

Recommendation

The School Board require logs for all vehicles. These logs should be reviewed and reconciled to fuel purchases and any significant discrepancies investigated.

Auditee's Response

The School Board provided the following written response:

The District accepts the State Auditor's findings. The District purchased mileage and fuel tracking software that requires persons purchasing fuel to input the vehicle mileage at each fuel purchase. These logs are reviewed by the business office to ensure that fuel purchases are consistent with expectations. Any significant discrepancies will be investigated.

Hickman Mills C-1 School District
Organization and Statistical Information

The Hickman Mills School District is located in Jackson County approximately 10 miles southeast of downtown Kansas City and covers 56 square miles.

The district operates eight elementary schools (grades K-5), one middle school (grades 6-7), one junior high school (grades 8-9), one senior high school (grades 10-12), two residential special education schools (grades K-12), along with a comprehensive gifted program, an early childhood center, and an alternative school. Enrollment was 6,052 for the 2011-2012 school year. The district employed 931 full-time and 345 part-time employees at June 30, 2012.

The Hickman Mills School District has been classified under the Missouri School Improvement Program (MSIP) as "Provisionally Accredited" by the Missouri Department of Elementary and Secondary Education. A provisionally accredited district has not met enough of the MSIP standards and indicators to be fully accredited.

School Board

An elected board acts as the policy-making body for the district's operations. The board's seven members serve 3-year terms without compensation. Members of the board at June 30, 2012, were:

Breman Anderson Jr., President
James "JT" Brown, Vice-President
Bonnaye Mims, Member
Darrell Curls, Member
April Cushing, Member
Dan Osman, Member
Eric Lowe, Member

Superintendent

The district's superintendent at June 30, 2012, was Dr. Marjorie Williams and her annual compensation was $187,900. The superintendent's compensation is established by the School Board.

CITIZENS SUMMARY

Findings in the audit of the Twenty-Third Judicial Circuit, City of Pevely Municipal Division

Bond Account Liabilities

The court administrators have not adequately reviewed the status of open bonds. The list of open bonds includes 22 bonds that are over 10 years old, with 7 bonds dating back to 2000. We reviewed case files for 15 bonds on the open bond list and determined 2 bonds (totaling $2,000) should have been transmitted to the city and 7 other bonds (totaling $2,500) should have been refunded to the person posting the bond. If disbursement is appropriate, but proper payees cannot be located, the monies should be disposed of in accordance with state law.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 5

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Twenty-Third Judicial Circuit
and
Municipal Judge
and
Honorable Mayor
and
Members of the Board of Aldermen
Pevely, Missouri

We have audited certain operations of the City of Pevely Municipal Division of the Twenty-Third Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2012. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) a deficiency in internal controls and (2) no significant noncompliance with legal provisions. The accompanying Management Advisory Report presents our finding arising from our audit of the City of Pevely Municipal Division of the Twenty-Third Judicial Circuit.

A petition audit of the City of Pevely, fulfilling our obligations under Section 29.230, RSMo, is still in process, and any additional findings and recommendations will be included in the subsequent report.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Chris Vetter, CPA
In-Charge Auditor:	David Olson
Audit Staff:	Morgan Alexander
	Andrew Roley

Twenty-Third Judicial Circuit
City of Pevely Municipal Division
Management Advisory Report - State Auditor's Findings

1. Bond Account Liabilities

The court administrators have not adequately reviewed the status of old open bonds held in the court's bond account. The list of open bonds consists of 175 bonds totaling approximately $48,000 as of July 31, 2013. Twenty-two of the bonds are over 10 years old, with 7 of those dating back to 2000. We reviewed case files for 15 bonds on the list and determined 2 bonds totaling $2,000 should have been transmitted to the city and 7 other bonds totaling approximately $2,500 should have been refunded to the person posting the bond because the cases had been disposed. The court administrators indicated they had attempted to contact some of these individuals, but were unsuccessful due to not having their current addresses.

The failure to routinely review open bonds and disburse monies when appropriate increases the volume of cases which must be monitored and deprives the state, city, or others the use of those monies. If disbursement is appropriate, but proper payees cannot be located, the monies should be disposed of in accordance with state law.

Recommendation

The City of Pevely Municipal Division routinely review the list of open bonds and disburse or dispose of monies as appropriate.

Auditee's Response

The Chief Administrative Judge provided the following written response:

On March 8, 2013, I assumed the administrative duties of the Pevely Municipal Court. At that time, during the court's own internal reviews of operations, I discovered the issue of open bonds still deposited in the Judicial Bond Account. I immediately issued an order instructing the court personnel to begin a process of reviewing each individual bond file to determine the correct processing of the bond payment. The process has been completed. Payment of all outstanding bond deposits have been forwarded to the City of Pevely on Bond Forfeitures, to 14 individuals who never reclaimed their bonds after the disposition of their cases, and to the State of Missouri Treasurer's office for 13 individuals who could not be located and never reclaimed their bond.

Additionally, an administrative procedure was established whereby court action regarding bond disposition is recorded on the individual defendant's file, recorded in the court's electronic records of the defendant's file and bond payment is processed within 48 hours. Further, monthly review of the outstanding bond account is conducted to verify the accuracy of the bond account.

It is a pleasure to state that the current court personnel have completed the above task of reviewing the bond account and that the present day bond account is accurate to the individual file. The Municipal Court of the City of Pevely is no longer holding bond money that is not assigned to an open pending case.

Twenty-Third Judicial Circuit
City of Pevely Municipal Division
Organization and Statistical Information

The City of Pevely Municipal Division is in the Twenty-Third Judicial Circuit, which consists of Jefferson County. The Honorable Troy A. Cardona serves as Presiding Judge.

The municipal division is governed by Chapter 479, RSMo, and by Supreme Court Rule No. 37. Supreme Court Rule No. 37.49 provides that each municipal division may establish a violation bureau in which fines and court costs are collected at times other than during court and transmitted to the city treasury.

Personnel

At December 31, 2012, the municipal division employees were as follows:

Title	Name
Municipal Judge (1)	Denis Huston
Court Administrator	JoAnn Bates
Court Administrator	Evelyn Haithcoat

(1) Because the elected Municipal Judge was unable to fulfill his duties for personal reasons, Steven Davis was appointed Chief Administrative Judge in March 2013. Municipal Judge Huston's term ends April 2014.

Financial and Caseload Information

	Year Ended December 31, 2012

Low Income Housing Tax Credit Program

March 2014

Report No. 2014-014

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Economic Development, Low Income Housing Tax Credit Program

Background

The Department of Economic Development (DED), Missouri Low Income Housing Tax Credit (LIHTC) Program started in 1990. The Missouri Housing Development Commission (MHDC) manages this tax credit program, which is designed to supplement the federal LIHTC. Tax credits must be used for new construction, rehabilitation, or acquisition and rehabilitation. The LIHTC is the state's largest tax credit program and had $144 million in redemptions in fiscal year 2013.

Program Cost and Efficiency

While the LIHTC program has helped provide thousands of units of affordable housing for low income Missourians, options exist to improve the efficiency of the tax credit model. Annual redemptions are projected to increase to and remain around $200 million per year through 2018. Of the 10 states with state LIHTC programs, Missouri ranked highest in state LIHTC funding, and was one of only two states with a per capita rate exceeding $20. Six states had per capita rates of $5.14 or less. Actual state LIHTCs issued and redeemed have greatly exceeded 1997 MHDC projections provided to the General Assembly. In the fiscal note, the MHDC estimated the average allocation rate would be 50 percent of the federal credit, but the MHDC has allocated essentially 100 percent of the federal amount since 1998. Since fiscal year 1997, the MHDC has authorized $842 million more LIHTCs than projected. The MHDC has taken action to reduce costs by implementing some of the recommendations in our prior LIHTC audit.

Currently, only $0.42 of every tax credit dollar issued actually goes toward the construction of low income housing; the remainder goes to the federal government in the form of increased federal income taxes; to syndication firms; and to investors. The MHDC could improve the efficiency of Missouri's LIHTC by (1) converting to a certificated credit model (possibly combined with the use of not-for-profits or government entities to eliminate federal taxation), (2) making the credits refundable, (3) using a direct appropriation to fund low income housing directly from state revenues, also utilizing not-for-profit organizations or government entities, and (4) reducing the number of years over which the tax credits are spread.

The program has no sunset provision. By adopting a sunset provision for the LIHTC program, the General Assembly could better determine whether the program is achieving its intended purpose and whether program funding levels are appropriate. In addition, state law allows claiming the same project costs under two or more tax credit programs. This "stacking" of tax credits can be lucrative for developers, but generates no additional economic activity or state benefit.

Economic Impact

The economic impact of the LIHTC program reported to the legislature by the DED is likely overstated. The department's analysis assumes no low income housing construction would occur if not for the state credit; however, since the federal LIHTC is available, some low income housing activity would likely occur even without the state LIHTC program. Moreover, even considering the overstatement, the LIHTC program results in a very low return on investment. The fiscal year 2013 analysis shows the program returned $0.08 in state revenue for every dollar spent and created approximately 63 new full-time jobs. With redemptions of $144 million in 2013, the program costs the state approximately $61,000 per unit of housing or $2.3 million per job.

In the areas audited, the overall performance of this program was **Fair.***

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jay Nixon, Governor
and
Kip Stetzler, Acting Executive Director
Missouri Housing Development Commission
and
Mike Downing, Director
Department of Economic Development
Jefferson City, Missouri

We have audited certain operations of the Missouri Low Income Housing Tax Credit Program in fulfillment of our duties under Chapter 29, RSMo and Section 620.1300, RSMo. The scope of our audit included, but was not limited to 2 years ended June 30, 2013. The objectives of our audit were to:

1. Analyze the costs and benefits of the program to determine if it is an effective and efficient use of state resources.

2. Evaluate the internal controls over significant management and financial functions related to the program.

3. Evaluate compliance with certain legal requirements related to the program.

4. Evaluate the economy and efficiency of certain management practices and operations.

For the areas audited, we (1) determined the current program structure is an inefficient method of funding low income housing activity, but due to weaknesses in program data, other aspects of program effectiveness and efficiency could not be adequately determined, (2) identified no deficiencies in internal controls, (3) identified no significant noncompliance with legal provisions, and (4) identified the need for improvement in management practices and procedures.

Except for the matter discussed in the last paragraph of the Scope and Methodology, we conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Management Advisory Report presents our findings arising from out audit of the Missouri Low Income Housing Tax Credit Program.

Missouri Low Income Housing Tax Credit Program Introduction

Background

Missouri Low Income Housing tax credit (LIHTC) program started in 1990 and is established under Section 135.350 to 135.363 RSMo. The tax credit has no sunset or expiration date. The Missouri Housing Development Commission (MHDC)[1] manages this tax credit program that is designed to supplement the federal LIHTC, which began in 1986. Tax credits must be used for new construction, rehabilitation, or acquisition and rehabilitation. The LIHTC had $144 million in redemptions in fiscal year 2013, making it the state's largest tax credit program. See Appendix C for redemption information on all state tax credits.

The Internal Revenue Service (IRS) allocates federal LIHTCs[2] to each state based on population. The funding level was $1.75 per capita in 2002 and has been adjusted annually for inflation beginning in 2003. For 2013, federal funding levels were $2.25 per capita, which for Missouri equals $13.5 million (per year for 10 years). Guidelines for the federal LIHTC are contained in Section 42 of the IRS tax code.

Owners of a project to which the federal credit is allocated receive a federal credit equal to 9 percent of the qualified basis[3] of the project for 10 years. Projects financed with tax-exempt bonds receive a federal tax credit equal to 4 percent of the qualified basis.[4] Projects seeking 9 percent credits are awarded on a competitive basis. Projects seeking 4 percent credits have historically been awarded based on the availability of tax-exempt bond financing. Starting in 2007, the MHDC implemented a process that prioritizes 4 percent project applications to help ensure the best projects receive priority access to available bond funding.

In 1990, Missouri began supplementing the federal program by allocating state income tax credits equal to 20 percent of the federal total. In 1994, the state credit increased to up to 40 percent of the federal credit for areas that lost housing in the 1993 flood. In 1997, the state credit increased to up to 100 percent of the federal credit for all areas and remains at that level.

[1] The MHDC includes the Governor, Lieutenant Governor, Attorney General, State Treasurer and six persons appointed by the governor with the advice and consent of the Senate. An Executive Director manages MHDC operations. MHDC is part of the Department of Economic Development.

[2] The allocation relates to 9 percent projects only.

[3] Qualified basis is the total cost to develop the property, less items not subject to depreciation (land and reserves) and the cost of market rate units. A project's qualified basis may be increased by 30 percent if it is located in a difficult to develop area as determined by the federal Department of Housing and Urban Development (HUD).

[4] Actual tax credit rates are not exactly 9 percent and 4 percent, and vary on a monthly basis. The tax credit rate is determined so that the actual expected present value of the subsidy over the 10-year period equals 70 percent of the project's eligible basis in the case of the 9 percent credit, and 30 percent for the 4 percent credit. The rates are calculated and released monthly by the United States Treasury.

The credit is limited to a percentage of the qualified basis, based upon depreciable basis, and the percentage of affordable units in the development. The minimum number of qualifying units is (1) 40 percent of the total number of units affordable to persons at 60 percent of the median income or (2) 20 percent affordable to persons at 50 percent of the median income. Missouri's annual Qualified Allocation Plan (QAP) establishes the selection criteria, federal preferences, and MHDC priorities for proposal selection. Congress has delegated the administration of the federal LIHTC to state housing agencies (the MHDC in Missouri) to assure that good quality housing would be available where it is most needed. The MHDC is responsible for the allocation of federal and state credits and assuring compliance with the regulations. The compliance process includes periodic physical inspections of the property as well as reviews of management and occupancy procedures during a minimum 15-year compliance period.

The tax credit is non-refundable,[5] and non-transferable. Section 135.352.4, RSMo, allows the credits to be carried back 3 years to offset prior tax liability or carried forward for 5 years to offset future tax liability. The tax credits are used by investors who must acquire an ownership interest in the development partnership and may be redeemed against state income tax, corporate franchise tax, financial institution tax, or insurance company premium tax.

Housing tax credits in other states

Missouri is one of 13 states that have established state tax credits for housing. Seven states[6] utilize a state LIHTC in addition to the federal credit, three states[7] utilize a contribution credit that is dependent upon contributions to not-for-profit organizations, and three states (Arkansas, Missouri, and Vermont) use a combination of a LIHTC and contribution credit. Missouri's contribution credit is called the Affordable Housing Assistance Program, and is separate from the state LIHTC program. Of the 10 states that utilize a state LIHTC, six use a 10-year credit period like Missouri, while four use a shorter timeframe. See Appendix B for 2012 funding information on each state utilizing a LIHTC.

Application and approval process for state and federal credits

Developers (for-profit and not-for-profit) are eligible to apply for tax credits. Applicants must demonstrate prior, successful housing experience and engage the services of housing professionals, such as architects, attorneys, accountants, contractors, and property managers with demonstrable tax credit and housing experience. Developers must have the

[5] The tax payer must have a tax liability the credit can be offset against.

[6] States that utilize only a state LIHTC in addition to the federal credit are California, Georgia, Hawaii, Massachusetts, New York, North Carolina, and Utah.

[7] States that utilize only the contribution credit are Connecticut, Illinois, and New Mexico.

financial capacity to successfully complete and operate the proposed housing development. Proposed housing developments must:

- Meet a demonstrated affordable housing need
- Provide housing for low income persons and families
- Demonstrate local support
- Leverage tax credit funding with other financing and/or rental assistance
- Be economically feasible
- Balance sources and uses of funds

The MHDC sets the application and selection schedule annually. Typically, a Notice of Funding Availability is published during the month of June. Once the notice is released, an application packet is available on the MHDC website or by mail. The deadline for proposal submission is typically in late September, and MHDC staff make recommendations to the commission in December. The MHDC sets project cost limits at 125 percent of established HUD guidelines for 8 designated metropolitan areas[8] in the state; with any projects outside these areas limited to 100 percent of the HUD guideline cost limit. Tax credits are issued to approved project owners over a 10-year period once the housing is ready for occupancy, which is typically 2 years after project approval. The MHDC will not approve projects for state LIHTCs without also approving the project for federal credits. Projects are generally limited to $7 million[9] in state credits and $7 million in federal credits. The state credit has the same guidelines as the federal credit.

Tax credit sale and investment process

Developers typically recruit investors to become part of a limited partnership arrangement where tax credits are transferred. The arrangement is often administered by a syndicator who is responsible for ensuring project compliance with federal tax code rules. Several of the more active syndicators in the state are directly affiliated with developers who are also active in the program. As a general partner, the developer has a small ownership percentage in the project, but has the authority to build and maintain the project on a day to day basis. The investors, as limited partners, have a large ownership percentage in the project with an otherwise passive role. Investors look at the credit, which can be used to offset tax liabilities, as part of their return on investment. Investors may also receive tax benefits related to project operating losses, interest on debts, and deductions such as depreciation and amortization.

[8] The eight designated metropolitan areas established are Jefferson City, Columbia, St. Louis, Springfield, McDonald County, Kansas City, St. Joseph, and Joplin.
[9] $700,000 in annual credits over 10 years.

Syndicators told us the investors receiving the federal tax credit are usually different than the investors receiving the state tax credits. Insurance companies have become big investors in LIHTC projects in Missouri and are redeeming a large portion of the state LIHTCs. The insurance companies use the credits to offset insurance company premium taxes.

Tax credit recapture

MHDC staff monitors compliance with federal LIHTC requirements. If non-compliance is identified the owner has up to 45 days to correct the problem, unless an extension is granted. MHDC staff will re-inspect the project, evaluate the status of the compliance problem and file a report with the IRS regardless of whether or not the problem was corrected. Reported uncorrected non-compliance issues may result in recapture of a portion of federal and state tax credits redeemed on the projects. IRS staff determines if federal LIHTCs will be recaptured.

State law[10] mirrors the federal law regarding recapture of tax credits Projects receiving federal LIHTC allocations since 1987 must comply with eligibility requirements for a period of 15 taxable years, beginning with the first taxable year of a project's credit period. Projects receiving credit allocations after December 31, 1989 are required by the IRS code to comply with eligibility requirements for an additional 15 years beyond the initial 15-year compliance period, a total of 30 years. This additional 15-year period is referred to in the IRS code as the "extended use period." However, after the initial 15-year compliance period some low income housing projects may be eligible[11] for conversion to market-based rents if the property owner chooses to opt out of the low income housing program.

Tax credits authorized redeemed

The MHDC has authorized an average of $143.4 million in credits per year in 9 percent state credits for fiscal years 2012 and 2013, with the same amount being authorized in federal credits, while redemptions averaged $154 million per year. In addition, while the annual level of 4 percent credits was limited to $60 million with a legislative change in 2009, the MHDC authorized an average of $38.6 million per year in 4 percent state credits during fiscal years 2012 and 2013. In contrast, 4 percent tax credit authorizations averaged $89.7 million per year for the 5 years prior to the legislative change. Appendix A, lists detailed information of credits authorized and redeemed by fiscal year, and cumulative credits outstanding or pending issuance.

[10] Section 135.355, RSMo.

[11] Depends on the other types of financing besides tax credits used on the project and other conditions.

Low income housing units built

Approximately 46,700 low income housing units have been approved for construction using the state LIHTC since 1998.[12] The table below lists the number of units approved with state LIHTC during the 5 years ended June 30, 2013.

Low income units approved by credit type - state fiscal years 2009 through 2013

Type	2009	2010	2011	2012	2013	Total
9 Percent	913	1,529	1,017	751	1,359	5,569
4 Percent	1,272	864	51	1,009	1,004	4,200
Total	2,185	2,393	1,068	1,760	2,363	9,769

Source: MHDC data

Reporting

The DED provides the General Assembly and the public key program information for the LIHTC program through the tax credit activity report.

Agencies administering tax credit programs are required under Section 33.282, RSMo, to submit the estimated amount of tax credit activity for the next fiscal year to the State Budget Director for submission to the Chairmen of the Senate Appropriations and House Budget Committees. In addition to the estimates of tax credit activity, the agencies must also include a cost-benefit analysis of the program for the preceding fiscal year. The annual estimates and cost-benefit analyses are submitted on forms called tax credit activity reports. State law requires the tax credit activity report be submitted to the State Budget Director by October of each year and to the Chairmen of the Senate Appropriation and House Budget Committees by January 1 each year.

Scope and Methodology

To gain an understanding of the performance of the state LIHTC program, we interviewed various individuals involved in all aspects of the program, including MHDC staff, developers and their representatives, tax attorneys, an architect; representatives of three syndication firms, a lobbyist representing developers, and a Certified Public Accountant with a firm involved in the program. We also discussed tax credit redemptions with a representative of the Department of Revenue (DOR), and discussed tax credit reporting with representatives of the Department of Economic Development (DED). Our review also included visits to two completed LIHTC project sites.

We obtained data from MHDC staff on the number of housing units approved by the commission, and the number of projects converted to market-based housing during the 5 years ended June 30, 2013. We also obtained information on tax credit authorizations from MHDC staff and tax credit redemptions from MHDC and DOR staff.

[12] Data prior to 1998 was not obtained due to the time required for MHDC staff to compile it.

To understand how Missouri's state LIHTC program compares to the LIHTC programs of other states, we obtained information from various sources, including interviews with state housing agency representatives with the states of Arkansas, California, Connecticut, Georgia, Hawaii, Illinois, Massachusetts, New Mexico, New York, North Carolina, Utah, and Vermont.

To develop projections of future tax credit activity and liability, we reviewed historical trends in tax credits awarded, authorized, issued and redeemed including data presented in Appendix A. We also reviewed historical information related to the federal LIHTC allocation, including population and allocation rates. We based projections for future years on historical trends, with an emphasis on more recent history. Future 4 percent tax credit activity is limited to a maximum issuance of $60 million per year ($6 million per year for 10 years).

To evaluate aspects of program management, we reviewed the project selection process, project cost review process, and planning process to determine the state's long-term housing needs. We also reviewed the annual LIHTC cost-benefit analysis the MHDC reports to the legislature as part of the state budget process. In addition, we compared Missouri's program to best practices established by the National Council of State Housing Agencies.

To evaluate potential improvements to the program, we reviewed reports from the Missouri Tax Credit Review Commission. The commission was created by the Governor in July 2010, and charged with reviewing the state's tax credit programs and making recommendations for greater efficiency and enhanced return on investment. The commission released reports in November 2010 and December 2012.[13]

To evaluate state LIHTC recapture procedures, we interviewed MHDC staff and obtained information from MHDC on project non-compliance reported to the IRS during the 2 years ended June 30, 2013. We tested procedures in place to monitor ongoing projects for any noncompliance, which would result in potential recapture, and observed a sample of related site inspections.

We obtained aggregate totals of annual tax credit redemptions for state tax credits and recaptured LIHTCs for fiscal years 2008 through 2012 from the DOR. In accordance with the Missouri Supreme Court decision in the case of *Director of Revenue v. State Auditor* 511 S.W.2d 779 (Mo. 1974), auditors are not provided individual tax returns. As a result, auditors were

[13] The December 2012 report included a supplemental report that we also reviewed.

not able to verify the completeness and accuracy of redemption data provided.

Missouri Low Income Housing Tax Credit
Management Advisory Report
State Auditor's Findings

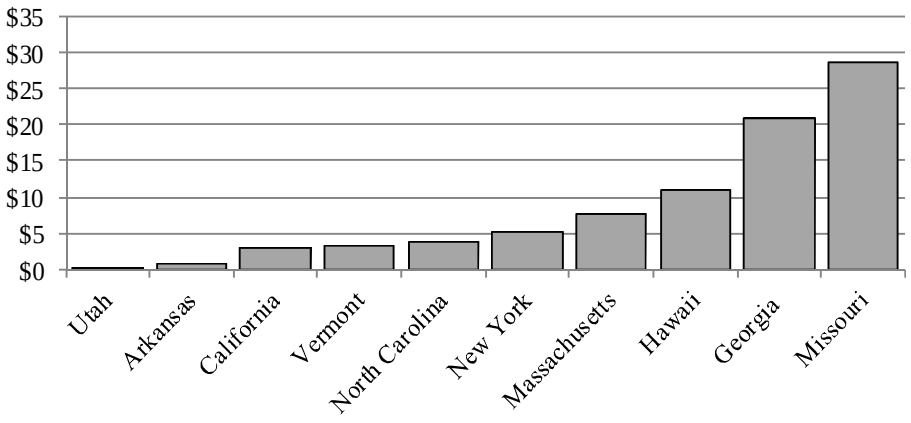
1. Program Cost and Efficiency

While there is no dispute the Low Income Housing Tax Credit (LIHTC) program has helped provide thousands of units of affordable housing for low income Missourians, this audit evaluates the economic efficiency of the current program. Missouri leads the nation in state LIHTC spending, on a per capita basis, and the amount of tax credits issued for low income housing has exceeded initial fiscal note projections. Options exist to improve the efficiency of the tax credit model, since currently only $0.42 of every tax credit dollar issued goes toward the construction of low income housing, with the remainder going to the federal government in the form of increased federal income taxes, to syndication firms, and to investors. In addition, the program has no sunset provision and applicants can receive multiple tax credits for the same expenditures.

1.1 Total program costs

In 2012, Missouri ranked highest in state LIHTC funding, with $28.60 spent on a per capita basis. Of the 10 states with state LIHTC programs, Missouri was one of only two states with a per capita rate exceeding $20, while 6 states had per capita rates of $5.14 or less.

2012 Per Capita Funding for States with State LIHTC Programs

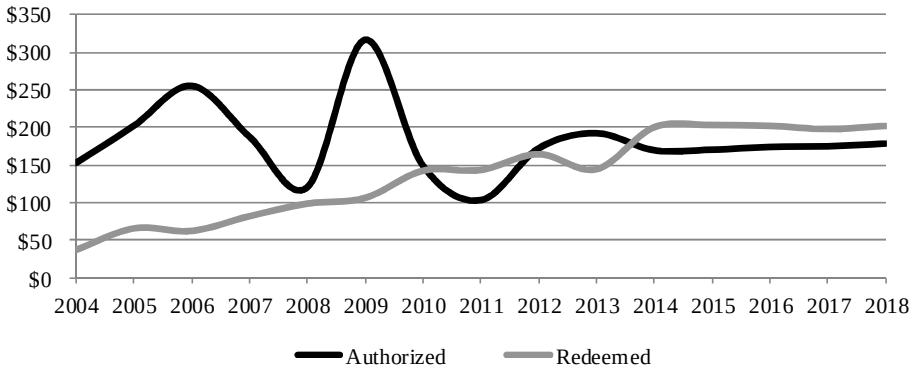


Source: SAO analysis

Projection of future tax credit activity

Based on actual tax credits awarded in recent years, we projected tax credits to be authorized, redeemed, and outstanding through 2018. Assuming tax credits are awarded at a pace consistent with prior years, our projections estimate a cumulative total of $3.4 billion in credits will be authorized and approximately $2.1 billion in credits will be redeemed, leaving an estimated $1.3 billion in credits outstanding or pending issuance by 2018. The chart on the following page depicts actual credits authorized and redeemed from 2004 through 2013, and projected authorizations and redemptions through 2018. Annual redemptions are projected to increase to and remain around $200 million per year through 2018.

Actual and estimated LIHTC authorized and redeemed - Fiscal year 2004 to 2018



Source: SAO projections based on MHDC and DOR data

Limits on total tax credits issued are high

Missouri's annual limit on 9 percent LIHTCs is significantly higher than all but one of the other 9 states with state LIHTC programs. State law limits the amount of 9 percent credits to 100 percent of the federal LIHTC allocation. All 10 states with state LIHTC programs limit the annual amount of credits authorized. Missouri is one of 4 states that utilizes a percentage of the federal allocation to determine the annual limit. While Missouri and Georgia authorize credits of 100 percent of the federal allocation, Hawaii limits state LIHTCs to 50 percent, and Utah to only 10 percent of the annual federal allocation. The remaining 6 states utilize some form of set dollar value limit.

Prior to 1997, Missouri law[14] primarily limited the annual amount of state credits to 20 percent of the federal allocation. In 1997, the law was changed to allow the MHDC to authorize up to 100 percent of the federal allocation. Missouri law[15] currently limits the amount of 4 percent credits to $60 million per year.

Credits issued and redeemed exceed MDHC projections

Actual state LIHTCs issued and redeemed have greatly exceeded 1997 MHDC projections provided to the General Assembly. In 1997, state law changed to increase the state credit to up to 100 percent of the federal credit. In the final fiscal note to the house bill, MHDC staff reported state credits would continue to be allocated at 20 percent of the federal credit in most parts of the state, but the MHDC would increase the allocation to 100 percent in rural areas and areas where it is difficult to develop affordable housing. MHDC estimated in the fiscal note the average allocation rate would be 50 percent of the federal credit. However, the MHDC has allocated essentially 100 percent of the federal amount since 1998. In addition, the estimate did not consider increases in the amount of annual federal LIHTCs available for 9 percent projects, and did not consider any estimate of credits issued for 4 percent projects. In total, since fiscal year

[14] Section 135.352.2, RSMo.
[15] Section 135.252.3, RSMo.

1997, the MHDC has authorized $842 million more LIHTCs than projected (based on the average annual authorizations estimated in the 1997 fiscal note).

Prior recommendations implemented

The MHDC has taken action to reduce costs by implementing some of the recommendations in our prior LIHTC audit,[16] including reducing the builder's fee percentage to be consistent with National Council of State Housing Agencies guidance, and reducing project cost limits. The MHDC reduced project cost limits from a maximum of 140 percent of HUD guidelines in metropolitan areas, down to 125 percent of HUD guidelines for 2011 and 2012. Our review of the 67 projects (9 percent only) approved in 2011 and 2012 showed development costs for 21 of those projects (31 percent) exceeded the HUD guideline, which represents an improvement from our prior LIHTC audit where we found 55 percent of projects to be over the HUD guideline, To reduce costs further, MHDC reduced the project cost limits down to 100 percent of HUD guidelines for fiscal year 2014. In addition, MHDC has made improvements in the project selection and evaluation process based on recommendations from the prior report.

1.2 Efficiency

The current LIHTC model is inefficient because only a portion of each dollar of tax credit goes toward low income housing. The current model finances low income housing construction at an effective interest rate of over 19 percent.[17] The MHDC awarded $192 million in state LIHTCs during fiscal year 2013, which will be redeemed over the next 10 to 15 years. The 2013 tax credits awarded will be converted into approximately $80.6 million in equity[18] to be used for the construction and development of low income housing.

The primary cause of the credit's inefficiency is the federal tax implications of end users using the tax credit to reduce their amount of state taxes paid. The reduction of a user's state taxes paid results in the loss of a portion of the federal tax deduction for state taxes paid, thereby increasing the user's federal tax liability. As a result, the price of the state credit is automatically reduced by approximately 35 percent.[19] The value of credit is further reduced by the 10-year discount period and syndicator discounts (if the developer uses a syndicator to sell the credits).

[16] Report number 2008-23, *Analysis of Low Income Housing Tax Credit Program*, issued in April 2008.
[17] Rate calculated by assuming $42 million was borrowed and $100 million was paid over 10 years to repay the debt.
[18] Assuming MHDC's current pricing floor of $.42 per $1 of credit.
[19] The highest marginal federal corporate tax rate for 2012 and 2013.

The inefficiency of the current model was noted in the Tax Credit Review Commission's December 2012, supplemental report, which stated "the state is borrowing money in connection with (the LIHTC) at a higher rate than that charged to the most risky of borrowers at a time when Missouri's credit rating is among the highest of all states. This should be a source of great embarrassment to Missouri." However, the Tax Credit Review Commission's primary recommendation to improve the efficiency of the current LIHTC model was to eliminate the existing tax consequences by getting the federal tax law changed, which does not appear likely.

Options to improve efficiency

Several options exist to improve the efficiency of Missouri's LIHTC, including (1) converting to a certificated credit model, potentially combined with the use of not-for-profit organizations to eliminate federal taxation, (2) making the credits refundable, (3) the use of a direct appropriation to fund low income housing directly from state revenues, also utilizing not-for-profit organizations, and (4) a reduction in the number of years the tax credits are spread over.

Certificated credit model

Under a certificated credit model a state housing agency issues certificates investors could purchase to reduce their state tax liability. Under this model, the end investor does not join the developing partnership, but instead is purchasing a transferable asset, increasing the attractiveness of the state credit to potential investors.

Missouri could achieve a sales price of approximately $.65 per credit dollar[20] utilizing a certificated credit model. The majority of the price increase that results from a change to a certificated model is due to a change in the tax treatment of state tax credits. As opposed to Missouri's current system where a portion of federal tax deduction is lost due to a reduction of state taxes paid, the use of certificates allow investors to apply state tax credits used as deduction on their federal income taxes. However, the sale of a certificated credit would then be treated as the sale of an asset and would be subject to capital gains taxes at the federal level.

An industry professional said to avoid tax consequences to the development partnership, tax credits would have to be issued to not-for-profit housing organizations. These agencies convert the credits into cash, without paying taxes on the transaction, allowing the partnership and its investors to avoid any federal tax consequences associated with the income provided by the state tax credits. This approach was endorsed by the 2010 Tax Credit Review Commission.

[20] Price assumes a 10-year credit and is similar to the price achieved for New York state credits. States utilizing a 5-year credit, such as Massachusetts, can receive prices in the mid-to-upper $.70 range.

Refundable credit model

In a refundable model the credits could be redeemed by the user regardless of their existing tax liability, and would provide an advantage to the state by making redemptions of the credits more predictable. A refundable option would be particularly effective if the credits were to become certificated, since transferable and refundable credits would be very marketable. If a refundable feature was added to the LIHTC, it would need to be structured such that each of the annual 10-year installments would be refundable separately over the 10-year stream. The Tax Credit Review Commission did not discuss the refundable credit option for the LIHTC in either report issued.

Direct appropriation

The simplest and most economically and administratively efficient change possible to the state's low income housing program would be the use of a direct appropriation from the state. Not-for-profit organizations would also need to be involved in a direct appropriation model to avoid federal tax consequences and for 100 percent of the state's money to go towards the construction of low income housing. If not-for-profit organizations were not used, the efficiency of the program would still be improved over the current model since tax credits would not need to be sold to third parties. This method would subject low income housing funding to the annual budget process.

Issuance timeframes

Reducing the timeframe tax credits are issued over would help improve the efficiency of the credit. With credits currently being issued in a 10-year stream, the value of the stream of credits is significantly discounted when developers convert the credits to equity for construction. By reducing the timeframe the credits are issued over, a reduced amount of credits can produce the same amount of equity for construction. This change was endorsed in the Tax Credit Review Commission's November, 2010 report, which indicated as much as a 30 percent increase in equity due to the reduction of the tax credits from a 10-year stream to a 5-year stream.

1.3 Sunset provision

As noted in Report No. 2010-47, *Tax Credit Cost Controls*, issued in April 2010, state law does not include a sunset provision for many tax credits, including the LIHTC program. The Sunset Act, passed in 2003, provides for new programs to sunset after a period of not more than 6 years unless reauthorized by the General Assembly or the program is exempted from the Sunset Act. The Act requires the Committee on Legislative Research to review applicable programs before the sunset dates and present a report to the General Assembly regarding the sunset, continuation, or reorganization of each affected program. However, the LIHTC program was created prior to the Sunset Act and is exempted.

By adopting a sunset provision for the LIHTC program, the General Assembly can better determine whether the program is achieving its intended purpose and whether program funding should be increased, decreased, or eliminated.

1.4 Use of multiple incentives

As noted in Report No. 2012-117, *Division of Business and Community Services*, issued in September 2012, state law does not prohibit claiming the same project costs under two or more tax credit programs. This "stacking" of tax credits can be lucrative for developers and additional tax credits are issued while no additional economic activity or state benefit is generated.

Companies may claim certain project costs under the Low Income Housing, Historic Preservation, Brownfield Remediation, and the Neighborhood Preservation Tax Credit programs. Between fiscal years 2000 and 2011, the state issued tax credits totaling approximately $738 million for 117 projects that received funding from two or more of these tax programs.

In December 2012, the Tax Credit Review Commission recommended changes when Brownfield, Historic Preservation, and Low Income Housing Tax Credits or any combination thereof are awarded to a single project. The commission recommended a specific ordering process and Brownfield credits would be calculated first based on eligible remediation expenditures. Next, the eligible Historic Preservation credit expenditures would be reduced by the amount of Brownfield credits. Finally, the Brownfield and Historic Preservation credits would be deducted from the total expenditures eligible for the Low Income Housing Tax Credit. The DED should work with the General Assembly to establish cost containment provisions regarding project costs claimed under multiple tax credit programs.

Similar conditions previously reported

Similar conditions to sections 1.1 and 1.2 were noted in our prior audit report on the LIHTC.

Recommendations

The General Assembly:

1.1 Evaluate and consider implementing a limit on the amount of LIHTCs awarded annually.

1.2 Evaluate and consider changes to improve the efficiency of the current LIHTC model.

1.3 Establish a sunset provision for the LIHTC program.

1.4 Establish cost containment provisions regarding project costs claimed under multiple tax credit programs.

2. Economic Impact

The economic impact the DED reports to the legislature regarding the LIHTC is likely overstated. However, even considering this overstatement, the LIHTC program results in a very low return on investment. The fiscal year 2013 analysis for the LIHTC shows the program returns $.08 in state

revenue for every dollar spent,[21] and created approximately 63 new full-time jobs. With redemptions of $144 million in 2013, the program cost the state approximately $61,000 per unit of housing, or $2.3 million per job. DED staff prepare the cost-benefit analysis for MHDC based on information and assumptions provided by MHDC staff.

The economic impact reported to the legislature appears overstated because it assumes *no* low income housing construction would take place if not for the state credit. However, since the federal LIHTC is available to the state, some low income housing activity would occur even without the state LIHTC program. The fiscal year 2012 tax credit activity report provided to the legislature estimates approximately 40 percent of LIHTC units would still be feasible without the state credit. Therefore, it is not reasonable to attribute all low income housing economic impact to the state credit. Considering only the low income housing activity that occurs due to the state program would allow the DED to provide the legislature a more accurate assessment of the economic impact of the state LIHTC program.

Recommendation

The Department of Economic Development consider the low income housing activity that would take place without the state LIHTC when calculating the economic impact attributable to the program.

Auditee's Response

The LIHTC, like several other tax credit programs, was not primarily designed to impact the economy; therefore, while a fiscal cost-benefit analysis is required by statute, it should be viewed in context of the program's other goals. Many non-economic tax credit programs also provide community value that cannot be easily quantified in dollar terms further disadvantaging the activity when fiscal analyses is done. Cost-benefit analyses can still be informative in these situations, but should be viewed with these constraints in mind and with other measures that more directly relate to the program's goals.

Since a standard reporting of fiscal cost-benefit analyses is required, regardless of the tax credit's goals, the DED strives to conduct assessments with as much consistency as possible. If findings support a lower activity level assumption in the LIHTC program then those figures can be incorporated into the annual assessment.

[21] $11.9 million in total economic benefit to the state, divided by $151.8 million in total cost equals $.08 returned per $1 invested.

Low Income Housing Tax Credit Activity

The following table shows the amount of LIHTCs authorized and redeemed, as well as the cumulative balance of credits outstanding or pending issuance.

Fiscal Year		Amount Authorized	Amount Redeemed	Cumulative Outstanding or Pending Issuance[1]
1994	$	22,027,870	55,706	21,972,164
1995		22,862,860	646,237	44,188,787
1996		30,106,140	1,072,649	73,222,278
1997		54,177,540	2,027,362	125,372,456
1998		85,806,200	2,907,544	208,271,112
1999		101,367,660	4,323,281	305,315,491
2000		80,455,840	10,105,111	375,666,220
2001		113,735,120	12,368,170	477,033,170
2002		125,558,880	19,474,343	583,117,707
2003		134,388,920	29,978,473	687,528,154
2004		202,644,630	36,916,831	853,255,953
2005		183,106,160	65,392,601	970,969,512
2006		273,640,430	61,963,798	1,182,646,144
2007		169,445,790	81,646,784	1,270,445,150
2008		120,120,070	98,305,085	1,292,260,135
2009		316,175,550[2]	105,967,104	1,502,468,581
2010		149,068,200	142,141,458	1,509,395,323
2011		102,960,000	143,055,387	1,469,299,936
2012		171,894,310	164,208,547	1,476,985,699
2013		192,000,000[3]	144,082,976	1,479,238,119
Totals	$	2,651,542,170	1,126,639,447	

[1] The $1.48 billion in outstanding credits may include some credits no longer eligible for redemption due to time expiration or project non-compliance. Current law does not require the Department of Revenue to maintain this information.

[2] MHDC's administrative process has historically resulted in the authorization of credits one fiscal year after commission approval. In fiscal year 2009, the MHDC changed its procedures to align the authorizations with the fiscal year in which credits are approved. The fiscal year 2009 authorizations account for credits approved in both fiscal year 2008 and 2009.

[3] Credits are issued upon completion and occupancy for an approved project, which can take up to 2 years for most projects. Few if any credits have been issued for fiscal years 2012 and 2013 approved projects as of August 2013. Issued credits for a project may be slightly more or less than the amount authorized for the project.

Per Capita Low Income Housing Funding by State

Based on interviews with other state housing agencies we determined the amount of state LIHTCs awarded in 2012, by state. Using 2012 Census Bureau population data, we calculated per capita LIHTCs awarded.

State	Credits Awarded	2012 Population	Per Capita
Missouri	$ 171,894,310	6,010,688	28.60
Georgia	205,000,000	9,815,219	20.89
Hawaii	15,122,910	1,374,810	11.00
Massachusetts	50,000,000	6,587,536	7.59
New York	100,000,000	19,465,197	5.14
North Carolina	37,000,000	9,656,401	3.83
Vermont	2,000,000	626,431	3.19
California	111,831,403	37,691,912	2.97
Arkansas	2,500,000	2,937,979	0.85
Utah	750,000	2,817,222	0.27

Source: Interviews with other state housing agency officials and MHDC.

The credit amount represents the annual tax credit awarded, multiplied by the duration of the tax credit. Like Missouri, state credits in Georgia, Hawaii, New York, Arkansas, and Utah are 10-year credits (10 percent redeemable each year for a period of 10 years). The other states' credits varied, with North Carolina having a one year credit, California having a 4-year credit, and Massachusetts and Vermont having 5-year credits.

Tax Credit Redemptions

The following table shows redeemed tax credits for fiscal years 2010 through 2013 for all state tax credit programs. We did not audit the information.

Program	Year Ended June 30, 2010	2011	2012	2013
Adoption (Special Needs)	$ 1,894,187	1,346,454	1,036,226	744,155

*Includes selected findings

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Cooper County

We have conducted follow-up work on certain audit report findings contained in Report No. 2013-102, *Cooper County*, issued in October 2013, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the county about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the county, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. As part of the AFTER work conducted, we reviewed supporting documentation submitted by the County Treasurer and held meetings with county officials. Documentation included bank reconciliations, bank account/fund activity reports, and various other financial records. This report is a summary of the results of this follow-up work, which was substantially completed during February 2014.

Thomas A. Schweich
State Auditor

Cooper County
Follow-Up Report on Prior Audit Findings
Status of Findings

1. County Treasurer Controls and Procedures

The County Treasurer did not enter receipts into the computerized accounting system timely during 2012 and did not perform timely bank reconciliations from October to December 2012. As a result, the County Treasurer could not provide up-to-date fund balances to the County Commission during 2012 or ensure the county's accounting records were in balance during the last 3 months of the year.

Prior to January 2012, the County Clerk's office entered receipts into the computerized accounting system, even though this is a duty of the County Treasurer. As of January 2012, this duty was turned back over to the County Treasurer, but he had not been performing this duty in a timely manner. Due to delays in the entry of receipts into the system, the fund balances and actual receipts of the various county funds were not known. Through December 2012, the county paid the software provider $2,163 to perform the backlogged receipt data-entry and bank reconciliation work, and to provide software training to the County Treasurer. Despite the training received, the County Treasurer stated he was still not familiar enough with the system to adequately perform these duties himself, and an additional $2,000 was budgeted in 2013 for the software provider to perform the data entry of the backlogged receipts and bank reconciliation work; however, no receipts for 2013 had been entered into the computerized accounting system as of June 2013.

Recommendation

The County Treasurer ensure receipts are timely entered into the computerized accounting system and bank reconciliations are completed in a timely manner.

Status

Implemented

The County Treasurer now enters receipts into the computerized system timely and completes the monthly bank reconciliations during each subsequent month. The October, November, and December 2013 bank reconciliations were completed on November 21, 2013; December 15, 2013; and January 9, 2014, respectively. The January 2014 bank reconciliation was in progress as of February 19, 2014. In addition, the County Treasurer now gives monthly bank account/fund activity reports to the County Commission after the monthly bank reconciliations have been completed.

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Marshfield, Missouri

We have conducted follow-up work on certain audit report findings contained in Report No. 2013-088, *City of Marshfield*, issued in September 2013, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the city about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the city, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. As part of the AFTER work conducted, we reviewed supporting documentation submitted by city officials and held a meeting with city officials. Documentation reviewed included a report by the City Administrator of the status of recommendations, city financial statements and budgets, open and closed meeting minutes, employee timesheets, real estate transaction documentation, bid documentation, disbursement reports, and receipt records. This report is a summary of the results of this follow-up work, which was substantially completed during January and February 2014.

Thomas A. Schweich
State Auditor

City of Marshfield
Follow-Up Report on Prior Audit Findings
Status of Findings

1. Financial Condition

The General Fund was in poor financial condition. The Board of Aldermen failed to monitor the city's budget and cash balances, and as a result, was not aware of the severity of the General Fund's financial condition. In addition, the city improperly borrowed monies from restricted funds, including transportation sales tax, water, and sewer monies, to finance general operations. Also, the city used General Fund monies to subsidize the Park Fund and transportation services without completing a cost-benefit analysis of these activities. Additionally, the city failed to allocate some disbursements to all impacted funds, thereby unnecessarily using General Fund resources to cover costs that could legitimately be paid from other funds.

Recommendation

The Board of Aldermen require accurate and timely financial reports be prepared, allocate disbursements when appropriate, and closely monitor the city's financial condition. Additionally, the Board of Aldermen should establish a plan to repay General Fund obligations to other restricted use funds, and periodically review operations of the city to ensure activities are operated efficiently and continue to be in the best interest of the city.

Status

In Progress

The financial condition of the General Fund improved during 2013. The December 31, 2013, ending fund balance increased about $83,000 to $283,658 from the December 31, 2012, balance. The Board continues to monitor the financial condition. The Board now receives a report of funds comparing budgeted financial information to actual financial information and also cash balances. New procedures were implemented to allocate disbursements to all impacted funds and document the allocation. We reviewed payroll transactions and a utility disbursement and noted costs were allocated appropriately to the various funds.

As explained in the audit report, the Board determined in 2012 that the General Fund incurred transportation related expenses in excess of the $1.3 million transfer from the Transportation Sales Tax Fund to the General Fund and no outstanding obligation is due. The Board plans to perform a similar review of Water and Sewer Fund transfers during 2014 to determine the extent of the General Fund obligation. The Board voted to eliminate transportation services in October 2013. The Board continues to review the subsidization of the Park Fund and will consider new fees for park services to reduce the burden on the General Fund.

2. Financial Activity

The city had not established adequate accounting records and procedures and had failed to implement prior audit recommendations related to inadequate financial procedures.

2.1 Restricted monies

The city operated with negative balances for some funds in the "pooled cash" account during the year, and financial information was inaccurate because the city did not record interfund transfers as they occurred.

In addition, the city transferred monies from the Transportation Sales Tax Fund to the General Fund, but did not track these monies and did not always record disbursements related to grant projects in the appropriate grant fund. The city deposited state motor vehicle-related receipts and Police Officer Standards Training and Law Enforcement Training fees into the "pooled cash" account, to the credit of the General Fund without tracking the receipts, disbursements, and balances of these restricted monies. The city also did not adequately track donations received for a sidewalk improvement project or identify these monies as restricted. Finally, the city incorrectly reported negative lodging tax receipts.

Recommendation

The Board of Aldermen establish procedures to ensure restricted monies are used only for allowable purposes and accounting records accurately reflect the financial activity of the city. In addition, the Board should correct errors and identify and review restricted fund activity.

Status

In Progress

The Board continues to identify and implement procedures to ensure restricted funds receipts are only used for allowable purposes and accounting records accurately reflect the financial activity of the city. The Board is working to separate funds into separate bank accounts to better track and limit interfund transfers and approved bank accounts for the Capital Improvement Funds for Water and Wastewater. The Board previously moved the Transportation Sales Tax and Cemetery Funds into separate bank accounts. As noted above, the Board reviewed the transfer from the Transportation Sales Tax Fund to the General Fund and determined no outstanding obligation is due. The city plans to perform a similar review of Water and Sewer Fund transfers during 2014 to determine the extent of the General Fund obligation. The city is in the process of identifying and preparing corrective journal entries for the errors identified in the audit report and expects to complete the process by the end of April 2014.

2.2 Corrective action

The city failed to implement many recommendations made by the independent auditor who performed the city's annual financial statement audit for the past 5 years.

Recommendation

The Board of Aldermen implement audit recommendations timely.

Status

In Progress

The Board has taken steps to address all of the State Auditor's recommendations. City staff also plan to review recommendations made in the independent auditor's reports for implementation in 2014.

2.3 Adjustments

Adjustments recorded in the accounting system by the City Accountant were not reviewed or approved by someone independent of administering the accounting system.

Recommendation

The Board of Aldermen require an independent review and approval of all adjustments.

Status

Implemented

The City Administrator now reviews journal entries and the Board reviews adjusting journal entries monthly. We reviewed information submitted to the Board for the December 5, 2013, Board meeting and noted a report of adjusting journal entries was presented to the Board. The Board discussed the report during the meeting and the City Administrator and Board reviewed the adjusting entries.

3. Real Estate Purchases and Leases

The city leased properties for minimal or no rental fees and held additional property for possible future use by a not-for-profit organization (NFP) despite the city's poor financial condition.

Recommendation

The Board of Aldermen develop plans for the utilization of city-owned property and ensure associated costs are considered and a cost-benefit analysis is performed when leasing properties. The Board should also better plan for future real estate purchases and projects, and ensure independent appraisals are obtained prior to the purchase of real estate.

Status

In Progress

The Board initiated a process of identifying and acquiring copies of all lease agreements and will perform a cost-benefit analysis on each property. The Board plans to prepare a property management plan to ensure periodic reviews of agreements are performed and insurance requirements are met. The Board recently sold 1 property leased to an NFP to the county and traded 2 other properties held for the same NFP with the Marshfield Housing Authority for land to be used for establishing a stormwater retention basin. We reviewed the related documents and noted the city obtained independent appraisals for these transactions.

4.1 Budgets and Financial Statements - Budgetary compliance and monitoring

City budgets did not include a budget message or budget summary, the actual beginning and estimated ending fund balances, or city indebtedness. The city had not established adequate procedures to monitor or amend budgets. In addition, the 2012 budgeted information was not recorded in the city accounting system correctly, causing any budget to actual reports generated to be inaccurate.

Recommendation

The Board of Aldermen ensure budgets comply with state law and include the most up-to-date information. In addition, the Board should establish procedures to properly monitor actual to budgeted activity, and ensure any budget amendments are made prior to incurring related disbursements.

Status

Implemented

We reviewed the city's 2014 budget document and it includes current financial information and meets statutory requirements. The Board is more closely monitoring the budget, and made 4 budget amendments in 2013. We reviewed 2 of these amendments and noted the Board made the amendments prior to incurring related disbursements.

5.1 Accounting Controls and Procedures - Receipting, transmitting, and depositing procedures

Receipt slips were not issued for some monies received. In addition, the City Collector did not issue receipt slips for monies transmitted from other city departments and receipt slips issued for building permits and water deposits were not prenumbered.

The method of payment was not always documented on utility stubs used to receipt utility payments and was not recorded in the utility billing system. Therefore, the composition of receipts could not be reconciled to either the accounting system or deposits. In addition, checks were not always restrictively endorsed upon receipt.

Monies collected were not always timely transmitted to the City Collector for deposit, and some city departments routinely withheld payments from transmittals. Also, Public Works employees did not properly secure monies collected after hours and receipts were not always deposited timely and intact.

Recommendation

The Board of Aldermen require prenumbered receipt slips or utility stubs, documenting the method of payment, be issued for all monies received including transmittals received by the City Collector's office. The Board should also ensure checks are restrictively endorsed immediately upon receipt, maintained in a safe location, and deposited intact and in a timely manner.

Status

Implemented

The Board purchased and installed the Receipt Management (RM) module of the city accounting system in 2013. City personnel restrictively endorse all checks, enter all receipts into the RM module, and a system generated receipt slip is issued. City personnel deposit receipts nightly. The City Collector also issues a system generated receipt slip for all monies transmitted by other city departments. Public Works employees record all monies received after hours in a prenumbered receipt slip book and transmit receipts nightly to the city hall night deposit box. We reviewed the receipt documentation for January 14, 2014, and noted city personnel issued receipt slips, recorded the method of payment, and reconciled the receipt records to the cash drawer.

6.1 Payroll Controls and Procedures - Payroll procedures

Payroll duties were not adequately segregated or supervised, and reviews of time records were not sufficient. Timesheets and timecards were not signed by most employees or by most supervisors to document approval of time worked and leave used. In addition, Police Department employees did not submit time records to the City Accountant to support payroll disbursements and provide information needed for updating centralized leave records.

Recommendation

The Board of Aldermen adequately segregate payroll duties or, at a minimum, ensure a documented review of these functions is performed on a periodic basis by someone independent of the payroll functions. The Board should ensure timesheets are prepared, properly signed, approved, and retained for all employees and the information is reviewed for accuracy prior to entry into the accounting system.

Status

In Progress

The Board segregated the payroll function from other accounting functions, which were previously handled by the same employee. All employees, including those in the Police Department, are now required to prepare time records that are signed by the employee and reviewed for accuracy by supervisors. Time records are retained. The City Administrator reviews department supervisors' timesheets. Once all timesheets are entered, a trial report is reviewed by the City Administrator and gross pay is checked against the previous pay period. The payroll claim report is then signed by the City Administrator and retained.

We reviewed the payroll records for the pay periods ending November 15 and December 31, 2013. All employees, including Police Department employees, submitted time records. The employee and supervisor signed the time records in most cases. We noted the City Administrator did not sign the supervisor timesheets to document his review. The City Administrator indicated he plans to sign the timesheets in the future to document his review.

7.2 Written Contracts and Contract Compliance - Monitoring contracts

The city did not always monitor contracts effectively.

The city contracted with an engineering firm in March 2008 to update the city's comprehensive plan. However, due to lack of progress, the city terminated the agreement in September 2009. In January 2010, the city contracted with a new engineering firm to provide the same service. In November 2010, the city was notified the original engineering firm, which the city had fired in 2009, had acquired the new engineering firm and the original engineering firm assumed the second contract. As of December 31, 2012, the city had paid a total of $50,283 for this project and the city did not have a finalized comprehensive plan document.

The city entered into a contract in April 2009 with a local company that agreed to maintain a minimum average number of full-time jobs over 5 years in exchange for city-owned land in the industrial park area. The city did not receive documentation of the average number of full-time jobs maintained in 2010, 2011, or 2012. As a result, the city did not properly monitor the contractual requirements. As of December 31, 2012, no report had been filed.

The city entered into a contract in July 2009 to lease the recycling center to a local sheltered workshop for $1 per month for 18 months. Although this contract expired in December 2011, the city allowed the sheltered workshop to occupy the center until December 2012 without an updated contract.

Recommendation

The Board of Aldermen monitor contracts for compliance and ensure satisfactory progress by contractors prior to payment.

Status

In Progress

The Board is in the process of identifying and acquiring copies of all existing contracts. The Board is also in the process of entering into contracts as appropriate for arrangements with other entities for which there are no contracts in place, and is working with the city attorney to prepare properly detailed contracts. The City Administrator plans to begin systematic monitoring of contracts including developing a contract management plan once all current contracts have been identified and other contracts have been entered into as appropriate.

8.1 Disbursements - Approval process and oversight

The approval process for disbursements and oversight of bank account activity was not adequate. The list of bills approved by the Board each month was not complete, and a comparison of this list to approved invoices and the actual checks written was not performed. The Board did not review or approve the closing of bank accounts or transfers between bank accounts. Some invoices were not approved prior to payment and purchase orders were not always approved prior to the date of purchase. The numerical sequence of purchase orders issued was not tracked.

Recommendation

The Board of Aldermen ensure the list of bills provided for approval at monthly meetings is complete, all invoices are reviewed and approved by appropriate officials prior to payment, purchase orders are approved prior to the date of purchase, and the numerical sequence of purchase orders issued is accounted for properly, and establish adequate review and approval procedures for transfers and bank account closures.

Status

In Progress

The Board now reviews a detailed report of and approves all non-payroll related disbursements. The Board also approves all bank account transfers and will approve any bank account closures. Starting with the January 23, 2014, Board meeting, city personnel provide the Board a report of payroll disbursements by department and fund. The Board hired a Financial Clerk in December 2013 to perform city accounting duties. As part of her duties, the Financial Clerk will review disbursements and ensure necessary information and approval is obtained and purchase orders are approved prior to purchase. The City Administrator will also review to ensure purchase orders are approved prior to purchase. The Board also created a Data Clerk position within the 2014 budget. This person's job duties will include reviewing invoices for appropriate approval, assisting departments in preparing purchase orders and tracking purchases, and accounting for the numerical sequence of purchase orders. We reviewed information submitted to the Board in January 2014 and noted city personnel presented detailed disbursement reports to the Board for review and approval.

8.3 Disbursements - Conflicts of interest

Former Alderman Noland, who served on the Board until April 2012 and who also served as Deputy Fire Chief and received payment for fire calls, did not always abstain from the approval of disbursements made for the operation of the city Fire Department. The Public Works Superintendent approved purchases of ready mix totaling $14,135 from a company owned by his cousin.

Recommendation

The Board of Aldermen more closely examine city transactions to identify and avoid apparent and actual conflicts of interest.

Status

Implemented

The City Administrator now reviews all vendors to ensure no apparent or actual conflicts or statutory violations exist. Any transactions with a potential conflict of interest are required to be reviewed and approved by the City Administrator in addition to the normal review process. The city continues to purchase items from the ready mix company, but the Public Works Superintendent is no longer solely responsible for approving the purchases. We reviewed 2 purchase orders for ready mix purchases from

September and October 2013 and noted the City Administrator and Board reviewed and approved the purchase orders.

8.4 Disbursements - Bidding

City personnel did not always comply with the city's purchasing policy. Bids were not solicited for some purchases, some bidding documentation could not be located, and no documentation was maintained for several sole source purchases.

Recommendation

The Board of Aldermen ensure bids are solicited for all applicable purchases in accordance with city policy and sufficient documentation is maintained.

Status

In Progress

We reviewed 5 disbursements made between July and December 2013 that required bids and noted the city did not always obtain the required bids. We noted 2 purchases did not have the required bids or quotes. The city made another purchase using a Webster County contract; however, city personnel did not include the related bid prices with the purchase documentation. The City Administrator indicated job responsibilities of the recently hired Financial Clerk include reviewing all purchase orders and ensuring bidding requirements are met before purchases are made in the future.

8.5 Disbursements - Supporting documentation

The city did not always receive or retain adequate supporting documentation to support disbursements or show compliance with grant agreements.

Recommendation

The Board of Aldermen ensure sufficient supporting documentation is maintained for all disbursements and grants.

Status

Implemented

The Financial Clerk is reviewing purchase and grant documentation to ensure all necessary documentation is obtained and retained. We reviewed 8 disbursements from December 2013 and noted supporting documentation was retained.

8.6 Disbursements - Untimely payments

The city did not pay several invoices timely. The city incurred unnecessary late payment fees for these errors. Further, invoice due dates were not correctly recorded in the accounting system.

Recommendation

The Board of Aldermen ensure all invoices are paid in a timely manner and invoice due dates are correctly recorded in the accounting system.

Status

Implemented

The Board segregated duties between accounts payable and payroll, reducing the responsibilities transferred to the new Financial Clerk. As a result, invoices are processed and recorded more timely in the accounting system. The Financial Clerk also now records the actual invoice due date rather than the board meeting date in the accounting system. We reviewed 8 disbursements from December 2013 and noted payments were timely.

8.7 Disbursements - Vendor information

As of December 2012, the city vendor list contained 18 duplicate vendor names, each with a separate vendor number. City officials did not review the vendor list and were not aware of these duplications. For one of the duplicate vendors, city staff entered an invoice totaling $316 into the accounting system twice in June 2012, using two different spellings of the vendor's name and made a duplicate payment to the vendor.

Recommendation

The Board of Aldermen ensure new vendors added to the accounting system are reviewed and approved. In addition, existing vendor files should be periodically reviewed by someone independent of the disbursement process and duplicate vendors should be eliminated.

Status

In Progress

The City Administrator reviewed the vendor list in November 2013 and eliminated identified vendor duplications. The city plans to continue to monitor the list. We reviewed the vendor list as of January 14, 2014, and noted 16 additional potential duplicate vendors. The Financial Clerk plans to review and address these potential duplicate vendors. The city received a credit memo in July 2013 from the vendor that received the duplicate payment.

10.2 Utility Controls and Procedures - Water usage and billings

The city did not investigate significant differences identified in the monthly comparison of gallons of water billed to customers to gallons of water pumped. In addition, city water usage was not tracked, and the city failed to install meters and bill two other political subdivisions for water and sewer services at city properties leased by those political subdivisions.

Recommendation

The Board of Aldermen investigate significant differences between gallons of water pumped to gallons billed, track city usage on a monthly basis, and ensure all usage is appropriately billed and collected.

Status

In Progress

The city now investigates large differences noted when reconciling water usage data. City reconciliations showed water loss in excess of 10 percent in October and November 2013. The city reviewed the October difference and determined it occurred due to the timing of reading water meters. The city is currently reviewing the water loss for November. In response to the audit,

city officials also revised their calculation procedures. Previously, the date for calculating the amount of water billed differed from the date of the water pumped resulting in timing differences that made it difficult to reconcile water usage data. The city now uses the same day.

As of January 31, 2014, the city is accounting for city water usage when comparing water usage to water billed. In addition, the city installed meters on all buildings owned by the city and leased to other political subdivisions. The City Administrator stated billing the political subdivisions will begin after lease agreements are changed to reflect responsibility for water and sewer charges.

Missouri State Auditor

State of Missouri

Single Audit

Year Ended June 30, 2013

March 2014

Report No. 2014-017

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Fiscal Year 2013 Statewide Single Audit

Single Audit Background

The United States Congress passed the Single Audit Act of 1996 to establish uniform requirements for audits of federal awards administered by states, local governments, and non-profit organizations. The Act requires an audit of the state's financial statements and its use of federal awards.

Single Audit guidelines require audit work be conducted on "major" programs and utilize a risk-based approach to determine which specific programs are major. Using this methodology, for the fiscal year ended June 30, 2013 (FY2013), our Single Audit involved audit work on 20 major programs at 9 departments, encompassing $8.27 billion (69 percent) of the total federal awards spent. The 20 major programs audited also account for approximately 70 percent ($108 million) of all American Recovery and Reinvestment Act of 2009 (ARRA) funds spent during FY2013. The audit contains 22 findings with 31 recommendations. Several of these findings are summarized below.

2013 Federal Awards

The state spent approximately $11.96 billion in federal awards through 344 different federal programs during FY2013, including approximately $153 million in federal ARRA awards expended through 29 programs at 11 state departments. The majority of ARRA funds were expended by the end of FY2013, but some programs will continue to have ARRA expenditures in subsequent fiscal years.

Child Care Eligibility, Payments, and Provider Eligibility
DSS

As noted in our three prior audit reports, significant weaknesses still exist in the DSS controls over the Child Care Development Fund eligibility and provider payments. The DSS could not locate eligibility files for 12 percent of cases reviewed, eligibility documentation was not sufficient to support a valid need for childcare for 18 percent of files reviewed, and 33 percent of payments reviewed were not supported by adequate documentation and/or were not in compliance with DSS policies. In addition, for 10 percent of the payments reviewed, providers were paid for more than the child's authorized number of days for the month, and for 13 percent of the payments, providers were paid more than the allowed number of absences and/or holidays. The DSS also lacks adequate controls and procedures to ensure license-exempt child care providers comply with state law. State law does not require child care providers to be licensed if they care for four or less children to whom they are not related. We reviewed 10 license-exempt providers, each caring for between 7 and 22 children, and found that for 80 percent of the providers, the DSS incorrectly classified, or could not substantiate, the relationship between the providers and the related children.

Eligibility and TANF Assistance Payments, Work Participation, and Sanctions
DSS

As noted in our two prior audit reports, the DSS-Family Support Division (DSS-FSD) paid Temporary Assistance for Needy Families (TANF) benefits to some recipients who may not have been eligible or were ineligible for the full amount of TANF payments received. We noted concerns for 8 percent of recipients reviewed. In addition, for 50 percent of TANF cases flagged for non-cooperation we tested, either the Child

	Support Enforcement Unit did not promptly notify the DSS-FSD of the non-cooperation, or the DSS-FSD did not act to sanction the recipient upon notification. Also, as noted in the three prior audits, the DSS-FSD was not in compliance with certain work activity reporting requirements contained in the Work Verification Plan. For 33 percent of recipients tested, the work participation hours were not documented, not verified, and/or not reported correctly. The DSS-FSD still lacks adequate procedures to ensure Missouri Work Assistance contractors notified the DSS-FSD when TANF recipients failed to meet work participation requirements, and 15 percent of recipients tested were not properly sanctioned for noncompliance.
Foster Care Reimbursements, Coding, and Allocations DSS	Coding errors by the DSS-Division of Finance and Administrative Services (DFAS) and Children's Division (CD) went undetected, causing some payments to residential facilities to be allocated to the Adoption Assistance program instead of the Foster Care program. The DFAS also claimed some federal costs at an incorrect rate and, as reported in two previous audit reports, continues to reimburse training costs without sufficient documentation to show they were allowable Foster Care training.
Medicaid Home and Community Based Services Eligibility Redeterminations DHSS	As noted in the three prior audits, the Department of Health and Senior Services (DHSS)-Division of Senior Disability Services (DSDS) does not ensure annual reassessments are performed, as required, to determine continued need of services of Home and Community Based Services recipients. The DHSS-DSDS did not perform annual reassessments for 54 percent of the cases reviewed which required a reassessment.
Pharmacy Reimbursement Allowance Tax and Report Reviews DSS	Due to a data entry error, the DSS-MO HealthNet Division (MHD) failed to properly assess one of the reviewed pharmacies taxes of at least $104,646. In addition, the DSS-MHD does not have effective controls for reviewing some reports to ensure compliance with enrollment requirements of the Medicare Buy-In program or certain claims processing requirements of the Medical Assistance Program.
Reporting and Subrecipient Monitoring DPS	The Department of Public Safety (DPS)-State Emergency Management Agency (SEMA) did not report subawards of the Disaster Grants-Public Assistance (PA) program as required by the Federal Funding Accountability and Transparency Act. In addition, the SEMA does not adequately document reviews performed of subrecipients' expenditures charged to the PA program.
Child Support Enforcement DSS	A county billed the DSS-FSD for unapproved personnel severance costs, and the FSD failed to identify the unallowable costs or require the county to provide supporting documentation for the $200,960 claimed. The DSS-DFAS also incorrectly recorded costs from one vendor invoice for call center services, resulting in unallowable costs charged to the program.
Medicaid Cash Receipt Controls DSS	The DSS-MHD does not have adequate controls over cash receipts. The DSS-MHD did not restrictively endorse checks and money orders immediately upon receipt or deposit receipts in a timely manner and did not adequately restrict user access within the cash receipts and accounts receivable modules of the Medicaid Management Information System.

Because of the compound nature of this audit report, no overall rating is provided.

INTRODUCTION AND SUMMARY

INTRODUCTION AND SUMMARY

The United States Congress passed the Single Audit Act of 1996 to establish uniform requirements for audits of federal awards administered by states, local governments, and non-profit organizations. The Office of Management and Budget (OMB) issued Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* to set forth standards for obtaining consistency and uniformity among federal agencies for the audit of non-federal entities expending federal awards. A single audit requires an audit of the state's financial statements and expenditures of federal awards. The audit is required to determine whether:

- The state's basic financial statements are presented fairly in all material respects in conformity with generally accepted accounting principles.

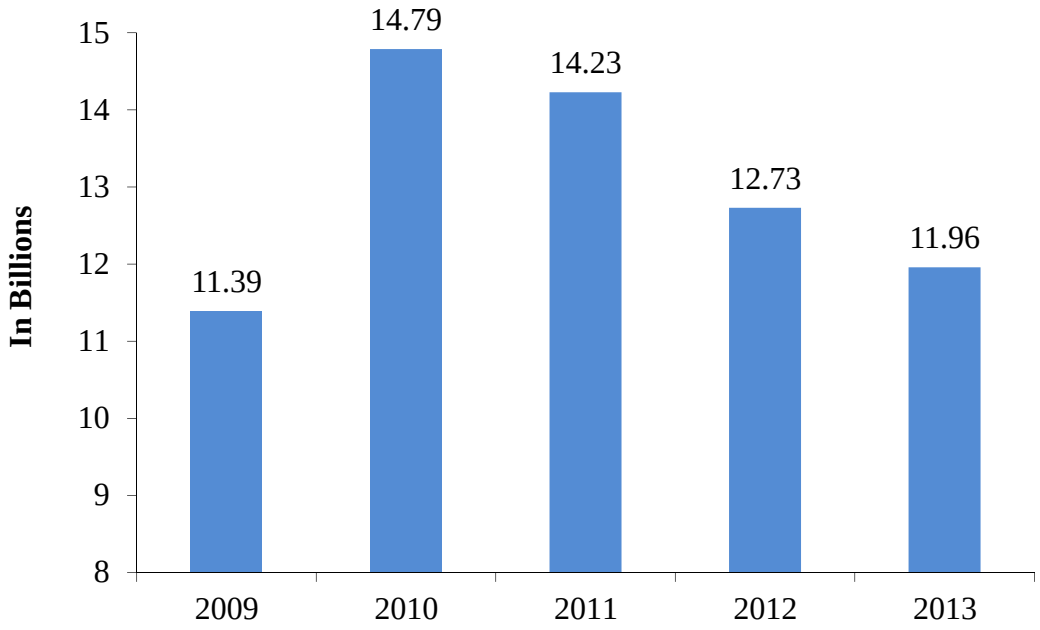
- The schedule of expenditures of federal awards is presented fairly in all material respects in relation to the financial statements taken as a whole.

- The state has adequate internal controls to ensure compliance with federal award requirements.

- The state has complied with the provisions of laws, regulations, and contracts or grants that could have a direct and material effect on federal awards.

The Single Audit report includes the federal awards expended by all state agencies that are part of the primary government. The report does not include the component units of the state, which are the public universities and various financing authorities. These component units have their own separate OMB Circular A-133 audits conducted by other auditors. The state expended $11.96 billion in federal awards during the year ended June 30, 2013.

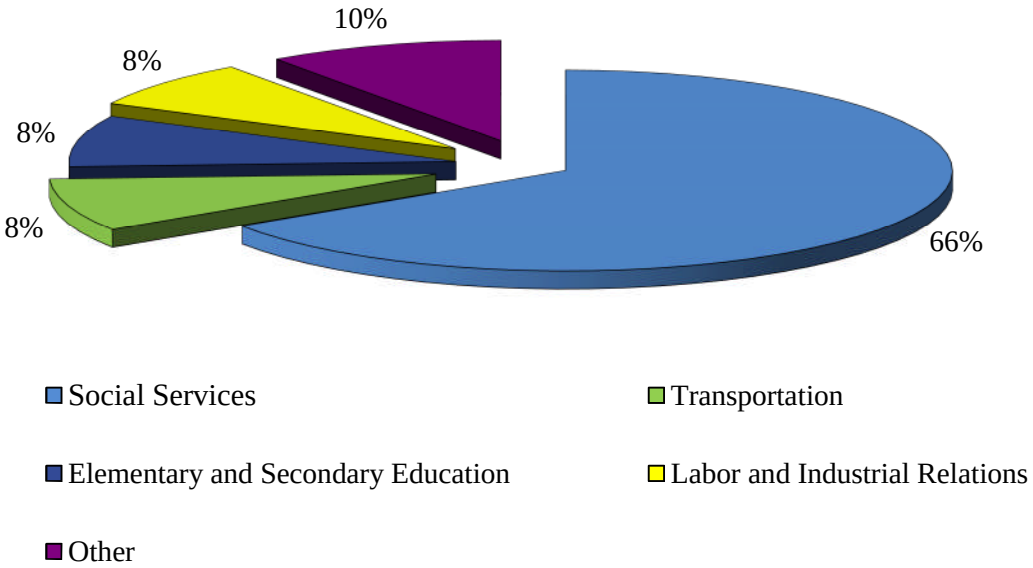
Total Expenditures of Federal Awards
Five Year Comparison



Expenditures of federal awards peaked in fiscal year 2010 due to additional federal funds made available through the American Recovery and Reinvestment Act of 2009 (ARRA). The majority of ARRA funds were expended by the end of fiscal year 2012; however, some programs continued to have ARRA expenditures in fiscal year 2013.

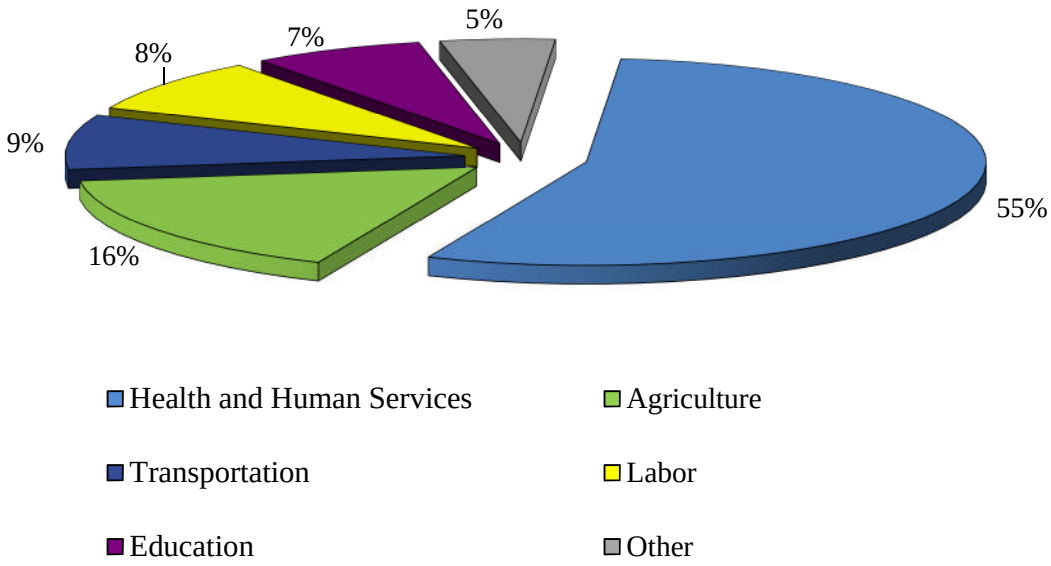
Although 19 state departments and other state offices expended federal awards, 4 state departments expended the bulk of the federal awards (90 percent).

Expenditures of Federal Awards by State Department



The state received federal awards from 23 different federal agencies. Most of the federal awards (95 percent) came from 5 federal agencies.

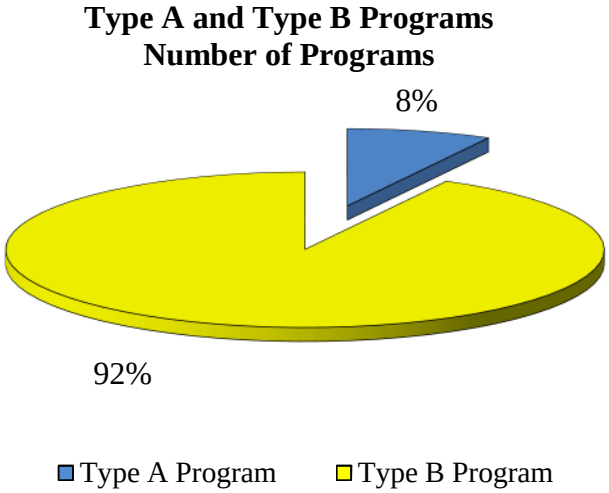
Expenditures of Federal Awards by Federal Department



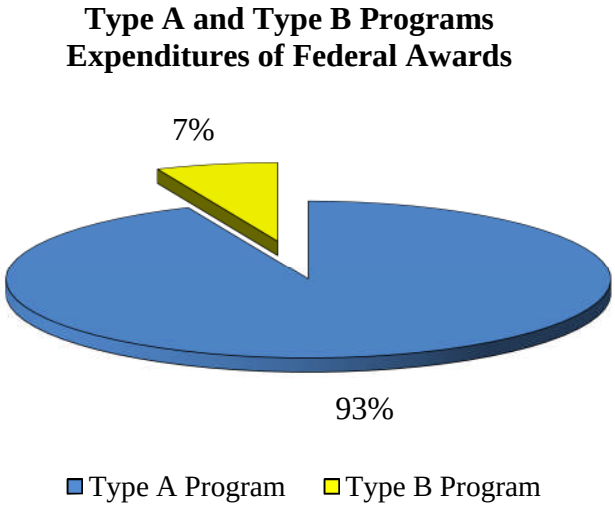
Overall, the state expended federal awards in 344 different programs. Under the audit requirements of OMB Circular A-133, federal programs are divided into Type A and Type B programs based on a dollar threshold. For the state of Missouri, OMB Circular A-133 defines the dollar threshold of a Type A program as the larger of $30 million or fifteen-hundredths of one percent (0.0015) of federal awards expended.

Determination of Type A Programs		
Larger of:		$30,000,000
		or
Total expenditures of federal awards	11,961,603,966	
Fifteen-hundredths of one percent	.0015	
		17,942,406
Dollar Threshold		$30,000,000

Programs with federal expenditures over $30 million are Type A programs and the programs under $30 million are Type B programs. Of the 344 different federal award programs, 27 were Type A programs and 317 were Type B programs.



The 27 Type A programs had expenditures of federal awards totaling $11.2 billion, which was 93 percent of the total expenditures for all programs. The 317 Type B programs had expenditures of federal awards totaling $779 million, which was only 7 percent of the total expenditures for all programs.



OMB Circular A-133 requires the auditor to perform risk assessments on Type A programs and to audit as major each Type A program assessed as high risk based on various risk factors. To ensure a high level of accountability over ARRA funds, Appendix VII of the 2013 Compliance Supplement included additional criteria to consider when determining risk for the Type A programs containing ARRA funds due to the inherently higher risk of these funds. We performed a risk assessment on each Type A program and determined 12 of the 27 Type A programs were low risk and did not need to be audited as major. In accordance with OMB Circular A-133, we audited the 15 Type A programs assessed as high risk as major.

OMB Circular A-133 also requires the auditor to perform risk assessments on the larger Type B programs to determine which ones to audit as major in place of the Type A programs which were not audited as major. The dollar threshold to determine the larger Type B programs is three-hundredths of one percent (.0003) of total awards expended ($11.96 billion times .0003 = $3,588,481). We performed risk assessments on the 50 larger Type B programs and determined 9 of them were high risk. In accordance with OMB Circular A-133, we audited 5 (at least one-half) of these 9 high risk Type B programs as major.

Major and Non-major Programs

Audit Coverage by Type of Program	Number of Programs	Expenditures	Percentage of Expenditures
Type A major programs	15	$ 8,194,304,695	
Type B major programs	5	76,483,430	
Total major programs	20	$ 8,270,788,125	69%
Type A non-major programs	12	$ 2,988,095,833	
Type B non-major programs	312	702,720,008	
Total non-major programs	324	$ 3,690,815,841	31%
Total all programs	344	$ 11,961,603,966	100%

American Recovery and Reinvestment Act of 2009

As noted above, the state of Missouri expended a total of approximately $11.96 billion in federal awards during the year ended June 30, 2013. Of that total, approximately $153 million (1.3 percent) was expended in ARRA awards. The ARRA awards relate to 29 federal programs with expenditures at 11 different state agencies. We audited 6 of these programs as major, covering about $108 million, or 70 percent of total expenditures of ARRA awards.

STATE AUDITOR'S REPORTS

THOMAS A. SCHWEICH
Missouri State Auditor

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the state of Missouri, as of and for the year ended June 30, 2013, and the related notes to the financial statements, which collectively comprise the state's basic financial statements, and have issued our report thereon dated January 10, 2014. Our report expressed a qualified opinion on the governmental activities and the General Fund, a major fund, because we were not allowed access to tax returns and related source documents for income taxes. Approximately 27 percent of governmental activity revenues and 32 percent of General Fund revenues are from this source. We were unable to satisfy ourselves by appropriate audit procedures as to the income tax revenue beyond the amounts recorded.

Our report on the state of Missouri's financial statements also includes a reference to other auditors who audited the financial statements of:

1. The Missouri Road Fund, a major fund; the Missouri Highway 63 Transportation Corporation, a blended transportation corporation; the Missouri Road Bond Fund; the Transportation Self-Insurance Plan; the Missouri State Employees' Insurance Plan; the Missouri Consolidated Health Care Plan; and the Missouri Department of Transportation and Missouri State Highway Patrol Medical and Life Insurance Plan, which represent 78 percent and 12 percent of the assets and revenues, respectively, of the governmental activities.

2. The State Lottery and the Petroleum Storage Tank Insurance Fund, which are both major funds and represent 37 percent and 49 percent of the assets and revenues, respectively, of the business-type activities.

3. The aggregate discretely presented component units.

4. The pension (and other employee benefit) trust funds and the Missouri Department of Transportation Local Fund, which represent 94 percent and 97 percent of the assets and additions, respectively, of the fiduciary funds.

This report does not include the results of the other auditors' testing of internal control over financial reporting or compliance and other matters that are reported on separately by those auditors.

The financial statements of the Missouri Highway 63 Transportation Corporation, a blended transportation corporation; the Missouri State Employees' Insurance Plan and the Missouri Consolidated Health Care Plan, internal service funds; the Missouri Development Finance Board, a discretely presented component unit; and the pension (and other employee benefit) trust funds were not audited in accordance with *Government Auditing Standards* and accordingly this report does not include reporting on internal control over financial reporting or instances of reportable noncompliance associated with these entities.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the state of Missouri's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the state's internal control. Accordingly, we do not express an opinion on the effectiveness of the state's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as described in the accompanying Schedule of Findings and Questioned Costs, we identified certain deficiencies in internal control that we consider to be a material weakness and a significant deficiency.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the state's financial statements will not be prevented, or detected and corrected, on a timely basis. We consider the deficiency described in the accompanying Schedule of Findings and Questioned Cost as finding number 2013-001 to be a material weakness.

A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiency described in the accompanying

Schedule of Findings and Questioned Cost as finding number 2013-002 to be a significant deficiency.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the state of Missouri's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose. However, pursuant to Section 29.200, RSMo, this report is a matter of public record and its distribution is not limited.

Thomas A. Schweich
State Auditor

January 10, 2014

THOMAS A. SCHWEICH
Missouri State Auditor

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR FEDERAL PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE WITH OMB CIRCULAR A-133

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly

Report on Compliance for Each Major Federal Program

We have audited the state of Missouri's compliance with the types of compliance requirements described in the U.S. Office of Management and Budget (OMB) *Circular A-133 Compliance Supplement* that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2013. The state's major federal programs are identified in the summary of auditor's results section of the accompanying Schedule of Findings and Questioned Costs.

Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of the state's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the state's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of the state's compliance.

Basis for Qualified Opinion on Certain Major Federal Programs

As described in findings 2013-003, 2013-005, 2013-009, and 2013-010 in the accompanying Schedule of Findings and Questioned Costs, the state of Missouri did not comply with requirements regarding the following:

Finding Number	***CFDA Number***	***Program (or Cluster) Name***	***Compliance Requirement(s)***
2013-003	*93.775* *93.777* *93.778*	*Medicaid Cluster*	*Activities Allowed and Unallowed and Allowable Costs and Cost Principles*
2013-005	*97.036*	*Disaster Grants - Public Assistance (Presidentially Declared Disasters)*	*Reporting*
2013-009	*93.575* *93.596*	*Child Care Development Fund Cluster*	*Activities Allowed and Unallowed, Allowable Costs and Cost Principles, and Eligibility*
2013-010	*93.575* *93.596*	*Child Care Development Fund Cluster*	*Eligibility and Special Tests and Provisions*

Compliance with such requirements is necessary, in our opinion, for the state of Missouri to comply with the requirements applicable to these programs.

Qualified Opinion on Certain Major Federal Programs

In our opinion, except for the noncompliance described in the Basis for Qualified Opinion paragraph, the state of Missouri complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on major federal programs for the year ended June 30, 2013.

Unmodified Opinion on Each of the Other Major Federal Programs

In our opinion, the state of Missouri complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its other major federal programs identified in the summary of auditor's results section of the accompanying Schedule of Findings and Questioned Costs for the year ended June 30, 2013.

Other Matters

The results of our auditing procedures disclosed other instances of noncompliance, which are required to be reported in accordance with OMB Circular A-133 and which are described in the accompanying Schedule of Findings and Questioned Costs as findings 2013-004, 2013-005,

2013-007, 2013-008, 2013-012, 2013-013, 2013-015, 2013-016, 2013-017, 2013-018, and 2013-021. Our opinion on each major federal program is not modified with respect to these matters.

The state of Missouri's response to the noncompliance findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs. The state's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

Report on Internal Control Over Compliance

Management of the state of Missouri is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the state's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of the internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the state's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below, we identified certain deficiencies in internal control over compliance that we consider to be material weaknesses and significant deficiencies.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. We consider the deficiencies in internal control over compliance described in the accompanying Schedule of Findings and Questioned Costs as findings 2013-005, 2013-009, 2013-010, and 2013-011 to be material weaknesses.

A *significant deficiency in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the deficiencies in internal control over compliance described in the accompanying Schedule of Findings and Questioned Costs as findings 2013-006, 2013-008, 2013-015, 2013-016, 2013-019, and 2013-021 to be significant deficiencies.

The state of Missouri's response to the internal control over compliance findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs. The state's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal controls over compliance and the results of that testing based on the requirements of OMB Circular A-133. Accordingly, this report is not suitable for any other purpose. However, pursuant to Section 29.200, RSMo, this report is a matter of public record and its distribution is not limited.

Missouri State Auditor

INDEPENDENT AUDITOR'S REPORT ON THE
SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS
IN ACCORDANCE WITH OMB CIRCULAR A-133

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the state of Missouri, as of and for the year ended June 30, 2013, and the related notes to the financial statements, which collectively comprise the state's basic financial statements, and have issued our report thereon dated January 10, 2014. Our report expressed a qualified opinion on the governmental activities and the General Fund, a major fund, because we were not allowed access to tax returns and related source documents for income taxes. Approximately 27 percent of governmental activity revenues and 32 percent of General Fund revenues are from this source. We were unable to satisfy ourselves by appropriate audit procedures as to the income tax revenue beyond the amounts recorded.

Our report on the state of Missouri's financial statements also includes a reference to other auditors who audited the financial statements of:

1. The Missouri Road Fund, a major fund; the Missouri Highway 63 Transportation Corporation, a blended transportation corporation; the Missouri Road Bond Fund; the Transportation Self-Insurance Plan; the Missouri State Employees' Insurance Plan; the Missouri Consolidated Health Care Plan; and the Missouri Department of Transportation and Missouri State Highway Patrol Medical and Life Insurance Plan, which represent 78 percent and 12 percent of the assets and revenues, respectively, of the governmental activities.

2. The State Lottery and the Petroleum Storage Tank Insurance Fund, which are both major funds and represent 37 percent and 49 percent of the assets and revenues, respectively, of the business-type activities.

3. The aggregate discretely presented component units.

4. The pension (and other employee benefit) trust funds and the Missouri Department of Transportation Local Fund, which represent 94 percent and 97 percent of the assets and additions, respectively, of the fiduciary funds.

The financial statements of the Missouri Highway 63 Transportation Corporation, a blended transportation corporation; the Missouri State Employees' Insurance Plan and the Missouri Consolidated Health Care Plan, internal service funds; the Missouri Development Finance Board, a discretely presented component unit; and the pension (and other employee benefit) trust funds were not audited in accordance with *Government Auditing Standards.*

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the state of Missouri's basic financial statements. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the audit procedures applied by us and the other auditors in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. The state of Missouri has excluded federal award expenditures of public universities and other component units from the accompanying schedule. In our opinion, except for the effects of the exclusion of federal award expenditures of public universities and other component units, the Schedule of Expenditures of Federal Awards is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The purpose of this report is solely to provide an opinion on the Schedule of Expenditures of Federal Awards in relation to the basic financial statements as a whole based on the requirements of OMB Circular A-133. Accordingly, this report is not suitable for any other purpose. However, pursuant to Section 29.200, RSMo, this report is a matter of public record and its distribution is not limited.

Thomas A. Schweich
State Auditor

January 10, 2014

The accompanying Notes to the Schedule of Expenditures of Federal Awards are an integral part of this schedule.

STATE OF MISSOURI
NOTES TO THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS
YEAR ENDED JUNE 30, 2013

1. Significant Accounting Policies

A. Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards of the state of Missouri has been prepared to comply with U.S. Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* and the 2013 OMB Circular A-133 Compliance Supplement. The circular requires a schedule that shows total federal awards expended for each federal program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA information is not available. Appendix VII of the supplement requires identifying expenditures of federal awards made under the American Recovery and Reinvestment Act of 2009 (ARRA) separately on the schedule with the inclusion of the prefix "ARRA-" in the name of the federal program.

The accompanying schedule includes all federal financial assistance administered by the state of Missouri, except for those programs administered by public universities and other component units and related organizations which are legally separate from the state of Missouri. Federal financial assistance provided to public universities and other component units and related organizations has been excluded from this audit. They were audited by other auditors under OMB Circular A-133.

B. Basis of Presentation

The accompanying Schedule of Expenditures of Federal Awards is presented in accordance with OMB Circular A-133, which defines federal financial assistance as assistance that non-federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

The schedule presents both Type A and B federal financial assistance programs administered by the state of Missouri. OMB Circular A-133 establishes the formula for determining the level of expenditures or disbursements to be used in defining Type A and B federal financial assistance programs. For the state of Missouri during the year ended June 30, 2013, Type A programs are those which exceed $30 million in disbursements, expenditures, or distributions. The determination of major and non-major programs is based on the risk-based approach outlined in OMB Circular A-133.

C. Basis of Accounting

The expenditures for each of the federal financial assistance programs are presented on the accounting basis as required by the federal agency which awarded the assistance. Most programs are presented on a cash basis, which recognizes expenditures of federal awards when disbursed in cash. However, some are presented on a modified accrual basis, which recognizes expenditures of federal awards when the related liability is incurred.

2. Supplemental Nutrition Assistance Program Expenditures

The reported expenditures for benefits under the Supplemental Nutrition Assistance Program (SNAP) (CFDA No. 10.551) are supported by both regularly appropriated funds and incremental funding made available under section 101 of the ARRA. The portion of total expenditures for SNAP benefits that is supported by ARRA funds varies according to fluctuations in the cost of the Thrifty Food Plan, and to changes in participating households' income, deductions, and assets. This condition prevents the U.S. Department of Agriculture (USDA) from obtaining the regular and ARRA components of SNAP benefits expenditures through normal program reporting processes. As an alternative, the USDA has computed a weighted average percentage to be applied to the national aggregate SNAP benefits provided to households in order to allocate an appropriate portion thereof to ARRA funds. This methodology generates valid results at the national aggregate level but not at the individual state level. Therefore, the state cannot validly disaggregate the regular and ARRA components of its reported expenditures for SNAP benefits. At the national aggregate level, however, ARRA funds account for approximately 7.79 percent of the USDA’s total expenditures for SNAP benefits in the federal fiscal year ended September 30, 2013.

3. Special Supplemental Nutrition Program for Women, Infants and Children Program Rebates

The state received cash rebates from an infant formula manufacturer, totaling $35,100,448, on sales of formula to participants in the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) (CFDA No. 10.557). This amount was excluded from total program expenditures. Rebate contracts with infant formula manufacturers are authorized by 7 CFR Section 246.16(a) as a cost containment measure. Rebates represent a reduction of expenditures previously incurred for WIC food benefit costs. The state was able to extend program benefits to more persons than could have been served this fiscal year in the absence of the rebate contract.

4. Unemployment Insurance Expenditures

Expenditures of federal awards reported for the Unemployment Insurance program (CFDA No. 17.225) include unemployment benefit payments from the State Unemployment Compensation Fund totaling $853,613,703. Reimbursements to other states from the State Unemployment Compensation Fund for benefits paid by those other states, totaling $38,134,704, have also been included in the Unemployment Insurance program expenditures. Reimbursements to the State Unemployment Compensation Fund

from other states for benefits paid by the state of Missouri, totaling $6,317,212, have been excluded from total expenditures.

5. Federal Loan Guarantees

The Department of Higher Education (DHE) guarantees student loans made by lenders under the Federal Family Education Loans program (CFDA 84.032). The original principal balance outstanding of all loans guaranteed by the DHE was $2,442,552,668 as of June 30, 2013. Additionally, the outstanding balance of defaulted loans (including principal and accrued interest) for which the federal government imposes continuing compliance requirements on the DHE was $327,958,313 as of June 30, 2013.

6. Nonmonetary Assistance

The Department of Elementary and Secondary Education distributes food commodities to school districts under the National School Lunch Program (CFDA No. 10.555). Distributions are valued at the cost of the food paid by the federal government and totaled $23,863,253.

The Department of Public Safety distributes excess Department of Defense (DOD) equipment to state and local law enforcement agencies under the DOD Surplus Property program (CFDA No. 12.AAG). Property distributions totaled $2,823,289 valued at the historical cost as assigned by the federal government, which is substantially in excess of the property's fair market value. The amount of expenditures presented on the Schedule of Expenditures of Federal Awards is 23.68 percent of the historical cost ($668,555), which approximates the fair market value of the property at the time of distribution.

The State Agency for Surplus Property distributes federal surplus property to eligible donees under the Donation of Federal Surplus Personal Property program (CFDA No. 39.003). Property distributions totaled $28,194,378 valued at the historical cost as assigned by the federal government, which is substantially in excess of the property's fair market value. The amount of expenditures presented on the Schedule of Expenditures of Federal Awards is 23.68 percent of the historical cost ($6,676,429), which approximates the fair market value of the property at the time of distribution as determined by the General Services Administration.

The Department of Health and Senior Services distributes vaccines to local health agencies and other health care professionals under the Immunization Cooperative Agreements program (CFDA No. 93.268). Distributions are valued at the cost of the vaccines paid by the federal government and totaled $59,835,798.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

STATE OF MISSOURI
SCHEDULE OF FINDINGS AND QUESTIONED COSTS
YEAR ENDED JUNE 30, 2013

Section I - Summary of Auditor's Results

Financial Statements

Type of auditor's report issued:	Qualified

Unmodified for all opinion units except for governmental activities and the General Fund, which were qualified.

Internal control over financial reporting:

• Material weaknesses identified?	x yes	____ no
• Significant deficiencies identified that are not considered to be material weaknesses?	x yes	____ none reported
Noncompliance material to the financial statements noted?	____ yes	x no

Federal Awards

Internal control over major programs:

• Material weaknesses identified?	x yes	____ no
• Significant deficiencies identified that are not considered to be material weaknesses?	x yes	
Type of auditor's report issued on compliance for major programs:	Qualified	

Unmodified for all major programs except for the Child Care Development Fund Cluster, Medicaid Cluster, and Disaster Grants - Public Assistance (Presidentially Declared Disasters), which were qualified.

Any audit findings disclosed that are required to be reported in accordance with Section .510(a) of OMB Circular A-133?	x yes	____ no

The following programs were audited as major programs:

CFDA Number	Name of Federal Program or Cluster
	SNAP Cluster:
10.551	Supplemental Nutrition Assistance Program
10.561	State Administrative Matching Grants for the Supplemental Nutrition Assistance Program
10.557	Special Supplemental Nutrition Program for Women, Infants, and Children
	CDBG - State-Administered CDBG Cluster:
14.228	Community Development Block Grants/State's Program and Non-Entitlement Grants in Hawaii
14.255	ARRA - Community Development Block Grants/State's Program and Non-Entitlement Grants in Hawaii
20.319	High-Speed Rail Corridors and Intercity Passenger Rail Service - Capital Assistance Grants
20.319	ARRA - High-Speed Rail Corridors and Intercity Passenger Rail Service - Capital Assistance Grants
64.015	Veterans State Nursing Home Care
81.042	Weatherization Assistance for Low-Income Persons
81.042	ARRA - Weatherization Assistance for Low-Income Persons
84.032	Federal Family Education Loans
84.126	Rehabilitation Services - Vocational Rehabilitation Grants to States
	School Improvement Grants Cluster:
84.377	School Improvement Grants
84.388	ARRA - School Improvements Grants, Recovery Act
93.268	Immunization Cooperative Agreements
	TANF Cluster:
93.558	Temporary Assistance for Needy Families (TANF) State Programs
93.563	Child Support Enforcement
	CCDF Cluster:
93.575	Child Care and Development Block Grant
93.596	Child Care Mandatory and Matching Funds of the Child Care and Development Fund
93.658	Foster Care - Title IV-E
93.719	ARRA - State Grants to Promote Health Information Technology
93.767	Children's Health Insurance Program
	Medicaid Cluster:
93.775	State Medicaid Fraud Control Units
93.777	State Survey and Certification of Health Care Providers and Suppliers (Title XVIII) Medicare

93.778	Medical Assistance Program
93.778	ARRA - Medical Assistance Program
	Disability Insurance/SSI Cluster:
96.001	Social Security - Disability Insurance
97.036	Disaster Grants - Public Assistance (Presidentially Declared Disasters)
97.067	Homeland Security Grant Program

Dollar threshold used to distinguish between Type A and Type B programs: $30,000,000

Auditee qualified as a low-risk auditee? _____ yes __x__ no

Section II - Financial Statement Findings

2013-001. Financial Reporting Controls - Department of Revenue

The Department of Revenue (DOR) does not have adequate procedures in place to ensure the accuracy of financial information for governmental and agency funds submitted to the Office of Administration - Division of Accounting (DOA). Net accounts receivable and the related liability balances would have been overstated by $133 million in the *Missouri Comprehensive Annual Financial Report* (CAFR) for the year ended June 30, 2013, had an error in the preparation of the DOR financial information not been identified during our audit. A similar condition was noted in our prior report.

To compile the DOR financial information for CAFR purposes, DOR personnel request the Office of Administration, Information Technology Services Division (OA-ITSD) run various reports from the DOR computerized systems. However, these reports are not reviewed by the DOR for reasonableness to ensure the amounts are correct. Consequently, an error in a fiscal year 2013 report resulted in the DOR using incorrect financial information to determine accounts receivable and related liability balances for governmental and agency funds. The error was not detected by the DOR and the incorrect financial information was submitted to the DOA.

When compiling the draft CAFR, the DOA incorporated the incorrect amounts reported by the DOR. This resulted in overstatements included in the CAFR for governmental and agency funds as follows:

Account Type	Governmental Funds	Agency Funds
Net Accounts Receivable	$107,398,842	$25,377,819
Deferred Revenue	$107,398,842	
Due to Other Entities		$25,377,819

After we brought this to the attention of the DOR and the DOA, corrections of the misstatements were made to the CAFR in December 2013, prior to its completion.

Adequate systems of internal controls include the design and operation of controls which allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements.

WE RECOMMEND the DOR implement controls which allow for the detection and correction of errors when preparing the governmental and agency fund financial information.

AUDITEE'S RESPONSE

The Department of Revenue agrees with the State Auditor's recommendation. The Financial and General Services Bureau staff will input the applicable information from the OA-ITSD produced reports into the CAFR spreadsheet and send it to the Taxation Division staff to review the numbers for reasonableness.

2013-002. Financial Reporting Controls - Department of Social Services - MO HealthNet Division

The Department of Social Services - MO HealthNet Division (MHD) does not have adequate procedures in place to ensure the accuracy of year-end financial data submitted to the Office of Administration - Division of Accounting (DOA). Accounts receivable amounts recognized as revenues would have been understated by $46.8 million and deferred revenues would have been overstated by $46.8 million in the *Missouri Comprehensive Annual Financial Report* (CAFR) for the year ended June 30, 2013, had the misstatement in the year-end financial data not been identified during our audit.

The MHD year-end financial data is to include expected net accounts receivable. Of the net accounts receivable at June 30, the year-end financial data is to identify expected subsequent July and August collections, which are recorded as revenues according to accounting standards. The remainder of the net accounts receivable is to be reported as deferred revenue. However, when preparing and reporting the year-end financial data, the MHD underestimated the expected July 2013 and August 2013 collections. This resulted in receivable amounts recorded as revenues being understated by $46.8 million and deferred revenues being overstated by $46.8 million. MHD supervisory reviews of the year-end financial data did not detect the misstatement and the incorrect year-end financial data was submitted to the DOA.

When compiling the draft CAFR, the DOA incorporated the incorrect amounts reported by the MHD. After we brought this to the attention of the MHD, a correction was submitted by MHD and made to the CAFR by the DOA in December 2013, prior to its completion.

Adequate systems of internal controls include the design and operation of controls which allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements.

WE RECOMMEND the MHD implement controls which allow for the detection and correction of misstatements when preparing the year-end financial data.

AUDITEE'S RESPONSE

The Department of Social Services (DSS), MHD does not agree that July and August estimates related to fiscal year 2013 accounts receivable collections were misstatements. In prior years, the MHD reported the total outstanding accounts receivables for the CAFR as of June 30 and the actual collections occurring in July related to the prior year's CAFR.

For fiscal year 2013, in addition to total outstanding accounts receivable as of June 30, the MHD was asked to provide July and August collections information prior to the end of the August collection period. This required the collections to be estimated for the combined July and August time frame.

The MHD was later informed by the State Auditor's Office (SAO) that the Missouri CAFR Survey was not submitted until December and any updates to the survey could be provided prior to the submission. After learning this, the MHD provided the SAO with updated actual collections for July and August. The total outstanding accounts receivable for fiscal year 2013 remained unchanged. The fiscal year 2013 Missouri CAFR submitted in December correctly reported MHD accounts receivable collections based upon July and August actual collections.

The DSS has updated internal procedures to allow for the submission of the actual collections for July and August to be included in the CAFR Survey data provided to the DOA.

AUDITOR'S COMMENT

The total original accounts receivable amount reported was not incorrect. Rather, the incorrect estimates of July and August collections caused the categories within the accounts receivable to be incorrect and resulted in amounts recognized as revenues versus deferred revenues being inaccurate. As noted in the finding, had these inaccuracies not been identified and corrected, the financial statements would have been misstated. A correction was submitted by the MHD to the DOA, and made to the CAFR, only after we brought this to the attention of the MHD. The MHD had no procedure in place to re-evaluate the reasonableness of the estimates presented when the actual data became known prior to completion of the CAFR. The misstatements could have been identified through an analysis of the July and August receipt data in September, before the CAFR draft was prepared. It appears the MHD had sufficient opportunity to ensure the estimates were corrected and resubmitted to the DOA prior to our review.

Section III - Federal Award Findings and Questioned Costs

2013-003.	**Medicaid Home and Community Based Services**

Federal Agency:	Department of Health and Human Services
Federal Program:	93.778 Medical Assistance Program 2012 - 1205MO5MAP and 1205MO5ADM 2013 - 1305MO5MAP and 1305MO5ADM
State Agency:	Department of Health and Senior Services (DHSS) - Division of Senior and Disability Services (DSDS)
Questioned Costs:	$238,623

As noted in the three prior audits, the DSDS does not ensure annual reassessments are performed, as required, to determine continued need of services of Home and Community Based Services (HCBS) recipients. As a result, the DSDS has not ensured over half of the HCBS recipients have a need for and are receiving the appropriate level of care.

The DSDS is responsible for the direct administration of various Medical Assistance Program (Medicaid)-funded HCBS programs for seniors and adults with disabilities, including the two largest programs, State Plan Personal Care (SPPC) and Aged and Disabled Waiver (ADW). The Medicaid program is administered by the Department of Social Services (DSS) - MO HealthNet Division, while the DSDS is charged with assessing and reassessing the need for, and authorizing HCBS services for these Medicaid recipients. These services, which are authorized in a plan of care, provide assistance to help qualifying recipients remain in or return to their home or community, and include services such as bathing, grooming, and dressing; general toileting activities; cleaning, dusting, and laundry; meal preparation and/or assistance with eating and washing dishes; and transportation for shopping/errands and medical appointments. Other services include advanced personal care, authorized nurse visits, and respite care. During the year ended June 30, 2013, approximately 58,000 recipients were provided SPPC services and 17,200 were provided ADW services, with a total of 59,400 recipients receiving one or both services totaling approximately $566 million.

Backlogs of HCBS annual reassessments have existed for several years. During recent years, the DSDS has received additional funding and taken various measures in attempts to reduce backlogs, including the hiring (and subsequent firing) of an external assessment administrator, hiring additional full-time and temporary staff, paying HCBS providers to perform some annual reassessments, developing the new HCBS Web Tool, and giving providers access to the Web Tool. With these changes, there has been some improvement; however, a significant backlog of reassessments still exists. According to DSDS officials, as of January 3, 2014, reassessments were due for approximately 22,200 Medicaid HCBS recipients, a 25 percent reduction from the backlog as of February 15, 2013, noted in our prior audit.

According to DSDS officials, and confirmed by our test results, the backlog consists of recipients still on the old legacy computer system since May 2011, when the new HCBS Web Tool was established. Currently, all new recipients are entered in the HCBS Web Tool, and existing recipients are moved from the legacy system to the HCBS Web Tool when their reassessments are performed. Because the HCBS Web Tool automatically suspends services for any recipient not receiving a required annual reassessment, the DSDS prioritizes and ensures these cases receive an annual reassessment. DSDS staff perform reassessments for the backlog of cases in the legacy system as time permits, with priority placed on recipients receiving ADW services. A review of the cases in the legacy system noted the most recent reassessment for these recipients was completed 1 to 9 years ago, with over half the cases not having a reassessment since 2009 or before. According to DSDS officials, as of January 2014, approximately 59 percent of HCBS recipients were in the HCBS Web Tool and approximately 41 percent were in the legacy system. DSDS officials indicated during fiscal year 2013, approximately 80 percent of reassessments were performed by DSDS staff, while approximately 20 percent were performed by HCBS providers.

We tested assessment documentation for 60 Medicaid recipients who received SPPC and/or ADW services during the year ended June 30, 2013. Payments totaling $730,968 ($603,266 SPPC and $127,702 ADW) were made to providers on behalf of these recipients during this period. We found the DSDS did not perform annual reassessments for 32 of the 59 (54 percent) recipients requiring a reassessment. As a result, the DSDS could not demonstrate these 32 recipients needed the services for which the payments were made. Five of these 32 recipients received both SPPC and ADW services, while 27 received SPPC only. Payments for services provided to these recipients without annual reassessments during the year ended June 30, 2013, totaled $315,027 for SPPC and $58,464 for ADW ($373,491 total). We question the federal share of $238,623, or $201,271 for SPPC and $37,352 for ADW, (63.89 percent).

The failure to perform annual reassessments as required can result in payments for services which are not necessary. Various regulations require that annual reassessments be performed for ADW and/or SPPC recipients to ensure the adequacy of the care plan and continued need for the level of care provided. These include federal regulation 42 CFR Section 441.302(c), Missouri statutes Sections 208.906 and 208.930, RSMo, state regulation 19 CSR 15-8.200, the Cooperative Agreement between the DSS and the DHSS, and the DSDS Home and Community Services Case Management Manual, Section 1606.20. Furthermore, OMB Circular A-87, Attachment A, Section C.1.c provides that costs must be authorized or not prohibited under state or local laws or regulations to be allowable.

WE RECOMMEND the DHSS, through the DSDS, resolve the questioned costs with the grantor agency and ensure annual reassessments are performed as required.

AUDITEE'S RESPONSE

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

2013-004. Medicaid Developmental Disabilities Comprehensive Waiver

Federal Agency:	Department of Health and Human Services
Federal Program:	93.778 Medical Assistance Program 2012 - 1205MO5MAP and 2013 - 1305MO5MAP
State Agency:	Department of Mental Health (DMH)
Questioned Cost	$22,432

Established controls over the Home and Community Based Services (HCBS), Developmental Disabilities Comprehensive Waiver (Comprehensive Waiver) Program are not always being followed. As a result, assessments of need for services are not always performed prior to individuals receiving Medicaid assistance under the program.

The DMH is responsible for the direct administration of various Medical Assistance Program (Medicaid)-funded HCBS programs for children and adults with disabilities, including the Comprehensive Waiver. The Medicaid program is administered by the Department of Social Services (DSS) - MO HealthNet Division, while the DMH is charged with assessing and reassessing the need for, and authorizing HCBS services for these Medicaid participants. These services, which are authorized in a plan of care, provide assistance to help qualifying participants remain in or return to their home or community. The waiver provides a set of services, including residential services, for Medicaid-eligible individuals who have an intellectual disability and/or a developmental disability who have been determined to otherwise require the level of care provided in an intermediate care facility for developmentally disabled. During the year ended June 30, 2013, approximately 8,278 participants were provided Comprehensive Waiver services totaling approximately $550 million.

The DMH enrolled 446 new participants into the Comprehensive Waiver Program during the year ended June 30, 2013. Applicants must have, among other things, a functional limitation assessment completed prior to acceptance into the Comprehensive Waiver Program. During the application process, an evaluation of need/waiver eligibility form is completed by a service coordinator in the respective regional office to document the various waiver requirements were met. As a part of the DMH's internal control procedures, this form is to be reviewed by a supervisor to ensure accuracy prior to enrolling new participants. However, supervisors are not always reviewing this form or the related case file to ensure all the required waiver documents have been completed and retained.

We visited 3 of the 11 DMH regional offices and tested records for 40 new participants to review whether the DMH obtained the required documentation to properly enroll participants. We determined five of the participants tested (12.5 percent) did not have a required functional limitation assessment on file prior to acceptance into the Comprehensive Waiver Program. Of these five participants, four had assessments completed during fiscal year 2013, but not until after the date of program entry. One participant did not have an assessment documented in the file. Two of these participants received Comprehensive Waiver services prior to their assessment dates, and the one participant without an assessment on file also received services during fiscal year 2013. This resulted in $35,398 in ineligible payments made on their behalf. We question the federal share of these payments, or $22,432 (63.37 percent). In addition, since one participant still does not have a documented assessment on file as of December 2013, there are likely ineligible payments made on behalf of this participant during fiscal year 2014. For each of these participants, an evaluation of need/waiver eligibility form was not completed at the date of program enrollment. The lack of completion and supervisory reviews of these forms caused the missing functional limitation assessments to go undetected.

Appendix B-6.d of the Comprehensive Waiver and 9 CSR 45-2.010(4)(C)1 require an assessment of functional limitations be completed for each participant prior to admittance into the Comprehensive Waiver Program to demonstrate the participant's need for services. Without such an assessment, the DMH cannot demonstrate the participant qualified for Comprehensive Waiver services at the time the services were provided.

WE RECOMMEND the DMH resolve the questioned costs with the grantor agency and perform established procedures to ensure assessments of participants' functional limitations are completed and documented prior to admittance into the Comprehensive Waiver program.

AUDITEE'S RESPONSE

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2013-005.	**Reporting and Period of Availability**

Federal Agency: Department of Homeland Security
Federal Program: 97.036 Disaster Grants - Public Assistance (Presidentially Declared Disasters)
- 2008 - FEMA-DR-1736-MO, FEMA-DR-1742-MO, FEMA-DR-1748-MO, FEMA-DR-1749-MO, and FEMA-DR-1773-MO
- 2009 - FEMA-DR-1809-MO
- 2011 - FEMA-DR-1961-MO and FEMA-DR-1980-MO, and FEMA-DR-4012-MO

State Agency: Department of Public Safety - State Emergency Management Agency (SEMA)
Questioned Costs: $194,867

Procedures related to reporting and period of availability for the Public Assistance (PA) program need improvement. Similar conditions were identified by the federal awarding agency during a financial monitoring review and reported to the SEMA in a letter dated September 2013.

A. The SEMA does not have controls and procedures in place to ensure compliance with the Federal Funding Accountability and Transparency Act (FFATA), and as a result, subawards were not reported as required.

The FFATA requires the reporting of key data elements for certain subawards and subcontracts to promote the transparency and accountability over the use of non-ARRA federal financial awards, and requires such information be made available to the public through a single searchable website. The FFATA requirements relate to direct recipients of grants or cooperative agreements that make first-tier subawards, and to contractors that award first-tier subcontracts. Reporting is required to be made by the end of the month following the month a subaward/subcontract greater than $25,000 was made. According to OMB Circular A-133 Compliance Supplement, the recipient must at least demonstrate a good faith effort to comply with these requirements, and such effort must be adequately documented.

As of January 2014, the SEMA had not reported any subawards issued after October 1, 2010 related to the PA program. In addition, the SEMA could not provide an accurate number and respective amount of subawards that were issued after October 1, 2010 that had not been reported, or were required to be reported during fiscal year 2013. The majority of funding the SEMA receives for the PA program is awarded to subrecipients and subject to FFATA reporting requirements. According to a SEMA official, information was needed from the federal granting agency to comply with this requirement. However, the SEMA could not provide evidence a good faith effort had been made to comply with FFATA requirements, such as documentation of contact with the federal granting agency, prior to our audit inquiries.

B. The SEMA has not ensured certain financial reports for various PA awards are submitted timely to the awarding agency. In addition, the SEMA has not ensured expenditures are liquidated timely.

Each PA program award provides for an obligation period for using grant funding, typically a four-year period. Federal regulation 44 CFR Section 13.23 indicates a grantee may charge to the award only costs resulting from obligations of the funding period. In addition, obligations incurred under a federal award must be liquidated not later than 90 days after the end of the funding period. Federal

regulation 44 CFR Section 13.41 and the State of Missouri Administrative Plan for the PA program also provide for the final Federal Financial Status Report (SF-425) to be submitted within the 90 day close-out period.

None of the six final SF-425 reports filed for PA program awards during fiscal year 2013 were submitted timely to the federal awarding agency. The reports were submitted from three to nine months after the final liquidation date. Additionally, we reviewed these six awards and identified expenditures, totaling $194,867, were charged to the awards after the date when obligations could be liquidated. We question the federal share of these costs, or $194,867 (100 percent). Failure to ensure disbursements are made during the period of availability can result in federal reimbursements for unallowable costs.

WE RECOMMEND the SEMA:

A. Establish procedures to ensure the subaward information required to be reported per the FFATA is complete, accurate, and submitted timely.

B. Resolve the questioned costs with the grantor agency, and ensure federal PA awards are liquidated and reported in a timely manner.

AUDITEE'S RESPONSE

We partially agree with the auditor's findings. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the findings.

2013-006.	**Subrecipient Monitoring**

Federal Agency: Department of Homeland Security
Federal Program: 97.036 Disaster Grants - Public Assistance (Presidentially Declared Disasters)
- 2008 - FEMA-DR-1736-MO, FEMA-DR-1742-MO, FEMA-DR-1748-MO, FEMA-DR-1749-MO, and FEMA-DR-1773-MO
- 2009 - FEMA-DR-1809-MO, FEMA-DR-1822-MO, and FEMA-DR-1847-MO
- 2010 - FEMA-DR-1934-MO
- 2011 - FEMA-DR-1961-MO and FEMA-DR-1980-MO, and FEMA-DR-4012-MO

State Agency: Department of Public Safety - State Emergency Management Agency (SEMA)

Controls and procedures over subrecipient monitoring for the Public Assistance (PA) program need improvement. During the year ended June 30, 2013, the PA program disbursed approximately $33 million to approximately 140 subrecipients.

A. The SEMA does not adequately document reviews performed of subrecipient expenditures to demonstrate compliance with subrecipient monitoring requirements. These reviews help ensure costs charged to the PA program are allowable.

The SEMA has procedures to review at least 10 to 20 percent of subrecipient expenditures prior to payment. At the end of each subaward, during final review, the SEMA documents the total percentage of expenditures reviewed for each project related to the subaward. When the percentage reviewed is less than 100 percent, the SEMA does not always document which specific expenditures were reviewed. As a result, the SEMA is unable to clearly support the total percentage documented as reviewed to ensure costs charged to the PA program are allowable. In addition, the SEMA does not always ensure subrecipients include proof of payment with expenditure documentation, as required.

OMB Circular A-133, Subpart D Section 400(d)(3) requires the SEMA to monitor subrecipients to ensure federal awards are used for authorized purposes in compliance with laws, regulations, and provisions of contracts and grant agreements. Federal Emergency Management Agency Standard Operating Procedure (SOP) 9570.14 requires the SEMA to verify the accuracy of the costs incurred by the subrecipient. If supporting records are extensive, the SOP requires the grantee to review at least 10 to 20 percent of the subrecipient's expenditures. In addition, this SOP requires subrecipients to provide proof of payment. Without adequate documentation of the reviews performed, there is less assurance the SEMA adequately reviewed the appropriateness of the subrecipient expenditures.

B. The SEMA has not established an adequate tracking system to ensure PA program subrecipients expending $500,000 or more in federal funds obtained independent Single Audits as required. In addition, the SEMA did not follow-up on findings reported in subrecipient Single Audits. A similar condition was reported in our previous audit report (Report No. 2012-26, *State of Missouri Single Audit, Year Ended June 30, 2011*, issued in March 2012, finding number 2011-12).

In February 2013, the SEMA sent a letter to each subrecipient which incurred PA program expenditures during the 2 fiscal years ended June 30, 2012 and requested the subrecipient to certify whether it had expended more than $500,000 in federal funds during each year (or its respective audit period, if different). The subrecipent was required to submit a copy of its Single Audit report, if applicable. The SEMA has a system to track the receipt of Single Audit reports; however, the system is not complete and accurate. For many subrecipients, the system was not updated when responses were received and did not indicate whether a Single Audit was reviewed. In addition, the tracking system does not document whether

audit findings were identified in the Single Audit reports reviewed and if follow-up procedures were completed.

Nine subrecipients each received $500,000 or more in federal funds from the PA program alone. For six of these subrecipients, the SEMA had either not received or not documented the review of the Single Audit reports prior to our inquiries. In addition, one of the six reports had audit findings but no follow-up action had been taken by the SEMA. While remaining subrecipients received PA funding of less than $500,000, numerous awardees received significant PA funds and it is likely, when considering federal awards from other sources, a Single Audit would have been required for some.

OMB Circular A-133, Subpart D, Section 400(d) requires grant recipients to ensure subrecipients obtain a Single Audit when federal grant expenditures exceed $500,000 in a fiscal year. That audit report is required to be filed with the recipient agency and the federal Single Audit Clearinghouse within 9 months of the end of the subrecipient's fiscal year. The recipient agency is also required to issue a management decision on audit findings within 6 months after receipt of the subrecipient's audit report and ensure the subrecipient takes timely and appropriate corrective action. Findings identified in subrecipient Single Audit reports could provide the SEMA valuable information about the performance of subrecipients.

WE RECOMMEND the SEMA:

A. Maintain adequate documentation of reviews performed of subrecipient expenditures to ensure costs are allowable.

B. Improve the system to obtain and track Single Audit reports expected and received from applicable subrecipients. In addition, the SEMA should document its review and follow-up of all subrecipient Single Audit reports received.

AUDITEE'S RESPONSE

We partially agree with the auditor's findings. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the findings.

2013-007. Payroll Allocations and Salary Certifications

Federal Agency: Department of Agriculture
Department of Health and Human Services
Federal Program: 10.561 State Administrative Matching Grants for the Supplemental Nutrition Assistance Program
2012 - 2012IS251443 and 2013 - 2013IS251443

93.558 Temporary Assistance for Needy Families
2012 - G1202MOTANF and 2013 - G1302MOTANF
93.575 Child Care and Development Block Grant
2012 - G1201MOCCDF and 2013 - G1301MOCCDF
93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
2012 - G1201MOCCDF and 2013 - G1301MOCCDF
93.658 Foster Care - Title IV-E
2012 - G1201MO1401 and 2013 - G1301MO1401
93.659 Adoption Assistance
2012 - G1201MO1407 and 2013 - G1301MO1407
93.667 Social Services Block Grant
2012 - G1201MOSOSR and 2013 - G1301MOSOSR
93.778 Medical Assistance Program
2012 - 1205MO5ADM and 2013 - 1305MO5ADM

State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)

Questioned Costs: $471,046

DFAS controls and procedures over the allocation of some payroll costs to federal programs were inadequate and, as a result, employees continue to be assigned to the incorrect cost pools. Additionally, periodic salary certifications were not prepared for some employees as required.

A. As noted in our prior report, controls and procedures over the allocation of some payroll costs to federal programs failed to prevent and/or detect various errors. Some employees continue to be charged to incorrect cost pools based on division assignment. While the DSS included adjustments to federal reports to resolve questioned costs identified in the prior audit finding, no effort was made to further review or modify cost pool assignments during the current audit period. Officials indicated they plan to revise the methodology for assignment of employees to the cost pools during the implementation phase of a new cost allocation plan currently under development.

Payroll costs are identified and allocated to federal programs administered by the department in accordance with the DSS cost allocation plan. These payroll costs are classified by use of labor codes. Payroll costs related to some labor codes are directly charged to specific federal programs while payroll costs related to other labor codes are included in the Income Maintenance (IM) or Children's Services (CS) cost pools. Payroll costs included in the cost pools are allocated to federal programs based on the percentage of time worked by employees on certain federal programs. Costs included in the IM cost pool are primarily allocated to programs administered by the Family Support Division (FSD), and costs included in the CS cost pool are primarily allocated to programs administered by the Children's Division (CD).

FSD, CD, and Missouri Healthnet Division Personnel Unit staff assign a labor code to each employee that reflects the employee's position, division, and other programmatic information related to the employee's duties. Each division has the authority to establish new labor codes or modify existing labor codes, as necessary, to account for new programs or facilitate reorganization of existing employees. The DFAS is primarily responsible for determining how those labor codes are to be processed through the cost allocation plan. DFAS officials indicated Personnel Unit staff notify and discuss with them changes to labor codes so the DFAS can make necessary changes in the allocation of labor codes to federal grants. The DFAS does not maintain a master listing of the title/definition of each labor code or periodically review labor codes assigned to employees to ensure payroll costs are allocated appropriately.

Our review of selected labor codes charged to the IM and CS cost pools during state fiscal year 2013 identified 11 of 60 employees reviewed (18 percent) were assigned labor codes that resulted in their payroll costs being charged to the incorrect cost pool. These errors resulted in overstatements of payroll costs totaling approximately $525,000 ($291,000 federal share) and understatements totaling approximately $487,000 ($308,000 federal share) for seven federal programs for the year ended June 30, 2013. Identified errors include:

- Six labor codes that included seven CD managerial and administrative support employees were charged to the IM cost pool in error. Four of the labor codes included both CD and FSD employees; however, the DSS charged the labor codes entirely to the IM cost pool. The remaining two labor codes included only CD employees but the DSS charged the codes incorrectly to the IM cost pool. These errors resulted in overstatements totaling approximately $384,000 to three federal programs and understatements totaling approximately $386,400 to four federal programs. We question the federal share of the overstatements, or $197,226.

- One labor code that only included three FSD administrative support employees was charged to the CS cost pool in error. This error resulted in overstatements totaling approximately $101,600 to four federal programs and understatements totaling approximately $100,900 to three federal programs. We question the federal share of the overstatements, or $67,393.

- One labor code that included two employees was charged to the CS cost pool; however, the labor code included an employee whose entire payroll costs should have been directly charged to federal programs related to the employee's job duties. This employee provides administrative support for the Caring Communities program funded by the Promoting Safe and Stable Families or the Social Services Block Grant programs. In response to Report No. 2010-30, *State of Missouri, Single Audit, Year Ended June 30, 2009*, issued in March 2010, finding 2009-12, DFAS management indicated the allocation of similar Caring Community partnership costs through the CS cost

pool would be discontinued and the costs would be charged directly to applicable federal programs. This resulted in overstatements to four federal programs totaling approximately $39,300. We question the federal share of the overstatements, or $26,445.

As noted above, some employees were assigned to labor codes that included both CD and FSD employees. At least 6 of the 42 labor codes currently assigned to CS or IM cost pools include both CD and FSD employees. While the DFAS has access to quarterly data which shows the specific amounts of CD and FSD expenses, the DFAS does not use this information to allocate costs but charges these combined labor codes to only one cost pool. The remaining employees were assigned to labor codes not commonly used. DFAS officials indicated the purpose or definition of some labor codes may have changed, but these changes were not properly reflected in the assignment of labor codes to the cost pools.

As noted above, identified errors resulted in both understatements and overstatements for various federal programs. We question the federal share of payroll costs related to the overstatements because those costs were not allowable costs of the applicable federal programs. The understatements relate to allowable costs the DSS can allocate to applicable federal programs through future adjustments on federal financial reports. Listed below is the federal share of questioned costs related to the overstatements:

CFDA	Program	Amount
10.561	State Administrative Matching Grants for the Supplemental Nutrition Assistance Program	$ 100,026
93.558	Temporary Assistance for Needy Families	36,124
93.575/ 93.596	Child Care and Development Block Grant/ Child Care Mandatory and Matching Funds of the Child Care and Development Fund	12,929
93.658	Foster Care - Title IV-E	35,069
93.659	Adoption Assistance	4,226
93.667	Social Services Block Grant	18,282
93.778	Medical Assistance Program	84,408
Total		$ 291,064

OMB Circular A-87, Attachment A, Section C.3.a states that a cost is allocable to a particular cost objective if the related goods or services are chargeable or assignable to such cost objective in accordance with relative benefits received. In addition, federal regulation 45 CFR Section 96.30(a) requires the DSS to have sufficient controls over block grants to ensure expenditures are allowable. Without proper controls to periodically review the purpose and definition of labor codes and labor codes assigned to employees, the DFAS cannot ensure payroll costs are allowable and allocable to the various federal programs.

B. The DSS did not prepare salary certifications for employees whose personnel costs were charged wholly to the Title IV-E Foster Care program. These employees work solely with the Statewide Automated Child Welfare Information System (SACWIS). The SACWIS system is a comprehensive case management system for use in administering child welfare programs, including foster care, adoption, and family preservation.

The DSS charges SACWIS operating costs to the Title IV-E Foster Care program, as allowed by federal guidance. Federal regulation 45 CFR Section 1355.52(c) states expenditures for the operation of the automated information system are eligible for federal reimbursement under the Title IV-E Foster Care program at the 50 percent federal financial participation rate. Operating activities include the use of supplies, software, hardware, and personnel directly associated with the functioning of the automated system. Personnel costs (salaries, benefits, and indirect costs) for these employees totaled $359,964. We question the federal share, or $179,982 (50 percent).

OMB Circular A-87, Attachment B, Section 8.h(3) requires that charges for salaries and related salary costs of employees who work solely on a single federal award or cost objective be supported by periodic certifications that the employees worked solely on that program. These certifications are required to be prepared at least semi-annually and signed by either the employee or a supervisor having specific knowledge of the work performed by the employee. Without accurate and complete certifications, the DSS has not fully substantiated the salary costs charged to the Title IV-E Foster Care program.

WE RECOMMEND the DSS, through the DFAS, resolve the questioned costs with the grantor agency and:

A. Establish controls and procedures to ensure payroll costs are allowable and allocable. These procedures should include periodic documented reviews of labor codes assigned to employees and the purpose and definition of labor codes to ensure associated payroll costs are charged to appropriate federal programs directly or through the proper cost pool.

B. Prepare semi-annual salary certifications as required.

AUDITEE'S RESPONSE

A. We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

B. We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

2013-008. Residential Treatment and Case Management Payments

Federal Agency:	Department of Health and Human Services
Federal Program:	93.558 Temporary Assistance for Needy Families 2012 - G1202MOTANF and 2013 - G1302MOTANF 93.658 Foster Care - Title IV-E 2012 - G1201MO1401 and 2013 - G1301MO1401 93.659 Adoption Assistance 2012 - G1201MO1407 and 2013 - G1301MO1407 93.778 Medical Assistance Program 2012 - 1205MO5ADM and 2013 - 1305MO5ADM
State Agency:	Department of Social Services (DSS) - Children's Division (CD) and Division of Finance and Administrative Services (DFAS)
Questioned Costs:	$7,357,204

The DSS does not have adequate documentation to support the rate structure used to allocate rehabilitative residential treatment facility payments to the Foster Care and Temporary Assistance for Needy Families (TANF) programs. Procedures over the allocation of rehabilitative residential treatment payments also need improvement. Additionally, the DSS has not utilized established procedures to ensure all payments to Foster Care case management contractors are properly allocated to federal programs.

OMB Circular A-87, Attachment A, Section C.3.a states that a cost is allocable to a particular cost objective if the related goods or services are chargeable or assignable to such cost objective in accordance with relative benefits received. Additionally, costs must be adequately documented to be allowable.

A. The DSS does not have adequate documentation to support the daily rate used to allocate a portion of payments to residential treatment facilities to the Foster Care or TANF programs, and controls and procedures over the allocation of rehabilitative residential treatment payments need improvement. Some children who have been abused, neglected, or have emotional or psychological difficulties require treatment in a residential environment. The DSS contracts with residential treatment facilities to provide room and board, supervision, and therapeutic rehabilitative services to children at various rates based on the child's level of need.

   The DSS began allocating the room and board/supervision portion of rehabilitative residential treatment facility payments to the Foster Care and TANF programs during state fiscal 2013. To determine the allocation amount, the Office of Administration - Information Technology Services Division (ITSD) prepares a monthly report of rehabilitative residential treatment facility payments processed through the Family and Children's Electronic System (FACES) system. The ITSD report calculates the portion of each payment that relates to room and

board/supervision by multiplying pre-programmed daily rates of approximately $45 by the number of days the child was in the facility's care. The room and board/supervision portion is allocated to either the Foster Care or TANF programs based on the child's federal Foster Care program eligibility. The remaining portion, representing the amount for rehabilitative services, is allocated to the Medical Assistance program. We noted the following issues with the allocation of room and board/supervision payments:

- The DSS does not have documentation to support how the room and board/supervision daily rate was determined. DSS officials stated the rate is based on a study performed by a consultant more than 5 years ago, but they are unable to locate the study. The DSS allocated residential treatment facility room and board/supervision payments totaling $4,281,830 to the Foster Care program and $4,721,309 to the TANF program during state fiscal year 2013. Although some portion of these allocated costs are likely allowable, the DSS could not substantiate the basis and reasonableness of the daily rate used when the costs were claimed. As a result, it is unclear how much of the cost is allowable and we question the entire federal share of $2,635,895 (61.56 percent) and $4,721,309 (100 percent) for the Foster Care and TANF programs, respectively.

  The DSS contracted with a consultant to conduct a review to determine residential facility daily rates including room and board/supervision rates. The new study, completed in October 2013, determined daily rates for room and board/supervision should range between approximately $40 and $56 depending on the level of services provided for a child. However, this study was not yet complete at the time fiscal year 2013 payments were allocated to the TANF and Foster Care programs and was not used to determine the fiscal year 2013 daily rate.

- Errors exist in the system logic the ITSD uses to prepare the monthly report. As a result, the DSS allocated duplicate residential treatment payments totaling approximately $4,800 to the Foster Care program for 2 of the 15 children reviewed. The FACES system processed the duplicate payments and the ITSD included those in the allocated costs. The duplicate payments were later corrected in the FACES system and recovered from the vendors. However, the related amount allocated to the program was not corrected because the monthly ITSD report logic does not evaluate whether any changes to previous months payments occurred in FACES.

  Additionally, if the amount paid to the residential treatment facility is higher than the maximum Missouri rate, the excess payments are considered entirely room and board/supervision rather than allocated between room and board/supervision and rehabilitative services (also charged to the Medical Assistance program). The DSS will often pay higher than the maximum Missouri rate if the child is placed in an out-of-state facility. A total of about $374,000 and

$632,000 was charged to the Foster Care and TANF programs, respectively, for these payments. Payments related to report logic errors are included in questioned costs above.

Without accurate procedures and adequate documentation to support rates and methods used to allocate residential treatment facility costs, the DSS cannot sufficiently justify amounts allocated to the Foster Care and TANF programs.

B. As similarly noted in a previous audit report, the DSS has not utilized established procedures to ensure all payments to Foster Care case management contractors are properly allocated to federal programs. As a result, some contractor payments are allocated to federal programs based on the contractors' budgeted expenditure categories rather than contractors' actual expenditures.

The DSS contracts with six Foster Care case management contractors, each a consortium of multiple local agencies, to provide case management and room and board for children in state custody. The DSS originally awarded these contracts in 2008 and again awarded the contracts in 2012 through a competitive bidding process. The DSS pays the contractors a monthly fixed price for 1) case management/administration, 2) room and board, and 3) residential treatment for a pre-established caseload. The DSS paid these contractors approximately $61.5 million during the year ended June 30, 2013, of which at least $38 million was paid from federal funds.

While the CD allocates contractor costs associated with room and board and residential treatment to applicable federal programs based on actual costs incurred by the contractors, the costs associated with case management/administration are allocated based on the original budgets submitted by the contractors in their requests for proposal. Each contractor's budget separates case management/administration costs into five categories, and the CD allocates these costs to several federal programs. The CD allocates case management services and resource development costs to the Foster Care administration and training programs, respectively. Treatment services, crisis fund expenses, and special expenses are allocated to the Social Services Block Grant (SSBG) program. Finally, general administration costs are allocated to the Children's Services cost pool for distribution to several federal programs (TANF, Foster Care, Adoption Assistance, Medical Assistance, and SSBG). Of $61.5 million paid to the contractors during the year ended June 30, 2013, approximately $28.9 million ($16.1 million federal funds) was for case management/administration services.

Although contractors submit monthly reports of actual costs, the DSS does not use this information to allocate case management/administration costs to the specific federal programs as noted above. The DSS has not performed procedures

to determine if budget-based allocations are representative of actual costs incurred.

In response to a similar finding in our previous audit report (Report No. 2011-11, *State of Missouri, Single Audit, Year Ended June 30, 2010*, issued in March 2011, finding number 2010-17), the DSS contracted with a consultant for $394,000 to review and develop procedures for claiming case management costs. The consultant developed and the DSS implemented additional procedures to better track actual costs incurred each month including 1) requiring contractors participate in a quarterly random moment time study, 2) developing a cost allocation plan specific to each contractor, and 3) revising the template used to report monthly expenditure data. Despite the additional cost information now available, DFAS officials indicated they have not determined whether to change the process to allocate case management/administrative costs to the federal programs.

Costs charged to a federal program in excess of that program's allocable share would be questionable; however, such costs may be allocable to another federal program(s). As a result, questioned costs resulting from these allocation procedures are likely but were not determined. While the DSS now has additional actual cost data available, without periodically analyzing and allocating costs based on such data, the DSS cannot ensure the costs are allowable and allocable to the various federal programs.

WE RECOMMEND the DSS, through the CD and DFAS:

A. Resolve questioned costs with the grantor agency and ensure that the room and board/supervision rate is adequately supported and reflects actual costs as required by federal regulations. Additionally, the DSS should determine if programming changes are needed to improve the accuracy of the monthly ITSD report.

B. Establish procedures to ensure all payments to Foster Care case management contractors are allocated to federal programs in accordance with federal regulations.

AUDITEE'S RESPONSE

We disagree with the auditor's findings. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement.

2013-009.	Child Care Eligibility and Payments

Federal Agency:	Department of Health and Human Services
Federal Program:	93.575 Child Care and Development Block Grant 2012 - G1201MOCCDF and 2013 - G1301MOCCDF 93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund 2012 - G1201MOCCDF and 2013 - G1301MOCCDF
State Agency:	Department of Social Services (DSS) - Children's Division (CD) and Family Support Division (FSD)
Questioned Costs:	$72,257

As noted in our prior three audit reports, significant weaknesses exist in DSS controls over Child Care Development Fund (Child Care) eligibility and provider payments. Controls are not sufficient to prevent and/or detect payments on behalf of ineligible clients or improper payments to child care providers. Eligibility and payment documentation could not be located for many child care cases reviewed, and overpayments were made to some providers. During the year ended June 30, 2013, the DSS paid over 7,500 child care providers approximately $149 million for services provided to about 76,000 children.

The DSS provides funds to child care providers who serve eligible clients. Federal regulation 45 CFR Section 98.20 provides that to be eligible for services the child must 1) be under 13 years old, or at the option of the DSS under age 19 and physically or mentally incapable of caring for himself/herself or under court supervision, 2) live with a family who meets certain income guidelines, and 3) have parents who are working or attending a job training or educational program. Clients may also be eligible if they receive Temporary Assistance for Needy Families (TANF) benefits and satisfactorily participate in job search, training, volunteer work experience, or other activities through the Missouri Work Assistance (MWA) program.

Parents/caregivers apply to FSD or CD case workers for participation in the program. Once approved, the parent/caregiver selects a child care provider and the DSS enters into an agreement with the provider for child care services. To comply with federal requirements, the DSS Income Maintenance manual requires that case workers set maximum authorized service units for the amount and type of care that best meets the family's need; and maintain case file documentation, including the child care application or a signed system-generated interview summary and copies of income (including work hours) or educational program verifications to support eligibility determination. The DSS Income Maintenance manual considers a parent/caregiver to be working only if they are working an average of 20 or more hours per week. The DSS Income Maintenance manual also limits the number of absences and holidays eligible for reimbursement.

In addition, the Child Care policy manual and provider agreements require that providers submit a monthly invoice electronically via the internet through the Child Care Online

Invoicing System (CCOIS) or manually through the Child Care Provider Relations Unit. The CCOIS system interfaces with the Family Assistance Management Information System (FAMIS) eligibility and payment system to process provider payments. Additionally, providers are required to maintain detailed attendance records documenting daily arrival and departure times and containing parent/caregiver signature verifying the child received the services. Although all providers are required to retain attendance records for 5 years, the DSS only requires registered (license exempt) providers who submit manual invoices to submit attendance records for payment.

A. Controls over eligibility and provider payments are not sufficient to prevent and/or detect payments made on behalf of ineligible clients or improper payments to child care providers. The DSS has only limited procedures to review eligibility determinations and current procedures are inadequate to monitor payments to providers.

To test compliance with program requirements, we sampled eligibility documentation for 60 children, and reviewed provider agreements and payment documentation supporting one payment for each of these children. Payments totaling approximately $157,000 were made to child care providers on behalf of these children during state fiscal year 2013. We noted the following:

- The DSS could not locate the child care eligibility file for 7 of 60 (12 percent) cases reviewed. For one case, the DSS could not locate any original signed information and provided only reprinted information from the FAMIS system. The remaining six files included information related to other benefit programs or child care information for other time periods; however, child care eligibility information for the audit period was missing. Child care payments made on behalf of these children and their siblings during the year ended June 30, 2013, totaled $47,147. We question the federal share of $34,889 (74 percent).

- Eligibility documentation was not sufficient to support a valid need for child care for 11 of 60 (18 percent) cases reviewed. For two cases, the client provided information at the time of application or redetermination for the child care or another assistance program that showed the client was employed less than an average of 20 hours per week or not employed and had no other valid need for services. For one case, the DSS obtained wage information in December 2012 showing the client quit employment in October 2012. The DSS closed the case as of December but did not request repayment for the prior two months. For one case, the client did not report all sources of income, and the additional income made her ineligible for benefits. The DSS identified the additional income while processing case files for our review. For two cases, there was no documentation supporting the need for child care while enrolled in an educational or training program. For three other cases, the FSD eligibility specialist authorized child care for periods which were not verified with educational course documentation or proof of continued enrollment at the institution.

For the remaining two cases, the clients were reported as not meeting the TANF MWA program work requirements and the DSS did not close the child care cases after sanctioning the clients' TANF benefits for noncompliance. The DSS does not consider the clients to have a valid need for child care because they were not working.

Payments totaling $46,507, made on behalf of the children and their siblings, during the year ended June 30, 2013, were unallowable and/or unsupported by adequate documentation. We question the federal share of $34,415 (74 percent).

- Child care payments made on behalf of 20 of 60 (33 percent) children reviewed were not supported by adequate documentation and/or were not in compliance with DSS policies. Some attendance records were not provided by child care providers upon our request, some attendance records were not signed by the parent and/or provider, and some provider invoices did not agree to the corresponding attendance records. One provider billed for services provided approximately one week after the facility closed and the provider voluntarily relinquished its license. Three providers claimed absences on a day the center was closed for business after exhausting their annual allotment of holidays, allowing them to circumvent the limit on annual paid holidays. In addition for two payments, the provider submitted a paper invoice and the CD entered and/or calculated the payment incorrectly. Of these payments, five were for cases that also lacked eligibility documentation and were included in the questioned costs above. Payments for the remaining 15 cases totaled an additional $3,435. We question the federal share of $2,542 (74 percent).

During the fiscal year ended June 30, 2013, there was a lack of overall quality control for the Child Care program. The various errors noted above occurred because the DSS lacks sufficient controls to ensure eligibility determinations are accurate and payments are proper and adequately supported. At least three significant factors contributed to the weak control system including: limited supervisory review of child care eligibility determinations, failure to perform on-site contract compliance reviews of child care providers and minimal other procedures in place to review provider attendance records, and poor case management and document retention.

In response to deficiencies identified in previous audits, the DSS implemented new controls over eligibility determinations. Effective March 1, 2012, the DSS requires all FSD eligibility supervisors to review a minimum of three child care cases each month in the case review system. While the new procedures improve controls over eligibility determinations, there are no requirements for random case selection and only limited procedures to ensure the monthly case reviews are performed. In addition, eligibility reviews may not be sufficient to detect errors. The DSS performed eligibility reviews for the month eligibility was determined

on all 60 cases we selected, prior to providing the case files, and did not detect two ineligible cases questioned above.

The DSS needs to review and strengthen policies and procedures to ensure child care payments are made only on behalf of eligible clients, invoices agree to the corresponding attendance records, attendance records are complete, payments are in accordance with department policy, and appropriate child care services are authorized. These procedures should include sufficient monitoring of eligibility determinations and provider payments, and follow-up on errors identified. Complete and accurate case records are critical in properly administering the program.

Payments associated with known questioned costs represented approximately 38 percent of payments reviewed. If similar errors were made on the remaining population of child care payments, questioned costs could be significant.

B. Some payment edit checks in the FAMIS system are not operating effectively. As a result, some providers were paid for more than the authorized number of days or more than the allowed number of absences and/or holidays.

DSS officials indicated it is not uncommon to process multiple payments to a provider for a child during the same month, depending on the end date of the child's service authorization. The DSS paid child care providers multiple times for the same child and service month for about 12,600 children during state fiscal year 2013. To test the effectiveness of system controls intended to limit payment to the maximum authorized amount, we reviewed payments to child care providers made on behalf of 40 of these children. We selected one service month for each child and compared the amount invoiced and paid to the child's authorization. The DSS made multiple payments for these children because a child care authorization ended during the month and a new authorization period subsequently began that same month. We noted the following issues:

- For 4 of the 40 (10 percent) payments reviewed, the FAMIS system paid the provider for more than the child's authorized number of days for the calendar month. For example, the DSS paid one provider for 30 days of care for September 2012 when the child was only authorized for 22 days total. This occurred because the FAMIS system allowed 21 units for the authorization period that ended on September 21 and 9 units for the new authorization period that began on September 22. For two of the four payments, the provider submitted a paper invoice for the CD to enter, but the CD did not detect the invoiced days were in excess of the authorized amount when entering the payment.

- For 5 of the 40 (13 percent) payments reviewed, the FAMIS system paid the provider more than the allowed number of absences and/or holidays. For example, the DSS paid one provider for seven absences and one holiday in

May 2013 because the FAMIS system allowed up to five absences and/or holidays for the child's authorization period that ended on May 22 and also the new authorization period that began on May 23. Providers are limited to a maximum of three or five absences and holidays combined, per calendar month, depending on the child's authorized level of care.

System edit checks did not identify excess payments because the edit checks did not consider the entire calendar month and instead considered each authorization period separately. Overpayments due to the above identified system errors totaled $556. We question the federal share, or $411 (74 percent). Without adequate controls and procedures in place, including appropriate computer system edits, the DSS is unable to effectively prevent and detect improper payments.

WE RECOMMEND the DSS through the CD and FSD, resolve the questioned costs with the grantor agency and:

A. Review and strengthen policies and procedures regarding child care eligibility determinations, provider payments, and case record documentation and retention. These procedures should include sufficient monitoring of eligibility determinations and provider payments, and follow-up on errors identified.

B. Improve system controls to ensure payments are limited to authorized days and payments for absences and holidays are limited in accordance with policy.

AUDITEE'S RESPONSE

A. We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

B. We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2013-010.	**Child Care Provider Eligibility**

Federal Agency:	Department of Health and Human Services
Federal Program:	93.575 Child Care and Development Block Grant 2012 - G1201MOCCDF and 2013 - G1301MOCCDF 93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund 2012 - G1201MOCCDF and 2013 - G1301MOCCDF
State Agency:	Department of Social Services (DSS) - Children's Division (CD) and Family Support Division (FSD)
Questioned Costs:	$21,146

The DSS does not have adequate controls and procedures in place to ensure certain child care providers participating in the Child Care Development Fund (Child Care) subsidy program comply with statutory requirements for license-exempt status. By statute, child care providers are exempt from licensing requirements if they care for four or less unrelated children, known as "four-or-less" (FOL) registered providers. The DSS did not properly classify some children as unrelated or could not verify the relationship between some FOL providers and children in their care. During the year ended June 30, 2013, the DSS paid over 4,100 FOL child care providers approximately $24.4 million for child care services.

Child care providers must be licensed, or be exempt from licensure by statute, to participate in the program. FOL providers must sign a registration agreement attesting they understand the health and safety requirements of the program, will comply with such requirements, and will report true and accurate information. Once the provider registers with the DSS, clients participating in the Child Care subsidy program may request their children be authorized for care with the provider. The Child Care policy manual specifies the information the FSD eligibility specialist (ES) should review to verify the relationship between the children and the FOL providers. Examples specified include Missouri electronic birth records accessible via the Family Assistance Management Information System (FAMIS) eligibility and payment system, paper birth certificates for individuals born in other states, marriage licenses, and other documents. The policy does not specify that the ES is required to document how they perform verification procedures, though the policy indicates the ES may not accept the parent's statement as the only verification. The FAMIS system has built-in edits that only allow the ES to authorize a maximum of four unrelated children to a FOL provider at any given time. However, if the correct relationship code is not used, the edit will not prevent payment for more than four unrelated children.

We selected ten FOL providers paid during fiscal year 2013 and reviewed the relationship of all children listed as relatives and claimed for reimbursement during a selected month. The DSS paid each provider for 7 to 22 related and unrelated children for the month reviewed, 162 children in total. We asked the CD to verify the relationships using information available in FAMIS or available from the local FSD offices responsible for managing the cases.

For 8 of 10 (80 percent) providers reviewed, the relationships between some of the children and their providers could not be verified or the ES did not use the correct relationship code. The eligibility specialists entered a relationship code specifying the relationship as aunt for 9 of the 15 related and unrelated children for one provider and 3 of the 11 related and unrelated children for another provider. The providers are actually the great-aunt of the children and should be considered as unrelated persons based on the statutory and DSS policy definitions of a relative. For the remaining six providers, the eligibility specialists did not document how they originally verified the relationship, and the DSS was unable to confirm the relationship upon our request. As a result, these eight providers may have cared, and been paid by the DSS, for more than the four unrelated children allowed during the month tested. If so, these eight providers operated in

violation of state child care licensing laws and were ineligible for the program. The DSS paid these eight providers $28,576 during the month reviewed. We question the federal share of $21,146 (74 percent). If similar errors in the classification of relatives and inability to verify relationships were made for the remaining 1,050 FOL providers paid for more than four children, questioned costs could be significant.

An eligible provider for the Child Care program is defined by 45 CFR Section 98.20 as a provider for child care services for compensation that is licensed, regulated, or registered under applicable state or local law and satisfies state and local requirements, including health and safety requirements. Section 210.211.1, RSMo, states it is unlawful for any person to establish, maintain, or operate a child care facility without a valid license issued by the Missouri Department of Health and Senior Services unless the provider meets one of the listed exemptions. Section 210.211.1(1), RSMo, exempts from licensure any person who is caring for four or fewer unrelated children. Children related to the provider by blood, marriage, or adoption within the third degree are not considered in the total number of children being provided care.

Adequate documentation of the verification of a child's relationship to a FOL provider is necessary to ensure compliance with DSS policy and state law. In addition, documentation would allow supervisors to better review relationship determinations for children authorized to FOL providers.

WE RECOMMEND the DSS, through the CD, resolve questioned costs with the grantor agency and improve controls and procedures to ensure child care providers participating in the subsidy program are in compliance with state licensing requirements. These procedures should include maintaining adequate documentation to demonstrate verification of a child's relationship to the provider at the time of authorization.

AUDITEE'S RESPONSE

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

2013-011.	**Foster Care Payment Coding**

Federal Agency:	Department of Health and Human Services
Federal Program:	93.658 Foster Care - Title IV-E 2012 - G1201MO1401 and 2013 - G1301MO1401 93.659 Adoption Assistance 2012 - G1201MO1407 and 2013 - G1301MO1407
State Agency:	Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS) and Children's Division (CD)
Questioned Costs:	$1,146,008

DSS controls and procedures over the establishment and monitoring of assigned accounting system coding for assistance payments are inadequate. Coding errors occurred and went undetected, and as a result, some payments to residential facilities were incorrectly allocated to the Adoption Assistance program instead of the Foster Care program. These costs are not allowable expenditures for the Adoption Assistance program.

The DSS contracts with residential facilities to provide room, board, and supervision for children in state custody. Several times each month, the DFAS processes payments to residential facilities from the Family and Children's Electronic System (FACES). Personnel in the DFAS Accounts Payable Unit enter the total of the payments into the statewide accounting system (SAM II) using predetermined coding that designates how the expenditures will be allocated to federal programs. FACES payment information is included in a report identifying FACES expenditure totals by type of service and FACES fund code. The FACES fund code denotes the child's eligibility for various federal programs and the types of services paid. For example, FACES fund code 22 is assigned to a child in a residential facility placement that is eligible for the Foster Care program. The appropriate related SAM II coding designates the expenditures as eligible to claim for the federal Foster Care program.

DFAS and CD personnel establish how FACES payments should be coded in SAM II and create the coding template used by DFAS Accounts Payable Unit staff. CD officials indicated the established SAM II coding is updated as needed if there are significant changes to FACES coding or federal program provisions. However, there is no documented supervisory review of established coding or coding changes to ensure the accuracy of coding used or changes made. According to DFAS officials, DFAS and CD personnel discussed coding of residential facility payments (fund code 22) at a meeting in October 2011. The DFAS employee responsible for updating the established SAM II coding misinterpreted comments made during the meeting and changed the designated SAM II coding to an Adoption Assistance program code. As a result, FACES fund code 22 payments were incorrectly coded in SAM II to the Adoption Assistance program rather than the Foster Care program, and subsequently claimed incorrectly as Adoption Assistance program expenditures on federal reports. To be an allowable Adoption Assistance program cost, the payments would have to be made on behalf of legally adopted children for whom the DSS has a signed Adoption Subsidy agreement pursuant to 42 USC 673 and 45 CFR Section 1356.40. Payments for children coded to FACES fund code 22 would not meet these requirements.

Since October 2011, the DSS incorrectly claimed $3,857,991 in residential facility payments to the Adoption Assistance program ($2,408,911 federal share), including $1,850,490 for the year ended June 30, 2013. We question the federal share of fiscal year 2013 payments claimed incorrectly, or $1,146,008 (61.93 percent). We notified DSS officials of the apparent coding error in September 2013. DSS officials agreed and made changes at that time to correct future coding. Additionally, the DFAS determined the dollar amount of claiming errors for state fiscal years 2012, 2013, and the first quarter of

state fiscal year 2014. The DFAS has since processed adjustments to correct erroneous claims made between January 1, 2012 and September 30, 2013.

SAM II coding established by CD and DFAS personnel dictates how the majority of payments made on behalf of foster and adoptive children through the FACES system are claimed for federal reimbursement. However, there is no periodic supervisory review of the established coding or the coding templates used by DFAS Accounts Payable Unit staff. The lack of review allowed the above errors to go undetected by the DSS. Good internal controls require adequate procedures to ensure amounts charged to federal programs are accurate. Without proper controls to periodically review the SAM II coding, the DSS cannot ensure only allowable costs are charged to the various federal programs.

WE RECOMMEND the DSS, through the CD and the DFAS, resolve questioned costs with the grantor agency and develop controls and procedures to ensure appropriate coding is established and expenditures are claimed to the appropriate federal program. Controls and procedures should include a periodic supervisory review of coding.

AUDITEE'S RESPONSE

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

2013-012.	**Foster Care Cost Allocation Procedures**

Federal Agency:	Department of Health and Human Services
Federal Program:	93.658 Foster Care - Title IV-E 2012 - G1201MO1401 and 2013 - G1301MO1401
State Agency:	Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)
Questioned Costs:	$30,143

DFAS controls and procedures over the allocation and calculation of the federal portion of costs for the Title IV-E Foster Care program need improvement and as a result, errors were not prevented and/or detected. The DFAS claimed some federal costs at an incorrect rate.

The DFAS has procedures to identify, measure, and allocate all costs to the programs administered by the department. Costs are allocated quarterly using comprehensive cost allocation spreadsheets. The spreadsheets contain formulas to apportion costs to the various programs to determine amounts to be claimed for reimbursement on federal financial reports. As part of this process, the DSS calculates the federal portion of Title IV-E Foster Care expenditures by first calculating the federally eligible expenditures and then applying the appropriate federal financial participation (FFP)

rates to these expenditures based on the following expenditure types: assistance; training; or administrative. For training and some administrative expenditures, the DSS calculates the federally eligible expenditures by multiplying the total expenditure amount by the percentage of federally eligible children in foster care (approximately 66 percent in state fiscal year 2013). DFAS personnel perform supervisory reviews of the cost allocation spreadsheets, but do not document their reviews or specifically review FFP percentages applied to expenditures.

The DSS contracts with four state universities to provide educational assistance to students preparing for a Master's Degree in Social Work (MSW) and reimburses the universities for both direct and indirect costs. An audit performed by the Department of Health and Human Services (DHHS) - Office of Inspector General (OIG), *Review of the Missouri Department of Social Services Claim for Title IV-E Training Costs for Long-Term Training*, released in February 2010, noted the DSS incorrectly claimed indirect costs related to the MSW program contracts at the 75 percent enhanced training FFP rate rather than the 50 percent administrative FFP rate.

In response to the OIG audit, the DSS created two reporting category codes in the statewide accounting system during state fiscal year 2011 to separately identify the direct and indirect portion of the MSW payments. While the amounts were separately identified in the accounting system, DFAS personnel improperly combined these amounts on the cost allocation spreadsheets during the first three quarters of state fiscal year 2013. DFAS personnel calculated the federal portion by multiplying the federally eligible expenditure amount by the enhanced training FFP rate. As a result, the DSS incorrectly claimed MSW contract indirect costs at the 75 percent enhanced training FFP rate rather than the 50 percent administrative FFP rate. The incorrect calculations involved indirect costs totaling approximately $183,000 reimbursed to the universities. We question $30,143, the amount of federal costs claimed in excess of the appropriate federal share.

After our review, the DFAS Fiscal and Administrative Manager revised the cost allocation spreadsheet to separately calculate the FFP for MSW indirect costs for the fourth quarter of state fiscal year 2013. For the errors noted above, correcting adjustments were included on the Title IV-E Foster Care federal financial report filed for the quarter ended June 30, 2013. The Fiscal and Administrative Manager, who reviews the cost allocation spreadsheets, stated she was aware the DSS created separate reporting category codes but was unaware why this change occurred and the need to use different FFP percentages for the direct and indirect MSW costs.

According to 45 CFR Section 1356.60(b)(3) and 42 USC 674(a)(3)(A), costs for short-term and long-term training at educational institutions and in-service training may be claimed at the enhanced 75 percent FFP rate for training of personnel employed by or preparing for employment with the state agency. The DHHS - Departmental Appeals Board (DAB) issued DAB No. 2159 in 2008 stating the enhanced rate is not available for indirect costs that were developed from cost pools consisting of both allowable training costs and other administrative costs.

Good internal controls require adequate procedures to ensure the federal portion of expenditures is correctly calculated by applying the appropriate FFP rate in cost allocation spreadsheets. Inadequate supervisory reviews of the spreadsheets could hinder the ability to manage federal funds effectively and to comply with federal regulations.

WE RECOMMEND the DSS, through the DFAS, resolve questioned costs with the grantor agency and implement controls to ensure indirect costs are claimed at the proper federal financial participation rate. These procedures should include a detailed and documented supervisory review of cost allocation spreadsheets.

AUDITEE'S RESPONSE

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2013-013. Foster Care Residential Facility Training Reimbursements

Federal Agency:	Department of Health and Human Services
Federal Program:	93.658 Foster Care - Title IV-E 2012 - G1201MO1401 and 2013 - G1301MO1401
State Agency:	Department of Social Services (DSS) - Children's Division (CD)
Questioned Costs:	$17,055

As noted in two previous audit reports, the CD has not established sufficient procedures to monitor residential facility training reimbursements. As a result, reimbursements to these facilities continue to be unsupported and/or unallowable.

Residential facilities provide specialized care for children who need more structure and intervention than a foster home can provide. The DSS contracts with 29 of the 75 residential facility operators to reimburse part of the costs of training facility staff. The contracts outline specific allowable and unallowable training activities as provided by federal regulations and guidelines. Facilities must submit a training report of total claims for reimbursement by type including travel, salaries, and materials.

The DSS reimburses the residential facilities a percentage of training costs claimed, based on an allocation methodology outlined in the contracts. During state fiscal year 2013, this percentage was approximately 60 percent in the first quarter and a portion of the second quarter, and approximately 65 percent for the remainder of the fiscal year. Training reimbursements to the facilities totaled approximately $315,000 during fiscal year 2013.

In response to Report No. 2011-11, *State of Missouri, Single Audit, Year Ended June 30, 2010*, issued in March 2011, finding number 2010-19, the DSS sent a letter to residential facilities to inform them of the need to clearly document training expenses and provide

rationale that shows the expenditures meet Foster Care program requirements for allowability. The DSS requires contractors to classify all training courses under one of the sixteen allowable Foster Care program topics described in Section 8.1h of the Department of Health and Human Services, Administration of Children and Families Child Welfare Manual. Contractors must also provide written rationale or justification for Foster Care reimbursement of the course costs. However, the CD review procedures are still not sufficient to prevent and/or detect some unsupported and/or unallowable reimbursements.

We reviewed selected training reports and supporting documentation for reimbursements made to eight residential facilities during fiscal year 2013. Of the $72,334 in reimbursements reviewed, payments totaling $22,741 (31 percent) were unsupported and/or unallowable, of which we question $17,055 claimed as the 75 percent federal share.

Some training reports and supporting documentation were not sufficient to show the training and related costs were for allowable Foster Care training activities. Examples of these costs include salaries and benefits, travel expenses, conference registration fees, and professional memberships. DSS residential training contracts do not require the facilities to submit documentation supporting the training costs claimed. We noted most facilities attached various types of supporting documentation including invoices, receipts, programs or agendas, and attendance logs to the training reports; however, the level of detail and overall organization of the documentation varied. For example, one facility only submitted a credit card invoice to support a lodging expense while other facilities submitted the original lodging invoice which included the room rate, arrival and departure dates, and other applicable charges. OMB Circular A-87, Attachment A, Section C.1.j states costs must be adequately documented to be allowable.

In addition, some training activities reimbursed appeared unallowable. For example, one facility was reimbursed for staff to attend regular administrative staff meetings. The CD reimbursed another facility for unallowable expenses incurred while attending an out-of-state conference. These questionable expenditures included sponsorship of a conference refreshment break, travel expenses for non-facility employees, lodging and meal expenses for days before and after the conference, and the purchase of alcoholic beverages and souvenirs. The CD reimbursed a third facility for lodging expenses which exceeded the maximum amount allowed by state travel policy. The residential facility contract prohibits these unallowable costs and requires each facility to abide by the current State of Missouri Travel Regulations published by the Office of Administration, which specify the maximum reimbursable amount for meals, lodging, and mileage. Training activities must be closely related to one of the examples cited in 45 CFR Section 1356.60; however, these training activities do not appear reimbursable under this guidance.

The reimbursements we reviewed contained no indication CD staff requested additional information or documentation supporting the training costs claimed. Without sufficient monitoring procedures and adequate supporting documentation, the CD cannot ensure

residential facility training costs claimed are for allowable Foster Care activities. The CD should ensure training activities are in compliance with federal regulations, and supported by sufficient documentation.

WE RECOMMEND the DSS, through the CD, resolve questioned costs with the grantor agency and improve residential facility monitoring procedures to ensure training costs reimbursed are for allowable activities outlined in federal regulations and are adequately supported.

AUDITEE'S RESPONSE

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

2013-014.	**Section 1512 Reporting**

Federal Agency: Department of Health and Human Services
Federal Program: 93.719 ARRA - State Grants to Promote Health Information Technology
2009 - 90HT001201
State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)

The DSS did not report the identity of vendors paid by the subrecipient for the ARRA - Health Information Technology (HIT) program as required for Section 1512 reporting. The DSS passes through the majority of HIT funds to a single subrecipient, the Missouri Health Connection (MHC). During state fiscal year 2013, the DSS disbursed approximately $3.7 million in ARRA funds to the MHC.

Section 1512 of the ARRA requires comprehensive reporting for certain ARRA awards to promote transparency and accountability over the use of such funds. This section requires various data elements to be reported on a quarterly basis by prime recipients detailing the use of ARRA funds including the total grant award, the amount received and expended, and certain elements for vendor payments and subawards. Additionally, prime recipients are required to report on planned projects and activities, including the status of project completion and an estimate of direct jobs created or retained. Prime recipients may solicit information for some data elements from subrecipients and vendors to help meet Section 1512 reporting requirements. For any payments greater than $25,000, the subrecipient must report the identity of the vendor. In some cases, prime recipients may delegate certain direct reporting duties to their subrecipients, although the state of Missouri, as the prime recipient of these funds, has not delegated such responsibilities.

On a quarterly basis, the MHC submits required information to the DFAS such as jobs created and the status of the project; however, the MHC does not submit detailed

expenditure data, including payments to vendors in excess of $25,000. DFAS personnel combine the amount disbursed to the MHC during the quarter with information submitted by the MHC and enter the information into the state's Section 1512 reporting system (STIM 360). However, payments from the MHC to vendors exceeding $25,000 were not reported to the DSS and subsequently were not included in Section 1512 reports as required. The DFAS employee responsible for entering data into Section 1512 reports indicated she was not aware of this requirement.

The MHC prepared a narrative budget for the program's four-year project period. The budget narrative indicates the MHC planned to spend approximately $7.4 million, or 48 percent of the total budgeted expenditures, on contractual expenses throughout the project period. Based on budgeted expenditures, it appears the MHC routinely processes payments to vendors exceeding $25,000; however, the number of vendors this includes is unknown because the DSS does not require the MHC to report, and the MHC does not report, detailed expenditure information.

OMB Memorandum M09-21 states the DSS, as prime recipient, is ultimately responsible for the reporting of all data required by Section 1512 of the ARRA. Additionally, the prime recipients, as owners of the data submitted, have principal responsibility for the quality of the information submitted.

The HIT program ended on February 7, 2014. Public Law 113-76 Section 627(b) repealed Section 1512 reporting effective February 1, 2014; however, previously filed reports may need to be amended to reflect data elements required but not reported.

WE RECOMMEND the DSS, through the DFAS, work with the grantor agency to determine if Section 1512 reports should be amended to reflect the required data elements not previously reported.

AUDITEE'S RESPONSE

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2013-015. Eligibility and TANF Assistance Payments

Federal Agency:	Department of Health and Human Services
Federal Program:	93.558 Temporary Assistance for Needy Families 2012 - G1202MOTANF and 2013 - G1302MOTANF
State Agency:	Department of Social Services (DSS) - Family Support Division (FSD)
Questioned Costs:	$3,451

The FSD did not act promptly or properly on information affecting recipients' eligibility and did not maintain complete eligibility documentation for one Temporary Assistance

for Needy Families (TANF) recipient reviewed. In addition, the FSD did not impose sanctions on some recipients who failed to cooperate with Child Support Enforcement (CSE) procedures. During the state fiscal year ended June 30, 2013, the DSS expended federal funding of about $181 million for the TANF program, including about $87 million in basic assistance payments to families. Similar conditions were noted in our prior two audits.

A. The FSD paid TANF benefits to some recipients who may not have been eligible or were ineligible for the full amount of TANF payments received. We sampled 60 recipients, with payments totaling $102,855 for the year ended June 30, 2013, and noted concerns with 5 (8 percent) of the recipients tested. The purpose of the test was to determine whether proper eligibility determinations were made, and whether payments were calculated in accordance with program requirements, including obtaining any required documentation. Our test disclosed the following:

- The FSD identified unreported income or other changed circumstances for four recipients tested and took action to close the cases; however, the FSD did not establish claims for recoupment of the improper benefits until we inquired about these cases. The FSD determined improper benefits for these cases totaled $1,405. We question the amount of the improper benefits identified totaling $1,405 (100 percent federal share).

  Under 45 CFR Section 206.10, an individual's eligibility must be reconsidered or redetermined: (1) when required on the basis of information the agency has obtained previously about anticipated changes in the individual's situation; (2) promptly, after a report is obtained which indicates changes in the individual's circumstances that may affect the amount of assistance to which he is entitled or may make him ineligible; and (3) periodically, within agency established time standards, but not less frequently than every 12 months for certain other eligibility factors subject to change. Additionally, prompt determination of overpayments and establishment of claims are necessary since amounts recovered offset future program costs.

- The FSD did not maintain adequate documentation for one recipient tested. The recipient's assistance application/eligibility statement and system-generated interview summary were printed in January 2013, but not signed by the recipient until August 2013, after we requested the case file. The recipient began receiving benefits in February 2013. The assistance application/eligibility statement and interview summary contain questions concerning income, reasons for need, and required federal prohibitions and requirements, and must be promptly signed by the applicant certifying compliance with the requirements and attesting to the accuracy of the information provided.

  Under 45 CFR Section 206.10(a)(1)(ii), applications for program participation must be in writing on an agency prescribed form and signed by the applicant

or an appropriate representative. In addition, 45 CFR Section 205.60(a) requires the agency to maintain records for the proper and efficient operation of the plan, including records regarding applications, determination of eligibility, the provision of financial assistance, and other pertinent information obtained.

Because the FSD did not maintain required case file documentation, it could not ensure or demonstrate compliance with federal requirements related to eligibility for the TANF program. Payments made for this recipient during the year ended June 30, 2013, totaled $920, for which we question the entire amount (100 percent federal share).

B. The FSD did not act upon some notices of non-cooperation from the CSE Unit to sanction recipients, and the CSE Unit did not always notify the FSD of non-cooperating clients. We obtained a listing of CSE cases flagged in the child support case management system for non-cooperation during the year ended June 30, 2013, and matched it against a listing of TANF cases. There were 2,808 TANF cases flagged for non-cooperation, with payments totaling more than $5.3 million during the fiscal year ended June 30, 2013. We tested 60 of these TANF recipients to determine whether the FSD was properly sanctioning recipients who were not cooperating with CSE procedures. TANF payments for the fiscal year for the 60 recipients totaled about $114,000. For 30 of the 60 recipients (50 percent) tested, either the CSE Unit did not promptly notify the FSD of the non-cooperation or the FSD did not act to sanction the recipient upon notification.

- The CSE Unit did not properly notify the FSD of 18 non-cooperating clients tested. When non-cooperation occurs, the CSE Unit is to alert the FSD eligibility specialist via email comments or by sending a notice of non-cooperation form. For two cases, the notifications occurred about 5 months and 2 months after the non-cooperation began, delaying the imposition of sanctions, resulting in overpayments totaling $438 during the year ended June 30, 2013. For 16 cases, neither the FSD nor the CSE Unit had documentation the FSD had received a notice of non-cooperation. No notification was sent for 12 of the 16 cases because, according to a CSE official, there was no active TANF case at the time of the non-cooperation (10 cases), the custodial parent was excluded from the TANF household (1 case), and the custodial parent was homeless (1 case). Of the remaining 4 cases, another sanction was already in place on 3 cases and no explanation for non-notification was apparent on the other case. For 1 of the 10 cases with no active TANF case during non-cooperation, the recipient subsequently began receiving benefits and sanctions were not imposed, resulting in overpayments totaling $212 during the year ended June 30, 2013. As a result of the failure of the CSE Unit to notify the FSD of non-cooperation, sanctions were not entered or not entered timely into the Family Assistance Management Information System (FAMIS) system. We question the federal share of overpayments totaling $650 (100 percent federal share).

- The FSD did not sanction 12 recipients when notified of referral for non-cooperation. For two recipients, the active TANF case was not sanctioned by the FSD, resulting in overpayments totaling $336 during the year ended June 30, 2013. The TANF cases for the other 10 recipients were inactive when the notifications were received, and consequently the FSD entered no sanctions for non-cooperation in the FAMIS system. As a result, no sanctions would be in effect if the cases were later re-activated. For 2 of these 10 cases, the recipient subsequently began receiving benefits with no sanctions imposed, resulting in overpayments totaling $140 during the year ended June 30, 2013. We question the federal share of overpayments, totaling $476 (100 percent federal share).

Under 45 CFR Section 264.30, the FSD must refer to the CSE Unit all appropriate individuals in the family of a child for whom paternity has not been established or for whom a child support order needs to be established, modified, or enforced. Referred individuals must cooperate in establishing paternity and in establishing, modifying, or enforcing a support order with respect to the child. If the CSE Unit determines an individual is not cooperating, and the individual does not qualify for a good cause or other exception established by the CSE Unit, the FSD, or federal law, the CSE Unit must notify the FSD promptly. The FSD must then take appropriate action by either deducting an amount equal to at least 25 percent from the TANF assistance that would otherwise be provided to the family of the individual or denying the family assistance entirely. The DSS has determined the sanction will be 25 percent of the assistance amount. Additionally, 13 CSR 40-2.330 requires sanctions for applicants and recipients of TANF assistance who are not cooperating with the CSE Unit. It appears applicants who have failed to cooperate in the past should be sanctioned upon re-opening of their TANF cases unless or until they begin cooperating as required.

The FSD and the CSE Unit did not have a system to track cases requiring notification of non-cooperation and ensuring the notifications were sent and received. As a result, the FSD could not ensure or demonstrate compliance with federal requirements related to sanctioning of recipients who were not cooperating with CSE program requirements. Notifications should be sent and sanctions entered on all non-cooperating cases, including inactive cases and cases sanctioned for other reasons, so the sanction can be applied if the TANF case becomes active or the other sanctions expire. Effective July 2012, the FSD began requiring the eligibility specialists maintain a log for tracking requests for sanction and notating when the sanctions were added to FAMIS, and in April 2013 the FSD began requiring the CSE Unit notify both the eligibility specialist and the eligibility specialist's supervisor by email of requests for sanction and notify the eligibility specialist even when other sanctions are in place. However, our review indicates these procedures were not effective in ensuring compliance.

WE RECOMMEND the FSD resolve the questioned costs with the grantor agency and:

A. Strengthen controls to ensure proper and timely action is taken regarding the recoupment of overpayments. In addition, the FSD should maintain required eligibility documentation in all case files.

B. Develop additional controls to ensure sanctions are imposed on TANF recipients who fail to cooperate with CSE program requirements.

AUDITEE'S RESPONSE

A. We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

B. We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

2013-016. TANF Work Participation and Sanctions

Federal Program:	93.558 Temporary Assistance for Needy Families 2012 - G1202MOTANF and 2013 - G1302MOTANF
State Agency:	Department of Social Services (DSS) - Family Support Division (FSD)
Questioned costs:	$612

The FSD did not have adequate controls in place to ensure compliance with the Temporary Assistance for Needy Families (TANF) Work Verification Plan in effect for state fiscal year 2013 and, as a result, the FSD has less assurance the data used to calculate the work participation rate is accurate. In addition, controls were not adequate to ensure recipients were sanctioned when they were not in compliance with federal and state requirements.

The FSD contracted with 10 community organizations for the 19 regions in the Missouri Work Assistance (MWA) program to perform many of the required TANF work activity functions. These duties include case management, enrollment and assistance to TANF recipients who are required to participate in eligible work activities, and reporting recipient noncompliance and hours of participation to the FSD. Payments to the contracted community organizations for the MWA program totaled about $14.1 million during the year ended June 30, 2013.

The FSD has adopted procedures to monitor the performance of the MWA contractors for compliance with the Work Verification Plan policies and procedures. Those procedures include periodic reviews of 3 to 5 percent of cases for proper handling, and quarterly

testing of a sample of cases with no recorded hours of work activity for proper sanctioning. The FSD has also provided training to the MWA contractors based on the case testing results. Additionally, during state fiscal year 2013, the FSD and the Division of Finance and Administration performed on-site reviews at three of the MWA contractors. However, our review indicates monitoring activities and training were not effective in ensuring adequate contractor compliance. As a result, the FSD did not ensure MWA contractors complied with the state Work Verification Plan and policies for reporting recipients who do not comply with work requirements.

Under 45 CFR Section 265.3, states are required to submit quarterly TANF Data Reports which provide information regarding TANF recipients and work activities. The Department of Health and Human Services, Administration for Children and Families uses the TANF Data Reports to calculate the state work participation rate each fiscal year. In addition, under 45 CFR Section 261.62, the FSD is required to have a Work Verification Plan which includes requirements to maintain adequate documentation, verification, and internal control procedures to ensure the accuracy of the data used in calculating work participation rates. In doing so, the FSD must have in place procedures to identify TANF recipients who are work-eligible, identify work activities that may count for work participation rate purposes, determine how to count and verify reported hours of work, and control internal data transmission and accuracy.

A. The FSD was not in compliance with certain work activity reporting requirements contained in the Work Verification Plan in effect for state fiscal year 2013. A similar condition was noted in our prior three audit reports.

   We obtained a February 2013 listing of those TANF recipients referred to the MWA contractors which included data on the status of each recipient's compliance with the work participation requirements and number of hours of participation in the various work related activities. Of the 20,913 TANF recipients included in the report, 4,401 recipients had at least an hour of work activity reported. We selected 60 recipients with reported work activity for testing and obtained their case files. We noted for 20 (33 percent) of the cases tested, the work participation hours were either not documented, not verified, and/or not reported correctly in accordance with the Work Verification Plan. In two instances, the errors led to incorrectly reporting the recipient as meeting or not meeting the work participation requirements. These errors offset and resulted in no net misstatement to the work participation compliance rate for this group of 60 individuals. However, our test results indicate there are a significant number of cases for which the reported work participation hours are not accurate and as a result, the FSD has less assurance the state's work participation rate requirement is being met.

   The failure to maintain adequate controls to ensure accurate data is reported for measurement of work participation could result in a penalty, under 45 CFR Section 261.65, of not less than 1 percent and not more than 5 percent of the annual grant amount.

B. The FSD did not have adequate procedures in place to ensure MWA contractors notified the FSD when TANF recipients failed to meet work participation requirements or ensure timely investigation of notices from MWA contractors of incorrect addresses for recipients. As a result, many TANF recipients who failed to meet work participation requirements were not sanctioned and continued to receive full benefits. A similar condition was noted in our prior two audit reports.

Of 20,913 individuals on the February 2013 listing of TANF recipients referred to the MWA contractors, there were 16,512 recipients for which no work activities were reported. About 3,300 of these recipients were not subject to sanction due to various allowable waivers and exemptions, leaving about 13,200 recipients who were not participating in work activities and subject to sanction. We sampled 60 of the 13,200 cases and noted 9 (15 percent) of the recipients were not appropriately sanctioned for non-compliance with work participation requirements. Twenty-five recipients were appropriately sanctioned and the remainder were not subject to sanction during February 2013 due to various reasons, such as the recipient began participation or the FSD or recipient closed the case. The DSS has established the sanction at 25 percent of the monthly benefit amount. We question the amount of the sanctions that were not imposed on these 9 recipients for the month of February 2013, which totaled $612 (100 percent federal share).

For the cases with errors, MWA program contractors had multiple contacts with the recipients to get them engaged with the program and/or to reschedule missed appointments. However, the contractors did not timely place the recipients in conciliation or report them to the FSD to begin the sanctioning process. In 2 instances, the FSD did not act upon notification from the MWA contractor of an incorrect address for the recipient.

Under 45 CFR Section 261.14, for an individual who refuses to engage in work required under Section 407 of the Social Security Act, the state must reduce or terminate the amount of assistance payable to the family, subject to any good cause or other exceptions the state may establish. The state has determined the sanction shall be 25 percent of the monthly benefit. A state that fails to impose penalties on individuals in accordance with the provisions of Section 407(e) of the Social Security Act may be subject to penalty. Under 45 CFR Section 261.54, the federal agency may impose a penalty amount for a fiscal year of no less than 1 percent and no more than 5 percent of the annual grant amount.

The failure to maintain adequate controls to ensure recipients who are not in compliance with the work requirements are appropriately sanctioned has resulted in overpayment of benefits totaling $612.

In 2010 and 2011, the Department of Health and Human Services, Administration for Children and Families (ACF) determined the state did not meet the overall work participation rates for federal fiscal years 2008 and 2009 and indicated the state was

subject to potential penalties totaling $44.4 million. The DSS appealed the ACF's determinations and the matter is currently pending the DSS's development of a corrective action plan. In 2013, the ACF determined the state met the overall work participation rate for federal fiscal year 2010. Failure to comply with the requirements regarding data accuracy and imposition of sanctions for failure to meet work requirements increases the risk additional penalties may be imposed.

WE RECOMMEND the FSD:

A. Develop additional controls to ensure work activities are adequately documented, verified, and reported in accordance with the FSD Work Verification Plan.

B. Develop additional controls to ensure TANF recipients failing to meet work participation requirements are sanctioned as required. In addition, the FSD should resolve the questioned costs with the grantor agency.

AUDITEE'S RESPONSE

We partially agree with the auditor's findings. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the findings.

2013-017.	**Child Support Enforcement**

Federal Agency:	Department of Health and Human Services
Federal Program:	93.563 Child Support Enforcement 2012 - G1204MO4005 and 2013 - G1304MO4005
State Agency:	Department of Social Services (DSS) - Family Support Division (FSD) - Child Support Enforcement (CSE) and Division of Finance and Administrative Services (DFAS)
Questioned Costs:	$307,569

The FSD did not identify unallowable personnel severance costs included in a reimbursement request from one county providing child support services. In addition, the DFAS did not properly record costs for one vendor invoice resulting in unallowable costs charged to the program. During the year ended June 30, 2013, the federal share of CSE expenditures totaled about $60 million.

A. The FSD reimbursed unallowable personnel severance costs totaling $200,960 to one county providing child support services. The FSD failed to identify the unallowable costs included on the county's invoice for October 2012 and did not require the county provide supporting documentation for the unusually large amount of personnel costs claimed for some employees.

The county's invoice listed each employee and his/her monthly salary, including additional compensation for leave paid upon termination and employer-paid fringe benefits. The monthly salary expense listed for 15 employees, excluding the unit director, ranged from over $8,100 to $41,806 per employee. The monthly salaries listed for the other 41 employees only ranged from about $2,000 for a clerk to about $8,200 for the unit director. After our inquiries about the increased costs, the CSE Unit requested the county prosecutor's child support office provide an explanation. An official in that county prosecutor's office indicated, in response to significant funding cuts imposed by the DSS, the county offered employees a voluntary retirement/resignation incentive program not normally provided to county employees. Under the incentive program, county employees could receive severance pay equal to their base salary for 6 weeks to 14 weeks, depending on their years of service. The county billed the FSD severance costs totaling $200,960 for all 15 employees electing to participate. The FSD approved and paid the entire claim for reimbursement. An FSD official indicated the FSD was generally aware the county planned to reduce its workforce and provide severance pay to employees, but the FSD did not require documentation explaining the severance costs or addressing the allowability of those costs for reimbursement by the CSE program.

OMB Circular A-87 Appendix B, Section 8.g(3) states abnormal or mass severance pay will be considered on a case-by-case basis and is allowable only if approved by the cognizant federal agency. Neither the county, the county child support office, nor the FSD obtained the required approval. An FSD official indicated four other counties similarly terminated employees due to funding cuts, but none of those counties billed the CSE program for severance payments. We question the amounts reimbursed for personnel costs for the 15 employees totaling $200,960 (100 percent federal share).

B. The DFAS incorrectly recorded costs from one vendor invoice for call center services provided in February 2013. While the correct allocation of service costs for the CSE and Income Maintenance (IM) programs was noted on the invoice, the DFAS entered incorrect amounts into the state's accounting system (SAM II) and federal reports, resulting in $106,609 being improperly overcharged to the CSE program rather than allocated to various IM programs. DFAS procedures and controls for review, approval, and processing of payments did not prevent or detect the error. Since these costs were not valid costs of the CSE program, we question the unallowable costs totaling $106,609 (100 percent federal share).

WE RECOMMEND the DSS, through the FSD and DFAS, resolve the questioned costs with the grantor agency and develop additional controls to:

A. Ensure costs are allowable and adequate documentation is maintained prior to issuing payment.

B. Ensure costs are properly allocated to federal programs and recorded in the state accounting system.

AUDITEE'S RESPONSE

We partially agree with the auditor's findings. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the findings.

2013-018.	**Pharmacy Dispensing Fees**

Federal Agency:	Department of Health and Human Services
Federal Program:	93.767 Children's Health Insurance Program 2011 - 1105MO5021 and 2012 - 1205MO5021 93.778 Medical Assistance Program 2012 - 1205MO5MAP and 1205MO5ADM 2013 - 1305MO5MAP and 1305MO5ADM
State Agency:	Department of Social Services (DSS) - MO HealthNet Division (MHD)
Questioned Costs:	$6,102,152

The MHD has periodically changed the rate paid pharmacies for dispensing prescription drugs under the Medical Assistance Program and the Children's Health Insurance Program (CHIP); however, the state regulation authorizing these dispensing fees has not been updated since 1988. The Medical Assistance Program, also known as Medicaid, and the CHIP are administered by the MHD under the federally approved Medicaid and CHIP State Plans.

In addition to paying pharmacies for the cost of each prescribed drug, the MHD also pays pharmacies a base fee of $4.84 for dispensing each participant's prescription. However, this dispensing fee is higher than the $3 established under 13 CSR 70-20.060(1). In addition, in 1991 the DSS, as part of a settlement agreement, agreed to increase the Medicaid pharmacy dispensing fee to $4.09 per prescription. While the payment amount was increased as required by the agreement, neither the State Plan nor the CSRs were updated to reflect this amount. The State Plan was updated to add general wording indicating the state would pay the applicable fee at the time the prescription is filled, but again, no specific dollar amount was noted.

Federal regulation 42 CFR Section 431.10(b)(2) requires the state to establish the legal authority for the Medicaid agency to administer the Medicaid State Plan, including making rules and regulations to follow in administering the plan. In accordance with this CFR, the Medicaid State Plan lists the various statutes allowing the DSS to establish rules and regulations to administer the plan. The MHD has created CSRs, such as the one mentioned above, to administer the Medicaid program. However, failure to update the

related regulations when fee structures are changed causes the MHD to be noncompliant with its own regulations in administering the Medicaid State Plan.

The MHD paid pharmacies base dispensing fees totaling $63,037,007 during the year ended June 30, 2013. Had the dispensing fees been paid in accordance with the 1991 settlement agreement, the fees would have totaled $53,268,876, a difference of $9,768,131. We question the federal share of the increased payments, or $6,102,152 (62.47 percent).

Similar findings were included in our two prior audit reports. Subsequent to the audit period, MHD personnel took action to update state regulations in response to our recommendations. The proposed rule to update state regulations was published on November 1, 2013, and became effective December 30, 2013.

WE RECOMMEND the MHD resolve questioned costs with the grantor agency and ensure any future increases in payment rates are included in state regulations.

AUDITEE'S RESPONSE

We disagree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement.

2013-019.	**Cash Receipt Controls**

Federal Agency:	Department of Health and Human Services
Federal Program:	93.767 Children's Health Insurance Program 2011 - 1105MO5021 and 2012 - 1205MO5021 93.778 Medical Assistance Program 2012 - 1205MO5MAP and 1205MO5ADM 2013 - 1305MO5MAP and 1305MO5ADM
State Agency:	Department of Social Services (DSS) - MO HealthNet Division (MHD)

The MHD does not have adequate controls in place to ensure the proper management of cash receipts handled by the division, which totaled approximately $615 million during the year ended June 30, 2013. These receipts include monies received from participants, providers, and insurance companies for items such as premiums, reimbursements, and taxes related to the Medical Assistance Program (Medicaid) and the Children's Health Insurance Program (CHIP), which are administered by the MHD.

A. The MHD does not restrictively endorse checks and money orders immediately upon receipt or deposit receipts in a timely manner. Restrictive endorsement is not applied until the receipt has been posted to accounts receivable and is ready for deposit. During a count of undeposited items on August 29, 2013, we identified 697 checks and money orders totaling $263,216 which were not deposited within

eight calendar days of receipt. Thirteen receipts totaling $2,466 ranged in date from April 14, 2008 to August 29, 2012, and had been held for a year or longer. Some of the items may no longer be accepted by a bank for deposit. Although a report listing undeposited checks and money orders is reconciled weekly to monies in the safe, there is no follow-up review of receipts held for a significant length of time. Failure to restrictively endorse checks and money orders immediately upon receipt and to deposit receipts in a timely manner increases the risk of misappropriation.

B. The MHD did not adequately restrict user access within the cash receipts and accounts receivable modules of the Medicaid Management Information System (MMIS), an internal MHD accounting system. Our review identified seven employees that had the ability to record receipts and update or close the related accounts receivable in the MMIS, which increases the risk of misappropriation. Proper segregation of duties for user access in the MMIS should separate duties involving custody of assets, authorizations surrounding the assets, and record keeping.

Federal regulation 2 CFR Section 215.21, requires financial management systems to provide effective control over and accountability for all funds, property and other assets. Recipients are to adequately safeguard all such assets and assure they are used solely for authorized purposes.

WE RECOMMEND the DSS:

A. Establish controls to restrictively endorse checks and money orders immediately upon receipt and deposit all receipts in a timely manner.

B. Restrict user access within the MMIS accounting system and adequately segregate duties related to record keeping and asset custody.

AUDITEE'S RESPONSE

We agree with the auditor's findings. Our Corrective Action Plan includes our planned actions to address the findings.

2013-020.	**Pharmacy Reimbursement Allowance Tax**

Federal Agency: Department of Health and Human Services
Federal Program: 93.767 Children's Health Insurance Program
2011 - 1105MO5021 and 2012 - 1205MO5021
93.778 Medical Assistance Program
2012 - 1205MO5MAP and 1205MO5ADM
2013 - 1305MO5MAP and 1305MO5ADM

State Agency: Department of Social Services (DSS) - MO HealthNet Division (MHD)

The MHD does not have effective controls in place to ensure or demonstrate compliance with requirements of the Pharmacy Reimbursement Allowance (PRA) program, and as a result, taxes totaling at least $104,646 were not properly assessed to a pharmacy. PRA taxes assessed to 1,316 in-state pharmacy providers for the year ended June 30, 2013 totaled approximately $98.2 million.

The PRA program imposes a tax upon licensed retail pharmacies for the privilege of providing outpatient prescription drugs in Missouri. State regulation 13 CSR 70-20.320 establishes the PRA program and the method to compute the tax owed, as allowed under 42 CFR Section 433.68(b). The tax is calculated by multiplying the pharmacy's gross retail prescription receipts by the established tax rate. Monies generated by this tax are used to provide a portion of the state match required for services related to the Medicaid pharmacy program.

Licensed retail pharmacies report gross retail sales receipts to the MHD annually. MHD personnel manually enter these reported sales receipts into a database that computes the PRA tax assessments. Using the reports of gross retail sales receipts and the PRA tax rates in effect during fiscal year 2013, we recomputed the tax assessments for selected pharmacy providers. Our review identified 1 of 40 (2.5 percent) pharmacies reviewed was not assessed the correct amount of taxes owed due to a data entry error. The error relates to a pharmacy chain that submits data for multiple stores on one gross retail sales receipt report. When entering the reported sales receipts for each location into the database, MHD personnel failed to enter the activity for one store. The error was not detected by the MHD because there is no supervisory review or other control in place to ensure accuracy of data entry. As a result, the pharmacy was not assessed or billed for $104,646 in taxes owed related to the unrecorded sales receipts.

Without proper controls to ensure the retail sales receipts are entered accurately, there is less assurance the proper amount of PRA tax is assessed and collected.

WE RECOMMEND the DSS establish controls to ensure all pharmacies are assessed and billed the correct amount of PRA taxes. In addition, the DSS should pursue collection of the $104,646 in taxes owed.

AUDITEE'S RESPONSE

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2013-021.	Report Reviews

Federal Agency: Department of Health and Human Services
Federal Program: 93.778 Medical Assistance Program
2012 - 1205MO5MAP and 1205MO5ADM
2013 - 1305MO5MAP and 1305MO5ADM
State Agency: Department of Social Services (DSS) - MO HealthNet Division (MHD)
Questioned Costs: $1,024

The MHD does not have effective controls in place for the review of some reports necessary to ensure compliance with enrollment requirements of the Medicare Buy-In program or certain claims processing requirements of the Medical Assistance Program. The Medical Assistance Program, also known as Medicaid, is administered by the MHD.

Some state Medicaid participants may also be enrolled simultaneously in the federal Medicare program, and known as dually eligible. For these participants, the Medicare program is the primary insurance, and Medicaid is the secondary insurance. This arrangement is cost-beneficial to the state because the Medicaid program is only responsible for expenses not covered by Medicare, such as deductible and coinsurance amounts. Federal regulation 42 CFR Section 433.138 requires the DSS to take reasonable measures to identify other sources of health coverage that Medicaid beneficiaries may have and to ensure such parties pay to the extent of their liability. The MHD is responsible for reviewing reports to identify dually eligible participants with recently paid Medicaid claims. The MHD ensures these participants are coded as dually eligible in the system and attempts to recover monies paid for certain services by recouping the payment from the providers and notifying them to resubmit the claims to Medicare for payment of such services.

When participants are dually eligible, they may also qualify for the Buy-In program. Under this program, the MHD may enroll certain eligible participants in Medicare Part A (hospital insurance) and Part B (medical insurance) and use Medicaid funds to pay the premiums and other charges, as allowed by federal regulations 42 CFR Section 406.26 and 42 CFR Section 431.625. Since the MHD is paying the premiums for participants in this program, it is important that only those participants that are eligible are enrolled in the program. MHD responsibilities for the Buy-In program include identifying existing Medicaid participants eligible for Buy-In, maintaining the records of Buy-In participants, removing participants when they become ineligible, and verifying payments made for Medicare premiums.

Several reports are system-generated and utilized to ensure proper handling of claims for participants who had recently become Medicare dually eligible and proper enrollment of participants in the Buy-In program. We reviewed the MHD's usage of these reports and noted the following concerns:

A. MHD personnel did not ensure timely review of a claims report for Medicaid participants who had recently become Medicare dually eligible to determine if recoupment from the provider was needed. The cumulative claims report is generated semi-monthly and includes all outstanding claims awaiting review. During the year ended June 30, 2013, there were approximately 2,900 claims on each semi-monthly report. We tested 40 of these claims to determine if claims were properly researched and providers billed when necessary. We identified 6 of 40 (15 percent) claims tested were not reviewed timely or at all. The MHD did not review five claims tested, totaling $1,325, and did not review an additional claim within the time required to act on the claim. The claim, totaling $520, was reviewed more than one year past the service date, making it ineligible for submission to Medicare. Since most of the remaining 34 claims tested had resulted in a recoupment, it is likely most of the un-reviewed claims would also have required recoupment. Timely reviews of claims reports related to participants who had recently become Medicare dually eligible are necessary to ensure compliance with federal regulations and recoupment of Medicaid monies.

B. The MHD does not have sufficient procedures to ensure reports related to Buy-In program eligibility are reviewed to determine the proper enrollment of participants. As a result, the MHD failed to add 9 participants and delete 5 ineligible participants from the Buy-In program.

MHD staff review three system-generated reports of Medicaid participants with changes that may affect eligibility for the Buy-In program. While reviewing these reports, MHD personnel are to research each participant and manually add or delete the participants to/from the Buy-In program as necessary. During the year ended June 30, 2013, there were approximately 4,700 participants on these reports each month. We tested 40 participants from each report (120 participants in total) to determine if the MHD verified and properly changed the participants' Buy-In program eligibility.

- We identified 10 participants (8 percent) that were not reviewed by MHD personnel, including 7 participants qualified for the Buy-In program that were not added to the program and 3 participants that no longer qualified but were not deleted from the program. MHD personnel indicated that due to staffing limitations, those coded for addition were considered lesser priority and were not always reviewed. The 3 participants that should have been deleted were simply overlooked during the review process.

- We identified 3 participants (2 percent) that were reviewed by MHD personnel but needed enrollment actions were not completed. The enrollment actions were submitted by MHD personnel but were rejected by the federal enrollment system, and MHD personnel were not aware the transactions failed to process. Although a report to identify errors existed, it was not reliable or accurate. Because, there was not a usable notification system or report in place to notify the MHD when transactions failed to process, no further research or

resubmission was performed. In addition, we identified 1 participant that was not properly enrolled in the Buy-In program for some of the months in which the participant qualified. For this participant, the MHD incorrectly entered the period of eligibility into the federal enrollment system.

Without fully reviewing reports related to the Buy-In program and ensuring proper handling of those participants, the MHD is not able to ensure only eligible Medicaid participants are enrolled in the Buy-In program. The ineligible payments made on behalf of the participants mentioned above totaled $1,668 during the year ended June 30, 2013. We question the federal share of the ineligible payments, or $1,024 (61.37 percent).

A similar condition was reported in our previous audit report, *Report No. 2012-26, State of Missouri Single Audit, Year Ended June 30, 2011*, issued in March 2012, finding number 2011-25 part B. The recommendation related to the prior finding was subsequently implemented; however, the condition re-occurred during fiscal year 2013.

WE RECOMMEND the MHD resolve the questioned costs with the grantor agency and establish controls to ensure complete and timely review of all reports related to participants who become Medicare dually eligible and the Medicare Buy-In program. In addition, the MHD should establish controls to ensure action taken as a result of the reviews is properly applied to the participant.

AUDITEE'S RESPONSE

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2013-022.	**Davis-Bacon Act**

Federal Agency: Department of Transportation
Federal Program: 20.319 ARRA - High-Speed Rail Corridors and Intercity Passenger Rail Service - Capital Assistance Grants
FR-HSR-0071-11-01-00 and FR-HSR-0076-11-01-00
State Agency: Missouri Department of Transportation (MoDOT)

The MoDOT does not have adequate controls in place to ensure compliance with Davis-Bacon Act prevailing wage requirements on High-Speed Rail Corridors and Intercity Passenger Rail Service - Capital Assistance Grants (HSIPR) projects.

The MoDOT contracted with a railroad company for various HSIPR construction improvement projects along the Kansas City/St. Louis railroad corridor. Construction labor for each project is provided by employees of the railroad company as well as employees of its contractors and subcontractors. We reviewed two of the seven HSIPR

projects with expenditures during the year ended June 30, 2013. The MoDOT paid the company approximately $13.3 million for these two projects during this period.

The MoDOT has not established controls and procedures to ensure prevailing wages are paid by the company. The MoDOT receives periodic invoices from the company for materials and labor, listing certain company employee payroll information. However, MoDOT personnel do not request and review supporting payroll documents, or perform other procedures, to ensure wages paid comply with the company's collective bargaining agreement. MoDOT officials indicated they did not monitor company wages because these union wages are contained in a collective bargaining agreement negotiated under the Railway Labor Act, which federal regulations 49 USC 24405(c)(2) and 49 USC 24312 deem to comply with the Davis-Bacon Act. While the union wage rates are deemed compliant with the Davis-Bacon Act, monitoring is necessary to ensure wages are paid in accordance with the union contract. Without monitoring wages paid by the company, the MoDOT cannot ensure compliance with Davis-Bacon Act requirements.

In addition, the company relies on a construction management firm to monitor and ensure HSIPR contractors and subcontractors comply with prevailing wage requirements. MoDOT project managers indicated the construction management firm provides a verbal report regarding contractors' and subcontractors' compliance during weekly project status meetings with MoDOT, company, contractor, and subcontractor officials. MoDOT project managers indicated they spot check contractors' and subcontractors' certified payroll documents made available by the engineering consultant at these meetings. However, documentation supporting this monitoring activity was not prepared or maintained. To demonstrate compliance with Davis-Bacon Act requirements, the MoDOT should maintain documentation of its monitoring of wages paid by the HSIPR contractors and subcontractors.

Federal regulations 40 USC 3141-3144, 3146, and 3147 require payment of prevailing wages on HSIPR projects, in accordance with the Davis-Bacon Act. OMB Circular A-133, Subpart C, Section .300(b) requires the MoDOT maintain internal controls that provide reasonable assurance of compliance with Davis-Bacon Act requirements.

WE RECOMMEND the MoDOT establish controls to monitor wages paid by the railroad company for compliance with the Davis-Bacon Act, and ensure adequate documentation of all monitoring procedures is prepared and maintained.

AUDITEE'S RESPONSE

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

Additional State Auditor's Reports:

The Missouri State Auditor's Office regularly issues audit reports on various programs, agencies, divisions, and departments of the state of Missouri. Audit reports may include issues relating to the administration of federal programs. Reports issued during fiscal year 2013 and through current were reviewed and the following reports relate to federal programs and were analyzed to determine if any issues noted in these reports were required to be reported in this Schedule of Findings and Questioned Costs in accordance with Section .510(a) of OMB Circular A-133.

Report Number	Report Name
2013-20	Social Services/Medicaid Management Information System Data Security
2013-33	Public Safety/State Emergency Management Agency
2013-46	Early Childhood Development, Education, and Care Fund
2013-50	Public Safety/Missouri State Highway Patrol
2013-63	Missouri Veterans Commission Capital Improvement Trust Fund
2013-135	Public Safety/Office of the Director
2013-136	Department of Conservation
2013-143	Social Services/Temporary Assistance for Needy Families Electronic Benefit Transfers
2013-147	Social Services/Division of Youth Services

All reports are available on the Missouri State Auditor's Office website: http://auditor.mo.gov

SUMMARY SCHEDULE OF PRIOR AUDIT FINDINGS
IN ACCORDANCE WITH OMB CIRCULAR A-133

STATE OF MISSOURI
SUMMARY SCHEDULE OF PRIOR AUDIT FINDINGS
IN ACCORDANCE WITH OMB CIRCULAR A-133

Circular A-133 requires the auditee to prepare a Summary Schedule of Prior Audit Findings to report the status of all audit findings in the prior audit for the year ended June 30, 2012, and the findings from the prior audits for the years ended June 30, 2011, 2010, 2009, and 2008, except those that were listed as corrected, no longer valid, or not warranting further action. This section includes the Summary Schedule of Prior Audit Findings, which is prepared by the state's management.

Circular A-133 requires the auditor to follow-up on these prior audit findings; perform procedures to assess the reasonableness of the Summary Schedule of Prior Audit Findings; and report, as a current year finding, when the auditor concludes the Summary Schedule of Prior Audit Findings materially misrepresents the status of any prior audit findings.

The disposition of the findings from the year ended June 30, 2011, is as follows:

Findings numbered 2, 3A, 3B, 5, 6, 7B, 8B, 9, 10, 11B, 13, 15A-C, 21, 22B, 25B, 25C and 26 were corrected.

Findings numbered 4A, 4B, 7A, 8A, 8C, 11A, 12, 14A, 14B, 16, 17, 18A, 18B, 19A-D, 20A, 20B, 22A, 22C, 23, 24 and 25A are included in the Summary Schedule of Prior Audit Findings.

For the year ended June 30, 2010, all findings were corrected, no longer valid, or did not warrant further action, except for findings numbered 6, 15, 16A, 17, 19, 21A-D and 25, which are included in the Summary Schedule of Prior Audit Findings.

For the year ended June 30, 2009, all findings were corrected, no longer valid, or did not warrant further action, except for findings numbered 6B, 12, 15A and 18, which are included in the Summary Schedule of Prior Audit Findings.

For the year ended June 30, 2008, all findings were corrected, no longer valid, or did not warrant further action, except for finding numbered 9A, which is included in the Summary Schedule of Prior Audit Findings.

SUMMARY SCHEDULE OF PRIOR AUDIT FINDINGS

2008-9A. Vocational Rehabilitation Program

Federal Agency: Department of Education
Federal Program: 84.126 Rehabilitation Services - Vocational Rehabilitation Grants to States
2007 - H126A0700372 and 2008 - H126A080037
State Agency: Department of Social Services - Family Support Division (FSD) - Rehabilitation Services for the Blind (RSB)
Questioned Costs: $3,444,779

The FSD did not establish procedures to ensure adequate supporting documentation was prepared for personnel costs charged to the Vocational Rehabilitation (VR) grant. Personnel costs charged to the VR grant during state fiscal year 2008 for which the supporting documentation was inadequate or not prepared totaled $4,377,102 of which we questioned the federal share of costs totaling $3,444,779 (78.7 percent).

Recommendation:

The FSD resolve the questioned costs with the grantor agency. In addition, the FSD should develop written policies and procedures to ensure salary certifications are prepared for all employees who work solely on a single program and personnel activity reports are prepared for employees who work on multiple federal awards or cost objectives in accordance with OMB Circular A-87.

Status of Finding:

The FSD/RSB has modified and implemented the processes to ensure compliance with regulations regarding personnel cost allocations effective July 1, 2009, with more recent modifications to improve the quality management and verification of accuracy. Where employees are expected to work solely on a single federal award or cost objective, charges for their salaries and wages will be supported by periodic certifications that the employees worked solely on that program for the period covered by the certification. Where employees work on multiple activities or cost objectives, a distribution of their salaries or wages will be supported by personnel activity reports or equivalent documentation which meets the standards as dictated in regulations. The RSB and the Division of Finance and Administrative Services continue to meet on a regular basis to improve communications, ensure compliance with regulations and documentation for auditors. The DSS received the program determination letter for the Single Audit for the period of July 1, 2007 through June 30, 2008 from the grantor agency. The DSS filed application for review with Office of Administrative Law Judges of the Department of Education.

Status of Questioned Costs:

The DSS is continuing to communicate with the grantor agency to negotiate a settlement.

Contact Person: Mark Laird
Phone Number: (573) 751-4249

2009-6B. Capital Assets

Federal Agency: Department of Defense
Federal Program: 12.401 National Guard Military Operations and Maintenance Projects
2008 - DAHA23-08-2-1000 and 2009 - DAHA23-09-2-1000
State Agency: Department of Public Safety - Adjutant General (AG)

AG personnel had not completed a reconciliation between the expenditure and capital asset records in the SAM II system. While a reconciliation was in progress, as of January 2010, approximately $1.2 million of the $3.8 million in capital asset expenditures from fiscal year 2002 through fiscal year 2009 had not been reconciled.

Recommendation:
The AG ensure the capital asset reconciliation is completed to identify all capital assets and ensure the capital asset records are accurate.

Status of Finding:
As of October 29, 2013, the only property that has not been tagged is from September and October 2013. All other capital assets have been identified and tagged. All assets from 2002 through 2013 have been identified and tagged or expensed. Of $201,886,849 worth of capital assets, only $3,373 is not entered in the SAM II Fixed Asset (FA) Subsystem. Two of the three expenditures were three-way matches, which are approved by the Office of Administration, therefore the AG Form 250 is not received during the approval process as with the other fixed assets. The $3,373 has been identified and is waiting for the completion of the AG Form 250 so items can be entered into the SAM II FA Subsystem. The new fixed asset procedures are working and items are being tagged and entered in the SAM II FA Subsystem in a timely manner. Fixed assets continued to be reconciled monthly.

Contact Person: Jill Delgado
Phone Number: 573-638-9574

2009-12. Cost Allocation Procedures

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2007 - G0701MOTANF
2008 - G0801MOTANF
2009 - G0901MOTANF
93.658 Foster Care - Title IV-E
2008 - G0801MO1401 and 2009 - G0901MO1401

93.659 Adoption Assistance
2008 - G0801MO1407 and 2009 - G0901MO1407
93.778 Medical Assistance Program
2008 - 0805MO5028 and 0805MO5048
2009 - 0905MO5028 and 0905MO5048

State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)

Questioned Costs: $666,189

The DSS did not establish procedures to ensure all payments to Caring Communities partnerships were allowable and allocable to the various federal programs. Some of the costs associated with the partnerships were allocated through a cost pool based on the percentage of time worked by Children's Division employees on certain federal programs rather than based on actual services provided by the partnerships. As a result, we questioned $666,189, which was the federal portion of the costs allocated to these programs through the Social Services cost pool during the year ended June 30, 2009.

Recommendation:

The DSS, through the DFAS, resolve the questioned costs with the grantor agency, and establish procedures to ensure all payments to the Caring Communities partnerships are allowable and allocable to the various federal programs in accordance with OMB Circular A-87.

Status of Finding:

The DSS is working in consultation with the Department of Health and Human Services (DHHS) to rewrite the cost allocation plan to better define its methodologies for allocating costs to various DHHS grants. The DSS has contracted with a third party to help develop and implement a new cost allocation plan and system. The first phase/portion of the new cost allocation plan should be submitted by March 2014. The plan will be tested and finalized by June 30, 2014. The remaining portion of the plan will be implemented after successful completion of phase one.

The DSS has also assigned a senior level staff person to manage the cost allocation plan. That person is responsible and accountable for updates/revisions to the plan.

Status of Questioned Costs:

Questioned costs were partially settled on federal reports during the quarter ended December 31, 2011. Remaining questioned costs were settled on the quarter ended September 30, 2013 federal reports. The DSS is waiting on clearance from the grantor agency.

Contact Person: Ami Patel
Phone Number: (573) 751-2170

2009-15A. Vocational Rehabilitation Program

Federal Agency: Department of Education
Federal Program: 84.126 Rehabilitation Services - Vocational Rehabilitation Grants to States
2007 - H126A0070037
2008 - H126A0080037
2009 - H126A0090037
State Agency: Department of Social Services (DSS) - Family Support Division (FSD) - Rehabilitation Services for the Blind (RSB) and Division of Finance and Administrative Services (DFAS)
Questioned Costs: $1,623,730

Adequate supporting documentation was not always prepared for personnel costs, which consisted of salaries and related fringe benefits and indirect costs, charged to the Vocational Rehabilitation (VR) grant for approximately 160 employees. Personnel costs were charged solely to the VR grant for some employees who performed duties related to other programs. Personnel costs charged to the VR grant during state fiscal year 2009 for which the supporting documentation was inadequate or not prepared totaled $2,063,188, of which we questioned the federal share of costs totaling $1,623,730 (78.7 percent).

Recommendation:

The DSS, through the FSD and DFAS, resolve the questioned costs with the grantor agency. In addition, the FSD should develop written policies and procedures to ensure salary certifications are prepared for all employees who work solely on a single program and personnel activity reports are prepared for employees who work on multiple federal awards or cost objectives in accordance with OMB Circular A-87.

Status of Finding:

To ensure compliance with OMB Circular A-87 to document personnel salaries and wages to the benefiting grant, and to verify that dollars intended for specific costs are in fact covering those and only those costs as dictated in relevant regulations, underlying formulas used to calculate the distribution of the salaries and wages to the appropriate grant on a monthly spreadsheet used by the designated state unit (RSB) have been corrected. The RSB has also implemented a monthly verification process of comparing each person's monthly salary and wages from the RSB monthly spreadsheet to a monthly payroll extraction report from the DFAS, addressing any inconsistencies. The RSB and the DFAS continue to meet on a regular basis to improve communications, ensure compliance with federal requirements for personnel cost allocations and allocable costs, and appropriate documentation for auditors.

Status of Questioned Costs:

The DSS is awaiting determination by the grantor agency.

Contact Person: Mark Laird
Phone Number: (573) 751-4249

2009-18. Medical Assistance Program

Federal Agency: Department of Health and Human Services
Federal Program: 93.778 Medical Assistance Program
2008 - 0805MO5028 and 0805MO5048
2009 - 0905MO5028 and 0905MO5048
93.778 ARRA - Medical Assistance Program
2009 - 0905MOARRA
State Agency: Department of Social Services (DSS) - Family Support Division (FSD) and MO HealthNet Division
Questioned Costs: $1,428

A redetermination was not conducted timely to determine the eligibility of a recipient related to the Medical Assistance Program (Medicaid). The medical payments made on behalf of this client before the case was closed totaled $1,924 during the year ended June 30, 2009. We questioned the federal share of these payments or $1,428 (74.23 percent).

Recommendation:
The DSS through the FSD perform eligibility redeterminations when required to ensure compliance with applicable federal Medicaid program requirements. In addition, the FSD should resolve questioned costs with the grantor agency.

Status of Finding:
The FSD still considers timely eligibility reinvestigations a matter of priority and continues to strive for a 100 percent reinvestigation currency. As reported by the FSD Income Maintenance Section, the reinvestigation currency percentage was 98.56 percent for state fiscal year 2013, which ended June 30, 2013.

Status of Questioned Costs:
Questioned costs were adjusted on the September 30, 2010, and December 31, 2011, quarterly reports. The DSS is waiting on clearance from the grantor agency.

Contact Person: Emily Rowe
Phone Number: (573) 526-0607

2010-6. Eligibility Reassessments

Federal Agency: Department of Health and Human Services
Federal Program: 93.778 Medical Assistance Program
2009 - 0905MO5028 and 0905MO5048
2010 - 1005MO5MAP/XIX-MAP10 and
1005MO5ADM/XIX- ADM10
93.778 ARRA - Medical Assistance Program
2009 - 0905MOARRA and 2010 - 1005MOARRA

State Agency: Department of Health and Senior Services (DHSS)
Questioned Costs: $598,286

The DHSS did not have effective controls in place to ensure annual reassessments to determine the eligibility of recipients receiving State Plan Personal Care or Aged and Disabled Waiver services were conducted, as required. The DHSS did not perform annual reassessments of eligibility for 49 of 66 cases reviewed. The payments made on behalf of the recipients without annual reassessments during the year ended June 30, 2010, totaled $806,967. We questioned the federal share of these payments or $598,286 (74.14 percent).

Recommendation:
The DHSS establish effective controls to ensure the annual reassessments are conducted as required. In addition, the DHSS should resolve the questioned costs with the grantor agency.

Status of Finding:
The fiscal year 2014 state budget includes funding for Home and Community Based Services (HCBS) providers to conduct reassessments. The ten Area Agencies on Aging will also begin conducting reassessments in fiscal year 2014. Reassessments for level of care of current clients will be scheduled for completion based upon the anniversary date of the last assessment. DHSS staff will review and approve all reassessment submitted by HCBS providers and the Area Agencies on Aging.

Status of Questioned Costs:
DHSS staff has met with staff from the federal Centers for Medicare and Medicaid Services to discuss the issues raised in the audit. The meetings are ongoing.

2010-15. Cost Allocation Procedures

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2009 - G0901MOTANF and 2010 - G1002MOTANF
93.658 Foster Care - Title IV-E
2009 - G0901MO1401 and 2010 - G1001MO1401
93.658 ARRA - Foster Care - Title IV-E
2009 - G0901MO1402 and 2010 - G1001MO1402
93.659 Adoption Assistance
2009 - G0901MO1407 and 2010 - G1001MO1407
93.674 Chafee Foster Care Independence Program
2009 - G0901MO1420 and 2010 - G1001MO1420
93.778 Medical Assistance Program

2009 - 0905MO5048 and 2010 - 1005MO5ADM

State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)

Questioned Costs: $2,168,919

DFAS controls and procedures over the quarterly allocation of costs to federal programs were not sufficient and as a result, numerous cost allocation errors were not prevented and/or detected. Our review of selected sections of state fiscal year 2010 Children's Division and Family Support Division cost allocation spreadsheets and supporting documentation identified overstatements totaling approximately $3.3 million for 5 federal programs and understatements totaling approximately $3.2 million for 11 federal programs due to spreadsheet formula and data entry errors. We questioned the federal share of costs related to the overstatements, or $2,168,919.

Recommendation:

The DSS, through the DFAS, resolve the questioned costs with the grantor agency, and strengthen controls and procedures to ensure the accurate allocation of costs to federal programs. These procedures should include a detailed and documented supervisory review of cost allocation spreadsheets.

Status of Finding:

The DSS is working in consultation with the Department of Health and Human Services (DHHS) to rewrite the cost allocation plan to better define its methodologies for allocating costs to various DHHS grants. The DSS has contracted with a third party to help develop and implement a new cost allocation plan and system. The first phase/portion of the new cost allocation plan should be submitted by March 2014. The plan will be tested and finalized by June 30, 2014. The remaining portion of the plan will be implemented after successful completion of phase one.

The DSS has also assigned a senior level staff person to manage the cost allocation plan. That person is responsible and accountable for updates/revisions to the plan.

Status of Questioned Costs:

Questioned costs were settled on quarter ending March 31, 2011, and quarter ending June 30, 2011, federal reports. The DSS is waiting on clearance from the grantor agency.

Phone Number: (573) 751-2170

2010-16A. Child Care Eligibility and Payments

Federal Agency: Department of Health and Human Services

Federal Program: 93.575 Child Care and Development Block Grant
2009 - G0901MOCCDF and 2010 - G1001MOCCDF

93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
2009 - G0901MOCCDF and 2010 - G1001MOCCDF
93.713 ARRA - Child Care and Development Block Grant
2009 - 20091MOCCD7

State Agency: Department of Social Services (DSS) - Children's Division (CD) and Family Support Division (FSD)

Questioned Costs: $73,315

Controls over eligibility and provider payments were not sufficient to prevent and/or detect payments on behalf of ineligible clients or improper payments to child care providers.

- Eligibility documentation such as a signed child care application or system-generated interview summary and/or income record(s) for 13 of 60 (22 percent) cases reviewed could not be located by the DSS. For six of these cases, the DSS could not locate the eligibility file. We questioned the federal share of payments made on behalf of these children and siblings of these children, or $70,092 (84 percent).

- For child care payments, 30 of 60 (50 percent) payments reviewed were not supported by adequate documentation and/or were not in compliance with DSS policies. Of these 30 payments, 11 were for cases which also lacked eligibility documentation and were included in the above questioned costs. Payments for the remaining 19 cases totaled an additional $3,837. We questioned the federal share, or $3,223 (84 percent).

Recommendation:

The DSS, through the CD and FSD, resolve the questioned costs with the grantor agency and review and strengthen policies and procedures regarding child care eligibility determinations, provider payments, and case record documentation and retention. These procedures should include sufficient monitoring of eligibility determinations and provider payments, and follow-up on errors identified.

Status of Finding:

Corrective actions taken since the finding was issued follow:

Case Adjustments - Funds have been returned to the federal government or claims have been entered on either a parent or provider.

Case Review Tool - On July 27, 2011, the FSD presented to the CD a walkthrough of the base Case Review System (CRS) to which a child care component was added. A webinar providing detail on the child care component of the system was completed with the Rushmore Group (provider of the current CRS) on August 11, 2011. On September 2, 2011, the Rushmore Group began coding child care into the existing CRS. In the spring of 2012, the CD trained 232 supervisors and program managers on the CRS. The CRS

was implemented in March 2012. The CD is utilizing output reports from the CRS to identify programmatic strengths and challenges and areas for policy, field and training improvement. The output reports for fiscal year 2013 have been reviewed and indicate a 95 percent accuracy rate statewide. In September 2013, a memorandum was issued to FSD staff clarifying expectations of supervisors as well as regional, program, and county managers. Local FSD leadership is expected to monitor reviews for timely submission and ensure that quality and accuracy standards are met for each child care eligibility element. It was further clarified that supervisors are to conduct case reviews on approved child care assistance cases. Closed or rejected actions should only be reviewed if there are no approval or adjustment actions for a county, for the review month. Supervisors must ensure staff take necessary action to correct any cases determined to be incorrect, including entering any client claims discovered through the case reading process.

Updates have been made to the CRS, as a result of feedback from FSD management at the local level. These updates include changes to the child care worksheet; moving transitional child care documentation above sliding fee documentation; removal of the IM-3 form as a causal factor, since it is no longer required; and changing the wording for the "Child Not Eligible" indicator to "Child Not Eligible to be Authorized."

We will continue to analyze data to identify programmatic strengths and weaknesses to determine which local FSD offices are in need of Program Enhancement Plans. A full statewide analysis is being prepared for the FSD and will be provided to FSD leadership. This analysis outlines areas for improvement with recommendations that are present statewide.

Self-Employment Training - Effective August 1, 2011 the FSD eligibility specialists (ES) and eligibility supervisors are required to complete the on-line Self-Employment Income Budgeting training course found in the Employee Learning Center. ES and eligibility supervisors were required to complete the training by December 31, 2011. The self-employment training is to assist in reducing the error rates for all income maintenance programs.

The CD will be using data made available through the CRS to determine whether the training has been beneficial to staff.

FSD Workers Online Child Care Training - The FSD administers the child care assistance program for income maintenance households. The majority of the families accessing child care receive services through their local FSD office. As of September 1, 2011, FSD frontline workers and supervisors were able to access online child care training through the FSD Training Unit intranet page. New FSD employees are required to successfully complete the online training prior to enrolling in the in-person Basic Child Care Orientation training. New staff access and complete the training through the DSS Employee Learning Center with the online assessment component. Effective April 1, 2013, ES and Eligibility Supervisors are required to retake the online Child Care Assistance training every two years after initial completion. The CD will be using data

made available through the CRS to determine whether the training has been beneficial to staff.

Casework Reference Guide - The FSD Training Unit, in collaboration with Child Care Program and Policy staff, developed a Case Reference Guide (CRG) for FSD workers. The CRG is an informational tool that can be utilized by workers when processing applications and completing other case actions. The CRG does not replace the policy and forms manuals. It is intended to be an additional resource for workers. Workers are to use this guide in conjunction with the policy and forms manuals and memorandums. The CD is currently updating the CRG.

Child Care Manual Revisions - Early Childhood and Prevention Services Program and Policy staff is continually reviewing the child care manual for clarification and revision.

Calendar Year	Policy Memorandum Updates by Section	Practice Points/Alerts
2011	40	5
2012	82	1
2013	10	4

Child Care Steering Committee - During the summer of 2012, the DSS formed a steering committee to address child care issues. From this initiative there were four project teams designated to identify deficiencies and problematic areas within the Child Care program: Eligibility, Provider Issues and Policy/Payments, Program Integrity, and Information and Systems Technology. Each team made five or six recommendations related to the team's assigned area.

Status of Questioned Costs:
The questioned costs were adjusted on the federal report for quarter ended June 30, 2011. The DSS is waiting on clearance from the grantor agency.

Contact Person: Marianne Dawson
Phone Number: (573) 522-2294

2010-17. Performance Based Case Management Contracts

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2009 - G0901MOTANF and 2010 - G1002MOTANF
93.658 Foster Care - Title IV-E
2009 - G0901MO1401 and 2010 - G1001MO1401
93.659 Adoption Assistance
2009 - G0901MO1407 and 2010 - G1001MO1407
93.778 Medical Assistance Program
2009 - 0905MO5048 and 2010 - 1005MO5ADM

State Agency: Department of Social Services (DSS) - Children's Division (CD)

The DSS had not established procedures to ensure all payments to performance based case management contractors were properly allocated to federal programs. As a result, some contractor payments were allocated to federal programs based on unrealistic budgeted expenditure categories rather than actual expenditures.

Recommendation:

The DSS, through the CD, establish procedures to ensure all payments to performance based case management contractors are allocated to federal programs in accordance with federal regulations.

Status of Finding:

The DSS believes that its current process for claiming performance based case management contractor payments is in accordance with federal regulations. However, to validate and improve our claiming process, the DSS awarded a work order to Public Consulting Group (PCG) to review and recommend improvements to the cost allocation methodology for foster care case management (FCCM) claiming. The initial review, data analysis, and recommendations report was received in draft form on December 21, 2011 and the final report was received on February 29, 2012. As a result of the recommendations, the DSS entered into a subsequent work order with PCG to implement the recommendations.

In April 2013, a Random Moment Sampling Time Study was implemented with the FCCM agencies in order to capture their work activities. In addition, PCG worked with the FCCM agencies to develop an individual cost allocation plan for each agency. This will be incorporated into any changes made to the overall DSS Cost Allocation Plan, as applicable. The monthly expenditure report which is submitted by each FCCM agency was revised effective with the contract renewal on October 1, 2013.

2010-19. Residential Facility Training Reimbursements

Federal Agency: Department of Health and Human Services
Federal Program: 93.658 Foster Care - Title IV-E
2009 - G0901MO1401 and 2010 - G1001MO1401
State Agency: Department of Social Services (DSS) - Children's Division (CD)
Questioned Costs: $19,467

The CD had not established sufficient procedures to review residential facility training reimbursements. As a result, reimbursements to these facilities were not always supported by sufficient documentation that training costs were allowable, and some reimbursed training costs appeared unallowable. Of the $30,656 in training

reimbursements reviewed, payments totaling $25,957 (85 percent) were unsupported and/or unallowable, of which we questioned $19,467 claimed as the federal share.

Recommendation:

The DSS, through the CD, strengthen residential facility training reimbursement review procedures to ensure training activities reimbursed are for allowable activities outlined in federal regulations and are adequately supported. In addition, the DSS should resolve the questioned costs with the grantor agency.

Status of Finding:

On May 3, 2011, the CD issued to residential treatment providers reimbursed for training costs a letter outlining enhanced procedures that will ensure there is adequate documentation to support claiming those costs for Title IV-E training reimbursement. Residential treatment providers are now required to code the training course to one of a list of Title IV-E allowable topics and to provide a rationale/justification for Title IV-E reimbursement of the course costs. Additionally, the Division of Finance and Administrative Services has strengthened department quality assurance and compliance functions to provide enhanced monitoring of programs and technical assistance to staff with fiscal responsibilities.

Status of Questioned Costs:

Questioned costs have not been resolved with the grantor agency.

2010-21A. Unallowable Costs and Maintenance of Effort

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2009 - G0901MOTANF and 2010 - G1002MOTANF
State Agency: Department of Social Services (DSS) - Family Support Division (FSD)
Questioned Costs: $29,638,870

The DSS charged unallowable state foster care, adoption assistance, and subsidized guardianship costs to the Temporary Assistance for Needy Families (TANF) program. The foster care, adoption assistance, and subsidized guardianship costs charged included non-emergency assistance, and the costs charged for emergency assistance were not separately identified; therefore, all costs were unallowable. We questioned all state fiscal year 2010 costs for foster care, adoption assistance, and subsidized guardianship charged to the TANF program, totaling $29,638,870 (100 percent federal share).

Recommendation:
The DSS ensure prior approved program costs charged to the TANF program comply with federal regulations. In addition, the DSS should resolve the questioned costs with the grantor agency.

Status of Finding:
The DSS disagreed with this finding. The DSS's previous response to the finding is unchanged. The DSS is using a manual, developed with the assistance of a third party, to evaluate whether costs are allowable under TANF and/or TANF maintenance of effort (MOE). This desk manual will help the DSS ensure that it has appropriately categorized costs as TANF or TANF MOE as the definitions of allowable costs vary between the two. The desk manual was finished December 2012 and was submitted on January 24, 2013, to our grantor agency for review.

The DSS received a decision letter from the Department of Health & Human Services - Administration for Children & Families (ACF) on February 21, 2014 addressing this finding. The ACF did not sustain the finding.

Status of Questioned Costs:
The ACF did not sustain the questioned costs.

Contact Person: Ami Patel
Phone Number: (573) 751-2170

2010-21B. Unallowable Costs and Maintenance of Effort

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2009 - G0901MOTANF and 2010 - G1002MOTANF
State Agency: Department of Social Services (DSS) - Family Support Division (FSD)

The DSS included unallowable educational program costs as qualifying under the maintenance of effort (MOE) requirement for the Temporary Assistance for Needy Families (TANF) program and, as a result, the DSS failed to meet the MOE funding requirements by at least $30.9 million.

Recommendation:
The DSS ensure expenditures claimed as MOE are allowable and resolve the potential penalty with the grantor agency.

Status of Finding:
The DSS disagreed with this finding. The DSS's previous response to the finding is unchanged. The DSS is using a manual, developed with the assistance of a third party, to evaluate whether costs are allowable under TANF and/or TANF MOE. This desk manual will help the DSS ensure that it has appropriately categorized costs as TANF or TANF

MOE as the definitions of allowable costs vary between the two. The desk manual was finished December 2012 and was submitted on January 24, 2013, to our grantor agency for review.

Additionally, during this process, the third party validated the allowability of the claim in question, citing 1999 TANF Final Rule (page 17825), which supports the DSS's contention that it claimed these funds correctly.

We would like to point out that federal TANF funds may also be used to pay for "nonassistance" activities (such as those identified in this finding) that meet the purposes of the program as given in Sections 401(a)(1)-(4) of the Social Security Act and 45 CFR Section 260.20. Federal TANF funds may also be used for activities that benefit non-needy families in some cases, e.g., activities that meet the purpose of either Section 401(a)(3) or (a)(4) of the Act. In this respect, there may be more flexibility in the expenditures that are allowable uses of federal funds than those that are allowable for MOE purposes. This is because federally funded services or benefits do not necessitate a determination of financial eligibility (need) if they do not meet the definition of assistance. Thus, states may use federal TANF funds (in accordance with Section 404 of the Act) to provide "nonassistance" services or benefits to eligible individuals who meet the state's other, nonfinancial, objective criteria for the delivery of such benefits.

The DSS has changed its claiming process to claim these funds as TANF, instead of TANF MOE to align its claiming with the above information.

The DSS received a decision letter from the Department of Health & Human Services - Administration for Children & Families (ACF) on February 21, 2014 addressing this finding. For Part 1 of 2 of the finding, the ACF did not sustain the finding or questioned costs. For Part 2 of 2 of the finding, the ACF agreed with the finding, accepted DSS' corrective action plan and did not sustain the questioned costs.

2010-21C. Unallowable Costs and Maintenance of Effort

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2009 - G0901MOTANF and 2010 - G1002MOTANF
State Agency: Department of Social Services (DSS) - Family Support Division (FSD)

For the quarter ended September 30, 2010, the DSS charged costs to the Temporary Assistance for Needy Families (TANF) program, totaling $18,493,665, relating to three scholarship programs: A+ Schools, Bright Flight Scholarships, and Ross-Barnett Scholarships; however, the DSS had not determined and documented whether there was any correlation between these programs and the four purposes of the TANF program. As

a result, these scholarship program costs charged to the TANF program in state fiscal year 2011 did not appear allowable.

Recommendation:
The DSS ensure program costs charged to the TANF program for state fiscal year 2011 comply with federal regulations.

Status of Finding:
The DSS disagreed with this finding. The DSS's previous response to the finding is unchanged. The DSS is using a manual, developed with the assistance of a third party, to evaluate whether costs are allowable under TANF and/or TANF maintenance of effort (MOE). This desk manual will help the DSS ensure that it has appropriately categorized costs as TANF or TANF MOE as the definitions of allowable costs vary between the two. The desk manual was finished December 2012 and was submitted on January 24, 2013 to our grantor agency for review.

Additionally, during this process, the third party validated the allowability of the claim in question, citing 1999 TANF Final Rule (page 17825), which supports the DSS's contention that it claimed these funds correctly.

We would like to point out that federal TANF funds may also be used to pay for "nonassistance" activities (such as those identified in this finding) that meet the purposes of the program as given in Sections 401(a)(1)-(4) of the Social Security Act and 45 CFR Section 260.20. Federal TANF funds may also be used for activities that benefit non-needy families in some cases, e.g., activities that meet the purpose of either Section 401(a)(3) or (a)(4) of the Act. In this respect, there may be more flexibility in the expenditures that are allowable uses of federal funds than those that are allowable for MOE purposes. This is because federally funded services or benefits do not necessitate a determination of financial eligibility (need) if they do not meet the definition of assistance. Thus, states may use federal TANF funds (in accordance with Section 404 of the Act) to provide "nonassistance" services or benefits to eligible individuals who meet the state's other, nonfinancial, objective criteria for the delivery of such benefits.

The DSS has changed its claiming process to claim these funds as TANF, instead of TANF MOE to align its claiming with the above information.

The DSS received a decision letter from the Department of Health & Human Services - Administration for Children & Families (ACF) on February 21, 2014 addressing this finding. The ACF did not sustain the finding and will not pursue a TANF misuse of funds penalty.

Phone Number: (573) 751-2170

2010-21D. Unallowable Costs and Maintenance of Effort

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2009 - G0901MOTANF and 2010 - G1002MOTANF
State Agency: Department of Social Services (DSS) - Family Support Division (FSD)

The DSS control system was not effective in ensuring the types of costs charged to the Temporary Assistance for Needy Families (TANF) program or recorded as TANF maintenance of effort (MOE) met all federal regulatory and grant requirements, resulting in unallowable costs and unqualified sources of MOE claimed against the federal TANF grant.

Recommendation:
The DSS establish a formal control system to ensure the types of costs charged to the TANF program or recorded as TANF MOE meet all federal regulatory and grant requirements.

Status of Finding:
The DSS disagreed with this finding. The DSS's previous response to the finding is unchanged. The DSS is using a manual, developed with the assistance of a third party, to evaluate whether costs are allowable under TANF and/or TANF MOE. This desk manual will help the DSS ensure that it has appropriately categorized costs as TANF or TANF MOE as the definitions of allowable costs vary between the two. The desk manual was finished December 2012 and was submitted on January 24, 2013, to our grantor agency for review.

The DSS received a decision letter from the Department of Health & Human Services - Administration for Children & Families (ACF) on February 21, 2014 addressing this finding. The ACF did sustain the finding and recommendation, but will not pursue a TANF penalty action.

2010-25. Provider Eligibility and Improper Payments

Federal Agency: Department of Health and Human Services
Federal Program: 93.778 Medical Assistance Program
2009 - 0905MO5028 and 0905MO5048
2010 - 1005MO5MAP/XIX-MAP10 and
1005MO5ADM/XIX- ADM10
93.778 ARRA - Medical Assistance Program
2009 - 0905MOARRA and 2010 - 1005MOARRA
State Agency: Department of Social Services (DSS) - MO HealthNet Division (MHD)

Questioned Costs: $122

The MHD had not established controls to detect expired Medicaid provider licenses or to prevent, detect, and correct payments to providers who were deceased prior to the date the reimbursement claim indicated medical services were provided. As a result, the MHD improperly paid $164 during the year ended June 30, 2010, for three claims submitted for one Medicaid provider who was deceased prior to the reported date of service. We questioned the federal share of the three claims paid for which the reported dates of services were after the provider's date of death, or $122 (74.43 percent). In addition, the MHD had not established controls to ensure providers continually meet federal requirements for disclosure of convictions of criminal offenses against Medicare, Medicaid, or the Title XX service program.

Recommendation:

The MHD develop procedures to ensure providers meet required criteria to be eligible Medicaid providers, including periodically verifying provider licenses, obtaining updated provider disclosures, and ensuring timely detection of deceased providers, to aid in the prevention and correction of improper claims paid. In addition, the MHD should resolve the questioned costs with the grantor agency.

Status of Finding:

In May 2011, Missouri Medicaid Audit and Compliance (MMAC) began receiving and taking action based upon a License Not Renewed Report. MMAC personnel receive the report quarterly, and the report includes a list of all enrolled providers who hold licenses through the Department of Insurance, Financial Institutions, and Professional Registration, whose licenses were not renewed. These providers are consequently terminated from participation in the Medicaid program. Additionally, MMAC personnel now receive notifications from the various boards which comprise professional registration when an enrolled provider's license is suspended, and MMAC suspends the provider from participation in the Medicaid program.

The DSS corrective action plan includes addressing the provider's date of death issue through the current Fraud Waste and Abuse contract with Thomson Reuters. The contractor purchased a license for the Social Security Master Death File and monthly updates. Additionally, the contractor provided the information for this match and planned on assessing a monthly charge for ongoing services. However, it was determined by the DSS to not be cost effective to pay for this information given the limited effectiveness gained from this enhancement.

Thus, the DSS addressed the provider’s required criteria for eligibility in the Request for Proposal (RFP) for the Provider Enrollment/Case Management system, section 2.3.29 which states "the solution shall provide ongoing monitoring of provider eligibility by automated matching against external databases for exclusions, licenses, death records, criminal records, National Provider Identifier deactivations, sanctions, and suspensions. Suspicious data and non-matches shall generate alerts for the end user for review and possible corrective action." The collection of social security numbers from providers will

make validation through an external database of death records feasible through the provider enrollment system.

The bid evaluation process has been concluded and the potential vendor selected. The RFP, the vendor response, and the Advanced Planning Document have been sent to the Department of Health and Human Services, Centers for Medicare and Medicaid Services (CMS) for approval. MMAC is still waiting for approval of the Provider Enrollment/Case Management system from CMS.

In the meantime, MMAC relies on updates from billing agents (contractors that submit claims for providers), provider communications or any other department-wide notices that MMAC may be able to obtain that can be verified with vital records. Once providers enroll with Missouri Medicaid they are typically enrolled permanently. MMAC has proposed rules to enforce the new federal requirement for revalidation and await department approval before these can be finalized. The revalidation schedule is set for reoccurring five year periods. Also, MMAC has never required social security numbers as part of the enrollment process because many enrolling providers are corporations. The new system, if approved, will capture social security numbers on individual providers and social security numbers on ownership disclosure information for an automatic validation.

MMAC will start revalidating providers upon approval and finalization of the enrollment regulation. This regulation will not give MMAC the ability to have an automated system which checks against social security numbers, but will allow MMAC to terminate provider numbers on those who do not send in credentials for revalidation. MMAC will also have the advantage of site visits for some of the new and re-enrolling providers.

At this time, MMAC personnel manually screen providers upon enrollment to ensure prospective providers are in good standing. Providers are also screened through the Office of Inspector General's List of Excluded Individuals and Entities, the Secretary of State's Office, and the National Sex Offender Registry.

The DSS corrective action plan also includes addressing the controls to ensure providers continually meet federal requirements for disclosure of convictions of criminal offenses against Medicare, Medicaid, or Title XX service programs. Currently, the state of Missouri is working on a new provider enrollment system. However, forms have been updated manually to require this information from all new initial applications. Additionally, 42 CFR Section 424.514 (effective March 25, 2011) requires prospective institutional providers submitting an initial application or currently enrolled institutional providers submitting an application establishing a new practice location to submit enrollment credentials, which includes disclosure information.

Status of Questioned Costs:

An adjustment was made on the December 31, 2011, quarterly report. The DSS is waiting for clearance from the grantor agency.

2011-4A. Medicaid Home and Community Based Services

Federal Agency: Department of Health and Human Services
Federal Program: 93.778 Medical Assistance Program
2010 - 1005MO5MAP and 1005MO5ADM
2011 - 1105MO5MAP and 1105MO5ADM
93.778 ARRA - Medical Assistance Program
2009 - 0905MOARRA
2010 - 1005MOARRA
2011 - 1105MOARRA and 1105MOEXTN
State Agency: Department of Health and Senior Services (DHSS) - Division of Senior and Disability Services (DSDS)
Questioned Costs: $387,576

The DSDS did not have effective controls in place to ensure annual reassessments were performed, as required, to determine continued need of services of Home and Community Based Services (HCBS) recipients. The DSDS did not perform annual reassessments of eligibility for 46 of 59 (78 percent) recipients reviewed. The payments for State Plan Personal Care and Aged and Disabled Waiver services provided to these recipients without annual reassessments during the year totaled $534,219. We questioned the federal share of $387,576 (72.55 percent).

Recommendation:
The DHSS, through the DSDS, resolve the questioned costs with the grantor agency and establish effective controls to ensure the annual reassessments are performed as required. Such controls should include diligent monitoring of reassessments, if any, performed by HCBS providers.

Status of Finding:
The fiscal year 2014 state budget includes funding for HCBS providers to conduct reassessments. The ten Area Agencies on Aging will also begin conducting reassessments in fiscal year 2014. Reassessments for level of care of current clients will be scheduled for completion based upon the anniversary date of the last assessment. DHSS staff will review and approve all reassessments submitted by HCBS providers and the Area Agencies on Aging.

Status of Questioned Costs:
DHSS staff has met with staff from the federal Centers for Medicare and Medicaid Services to discuss the issues raised in the audit. The meetings are ongoing.

2011-4B. Medicaid Home and Community Based Services

Federal Agency: Department of Health and Human Services
Federal Program: 93.778 Medical Assistance Program
2010 - 1005MO5MAP and 1005MO5ADM
2011 - 1105MO5MAP and 1105MO5ADM
93.778 ARRA - Medical Assistance Program
2009 - 0905MOARRA
2010 - 1005MOARRA
2011 - 1105MOARRA
2011 - 1105MOEXTN

State Agency: Department of Health and Senior Services (DHSS) - Division of Senior and Disability Services (DSDS)
Questioned Costs: $4,483

The DSDS could not locate the case file with documentation supporting the authorization of services provided to 1 of 60 (2 percent) Home and Community Based Services (HCBS) recipients tested. Payments totaling $6,179 were made to State Plan Personal Care and Aged and Disabled Waiver providers on behalf of this recipient during the year ended June 30, 2011. We questioned the federal share of $4,483 (72.55 percent).

Recommendation:
The DHSS, through the DSDS, resolve the questioned costs with the grantor agency and ensure case files are maintained for all HCBS recipients.

Status of Finding:
HCBS case records continue to transition to a web-based electronic system (WebTool). Doing so has safeguarded records, simplified/accelerated record retrieval, and reduced the amount of paper files that must be maintained.

Status of Questioned Costs:
DHSS staff has met with staff from the federal Centers for Medicare and Medicaid Services to discuss the issues raised in the audit. The meetings are ongoing.

2011-7A. Allowable Costs and Activities

Federal Agency: Department of Homeland Security
Department of Justice
Federal Program: 16.738 Edward Byrne Memorial Justice Assistance Grant Program
2007 - DJ-BX-0051
2008 - DJ-BX-0731 and DJ-BX-0027

2009 - DJ-BX-0090
2010 - DJ-BX-0066
16.803 ARRA - Edward Byrne Memorial Justice Assistance Grant Program/Grants to States and Territories
2009 - SU-B9-0032
97.067 Homeland Security Grant Program
2006 - GE-T6-0067
2007 - GE-T7-0034
2008 - GE-T8-0014
2009 - SS-T9-0062
2010 - SS-T0-0039

State Agency: Department of Public Safety - Office of the Director (OD)
Questioned Costs: $740,054

The OD did not ensure personnel related expenditures were properly supported by salary certifications and approved activity reports for the Homeland Security or the Justice Assistance Grant (JAG) programs. Salary certifications were not prepared for the eight employees working solely on the Homeland Security program or the eight employees working solely on the JAG program during the year ended June 30, 2011. We questioned the federal share of the salary costs for these 16 employees, or $671,287 (100 percent). In addition, the OD did not ensure the personnel activity reported for the 23 employees working on multiple programs was approved by the employee or the employee's supervisor. We questioned the federal share of salary costs for these employees for the month reviewed, or $68,767 (100 percent).

Recommendation:
The OD resolve the questioned costs with the grantor agency, and ensure salary certifications are prepared and approved for all employees who work solely on a single program and activities reported by employees working on multiple programs are approved as required.

Status of Finding:
Implemented.

Status of Questioned Costs:
Our federal granting agency has advised, upon our completed actions and corrective action plan submission, their portion of the audit is considered closed. The questioned costs are resolved with no further action required.

2011-8A. Subrecipient Monitoring

Federal Agency: Department of Homeland Security
Federal Program: 97.067 Homeland Security Grant Program
2006 - GE-T6-0067
2007 - GE-T7-0034
2008 - GE-T8-0014
2009 - SS-T9-0062
2010 - SS-T0-0039
State Agency: Department of Public Safety - Office of the Director (OD)

A formal subrecipient monitoring policy for the Homeland Security program was not implemented until March 2011 and monitoring procedures could have been improved. The delay in implementing the policy resulted in the OD not performing desk monitoring reviews for the majority of subrecipients during fiscal year 2011. Additionally, the monitoring policy required the OD to perform site visits at two subrecipients per year; however, the OD had not adequately documented the criteria and methodology for selecting Homeland Security subrecipients for a site visit, or specific procedures to be performed during each site visit.

Recommendation:
The OD establish and implement policies and procedures to ensure subrecipients are adequately monitored.

Status of Finding:
Implemented.

Contact Person: Bruce Clemonds

2007 - GE-T7-0034

2008 - GE-T8-0014
2009 - SS-T9-0062
2010 - SS-T0-0039

State Agency: Department of Public Safety - Office of the Director (OD)

The OD had not established an audit tracking system or ensured Homeland Security and Justice Assistance Grant program subrecipients expending $500,000 or more in federal funds obtained independent Single Audits as required. In addition, the OD had not documented that Single Audit reports received were reviewed.

Recommendation:

The OD establish a system to track Single Audit reports expected and received from applicable subrecipients. In addition, the OD should document its review and follow-up of all subrecipient Single Audit reports received.

Status of Finding:

Implemented.

Contact Person: Bruce Clemonds
Phone Number: (573) 522-6125

2011-11A. Social Services Block Grant

Federal Agency: Department of Health and Human Services
Federal Program: 93.667 Social Services Block Grant
2010 and 2009 - 0901MOSOS2
State Agency: Department of Public Safety - State Emergency Management Agency (SEMA)
Questioned Costs: $2,507,444

The SEMA did not have adequate controls and procedures in place to ensure the Social Services Block Grant (SSBG) disaster funds were used for allowable costs and activities.

1) Documentation was not adequate to support the allowability of disbursements made for a relocation buyout program. We questioned the federal share of all payments made for the buyout, or $1,751,588 (100 percent). In addition, the SEMA did not have a written agreement with a regional planning commission documenting the funding to be provided and the responsibilities of each party.

2) Documentation was not adequate to support the allowability of payments made for 2 of 17 individual assistance projects reviewed. We questioned the federal share of the payments, or $213,949 (100 percent). In addition, several project files lacked some other required documentation.

3) Documentation was not reviewed by the SEMA to ensure payments made to a regional planning commission for individual assistance projects were allowable. We questioned the federal share of these payments, or $541,907 (100 percent).

Recommendation:
The SEMA review payments made to ensure they were adequately supported and an allowable use of the SSBG Disaster funds. In addition, the SEMA should resolve the questioned costs with the grantor agency.

Status of Finding:
Implemented. The SEMA dedicated staff and resolved the questioned costs. Staff worked on the project and ensured all documentation was filed correctly in the SEMA files.

Status of Questioned Costs:
The SEMA determined that all costs were eligible, allocable, necessary and reasonable within the grant guidelines. The SEMA has been in contact with the grantor agency on June 21, 2012, with a resolution of the audit finding.

Contact Person: Dante Gliniecki
Phone Number: (573) 526-9132

2011-12. Disaster Assistance Subrecipient Monitoring

Federal Agency: Department of Homeland Security
Federal Program: 97.036 Disaster Grants - Public Assistance (Presidentially Declared Disasters)
2006 - FEMA-DR-1631-MO and FEMA-DR-1635-MO
2007 - FEMA-DR-1673-MO, FEMA-DR-1676-MO, FEMA-DR-1708-MO, and FEMA-DR-1728-MO
2008 - FEMA-DR-1736-MO, FEMA-DR-1742-MO, FEMA-DR-1748-MO, FEMA-DR-1749-MO, and FEMA-DR-1773-MO
2009 - FEMA-DR-1809-MO, FEMA-DR-1822-MO, and FEMA-DR-1847-MO
2010 - FEMA-DR-1934-MO
2011 - FEMA-DR-1961-MO and FEMA-DR-1980-MO
State Agency: Department of Public Safety - State Emergency Management Agency (SEMA)

The SEMA did not adequately track subrecipients to ensure an independent Single Audit had been completed, when required, and submitted to the SEMA on a timely basis.

Recommendation:
The SEMA develop procedures to ensure subrecipients obtain and submit independent Single Audits when required.

Status of Finding:
Partially implemented. The SEMA has established a monitoring plan to include annual certifications for A-133 compliance by our local sub-recipients, on-site monitoring visits, and review of hard copy audits from local sub-recipients in conjunction with review of electronic audit status from the federal audit clearinghouse. Annual certification letters were mailed to the sub-recipients in late February 2013. The SEMA is in the process of reviewing Certification of Audit Requirement forms received from sub-recipients. Certification of Audit Requirement forms for fiscal year 2013 are scheduled to be mailed in February 2014.

Phone Number: (573) 526-9130

2011-14A. Eligibility and Child Care Payments

Federal Agency: Department of Health and Human Services
Federal Program: 93.575 Child Care and Development Block Grant
2010 - G1001MOCCDF and 2011 - G1101MOCCDF
93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
2010 - G1001MOCCDF and 2011 - G1101MOCCDF
93.713 ARRA - Child Care and Development Block Grant
2009 - G0901MOCCD7
State Agency: Department of Social Services (DSS) - Children's Division (CD) and Family Support Division (FSD)
Questioned Costs: $42,204

Controls over eligibility and provider payments were not sufficient to prevent and/or detect payments made on behalf of ineligible clients or improper payments to child care providers.

- The DSS could not locate the eligibility file for 6 of 60 cases reviewed. Child care payments made on behalf of these children and their siblings during the year ended June 30, 2011, totaled $46,466. We questioned the federal share of $37,637 (81 percent).

- Eligibility documentation was not sufficient to support a valid need for child care for 3 of 60 cases reviewed. Payments totaling $4,610, made on behalf of these children and their siblings, were unallowable and/or unsupported by adequate documentation. We questioned the federal share of $3,734 (81 percent).

- For child care payments, 13 of 60 payments reviewed were not supported by adequate documentation and/or were not in compliance with DSS policies. Of these 13 payments, 2 were for cases which also lacked eligibility documentation and were included in the above questioned costs. Payments for the remaining 11

cases totaled an additional $1,028. We questioned the federal share of $833 (81 percent).

Recommendation:

The DSS, through the CD and FSD, resolve the questioned costs with the grantor agency and review and strengthen policies and procedures regarding child care eligibility determinations, provider payments, and case record documentation and retention. These procedures should include sufficient monitoring of eligibility determinations and provider payments, and follow-up on errors identified.

Status of Finding:

Corrective actions taken since the finding was issued follow:

Case Adjustments - Funds have been returned to the federal government or claims have been entered on either a parent or provider.

Case Review Tool - On July 27, 2011, the FSD presented to the CD a walkthrough of the base Case Review System (CRS) to which a child care component was added. A webinar providing detail on the child care component of the system was completed with the Rushmore Group (provider of the current CRS) on August 11, 2011. On September 2, 2011, the Rushmore Group began coding child care into the existing CRS. In the spring of 2012, the CD trained 232 supervisors and program managers on the CRS. The CRS was implemented in March 2012. The CD is utilizing output reports from the CRS to identify programmatic strengths and challenges and areas for policy, field and training improvement. The output reports for fiscal year 2013 have been reviewed and indicate a 95 percent accuracy rate statewide. In September 2013, a memorandum was issued to FSD staff clarifying expectations of supervisors as well as regional, program and county managers. Local FSD leadership is expected to monitor reviews for timely submission and ensure that quality and accuracy standards are met for each child care eligibility element. It was further clarified that supervisors are to conduct case reviews on approved child care assistance cases. Closed or rejected actions should only be reviewed if there are no approval or adjustment actions for a county, for the review month. Supervisors must ensure staff take necessary action to correct any cases determined to be incorrect, including entering any client claims discovered through the case reading process.

Updates have been made to the CRS, as a result of feedback from FSD management at the local level. These updates include changes to the child care worksheet; moving transitional child care documentation above sliding fee documentation; removal of the IM-3 form as a causal factor, since it is no longer required; and changing the wording for the "Child Not Eligible" indicator to "Child Not Eligible to be Authorized."

We will continue to analyze data to identify programmatic strengths and weaknesses to determine which local FSD offices are in need of Program Enhancement Plans. A full statewide analysis is being prepared for the FSD and will be provided to FSD leadership. This analysis outlines areas for improvement with recommendations that are present statewide.

Self-Employment Training - Effective August 1, 2011 the FSD eligibility specialists (ES) and eligibility supervisors are required to complete the on-line Self-Employment Income Budgeting training course found in the Employee Learning Center. ES and eligibility supervisors were required to complete the training by December 31, 2011. The self-employment training is to assist in reducing the error rates for all income maintenance programs.

The CD will be using data made available through the CRS to determine whether the training has been beneficial to staff.

FSD Workers Online Child Care Training - The FSD administers the child care assistance program for income maintenance households. The majority of the families accessing child care receive services through their local FSD office. As of September 1, 2011, FSD frontline workers and supervisors were able to access online child care training through the FSD Training Unit intranet page. New FSD employees are required to successfully complete the online training prior to enrolling in the in-person Basic Child Care Orientation training. New staff access and complete the training through the DSS Employee Learning Center with the online assessment component. Effective April 1, 2013, ES and eligibility supervisors are required to retake the online Child Care Assistance training every two years after initial completion. The CD will be using data made available through the CRS to determine whether the training has been beneficial to staff.

Casework Reference Guide - The FSD Training Unit, in collaboration with Child Care Program and Policy staff, developed a Case Reference Guide (CRG) for FSD workers. The CRG is an informational tool that can be utilized by workers when processing applications and completing other case actions. The CRG does not replace the policy and forms manuals. It is intended to be an additional resource for workers. Workers are to use this guide in conjunction with the policy and forms manuals and memorandums. The CD is currently updating the CRG.

Child Care Manual Revisions - Early Childhood and Prevention Services Program and Policy staff is continually reviewing the child care manual for clarification and revision.

2013	10	4

Child Care Steering Committee - During the summer of 2012, the DSS formed a steering committee to address child care issues. From this initiative there were four project teams designated to identify deficiencies and problematic areas within the Child Care Program: Eligibility, Provider Issues and Policy/Payments, Program Integrity, and Information and Systems Technology. Each team made five or six recommendations related to the team's assigned area.

Status of Questioned Costs:
The DSS recovered some of the questioned costs via processing claims against parents or providers. The DSS completed the remaining adjustments on the March 31, 2012 quarterly report. The DSS is waiting on clearance from the grantor agency.

Contact Person: Marianne Dawson
Phone Number: (573) 522-2294

2011-14B. Eligibility and Child Care Payments

Federal Agency: Department of Health and Human Services
Federal Program: 93.575 Child Care and Development Block Grant
2010 - G1001MOCCDF and 2011 - G1101MOCCDF
93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
2010 - G1001MOCCDF and 2011 - G1101MOCCDF
93.713 ARRA - Child Care and Development Block Grant
2009 - G0901MOCCD7
State Agency: Department of Social Services (DSS) - Children's Division (CD) and Family Support Division (FSD)
Questioned Costs: $16,011

Payments were made on behalf of clients ineligible for an ARRA Child Care Initiative. We noted 9 of 49 clients reviewed were receiving Temporary Assistance for Needy Family (TANF) benefits, although the initiative provided that clients receiving TANF benefits were not eligible. We questioned the federal share of the payments made on behalf of these clients, or $16,011 (100 percent).

Recommendation:
The DSS, through the CD and FSD, resolve the questioned costs with the grantor agency and revise its methodology for identifying clients who were ineligible for non-TANF ARRA Child Care Initiative benefits and recoup any improper payments identified.

Status of Finding:
On April 29, 2011, memorandum CD11-41/OEC11-110 was sent to field staff to reinforce the use of the non-TANF job search. Along with the memo, a listing of TANF recipients who potentially received the non-TANF job search child care benefit anytime between May 2010 and March 2011 was issued to FSD eligibility staff. During the subsequent months in which the program was in effect, the CD issued to field staff a non-TANF job search list for review and potential cleanup. The non-TANF job search program ended August 2011. The CD worked with the FSD to identify cases with unallowable costs. The case reviews were completed and inappropriately claimed funds have been repaid.

Status of Questioned Costs:
The DSS recovered a portion of the questioned costs via claims against parents or providers. The DSS is in discussions with the grantor agency on how to adjust for remaining questioned costs since the ARRA grant has expired.

Phone Number: (573) 522-2294

2011-16. Cost Allocation Procedures

Federal Agency: Department of Health and Human Services
Federal Program: 93.667 Social Services Block Grant
2010 - G1001MOSOSR and 2011 - G1101MOSOSR
State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)

DFAS controls and procedures over the allocation of costs to the Social Services Block Grant program were not sufficient and as a result, cost allocation errors were not prevented and/or detected.

Recommendation:
The DSS, through the DFAS, strengthen controls and procedures to ensure the accurate allocation of costs to the Social Services Block Grant. These procedures should include a detailed and documented supervisory review of cost allocation spreadsheets.

Status of Finding:
The DSS is working in consultation with the Department of Health and Human Services (DHHS) to rewrite the cost allocation plan to better define its methodologies for allocating costs to various DHHS grants. The DSS has contracted with a third party to help develop and implement a new cost allocation plan and system. The first phase/portion of the new cost allocation plan should be submitted by March 2014. The plan will be tested and finalized by June 30, 2014. The remaining portion of the plan will be implemented after successful completion of phase one.

The DSS has also assigned a senior level staff person to manage the cost allocation plan. That person is responsible and accountable for updates/revisions to the plan.

Phone Number: (573) 751-2170

2011-17. Earmarking

Federal Agency: Department of Health and Human Services
Federal Program: 93.667 Social Services Block Grant

2010 - G1001MOSOSR and 2011 - G1101MOSOSR

State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)

Questioned Costs: $6,461,316

Controls and procedures to ensure Temporary Assistance for Needy Families (TANF) funds transferred to the Social Services Block Grant (SSBG) were used for programs and services to eligible individuals were not sufficient. During preparation of the Post-Expenditure report for the year ended June 30, 2011, DFAS personnel allocated expenditures totaling $6,461,316 of TANF transfer funding to programs other than allowable case management and residential treatment. The DFAS did not have support to demonstrate the expenditures for the other programs reported were allowable. We questioned the $6,461,316 allocated in error to unapproved programs.

Recommendation:

The DSS, through the DFAS, resolve the questioned costs with the grantor agency. In addition, the DFAS should strengthen controls and procedures to ensure TANF funds transferred to the SSBG are used for programs and services to eligible individuals and transferred funds are accurately reported. These procedures should include a detailed and documented supervisory review of program reports.

Status of Finding:

The DSS does track and report funds transferred from TANF to SSBG. There was an oversight due to staff changes and reports have been revised and resubmitted to the federal agency. The DSS also provided the basis for its assurance that funds expended from TANF transfers to SSBG are used for children and their families with income less than 200 percent of the federal poverty level. The actual expenditure of funds met the requirements and was allowable; therefore, the DSS disagrees with the questioned costs.

Status of Questioned Costs:

This finding is the subject of continued discussion with the grantor agency, but no resolution has yet been finalized. Questioned costs have not been resolved with the grantor agency.

Phone Number: (573) 751-2170

2011-18A. Eligibility and TANF Assistance Payments

Federal Agency: Department of Health and Human Services

Federal Program: 93.558 Temporary Assistance for Needy Families
2010 - G1002MOTANF and 2011 - G1102MOTANF
93.714 ARRA- Emergency Contingency Fund for Temporary Assistance for Needy Families State Program
2009 - G0901MOTAN2 and 2010 - G1001MOTAN2

State Agency: Department of Social Services (DSS) - Family Support Division (FSD)
Questioned Costs: $15,070

The FSD paid Temporary Assistance for Needy Family (TANF) benefits to some recipients who may not have been eligible or were ineligible for the full amount of TANF payments received.

- For 4 of 60 recipients tested, the eligibility specialist did not act on information timely when quarterly wage matches between various federal and state databases and the TANF case management system showed significant unresolved differences in income earned during state fiscal year 2011. The FSD determined these four recipients received overpayments totaling $4,246, for which we questioned the entire amount (100 percent federal share).

- For 3 of 60 recipients tested, the FSD did not maintain adequate eligibility documentation to support payments made. Payments made for these three cases during the year ended June 30, 2011, totaled $10,824, of which we questioned the entire amount (100 percent federal share).

Recommendation:
The FSD resolve the questioned costs with the grantor agency and strengthen controls to ensure income information is reviewed periodically and proper and timely action is taken regarding the updated income information, including case sanctions, case closures and recoupment of overpayments, if warranted. In addition, the FSD should maintain required eligibility documentation in all case files.

Status of Finding:
The FSD continues to ensure cases are thoroughly reviewed and acted upon in a timely manner for reported household income changes, at points of assistance application and identified at scheduled continued-eligibility reviews. The FSD Income Maintenance (IM) staff and Family Assistance Management Information System staff is in the process of developing a Quarterly Wage Match (QWM) report for staff. IM Memo #53 (6/25/12) was issued to staff with detailed steps to process QWM within 15 days of receipt.

Status of Questioned Costs:
Questioned costs were adjusted on the March 31, 2012, and September 30, 2012, quarterly reports. The DSS is waiting on clearance from the grantor agency.

Contact Person: Jeannie Olson
Phone Number: (573) 751-3178

2011-18B. Eligibility and TANF Assistance Payments

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families

2010 - G1002MOTANF and 2011 - G1102MOTANF
93.714 ARRA- Emergency Contingency Fund for Temporary Assistance for Needy Families State Program
2009 - G0901MOTAN2 and 2010 - G1001MOTAN2

State Agency: Department of Social Services (DSS) - Family Support Division (FSD)
Questioned Costs: $1,258

The FSD did not act upon some notices of non-cooperation from the Child Support Enforcement Unit to sanction Temporary Assistance for Needy Family (TANF) recipients. For 7 of 47 recipients reviewed, the FSD did not sanction the recipient when notified. The FSD identified overpayments totaling $1,258 were made to these recipients during the year ended June 30, 2011. We questioned the federal share of these costs totaling $1,258 (100 percent federal share).

Recommendation:

The FSD resolve the questioned costs with the grantor agency and develop additional controls to ensure sanctions are imposed on TANF recipients who fail to cooperate with child support enforcement program requirements.

Status of Finding:

The FSD Income Maintenance (IM) section continues to work closely with the division's Child Support (CS) section to further ensure non-cooperation notifications from the CS section are promptly reviewed by IM staff for potential sanctions, and subsequently imposed as warranted. The FSD IM section implemented, with IM Memo #55 (July 3, 2012), a log to track the non-cooperation notifications received from the CS section to ensure IM staff process the requests in a timely manner. In addition, the FSD CS section notified CS staff with CS Memo #20 (April 15, 2013) about non-cooperation procedures for TANF recipients. The electronic database, which will replace the paper log, is still in development.

Status of Questioned Costs:

Questioned costs were adjusted on the March 31, 2012, and September 30, 2012, quarterly reports. The DSS is waiting on clearance from the grantor agency.

Contact Person: Jeannie Olson
Phone Number: (573) 751-3178

2011-19A. Unallowable Costs and Maintenance of Effort

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2010 - G1002MOTANF and 2011 - G1102MOTANF
93.714 ARRA - Emergency Contingency Fund for Temporary Assistance for Needy Families State Program
2009 - G0901MOTAN2 and 2010 - G1001MOTAN2

State Agency: Department of Social Services (DSS) - Family Support Division (FSD)
Questioned Costs: $25,810,891

The DSS claimed unallowable state foster care, adoption assistance, and subsidized guardianship costs under the Temporary Assistance for Needy Families (TANF) program. The foster care, adoption assistance, and subsidized guardianship costs claimed included non-emergency assistance, and the costs claimed for emergency assistance were not separately identified; therefore, all costs were unallowable. We questioned all state fiscal year 2011 costs for foster care, adoption assistance, and subsidized guardianship claimed under the TANF program, totaling $25,810,891 (100 percent federal share).

Recommendation:

The DSS resolve the questioned costs with the grantor agency and ensure prior approved program costs claimed under the TANF program comply with federal regulations.

Status of Finding:

The DSS disagreed with this finding. The DSS's previous response to the finding is unchanged. The DSS is using a manual, developed with the assistance of a third party, to evaluate whether costs are allowable under TANF and/or TANF maintenance of effort (MOE). This desk manual will help the DSS ensure that it has appropriately categorized costs as TANF or TANF MOE as the definitions of allowable costs vary between the two. The desk manual was finished December 2012 and was submitted on January 24, 2013, to our grantor agency for review.

Status of Questioned Costs:

The status is still under discussion with the grantor agency.

Contact Person: Ami Patel
Phone Number: (573) 751-2170

2011-19B. Unallowable Costs and Maintenance of Effort

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2010 - G1002MOTANF and 2011 - G1102MOTANF
93.714 ARRA - Emergency Contingency Fund for Temporary Assistance for Needy Families State Program
2009 - G0901MOTAN2 and 2010 - G1001MOTAN2
State Agency: Department of Social Services (DSS) - Family Support Division (FSD)

The DSS included unallowable educational expenditures totaling $19,034,632 in the amounts reported for the annual maintenance of effort (MOE) requirement for the Temporary Assistance for Needy Families (TANF) program.

Recommendation:
The DSS ensure expenditures claimed as MOE are allowable.

Status of Finding:
The DSS disagreed with this finding. The DSS's previous response to the finding is unchanged. The DSS is using a manual, developed with the assistance of a third party, to evaluate whether costs are allowable under TANF and/or TANF MOE. This desk manual will help the DSS ensure that it has appropriately categorized costs as TANF or TANF MOE as the definitions of allowable costs vary between the two. The desk manual was finished December 2012 and was submitted on January 24, 2013, to our grantor agency for review.

Additionally, during this process, the third party validated the allowability of the claim in question, citing 1999 TANF Final Rule (page 17825), which supports the DSS's contention that it claimed these funds correctly.

We would like to point out that federal TANF funds may also be used to pay for "nonassistance" activities (such as those identified in this finding) that meet the purposes of the program as given in Sections 401(a)(1)-(4) of the Social Security Act and 45 CFR Section 260.20. Federal TANF funds may also be used for activities that benefit non-needy families in some cases, e.g., activities that meet the purpose of either Section 401(a)(3) or (a)(4) of the Act. In this respect, there may be more flexibility in the expenditures that are allowable uses of federal funds than those that are allowable for MOE purposes. This is because federally funded services or benefits do not necessitate a determination of financial eligibility (need) if they do not meet the definition of assistance. Thus, states may use federal TANF funds (in accordance with Section 404 of the Act) to provide "nonassistance" services or benefits to eligible individuals who meet the state's other, nonfinancial, objective criteria for the delivery of such benefits.

The status is still under discussion with the grantor agency.

Phone Number: (573) 751-2170

2011-19C. Unallowable Costs and Maintenance of Effort

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2010 - G1002MOTANF and 2011 - G1102MOTANF
93.714 ARRA - Emergency Contingency Fund for Temporary Assistance for Needy Families State Program
2009 - G0901MOTAN2 and 2010 - G1001MOTAN2
State Agency: Department of Social Services (DSS) - Family Support Division (FSD)
Questioned Costs: $18,493,665

For the quarter ended September 30, 2010, the DSS claimed costs under the Temporary Assistance for Needy Families (TANF) program, totaling $18,493,665, related to three scholarship programs: A+ Schools, Bright Flight Scholarships, and Ross-Barnett Scholarships. The DSS had not determined and documented there was any correlation between those programs and any of the four allowable TANF purposes. We questioned the state fiscal year 2011 costs for scholarship programs that were claimed under the TANF program, totaling $18,493,665 (100 percent federal share).

Recommendation:

The DSS resolve the questioned costs with the grantor agency and ensure program costs claimed under the TANF program comply with federal regulations.

Status of Finding:

The DSS disagreed with this finding. The DSS's previous response to the finding is unchanged. The DSS is using a manual, developed with the assistance of a third party, to evaluate whether costs are allowable under TANF and/or TANF maintenance of effort (MOE). This desk manual will help the DSS ensure that it has appropriately categorized costs as TANF or TANF MOE as the definitions of allowable costs vary between the two. The desk manual was finished December 2012 and was submitted on January 24, 2013, to our grantor agency for review.

Additionally, during this process, the third party validated the allowability of the claim in question, citing 1999 TANF Final Rule (page 17825), which supports the DSS's contention that it claimed these funds correctly.

We would like to point out that federal TANF funds may also be used to pay for "nonassistance" activities (such as those identified in this finding) that meet the purposes of the program as given in Sections 401(a)(1)-(4) of the Social Security Act and 45 CFR Section 260.20. Federal TANF funds may also be used for activities that benefit non-needy families in some cases, e.g., activities that meet the purpose of either section 401(a)(3) or (a)(4) of the Act. In this respect, there may be more flexibility in the expenditures that are allowable uses of federal funds than those that are allowable for MOE purposes. This is because federally funded services or benefits do not necessitate a determination of financial eligibility (need) if they do not meet the definition of assistance. Thus, states may use federal TANF funds (in accordance with section 404 of the Act) to provide "nonassistance" services or benefits to eligible individuals who meet the state's other, nonfinancial, objective criteria for the delivery of such benefits.

DSS has changed is claiming process to claim these funds as TANF, instead of TANF MOE to align its claiming with the above information.

Status of Questioned Costs:

The status is still under discussion with the grantor agency.

Contact Person: Ami Patel
Phone Number: (573) 751-2170

2011-19D. Unallowable Costs and Maintenance of Effort

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2010 - G1002MOTANF and 2011 - G1102MOTANF
93.714 ARRA - Emergency Contingency Fund for Temporary Assistance for Needy Families State Program
2009 - G0901MOTAN2 and 2010 - G1001MOTAN2
State Agency: Department of Social Services (DSS) - Family Support Division (FSD)

The DSS control system was not effective in ensuring the types of costs claimed under the Temporary Assistance for Needy Families (TANF) program or recorded as TANF maintenance of effort (MOE) met all federal regulatory and grant requirements, resulting in unallowable costs and unqualified sources of MOE claimed against the federal TANF grant.

Recommendation:
The DSS establish a formal control system to ensure the types of costs claimed under the TANF program or recorded as TANF MOE meet all federal regulatory and grant requirements.

Status of Finding:
The DSS disagreed with this finding. The DSS's previous response to the finding is unchanged. The DSS is using a manual, developed with the assistance of a third party, to evaluate whether costs are allowable under TANF and/or TANF MOE. This desk manual will help the DSS ensure that it has appropriately categorized costs as TANF or TANF MOE as the definitions of allowable costs vary between the two. The desk manual was finished December 2012 and was submitted on January 24, 2013, to our grantor agency for review. The status is still under discussion with the grantor agency.

Contact Person: Ami Patel
Phone Number: (573) 751-2170

2011-20A. Work Participation and Sanctions

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2010 - G1002MOTANF and 2011 - G1102MOTANF
93.714 ARRA - Emergency Contingency Fund for Temporary Assistance for Needy Families State Program
2009 - G0901MOTAN2 and 2010 - G1001MOTAN2
State Agency: Department of Social Services - Family Support Division (FSD)

The FSD was not in compliance with certain work activity reporting requirements contained in the Temporary Assistance for Needy Families Work Verification Plan in

effect for state fiscal year 2011. We noted for 17 of 60 cases tested, the work participation hours were either not documented, not verified, and/or not reported correctly in accordance with the Work Verification Plan.

Recommendation:

The FSD develop additional controls to ensure work activities are adequately documented, verified, and reported in accordance with the FSD Work Verification Plan.

Status of Finding:

The Missouri Work Assistance (MWA) Case Management system was available for data entry June 28, 2011, and entries ceased in the Toolbox system on June 23, 2011. Inquiry access to Toolbox has continued to ensure necessary data was converted from Toolbox to the MWA System.

A Case Review form was developed for use by all MWA coordinators to provide consistency when reviewing data entries and physical files of MWA participants each contractor is serving. This tool is used by all MWA coordinators effective July 1, 2011.

A Case Review Guide was written and shared with MWA staff August 2011 (and upgraded December 2011) to ensure the MWA coordinators understand where policies regarding the form are located in the policy manual and request for proposal to assist contractors with any incorrect findings. This guide and the case review form have also been shared with MWA contractors for use when reviewing their staff case files.

Effective August 1, 2011, MWA coordinators report to the FSD program manager responsible for the MWA program (before that time coordinators reported to regional FSD staff). The change in supervision ensures that positions are dedicated to the MWA program and coordinator accountability for assigned work by the MWA FSD program manager. All field managers and coordinators continue to be dedicated to the support of the MWA program and report to the MWA unit manager.

With this change, four teams have been designated to further develop the MWA program. These teams are:

- MWA System and Data - user guides, system enhancements, reports;
- MWA Policy and Training – policy manual updates, training materials;
- MWA Contracts and Monitoring – monitoring tools, compliance; and
- Special Projects and Research – MWA webpage, research to improve the work participation rates.

Tools developed by these teams will provide contractors with information to ensure participation activities meet work verification standards and supported with adequate documentation. Resources developed will also serve to increase the work participation rate for the state and provide performance measures to the contractors.

MWA staff completed targeted case file reviews in March 2012 for individuals participating in Vocational Education as an activity. The review was conducted to ensure contractors were obtaining actual attendance sheets (work verification) for this activity rather than entering hours based on a class schedule. This review, and regular case file reviews examine if work verification standards are met.

Contact Person: Jennifer Roberts
Phone Number: (573) 526-5444

2011-20B. Work Participation and Sanctions

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2010 - G1002MOTANF and 2011 - G1102MOTANF
93.714 ARRA - Emergency Contingency Fund for Temporary Assistance for Needy Families State Program
2009 - G0901MOTAN2 and 2010 - G1001MOTAN2
State Agency: Department of Social Services - Family Support Division (FSD)
Questioned Costs: $1,134

The FSD did not have adequate procedures in place to ensure contractors notified the FSD when Temporary Assistance for Needy Families (TANF) recipients failed to meet work participation requirements. As a result, many TANF recipients who failed to meet work participation requirements were not sanctioned. We noted 18 of 55 recipients tested were not appropriately sanctioned for non-compliance with work participation requirements. We questioned the amount of the sanctions that were not imposed for these recipients for the month reviewed, which totaled $1,134 (100 percent federal share). In addition, the FSD did not ensure TANF recipients referred to Missouri Work Assistance (MWA) contractors were assigned case managers.

Recommendation:
The FSD develop additional controls to ensure TANF recipients failing to meet work participation requirements are sanctioned as required. In addition, the FSD should resolve the questioned costs with the grantor agency.

Status of Finding:
The FSD continues to perform the following activities to evaluate contractor compliance with notification requirements to ensure TANF recipients are sanctioned accordingly to policy and procedure.

The case review form includes an evaluation of the conciliation and sanction referral process. This tool continues to determine appropriate and timely actions of the MWA contractors should TANF recipients fail to meet the work participation requirements.

The MWA field managers and coordinators review the mass participation screens for case managers in each office to identify those individuals that are not participating in an activity and work with the contractors to identify those that should be placed in conciliation and possibly sanctioned.

Quarterly, the MWA coordinators review a sample of participants that have no hours of participation, no conciliation activity, or no sanction in place. Individuals identified are shared with the contractor for immediate contact and initiation of the conciliation and sanctioning process to ensure participants failing to meet the work participation requirement are sanctioned as required. These reviews have continued through state fiscal year 2013. Contractors are provided with information on any case file discovered during these reviews that require attention.

Status of Questioned Costs:
An adjustment was made to the March 31, 2012, quarterly report. The DSS is waiting on clearance from the grantor agency.

2011-22A. Medicaid Management Information System

Federal Agency: Department of Health and Human Services
Federal Program: 93.767 Children's Health Insurance Program
2010 - 1005MO05021
93.778 Medical Assistance Program
2010 - 1005MO5MAP and 1005MO5ADM
2011 - 1105MO5MAP and 1105MO5ADM
93.778 ARRA - Medical Assistance Program
2009 - 0905MOARRA
2010 - 1005MOARRA
2011 - 1105MOARRA and 1105MOEXTN
State Agency: Department of Social Services (DSS) - MO HealthNet Division (MHD)
Questioned Costs: $45

Medicaid Management Information System edit override documentation was not properly completed or approved by MHD personnel for 2 of 60 override actions reviewed. The payments related to these overrides totaled $63. We questioned the federal share of the total payments, or $45 (71.61 percent).

Recommendation:
The MHD ensure the override authorizations are properly completed and approved by appropriate employees. In addition, the MHD should resolve questioned costs with the grantor agency.

Status of Finding:

On March 1, 2012, the MHD notified the fiscal agent's claims manager of the errors with instructions to return any future override claims to the MHD if the reason for override or the authorized signature was missing. Each MHD unit is responsible for monitoring and logging override requests submitted by their staff. Notification is sent to the MHD Units with a reminder to ensure requests have been signed by an authorized person and indicate the reason for the override.

Status of Questioned Costs:

A decreasing adjustment is not necessary as the documentation to support the override authorizations for the two claims in question is maintained in the Medicaid Management Information System. The documentation previously provided to the State Auditor's office was not a copy of the actual override authorizations submitted with the claim but an incomplete file copy. In addition, the documentation to support the reason for the override was maintained in the case file and not submitted with the override authorization for the claims due to the volume of the documentation. The DSS will work with the grantor agency to resolve the questioned costs.

2011-22C. Medicaid Management Information System

Federal Agency: Department of Health and Human Services
Federal Program: 93.767 Children's Health Insurance Program
2010 - 1005MO05021
93.778 Medical Assistance Program
2010 - 1005MO5MAP and 1005MO5ADM
2011 - 1105MO5MAP and 1105MO5ADM
93.778 ARRA - Medical Assistance Program
2009 - 0905MOARRA
2010 - 1005MOARRA
2011 - 1105MOARRA and 1105MOEXTN
State Agency: Department of Social Services (DSS) - MO HealthNet Division (MHD)
Questioned Costs: $78

The Medicaid Management Information System did not properly process certain spend down claims, allowing some participants with medical claims that extended between 2 or more calendar months to receive benefits without meeting spend down requirements in any of the months. Of nine claims reviewed for spend down participants, we noted one paid claim where the participant had not met the required monthly spend down amount. The payments related to the claim tested totaled $109. We questioned the federal share of the total payments, or $78 (71.61 percent).

Recommendation:
The MHD identify and resolve questioned costs with the grantor agency related to spend down participant claims paid in error.

Status of Finding:
The MHD identified spend down claims with dates of service extending across two or more months that did not process correctly. The claims will be reviewed and appropriation action taken as necessary.

Status of Questioned Costs:
Any action that results in an adjustment to the claim payment amount will be reflected on future CMS 64 reports based upon the quarter for when the adjustment is completed.

2011 - 1105MOARRA and 1105MOEXTN
State Agency: Department of Social Services (DSS) - Family Support Division (FSD) and MO HealthNet Division (MHD)
Questioned Costs: $2,620

Adequate controls were not in place to ensure all required documentation was obtained and maintained supporting eligibility of participants related to the Medical Assistance Program (Medicaid) and the Children's Health Insurance Program (CHIP). The FSD did not obtain or maintain all documentation required for eligibility for 3 of 60 Medicaid and CHIP participants reviewed. The ineligible payments made on behalf of these participants totaled $3,717 during the year ended June 30, 2011. We questioned the federal share or $2,620 (70.49 percent).

Recommendation:
The DSS ensure all information required to determine participant eligibility is obtained, verified, and retained to ensure compliance with applicable federal requirements. In addition, the DSS should resolve questioned costs with the grantor agency.

Status of Finding:

The DSS has taken steps to ensure staff is following existing policy for obtaining verified Social Security Numbers, verifying citizenship, and exploring potential income sources when approving assistance applications and conducting periodic reviews. To enhance measures already in place and to continue to ensure correct case results, the corrective actions include the following:

- MHD Program and Policy has released a memorandum, IM-93 on November 27, 2012, reminding staff of required verification of citizenship, identification, and income when determining eligibility for MHD programs, IM-46 on June 1, 2012, to remind staff of the policies on citizenship and immigrant status and to apply policies appropriately, and IM-49 on August 25, 2011, to clarify reasonable opportunity to present documentary evidence of citizenship for MHD programs.

- When an applicant applies and declares to be a citizen or national, the eligibility specialist must follow policy as outlined in Income Maintenance Manual Policy Section 0110.020.02. The FSD Quality Control unit started reviewing as of November 2011, a random sampling of MO HealthNet for Families (MHF), MO HealthNet for Kids (MHK), MO HealthNet for The Aged, Blind, and Disabled (MHABD), and MO HealthNet for Pregnant Women (MPW) applications through the Payment Error Rate Measurement Reviews (PERM). If while reviewing a case for PERM, it is found that the case file does not contain the necessary documentation to verify citizenship, Quality Assurance/Quality Control will verify citizenship if possible, then forward the verification to the field office to update the case record. PERM review summaries are distributed to county of origin for follow up and corrective action. Also, FSD supervisors conduct random case readings of MHF, MHK, MHABD, and MPW cases identified on reports available on the Managed Reporting to measure eligibility specialist's performance in determining eligibility and providing correct benefits.

A request for automation of adverse actions when citizenship or ID verification has not been received within 90 days was submitted to the Family and Medical Information System (FAMIS) for inclusion on a list of planned systems enhancements. Due to the conversion currently in process from FAMIS to the Missouri Eligibility Determination and Enrollment System (MEDES), as well as budgetary constraints, the request was not completed. However, this automated function is included with the business requirements for MEDES.

Status of Questioned Costs:

An adjustment will be made on the December 31, 2013, quarterly reports. The DSS is waiting on clearance from the grantor agency.

2011-24. Pharmacy Dispensing Fees

Federal Agency: Department of Health and Human Services
Federal Program: 93.767 Children's Health Insurance Program
2010 - 1005MO05021
93.778 Medical Assistance Program
2010 - 1005MO5MAP and 1005MO5ADM
2011 - 1105MO5MAP and 1105MO5ADM

93.778 ARRA - Medical Assistance Program
2009 - 0905MOARRA
2010 - 1005MOARRA
2011 - 1105MOARRA and 1105MOEXTN
State Agency: Department of Social Services (DSS) - MO HealthNet Division (MHD)
Questioned Costs: $6,909,934

The MHD periodically changed the rate paid pharmacies for dispensing prescription drugs under the Medical Assistance Program (Medicaid) and the Children's Health Insurance Program (CHIP); however, the state regulation authorizing these dispensing fees had not been updated since 1988 and the current rate paid exceeded a 1991 settlement agreement that increased the pharmacy dispensing fee. The MHD did not have adequate documentation to support the determination of the current dispensing fee structure. The MHD paid pharmacies base dispensing fees totaling $62,331,717 during the year ended June 30, 2011. Had the dispensing fees been paid in accordance with the 1991 settlement agreement, the fees would have totaled $52,672,877, a difference of $9,658,840. We questioned the federal share of the difference, or $6,909,934 (71.54 percent).

Recommendation:

The MHD ensure state regulations related to administration of the Medicaid program and the CHIP are updated when changes are justified, and resolve questioned costs with the grantor agency. In addition, the MHD should ensure increases in payment rates are adequately supported and actuarially sound, as required by federal guidelines.

Status of Finding:

The MHD disagreed with the finding. The MHD makes payments in accordance with the Department of Health and Human Services, Centers for Medicare and Medicaid Services approved state plan. Furthermore, pharmacy dispensing fees paid under Title XIX and CHIP are communicated in documents during the budget process and authorized by the General Assembly through the appropriations process.

The MHD will work with the grantor agency to resolve any questioned costs. The proposed rule was published on November 1, 2013, Volume 38, No. 21, page 1768, for the regulatory changes necessary to reflect the current pharmacy dispensing fee.

Status of Questioned Costs:
This finding is the subject of future discussions with the grantor agency, but no resolution has yet been finalized.

2011-25A. Report Reviews

Federal Agency: Department of Health and Human Services
Federal Program: 93.767 Children's Health Insurance Program
2010 - 1005MO05021
93.778 Medical Assistance Program
2010 - 1005MO5MAP and 1005MO5ADM
2011 - 1105MO5MAP and 1105MO5ADM
93.778 ARRA - Medical Assistance Program
2009 - 0905MOARRA
2010 - 1005MOARRA
2011 - 1105MOARRA and 1105MOEXTN
State Agency: Department of Social Services (DSS) - MO HealthNet Division (MHD)

The MHD identified Medical Assistance Program and Children's Health Insurance Program claims requiring post-payment reviews and generated daily exception reports; however, these reports were not reviewed during the year ended June 30, 2011.

Recommendation:
The MHD review the report of claims that have been identified for post-payment reviews to ensure erroneous billings are properly recouped.

Status of Finding:
The MHD is currently working to verify the need for any exception to have a status of 4 (requiring a post-payment review). Unit program managers are being contacted to make the decision for their specific program areas. Thus far, we have received confirmation from the managers to change many status 4 exceptions to a different status because reporting the claims is not necessary. The size of the daily report has decreased from an average of 2,200 pages to 150 pages or less. Of this amount, many of the exceptions are utilized by Xerox through the CMSP contract (Clinical Management Services and System for Pharmacy Claims and Prior Authorization). The MHD is currently reviewing the CMSP exceptions to determine the need to continue using a status of 4.

One Unit (Third Party Liability) has chosen to continue to review the report for several exceptions which they feel may be of benefit to MHD. If they decide it does not benefit MHD, they will request a status change.

The next step in this process will be to submit a request to change the way GMCM6500-R018 is produced. We want to eliminate repetition of claim Internal Control Numbers (ICN) on the report. Currently, if an ICN posts more than one exception (up to 25) and any of the exceptions have a status of 4, the ICN will repeat on the report for every exception listed. For example, the report lists ICNs for EXC 715. The status of this exception was changed to 5 at the request of the pharmacy unit supervisor but still is reported because other exceptions on the same ICN posted. We only want to see the ICN reported one time.

We continue our efforts to confirm the necessity of this report as it applies to our claims processing and payment systems today. We are finding that the majority of this report is simply outdated, while newer, more advanced system tools provide the required editing for MHD.

2012-4A. Subrecipient Monitoring and Participant Data

Federal Agency: Department of Labor
Federal Program: 17.258 Workforce Investment Act - Adult Program
2010 - AA-20203-10-55-A-29
2011 - AA-21405-11-55-A-29
17.259 Workforce Investment Act - Youth Activities
2010 - AA-20203-10-55-A-29
2011 - AA-21405-11-55-A-29
17.278 Workforce Investment Act - Dislocated Workers Formula Grants
2010 - AA-20203-10-55-A-29
2011 - AA-21405-11-55-A-29
State Agency: Department of Economic Development - Division of Workforce Development (DWD)

The DWD did not establish adequate procedures to ensure subrecipients were complying with all federal requirements regarding participant enrollment. The DWD did not take action to ensure Workforce Investment Boards (WIB) were following federal guidelines which require participants be exited from the Workforce Investment Act program if no services had been provided for 90 days.

Recommendation:
The DWD continue to implement additional monitoring of WIB representatives or other staff responsible for documenting program exits to ensure compliance with federal requirements.

Status of Finding:
The July 31, 2013 final determination letter from the Department of Labor found the corrective action taken was sufficient and the finding is considered corrected.

Contact Person: Tracey Brown
Phone Number: (573) 526-8222

2012-4B. Subrecipient Monitoring and Participant Data

Federal Agency: Department of Labor
Federal Program: 17.258 Workforce Investment Act - Adult Program
2010 - AA-20203-10-55-A-29
2011 - AA-21405-11-55-A-29
17.259 Workforce Investment Act - Youth Activities
2010 - AA-20203-10-55-A-29
2011 - AA-21405-11-55-A-29
17.278 Workforce Investment Act - Dislocated Workers Formula Grants
2010 - AA-20203-10-55-A-29
2011 - AA-21405-11-55-A-29
State Agency: Department of Economic Development - Division of Workforce Development (DWD)

The DWD did not ensure participant records were complete and accurate for the Workforce Investment Act program. The DWD Central Office approved change requests to participant records which were not in compliance with federal requirements. In addition, changes made via the agency's change order process were documented with hard-copy change requests and logged separately from the electronic participant tracking system. However, the tracking system itself contained no mention or documentation of any changes to the participant records.

Recommendation:
The DWD ensure administrative changes made to participant records are appropriate, and develop or acquire the functionality to maintain adequate records of all changes made to participant records in the Toolbox Case Tracking System.

Status of Finding:
The July 31, 2013 final determination letter from the Department of Labor found the corrective action taken was sufficient and the finding is considered corrected.

2012-5A. Vocational Rehabilitation

Federal Agency: Department of Education
Federal Program: 84.126 Rehabilitation Services - Vocational Rehabilitation Grants to States
2010 - H126A100036C; 2011 - H126A110036-11H and
2012 - H126A120036-12D
84.187 Supported Employment Services for Individuals with Significant Disabilities
2012 - H187A120037-12B
State Agency: Department of Elementary and Secondary Education (DESE) - Missouri Vocational Rehabilitation (MVR)

An adequate review of community rehabilitation provider (CRP) billings and other supporting documentation was not performed, and employment of some clients was not independently verified prior to payment for placement and job coaching services. As a result, 23 payments totaling $33,699 were made during the period March 2011 to July 2012 to a CRP for falsified billings, and another 14 payments totaling $12,331 made to the same CRP during the period March 2011 to May 2012 were determined questionable and may have been either billing errors or additional falsified billings. As of November 2012, the MVR received full reimbursement of these questionable payments from the CRP.

Recommendation:
The DESE continue improving procedures over the billing review process to help prevent and identify falsified or erroneous billings from CRPs in a timely manner and ensure adequate supporting documentation is obtained for all expenditures.

Status of Finding:
Corrective action was taken.

Contact Person: Pam Sandbothe
Phone Number: (573) 526-7009

2012-5B. Vocational Rehabilitation

Federal Agency: Department of Education
Federal Program: 84.126 Rehabilitation Services - Vocational Rehabilitation Grants to States
2010 - H126A100036C; 2011 - H126A110036-11H and
2012 - H126A120036-12D
84.187 Supported Employment Services for Individuals with Significant Disabilities
2012 - H187A120037-12B

State Agency: Department of Elementary and Secondary Education (DESE) - Missouri Vocational Rehabilitation

Procedures were not established to effectively address concerns related to inadequate client contact identified in annual performance appraisals of counselors.

Recommendation:
The DESE ensure concerns with inadequate client contact identified during annual performance appraisals are corrected timely.

Status of Finding:
Corrective action was taken.

Contact Person: Pam Sandbothe

2012-6. Medicaid Home and Community Based Services

Federal Agency: Department of Health and Human Services
Federal Program: 93.778 Medical Assistance Program
2011 - 1105MO5MAP and 1105MO5ADM
2012 - 1205MO5MAP and 1205MO5ADM
State Agency: Department of Health and Senior Services (DHSS) - Division of Senior and Disability Services (DSDS)
Questioned Costs: $297,964

The DSDS did not ensure annual reassessments were performed, as required, to determine continued need of services of Home and Community Based Services (HCBS) recipients. Assessment documentation was tested for 60 Medicaid recipients who received State Plan Personal Care (SPPC) and/or Aged and Disabled Waiver (ADW) services during the year ended June 30, 2012. The DSDS did not perform annual reassessments of eligibility for 40 of the 58 (69 percent) recipients requiring a reassessment. The payments for SPPC and ADW services provided to these recipients without annual reassessments during the year ended June 30, 2012 totaled $468,570. We questioned the federal share, or $297,964 (63.59 percent).

Recommendation:
The DHSS, through the DSDS, resolve the questioned costs with the grantor agency and ensure annual reassessments are performed as required.

Status of Finding:
The fiscal year 2014 state budget includes funding for HCBS providers to conduct reassessments. The ten Area Agencies on Aging will also begin conducting reassessments in fiscal year 2014. Reassessments for level of care of current clients will be scheduled for completion based upon the anniversary date of the last assessment. DHSS staff will

review and approve all reassessments submitted by HCBS providers and the Area Agencies on Aging.

Status of Questioned Costs:
DHSS staff has met with staff from the federal Centers for Medicare and Medicaid Services to discuss the issues raised in the audit. The meetings are ongoing.

2012-7A. Homeland Security Grant Program

Federal Agency: Department of Homeland Security
Federal Program: 97.067 Homeland Security Grant Program
2007 - GE-T7-0034
2008 - GE-T8-0014
2009 - SS-T9-0062
2010 - SS-T0-0039
2011 - SS - 00003
State Agency: Department of Public Safety - Office of the Director (OD)
Questioned Costs: $745,978

The OD did not ensure personnel related expenditures were properly supported by salary certifications and approved activity reports for the Homeland Security program.

1) Salary certifications were not prepared for the 17 employees working solely on the Homeland Security program from July 2011 to March 2012. We questioned the federal share of personnel costs for these employees, or $511,940 (100 percent). In addition, after the OD began preparing salary certifications, our review identified 1 of the 17 employees still lacked a salary certification for both May and June 2012 and an additional employee, newly assigned to the program in May 2012, did not prepare a salary certification until June 2012. We questioned the federal share of personnel costs for these two employees during the additional periods, or $8,762 (100 percent).

2) Documentation of employee and supervisor approval for time worked was not always maintained for employees splitting time between multiple programs. We questioned the federal share of salary costs allocated for 10 employees charging part of their time to the Homeland Security program during July 2011 to March 2012, or $215,991 (100 percent). In addition, after the OD updated procedures for approving time worked, we identified 3 of 5 employees working on multiple programs in May 2012 either did not have properly approved activity forms or the allocation made did not agree to the approved form or other supporting documentation. Two of these 3 employees had similar errors in June 2012. We

questioned the federal share for these employees during May and June, or $9,285 (100 percent).

Recommendation:
The OD resolve the questioned costs with the grantor agency, and ensure adequate records of time worked are prepared and approved by the employee and/or their supervisor to support the salary costs allocated to the program.

Status of Finding:
Implemented.

Status of Questioned Costs:
Our federal granting agency has advised, upon our completed actions and corrective action plan submission, their portion of the audit is considered closed. The questioned costs are resolved with no further action required.

2012-7B. Homeland Security Grant Program

Federal Agency: Department of Homeland Security
Federal Program: 97.067 Homeland Security Grant Program
2007 - GE-T7-0034
2008 - GE-T8-0014
2009 - SS-T9-0062
2010 - SS-T0-0039
2011 - SS - 00003
State Agency: Department of Public Safety - Office of the Director (OD)

The OD needed to improve policies and procedures to provide better assurance that subrecipients of the Homeland Security program were in compliance with applicable federal and grant requirements.

1) Although a formal subrecipient monitoring policy was implemented in March 2011 and a revised policy was issued in April 2012 for the Homeland Security program, the OD did not comply with these policies and monitoring procedures could still have been improved.

2) The OD had not established an audit tracking system or ensured Homeland Security program subrecipients expending $500,000 or more in federal funds obtained independent Single Audits as required. In addition, follow-up was not performed on findings reported in subrecipient Single Audits.

Recommendation:
The OD improve procedures to ensure subrecipients are monitored timely. In addition, a system should be established to track Single Audit reports expected and received from applicable subrecipients, and to document the review and follow-up of all subrecipient Single Audit reports received.

Status of Finding:
Implemented.

93.778 Medical Assistance Program
2011 - 1105MO5ADM and 2012 - 1205MO5ADM

State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)

Questioned Costs: $148,884

DFAS controls and procedures over the allocation of some payroll costs to federal programs were inadequate, and, as a result, several errors were not prevented and/or detected. Incorrect labor codes were assigned to some employees, resulting in payroll costs for those employees being charged to the wrong cost pools. These cost pool errors resulted in overstatements of payroll costs totaling approximately $236,000 ($148,884 federal share) and understatements totaling approximately $139,000 ($86,000 federal share) for seven federal programs for the year ended June 30, 2012. We questioned the federal share of the overstatements, or $148,884.

Recommendation:

The DSS, through the DFAS, resolve the questioned costs with the grantor agency, and establish controls and procedures to ensure payroll costs are allowable and allocable. These procedures should include a periodic documented review of labor codes assigned to employees and the purpose and definition of labor codes to ensure associated payroll costs are charged to appropriate federal programs directly or through the proper cost pool.

Status of Finding:

The DSS - DFAS is working with program staff to ensure that staff is assigned to the appropriate labor codes that correspond to their job functions. The DFAS is also currently working to revise the Public Assistance Cost Allocation Plan. Currently, the labor code is part of the position code for each employee and is used to allocate payroll costs to various federal grants or cost pools. One of the changes being made is to allocate salaries to allowable cost pools through the Labor Distribution Profile (LDPR) codes in SAM II.

The reporting categories which identify which federal grant or pool to allocate to will be part of the LDPR code in SAM II.

Status of Questioned Costs:
Questioned costs were adjusted on the September 30, 2013 quarterly reports. The DSS is waiting on clearance from the grantor agency.

2011 - 1105MOARRA, 1105MOHIMP, 1105MOINCT and 1105MOEXTN
2012 - 1205MOIMPL and 1205MOINCT

State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)

DFAS controls and procedures over the preparation of the Schedule of Expenditures of Federal Awards (SEFA) were not sufficient, and, as a result, errors on the SEFA were not prevented and/or detected.

Recommendation:

The DSS, through the DFAS, continue to implement controls and procedures to ensure the schedule of expenditures of federal awards is complete and accurate.

Status of Finding:

The DSS has implemented procedures to ensure the SEFA is complete and accurate. The division updates the SEFA quarterly, instead of annually. The DFAS assigned a staff person outside of the Grants Management section to review the SEFA before a final review and approval by the Deputy Director over Grants Management.

2012-10. Reporting

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2011 - G1102MOTANF and 2012 - G1202MOTANF
93.568 Low-Income Home Energy Assistance Program
2011 - G11B1MOLIEA and 2012 - G12B1MOLIEA
93.575 Child Care and Development Block Grant
2011 - G1101MOCCDF and 2012 - G1201MOCCDF
93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
2011 - G1101MOCCDF and 2012 - G1201MOCCDF
93.667 Social Services Block Grant
2011 - G1101MOSOSR and 2012 - G1201MOSOSR

State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)

The DFAS did not have adequate controls and procedures to ensure compliance with the Federal Funding Accountability and Transparency Act of 2006 (FFATA) and, as a result, several subawards were not reported as required. For 23 of 24 subawards reviewed, totaling approximately $35.3 million, FFATA information was either not reported or not reported timely.

Recommendation:

The DSS, through the DFAS, improve controls to ensure the subaward information required to be reported per the FFATA is complete, accurate, and submitted timely. In addition, the DSS should report the 2012 subawards not yet reported as required.

Status of Finding:

The DSS DFAS has implemented procedures to ensure the accuracy of FFATA reporting. The subawards for the Low Income Home Energy Assistance amendments were reported October 2012 against the federal fiscal year 2012 grant.

2012-11A. Child Care Eligibility and Payments

Federal Agency: Department of Health and Human Services
Federal Program: 93.575 Child Care and Development Block Grant
2011 - G1101MOCCDF and 2012 - G1201MOCCDF
93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
2011 - G1101MOCCDF and 2012 - G1201MOCCDF
93.713 ARRA - Child Care and Development Block Grant
2009 - G0901MOCCD7
State Agency: Department of Social Services (DSS) - Children's Division (CD), Family Support Division (FSD), and Division of Legal Services
Questioned Costs: $55,465

Controls over eligibility and provider payments were not sufficient to prevent and/or detect payments made on behalf of ineligible clients or improper payments to child care providers.

- The DSS could not locate the child care eligibility file for 5 of 60 (8 percent) cases reviewed. Child care payments made on behalf of these children and their siblings during the year ended June 30, 2012, totaled $51,884. We questioned the federal share of $42,026 (81 percent).

- Eligibility documentation was not sufficient to support a valid need for child care for 5 of 60 (8 percent) cases reviewed. Payments totaling $12,603, made on behalf of these children and their siblings, were unallowable and/or unsupported by

adequate documentation. We questioned the federal share of $10,208 (81 percent).

- For child care payments, 22 of 60 (37 percent) payments reviewed were not supported by adequate documentation and/or were not in compliance with DSS policies. Of these 22 payments, 6 were for cases which also lacked eligibility documentation and were included in the questioned costs above, or were absence and/or holiday payment errors and were questioned in Finding 2012-11B. Payments for the remaining 16 cases totaled an additional $3,989. We questioned the federal share of $3,231 (81 percent).

Recommendation:

The DSS, through the CD and FSD, resolve the questioned costs with the grantor agency and review and strengthen policies and procedures regarding child care eligibility determinations, provider payments, and case record documentation and retention. These procedures should include sufficient monitoring of eligibility determinations and provider payments, and follow-up on errors identified.

Status of Finding:

Corrective actions taken since the finding was issued follow:

Case Adjustments - Funds have been returned to the federal government or claims have been entered on either a parent or provider.

Case Review Tool - On July 27, 2011, the FSD presented to the CD a walkthrough of the base Case Review System (CRS) to which a child care component was added. A webinar providing detail on the child care component of the system was completed with the Rushmore Group (provider of the current CRS) on August 11, 2011. On September 2, 2011, the Rushmore Group began coding child care into the existing CRS. In the spring of 2012, the CD trained 232 supervisors and program managers on the CRS. The CRS was implemented in March 2012. The CD is utilizing output reports from the CRS to identify programmatic strengths and challenges and areas for policy, field and training improvement. The output reports for fiscal year 2013 have been reviewed and indicate a 95 percent accuracy rate statewide. In September 2013, a memorandum was issued to FSD staff clarifying expectations of supervisors as well as regional, program and county managers. Local FSD leadership is expected to monitor reviews for timely submission and ensure that quality and accuracy standards are met for each child care eligibility element. It was further clarified that supervisors are to conduct case reviews on approved child care assistance cases. Closed or rejected actions should only be reviewed if there are no approval or adjustment actions for a county, for the review month. Supervisors must ensure staff take necessary action to correct any cases determined to be incorrect, including entering any client claims discovered through the case reading process.

Updates have been made to the CRS, as a result of feedback from FSD management at the local level. These updates include changes to the child care worksheet; moving transitional child care documentation above sliding fee documentation; removal of the

IM-3 form as a causal factor, since it is no longer required; and changing the wording for the "Child Not Eligible" indicator to "Child Not Eligible to be Authorized."

We will continue to analyze data to identify programmatic strengths and weaknesses to determine which local FSD offices are in need of Program Enhancement Plans. A full statewide analysis is being prepared for the FSD and will be provided to FSD leadership. This analysis outlines areas for improvement with recommendations that are present statewide.

Self-Employment Training - Effective August 1, 2011 the FSD eligibility specialists (ES) and eligibility supervisors are required to complete the on-line Self-Employment Income Budgeting training course found in the Employee Learning Center. ES and eligibility supervisors were required to complete the training by December 31, 2011. The self-employment training is to assist in reducing the error rates for all income maintenance programs.

The CD will be using data made available through the CRS to determine whether the training has been beneficial to staff.

FSD Workers Online Child Care Training - The FSD administers the child care assistance program for income maintenance households. The majority of the families accessing child care receive services through their local FSD office. As of September 1, 2011, FSD frontline workers and supervisors were able to access online child care training through the FSD Training Unit intranet page. New FSD employees are required to successfully complete the online training prior to enrolling in the in-person Basic Child Care Orientation training. New staff access and complete the training through the DSS Employee Learning Center with the online assessment component. Effective April 1, 2013, ES and eligibility supervisors are required to retake the online Child Care Assistance training every two years after initial completion. The CD will be using data made available through the CRS to determine whether the training has been beneficial to staff.

Casework Reference Guide - The FSD Training Unit, in collaboration with Child Care Program and Policy staff, developed a Case Reference Guide (CRG) for FSD workers. The CRG is an informational tool that can be utilized by workers when processing applications and completing other case actions. The CRG does not replace the policy and forms manuals. It is intended to be an additional resource for workers. Workers are to use this guide in conjunction with the policy and forms manuals and memorandums. The CD is currently updating the CRG.

Child Care Manual Revisions - Early Childhood and Prevention Services Program and Policy staff is continually reviewing the child care manual for clarification and revision.

Calendar Year	Policy Memorandum Updates by Section	Practice Points/Alerts
2011	40	5
2012	82	1
2013	10	4

Child Care Steering Committee - During the summer of 2012, the DSS formed a steering committee to address child care issues. From this initiative there were four project teams designated to identify deficiencies and problematic areas within the Child Care program: Eligibility, Provider Issues and Policy/Payments, Program Integrity, and Information and Systems Technology. Each team made five or six recommendations related to the team's assigned area.

Status of Questioned Costs:

The DSS recovered some of the questioned costs via processing claims against parents or providers. The DSS completed the remaining adjustments on the September 30, 2013 quarterly report. The DSS is waiting on clearance from the grantor agency.

2012-11B. Child Care Eligibility and Payments

Federal Agency: Department of Health and Human Services
Federal Program: 93.575 Child Care and Development Block Grant
2011 - G1101MOCCDF and 2012 - G1201MOCCDF
93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
2011 - G1101MOCCDF and 2012 - G1201MOCCDF
93.713 ARRA - Child Care and Development Block Grant
2009 - G0901MOCCD7
State Agency: Department of Social Services (DSS) - Children's Division (CD), Family Support Division (FSD), and Division of Legal Services
Questioned Costs: $243,382

Controls and procedures over absence and holiday payments were inadequate. Our review of DSS expenditure data determined the DSS paid at least 680 providers on behalf of at least 2,900 children for absences and/or holidays in months with no attendance reported for the child during either the month reported or the subsequent month. Identified payments made on behalf of these children with fiscal year 2012 service dates totaled $300,471. We questioned the federal share, or $243,382 (81 percent). In addition, some payment edit checks in the Family Assistance Management Information System and Child Care Online Invoicing System (CCOIS) were not in place or were not operating effectively.

Recommendation:
The DSS, through the CD and FSD, resolve the questioned costs with the grantor agency and implement procedures to ensure payments for absences and holidays are allowable and reviewed in accordance with policy. In addition, system controls should be strengthened to ensure claimed absences are limited in accordance with policy and service dates claimed are timely.

Status of Finding:
The CD clarified payment and attendance policies to identify when it is appropriate to claim absences and holidays during a service month. The policy clarification has been shared with FSD staff and child care providers.

The CD implemented system enhancements to address the absence and holiday issue in the CCOIS. System edits have been implemented in the CCOIS to disallow a provider from billing and being paid for absences and holidays in a service month when actual care has not been provided to a child. These system edits were implemented in March 2013. The CD tested the system edit using payment data from the last three months of fiscal year 2013 and the first four months of data for fiscal year 2014.

Staff identified all child care providers paid for absences and holidays with no actual attendance, during service months covering fiscal year 2012 and fiscal year 2013. Claims have been entered against these providers, if claims were not already established during previous reviews. Staff will review all child care providers paid in fiscal year 2012 and fiscal year 2013 for payment of more than the allotted amount of absences and holidays. Claims will be entered if the claims have not already been entered during previous reviews. Provider information and billing patterns will also be reviewed for possible referral to Attendance and Payment Accuracy training and/or referral to the Division of Legal Services - Welfare Investigations Unit (WIU) for investigation.

Status of Questioned Costs:
The DSS entered claims against some providers with absence and holiday overpayments and is recouping funds from active providers. The DSS completed the remaining adjustments on the September 30, 2013 quarterly report. Some providers were referred to the WIU and additional claims for absence and holiday overpayments will be entered upon identification. The DSS is waiting on clearance from the grantor agency.

2012-11C. Child Care Eligibility and Payments

Federal Agency: Department of Health and Human Services
Federal Program: 93.575 Child Care and Development Block Grant
2011 - G1101MOCCDF and 2012 - G1201MOCCDF

93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
2011 - G1101MOCCDF and 2012 - G1201MOCCDF
93.713 ARRA - Child Care and Development Block Grant
2009 - G0901MOCCD7

State Agency: Department of Social Services (DSS) - Children's Division (CD), Family Support Division (FSD), and Division of Legal Services (DLS)

Controls over child care fraud investigations were not sufficient to ensure cases were investigated timely and effectively.

Recommendation:

The DSS, through the DLS, improve controls and procedures over fraud investigations, and ensure cases are investigated timely, appropriate actions are taken to recover overpayments, and eligibility is not approved when the client is not repaying.

Status of Finding:

DLS Investigations Unit management is working towards ensuring all investigations are completed in a timely manner. Management has conducted a case closing study for the period of January 2010 through September 2012 and established timeframes for closing cases and/or completing various types of investigations. The case closing study allowed management to develop new performance objectives which is expected to increase the accountability for both investigators and supervisors. These performance objectives have been added to both Investigator II and Investigator III job expectations and took effect with cases opened after March 1, 2013.

Management is currently conducting a statewide review of all open cases/investigations to address all case closing deficiencies and to ensure that all appropriate steps have been taken. Each investigation opened prior to January 1, 2011 will be reviewed and prioritized to ensure closure prior to the statute of limitations. Any case beyond the statute of limitations will be investigated and referred to the FSD or the CD for appropriate action. Management will conduct an annual review to ensure timely investigations.

As a result of the statewide review, management has been successful in identifying deficiencies in each region. The Assistant Chief of Investigations currently performs a bi-monthly review of all pending cases to ensure timely closings.

To ensure that provider child care investigations are completed timely, management created a specialized team of investigators in the St. Louis region. These designated investigators will exclusively handle provider child care fraud investigations. All open child care fraud investigations have been prioritized by opening date.

The DLS Investigations Unit has completed 23 child care provider investigations statewide from July 2012 through October 2013. Of these 23 investigations, 11 are pending claim determination, 6 have been referred for prosecution, and 6 cases were closed.

The absence and holiday investigations stemming from the results of this audit remain pending.

2012-12A. Child Care Reporting and Earmarking

Federal Agency: Department of Health and Human Services
Federal Program: 93.575 Child Care and Development Block Grant
2011 - G1101MOCCDF and 2012 - G1201MOCCDF
93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
2011 - G1101MOCCDF and 2012 - G1201MOCCDF
State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)

DFAS controls over the preparation of quarterly federal financial reports were inadequate and, as a result, some reports were inaccurate. Expenditure amounts reported on Child Care and Development Fund quarterly financial reports (ACF-696) for two quarters exceeded actual expenditures because formula errors in a supporting spreadsheet were not detected.

Recommendation:
The DSS, through the DFAS, improve controls and procedures to ensure quarterly federal financial reports are complete and accurate and reflect actual expenditures. Controls and procedures should include a supervisory review of quarterly reports sufficient to detect errors.

Status of Finding:
DSS staff review amounts to be claimed on federal reports to ensure accuracy. The DSS has revised the spreadsheets used to prepare the federal reports to change the formulas in question. In addition, the DSS is currently restructuring the cost allocation plan and is working with a contractor to develop an automated system for federal grant reporting. The DSS has contracted with a third party to help develop and implement a new cost allocation plan and system. The first phase/portion of the new cost allocation plan should be submitted by March 2014. The plan will be tested and finalized by June 30, 2014. The remaining portion of the plan will be implemented after successful completion of Phase 1. This should considerably reduce the possibility of errors as a result of manual data entry.

2012-12B. Child Care Reporting and Earmarking

Federal Agency: Department of Health and Human Services
Federal Program: 93.575 Child Care and Development Block Grant
2011 - G1101MOCCDF and 2012 - G1201MOCCDF
93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
2011 - G1101MOCCDF and 2012 - G1201MOCCDF
State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)

DFAS procedures needed improvement to ensure Child Care and Development Fund (CCDF) federal earmarking requirements (targeted funds) were met. As a result, the DFAS did not report meeting two of three targeted fund requirements for federal fiscal year 2012, and some reported amounts were not supported.

Recommendation:
The DSS, through the DFAS, ensure earmarking requirements are met and improve controls for tracking and reporting targeted fund expenditures. Controls should be sufficient to ensure targeted fund expenditures are allowable and supported.

Status of Finding:
Discretionary funds include targeted funds. The CCDF grant terms and conditions require states to liquidate the discretionary funds by the end of the third fiscal year. The DSS has sufficient controls in place to track and report all targeted fund expenditures, and ensure the requirements are met within the liquidation period.

2012-13A. Vocational Rehabilitation

Federal Agency: Department of Education
Federal Program: 84.126 Rehabilitation Services - Vocational Rehabilitation Grants to States
2011 - H126A110037 and 2012 - H126A120037
State Agency: Department of Social Services (DSS) - Family Support Division (FSD) - Rehabilitation Services for the Blind (RSB)
Questioned Costs: $5,903

The RSB did not adequately review employment services (ES) provider billings and other supporting documentation and did not obtain independent verification of employment of the clients prior to payment for job placement services for the Vocational Rehabilitation (VR) program. For seven of eight cases reviewed, payments of $7,501 were made even though at least one or more of the required reports or monthly logs was not submitted by

the provider. In addition, a monthly log for one case appeared to be a duplicate of the prior month's log with a client signature that was not consistent with other signatures made by the client in the file. We questioned the federal share of payments for ES services for these seven cases, or $5,903 (78.7 percent).

Recommendation:

The DSS, through the FSD and RSB, resolve the questioned costs with the grantor agency. In addition, the FSD should establish procedures to improve the billing review process for ES providers, conduct independent verification of job placement for VR clients, and ensure adequate supporting documentation is obtained for all expenditures. The RSB should also consider more closely reviewing the remainder of the billings reimbursed to this provider.

Status of Finding:

The RSB has enhanced communication procedures between counselors and rehabilitation assistants to ensure adequate supporting documentation and independent verification of job placement is obtained as part of the bill review process for ES providers. The RSB has provided training directed to vocational counselors, rehabilitation assistants, and district supervisors regarding reconciliation of invoices specifically for employment services with required reports, any other supporting documentation that services invoiced have been delivered, and resultant case record documentation prior to submitting those same invoices for processing. The DSS continues to communicate with the grantor agency to resolve the questioned costs and related federal reports.

Status of Questioned Costs:

The DSS is awaiting clearance from the grantor agency.

Contact Person: Mark Laird
Phone Number: (573) 751-4249

2012-13B. Vocational Rehabilitation

Federal Agency: Department of Education
Federal Program: 84.126 Rehabilitation Services - Vocational Rehabilitation Grants to States
2011 - H126A110037 and 2012 - H126A120037
State Agency: Department of Social Services (DSS) - Family Support Division (FSD) - Rehabilitation Services for the Blind (RSB)

The RSB did not always conduct or adequately document annual reviews of Individualized Plans for Employment (IPE) for the Vocational Rehabilitation (VR) program. Documentation of the annual review was not included in the case file for 14 of 47 (30 percent) of cases tested.

Recommendation:
The DSS, through the FSD and RSB, ensure annual reviews of the IPE for VR clients are performed and documented as required.

Status of Finding:
The RSB has partnered with the current contractor maintaining the RSB electronic case management system, known as System 7, to complete a pre-defined query (PDQ) to alert/prompt vocational counselors that an annual review of progress toward the current vocational goal is due. The RSB has provided training in the use of the PDQ to vocational counselors and district supervisors. The RSB has also developed best practice guidelines and provided training to vocational counselors and district supervisors on case record documentation of the annual review of progress toward the current vocational goal. This finding has been cleared by the grantor agency.

Phone Number: (573) 751-4249

2012-14A. Unallowable Costs and Maintenance of Effort

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2011 - G1102MOTANF and 2012 - G1202MOTANF
State Agency: Department of Social Services (DSS) - Family Support Division
Questioned Costs: $32,412,572

The DSS claimed unallowable state foster care, adoption assistance, and subsidized guardianship costs under the Temporary Assistance for Needy Families (TANF) program. The foster care, adoption assistance, and the subsidized guardianship costs claimed included non-emergency assistance, and the costs claimed for emergency assistance were not separately identified; therefore, all costs were unallowable. We questioned all state fiscal year 2012 costs for foster care, adoption assistance, and subsidized guardianship claimed under the TANF program, totaling $32,412,572 (100 percent federal share).

Recommendation:
The DSS resolve the questioned costs with the grantor agency and ensure prior approved program costs claimed under the TANF program comply with federal regulations.

Status of Finding:
The DSS disagreed with this finding. The DSS's previous response to the finding is unchanged. The DSS is using a manual, developed with the assistance of a third party, to evaluate whether costs are allowable under TANF and/or TANF maintenance of effort (MOE). This desk manual will help the DSS ensure that it has appropriately categorized costs as TANF or TANF MOE as the definitions of allowable costs vary between the two.

The desk manual was finished December 2012 and was submitted on January 24, 2013, to our grantor agency for review.

Status of Questioned Costs:
The status is still under discussion with the grantor agency.

Contact Person: Ami Patel
Phone Number: (573) 751-2170

2012-14B. Unallowable Costs and Maintenance of Effort

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2011 - G1102MOTANF and 2012 - G1202MOTANF
State Agency: Department of Social Services (DSS) - Family Support Division

The DSS included unallowable early childhood educational expenditures of the Missouri Pre-School Program totaling $14,307,089 in the amounts reported for the annual maintenance of effort (MOE) requirement for the Temporary Assistance for Needy Families (TANF) program.

Recommendation:
The DSS ensure expenditures claimed as MOE are allowable.

Status of Finding:
The DSS disagreed with this finding. The DSS's previous response to the finding is unchanged. The DSS is using a manual, developed with the assistance of a third party, to evaluate whether costs are allowable under TANF and/or TANF MOE. This desk manual will help the DSS ensure that it has appropriately categorized costs as TANF or TANF MOE as the definitions of allowable costs vary between the two. The desk manual was finished December 2012 and was submitted on January 24, 2013, to our grantor agency for review.

Additionally, during this process, the third party validated the allowability of the claim in question, citing 1999 TANF Final Rule (page 17825), which supports the DSS's contention that it claimed these funds correctly.

We would like to point out that federal TANF funds may also be used to pay for "nonassistance" activities (such as those identified in this finding) that meet the purposes of the program as given in Sections 401(a)(1)-(4) of the Social Security Act and 45 CFR Section 260.20. Federal TANF funds may also be used for activities that benefit non-needy families in some cases, e.g., activities that meet the purpose of either Section 401(a)(3) or (a)(4) of the Act. In this respect, there may be more flexibility in the expenditures that are allowable uses of federal funds than those that are allowable for MOE purposes. This is because federally funded services or benefits do not necessitate a

determination of financial eligibility (need) if they do not meet the definition of assistance. Thus, states may use federal TANF funds (in accordance with Section 404 of the Act) to provide "nonassistance" services or benefits to eligible individuals who meet the state's other, nonfinancial, objective criteria for the delivery of such benefits.

The status is still under discussion with the grantor agency.

Phone Number: (573) 751-2170

2012-14C. Unallowable Costs and Maintenance of Effort

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2011 - G1102MOTANF and 2012 - G1202MOTANF
State Agency: Department of Social Services (DSS) - Family Support Division
Questioned Costs: $24,213,235

For the quarter ended September 30, 2011, the DSS claimed costs under the Temporary Assistance for Needy Families (TANF) program, totaling $24,213,235, related to two scholarship programs: A+ Schools, and Bright Flight Scholarships. The DSS had not determined and documented there was any correlation between those programs and any of the four TANF purposes. We questioned the state fiscal year 2012 costs for scholarship programs that were claimed under the TANF program, totaling $24,213,235 (100 percent federal share).

Recommendation:
The DSS resolve the questioned costs with the grantor agency and ensure program costs claimed under the TANF program comply with federal regulations.

Status of Finding:
The DSS disagreed with this finding. The DSS's previous response to the finding is unchanged. The DSS is using a manual, developed with the assistance of a third party, to evaluate whether costs are allowable under TANF and/or TANF maintenance of effort (MOE). This desk manual will help the DSS ensure that it has appropriately categorized costs as TANF or TANF MOE as the definitions of allowable costs vary between the two. The desk manual was finished December 2012 and was submitted on January 24, 2013, to our grantor agency for review.

Additionally, during this process, the third party validated the allowability of the claim in question, citing 1999 TANF Final Rule (page 17825), which supports the DSS's contention that it claimed these funds correctly.

We would like to point out that federal TANF funds may also be used to pay for "nonassistance" activities (such as those identified in this finding) that meet the purposes

of the program as given in Sections 401(a)(1)-(4) of the Social Security Act and 45 CFR Section 260.20. Federal TANF funds may also be used for activities that benefit non-needy families in some cases, e.g., activities that meet the purpose of either Section 401(a)(3) or (a)(4) of the Act. In this respect, there may be more flexibility in the expenditures that are allowable uses of federal funds than those that are allowable for MOE purposes. This is because federally funded services or benefits do not necessitate a determination of financial eligibility (need) if they do not meet the definition of assistance. Thus, states may use federal TANF funds (in accordance with Section 404 of the Act) to provide "nonassistance" services or benefits to eligible individuals who meet the state's other, nonfinancial, objective criteria for the delivery of such benefits.

The DSS has changed its claiming process to claim these funds as TANF, instead of TANF MOE to align its claiming with the above information.

Status of Questioned Costs:
The status is still under discussion with the grantor agency.

Contact Person: Ami Patel
Phone Number: (573) 751-2170

2012-14D. Unallowable Costs and Maintenance of Effort

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2011 - G1102MOTANF and 2012 - G1202MOTANF
State Agency: Department of Social Services (DSS) - Family Support Division (FSD)

The DSS control system was not effective in ensuring the types of costs claimed under the Temporary Assistance for Needy Families (TANF) program or recorded as TANF maintenance of effort (MOE) met all federal regulatory and grant requirements which resulted in unallowable costs and unqualified sources of MOE claimed against the federal TANF grant.

Recommendation:
The DSS establish a formal control system to ensure the types of costs claimed under the TANF program or recorded as TANF MOE meet all federal regulatory and grant requirements.

Status of Finding:
The DSS disagreed with this finding. The DSS's previous response to the finding is unchanged. The DSS is using a manual, developed with the assistance of a third party, to evaluate whether costs are allowable under TANF and/or TANF MOE. This desk manual will help the DSS ensure that it has appropriately categorized costs as TANF or TANF MOE as the definitions of allowable costs vary between the two. The desk manual was

finished December 2012 and was submitted on January 24, 2013, to our grantor agency for review. The status is still under discussion with the grantor agency.

2012-15A. Eligibility and TANF Assistance Payments

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2011 - G1102MOTANF and 2012 - G1202MOTANF
State Agency: Department of Social Services (DSS) - Family Support Division (FSD)
Questioned Costs: $18,024

The FSD paid Temporary Assistance for Needy Families (TANF) benefits to some recipients who may not have been eligible or were ineligible for the full amount of TANF payments received.

- For 5 of 60 recipients tested, the eligibility specialist did not act promptly or properly on available information affecting recipient eligibility, resulting in payment of improper benefits. We questioned the amount of improper benefits paid to these five recipients, totaling $6,342 (100 percent federal share).

- For 4 of 60 recipients tested, the FSD identified unreported income and took action to close the case; however, the FSD did not establish claims for improper benefits until we inquired about the cases. We questioned the amount of improper benefits identified totaling $2,369 (100 percent federal share).

- For 4 of 60 recipients tested, the FSD did not maintain adequate documentation to demonstrate compliance with federal requirements related to eligibility for the TANF program. Payments made for these four cases during the year ended June 30, 2012, totaled $9,313, for which we questioned the entire amount (100 percent federal share).

Recommendation:
The FSD resolve the questioned costs with the grantor agency and strengthen controls to ensure information affecting eligibility is properly reviewed periodically and proper and timely action is taken regarding the information, including case closures and recoupment of overpayments if warranted. In addition, the FSD should maintain required eligibility documentation in all case files.

Status of Finding:
The FSD continues to ensure cases are thoroughly reviewed and acted upon in a timely manner for reported household income changes, at points of assistance application and at scheduled continued-eligibility reviews. The FSD Income Maintenance (IM) staff and

Family Assistance Management Information System staff is in the process of developing a Quarterly Wage Match (QWM) report for staff. IM Memo #53 (June 25, 2012) was issued to staff with detailed steps to process QWM within 15 days of receipt.

Status of Questioned Costs:
An adjustment will be made on the December 31, 2013, quarterly report. The DSS is awaiting clearance from the grantor agency.

Contact Person: Valerie Howard
Phone Number: (573) 526-6598

2012-15B. Eligibility and TANF Assistance Payments

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2011 - G1102MOTANF and 2012 - G1202MOTANF
State Agency: Department of Social Services (DSS) - Family Support Division (FSD)
Questioned Costs: $2,237

The FSD did not act upon some notices of non-cooperation from the Child Support Enforcement (CSE) Unit to sanction recipients of the Temporary Assistance for Needy Families (TANF) program, and the CSE Unit did not always notify the FSD of non-cooperating clients.

- The CSE Unit did not notify the FSD of 23 non-cooperating clients tested. Of the 23 cases reviewed, 6 recipients received overpayments totaling $1,199 during the year ended June 30, 2012. We questioned the federal share of overpayments totaling $1,199 (100 percent federal share).

- The FSD did not sanction 11 recipients when notified of referral for noncooperation, resulting in overpayments totaling $1,038 during the year ended June 30, 2012. We questioned the federal share of overpayments, totaling $1,038 (100 percent federal share).

Recommendation:
The FSD resolve the questioned costs with the grantor agency and develop additional controls to ensure sanctions are imposed on TANF recipients who fail to cooperate with CSE program requirements.

Status of Finding:
The FSD Income Maintenance (IM) section continues to work closely with the division's Child Support (CS) section to further ensure non-cooperation notifications from the Child Support section are promptly reviewed by IM staff for potential sanctions, and subsequently imposed as warranted. The FSD IM section implemented, with IM Memo #55 (July 3, 2012), a log to track the non-cooperation notifications received from the CS

section to ensure IM staff process the requests in a timely manner. In addition, the FSD CS section notified CS staff with CS Memo #20 (April 15, 2013) about non-cooperation procedures for TANF recipients. The electronic database, which will replace the paper log, is still in development.

Status of Questioned Costs:
An adjustment will be made on the December 31, 2013, quarterly report. The DSS is awaiting clearance from the grantor agency.

Phone Number: (573) 526-6598

2012-16A. TANF Work Participation and Sanctions

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2011 - G1102MOTANF and 2012 - G1202MOTANF
State Agency: Department of Social Services (DSS) - Family Support Division (FSD)

The FSD was not in compliance with certain work activity reporting requirements contained in the Work Verification Plan in effect for state fiscal year 2012. For 25 of the 60 cases we tested, the work participation hours were either not documented, not verified, and/or not reported correctly in accordance with the Work Verification Plan.

Recommendation:
The FSD develop additional controls to ensure work activities are adequately documented, verified, and reported in accordance with the FSD Work Verification Plan.

Status of Finding:
The Missouri Work Assistance (MWA) Case Management system was available for data entry June 28, 2011, and entries ceased in the Toolbox system on June 23, 2011. Inquiry access to Toolbox has continued to ensure necessary data was converted from Toolbox to the MWA System.

A case review form was developed for use by all MWA Coordinators to provide consistency when reviewing data entries and physical files of MWA participants each contractor is serving. This tool is used by all MWA coordinators effective July 1, 2011.

A Case Review Guide was written and shared with MWA staff August 2011 (and upgraded December 2011) to ensure the MWA coordinators understand where policies regarding the form are located in the policy manual and RFP to assist contractors with any incorrect findings. This guide and the case review form have also been shared with MWA contractors for use when reviewing their staff case files.

Effective August 1, 2011, MWA coordinators report to the FSD program manager responsible for the MWA program (before that time coordinators reported to regional FSD staff). The change in supervision ensures that positions are dedicated to the MWA program and coordinator accountability for assigned work by the MWA FSD program manager. All field managers and coordinators continue to be dedicated to the support of the MWA program and report to the MWA unit manager.

With this change, four teams have been designated to further develop the MWA program. These teams are:

- MWA System and Data - user guides, system enhancements, reports;
- MWA Policy and Training - policy manual updates, training materials;
- MWA Contracts and Monitoring - monitoring tools, compliance; and
- Special Projects and Research - MWA webpage, research to improve the work participation rates.

Tools developed by these teams will provide contractors with information to ensure participation activities meet work verification standards and supported with adequate documentation. Resources developed will also serve to increase the work participation rate for the state and provide performance measures to the contractors.

MWA staff completed targeted case file reviews in March 2012 for individuals participating in vocational education as an activity. The review was conducted to ensure contractors were obtaining actual attendance sheets (work verification) for this activity rather than entering hours based on a class schedule. This review, and regular case file reviews examine if work verification standards are met.

Phone Number: (573) 526-6598

2012-16B. TANF Work Participation and Sanctions

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2011 - G1102MOTANF and 2012 - G1202MOTANF
State Agency: Department of Social Services (DSS) - Family Support Division (FSD)
Questioned Costs: $393

The FSD did not have adequate procedures in place to ensure Missouri Work Assistance (MWA) contractors notified the FSD when Temporary Assistance for Needy Families (TANF) program recipients failed to meet work participation requirements. For 6 of 57 cases tested, recipients were not appropriately sanctioned for non-compliance with work participation requirements. We questioned the amount of the sanctions that were not imposed on these six recipients for the tested month of February 2012, which totaled $393 (100 percent federal share).

Recommendation:
The FSD develop additional controls to ensure TANF recipients failing to meet work participation requirements are sanctioned as required. In addition, the FSD should resolve the questioned costs with the grantor agency.

Status of Finding:
The FSD continues to perform the following activities to evaluate contractor compliance with notification requirements to ensure TANF recipients are sanctioned according to policy and procedure.

The case review form includes an evaluation of the conciliation and sanction referral process. This tool continues to determine appropriate and timely actions of the MWA contractors should TANF recipients fail to meet the work participation requirements.

The MWA field managers and coordinators review the mass participation screens for case managers in each office to identify those individuals that are not participating in an activity and work with the contractors to identify those that should be placed in conciliation and possibly sanctioned.

Quarterly, the MWA coordinators review a sample of participants that have no hours of participation, no conciliation activity, or no sanction in place. Individuals identified are shared with the contractor for immediate contact and initiation of the conciliation and sanctioning process to ensure participants failing to meet the work participation requirement are sanctioned as required. These reviews have continued through state fiscal year 2013. Contractors are provided with information on any case file discovered during these reviews that require attention.

Status of Questioned Costs:
An adjustment will be made on the December 31, 2013, quarterly report. The DSS is awaiting clearance from the grantor agency.

Phone Number: (573) 526-6598

2012-17. LIHEAP and CSBG Subrecipient Monitoring

Federal Agency: Department of Health and Human Services
Federal Program: 93.568 Low-Income Home Energy Assistance
2011 - G11B1MOLIEA and 2012 - G12B1MOLIEA
93.569 Community Services Block Grant
2009 - G09B1MOCOSR, 2010 - G10B1MOCOSR, and
2011 - G11B1MOCOSR
93.710 ARRA - Community Services Block Grant
2009 - 0901MOCOS2
State Agency: Department of Social Services (DSS) - Family Support Division

(FSD) - Low-Income Home Energy Assistance Program Unit and the Division of Finance and Administrative Services - Compliance and Quality Control (CQC) Unit

The DSS conducted close out reviews of the Low-Income Home Energy Assistance program (LIHEAP) and the Community Services Block Grant (CSBG) program funds provided to the Human Development Corporation of Metropolitan St. Louis (HDC), a former DSS subrecipient, following the identification of misused funds. No additional misuse of LIHEAP funds was identified by the DSS; however, the DSS identified payments for CSBG services totaling $660,239 for which the HDC lacked adequate supporting documentation. The DSS filed another claim for those costs in the HDC corporate dissolution case in August 2012. The DSS formed the CQC Unit in April 2012 to develop and implement extensive monitoring tools and processes for the fiscal review of all Community Action Agencies.

Recommendation:

The DSS continue to review its subrecipient monitoring efforts and determine if further improvements are needed.

Status of Finding:

The FSD and the DFAS completed the close out review for the HDC on August 30, 2012. DSS filed affidavits by the court established deadline of September 1, 2012, seeking recovery of funds. The DSS has provided the federal grantor agency with a copy of the close-out report for the HDC. The DSS has worked closely with the HDC to seek recovery of state property. Computer equipment and devices deemed state property are currently in the care, custody and control of the DSS. The DSS accepted responsibility for the security and preservation of the information contained on the hard drives and the removal of all information from the equipment before disposing of all equipment as deemed fit. Actions have been taken to preserve relevant information and will be taken to remove all confidential information to prepare the items for disposal according to state of Missouri property guidelines. On December 12, 2013, a check was issued to the DSS for the court ordered amount of $10,321 from the HDC liquidation funds.

The DSS strengthened its subrecipient monitoring efforts in April 2012 with the implementation of the DFAS CQC Unit. The DFAS CQC Unit continues to partner with the FSD to conduct monitoring of LIHEAP/CSBG subrecipients.

2012-18A. Participant Eligibility

Federal Agency: Department of Health and Human Services
Federal Program: 93.767 Children's Health Insurance Program
2010 - 1005MO5021 and 2011 - 1105MO5021

93.778 Medical Assistance Program
2011 - 1105MO5MAP and 1105MO5ADM
2012 - 1205MO5MAP and 1205MO5ADM

State Agency: Department of Social Services (DSS) - Family Support Division (FSD) and MO HealthNet Division (MHD)

Questioned Costs: $3,311,503

Controls were not adequate to ensure participants transferred to a new eligibility determination system were completely converted to the new system. As a result, some annual redeterminations were not conducted timely to evaluate the continued eligibility of participants in the Medical Assistance Program (Medicaid) and Children's Health Insurance Program (CHIP). Of 894 cases not converted in the Family Assistance Management Information System (FAMIS) as of October 2012, 747 cases did not receive a redetermination during the year ended June 30, 2012, as required. Participants in 584 of the 747 cases had payments made on their behalf after the date a redetermination was due. These ineligible payments totaled $5,207,584 for the year ended June 30, 2012. We questioned the federal share of the total payments, or $3,311,503 (63.59 percent).

Recommendation:

The DSS establish controls to ensure all participants transferred to the FAMIS are finalized in the system so annual redeterminations of eligibility will be automatically initiated. In addition, the DSS should resolve questioned costs with the grantor agency.

Status of Finding:

The FSD obtained weekly reports from the Information Technology Services Division (ITSD) listing the cases remaining in the controlled flow to be converted into the FAMIS. The cases listed on the reports were reviewed each week by MHD Program and Policy staff. After review of the cases, MHD Program and Policy staff followed up with county office staff to ensure the completion of the cases. The conversion of all cases that remained in the flow to be converted into FAMIS was completed April 8, 2013.

Local FSD office staff have completed reviews and provided documentation to FSD central office staff to verify eligibility for 270 of the 584 cases with payments made on their behalf after the date a redetermination was due. The FSD review concentrated on review of eligibility of the cases with the highest dollar amounts first, and then began review of the lower dollar amounts. Of the 270 cases receiving a full eligibility review, 232 cases were found to be eligible for payment and 38 cases were found to be ineligible for payment. Payments made on behalf of the cases that have been reviewed and determined eligible totaled $4,586,372 with $2,903,949 federal share. The FSD is continuing eligibility reviews on the remaining 314 cases.

This reduces the total federal questioned costs from $3,311,503 to $407,554. FSD can confirm that $73,243, or approximately 18 percent of the $407,554 in federal questioned costs, was ineligible for payment. The remaining $334,311, or approximately 82 percent in federal questioned costs, is still under review at this time.

Status of Questioned Costs:
The DSS will resolve the questioned costs with the grantor agency.

Contact Person: Kimberly O'Hara
Phone Number: (573) 751-8980

2012-18B. Participant Eligibility

Federal Agency: Department of Health and Human Services
Federal Program: 93.767 Children's Health Insurance Program
2010 - 1005MO5021 and 2011 - 1105MO5021
93.778 Medical Assistance Program
2011 - 1105MO5MAP and 1105MO5ADM
2012 - 1205MO5MAP and 1205MO5ADM
State Agency: Department of Social Services (DSS) - Family Support Division (FSD) and MO HealthNet Division (MHD)
Questioned Costs: $219,768

The MHD identified Medical Assistance Program (Medicaid) and Children's Health Insurance Program (CHIP) payments made on behalf of approximately 400 children from 2009 to 2012 who were later determined to be ineligible for these programs at the time of service; however, the MHD has not taken steps to resolve these questioned costs with the grantor agency. The ineligible payments made on behalf of the 122 participants with Medicaid or CHIP payments during the year ended June 30, 2012, totaled $345,602. We questioned the federal share of the total payments, or $219,768 (63.59 percent).

Recommendation:
The DSS resolve questioned costs regarding payments for ineligible children with the grantor agency.

Status of Finding:
Further investigation of these claims was performed to determine eligibility by program type based on the dates of service. Results of this review indicate a total of $96,163 ($61,150 federal share) was paid for claims on dates of service for which the children were ineligible.

Status of Questioned Costs:
An adjustment was made on the June 30, 2013 quarterly report. The DSS is awaiting clearance from the grantor agency.

Contact Person: Sheila Tannehill
Phone Number: (573) 751-8962

2012-18C. Participant Eligibility

Federal Agency: Department of Health and Human Services
Federal Program: 93.767 Children's Health Insurance Program
2010 - 1005MO5021 and 2011 - 1105MO5021
93.778 Medical Assistance Program
2011 - 1105MO5MAP and 1105MO5ADM
2012 - 1205MO5MAP and 1205MO5ADM
State Agency: Department of Social Services (DSS) - Family Support Division (FSD) and MO HealthNet Division
Questioned Costs: $13,824

The FSD did not obtain or maintain all documentation required to support eligibility for 6 of 60 cases reviewed.

- A signed application was not obtained or retained for five participants reviewed. Payments totaling $21,414 were made on behalf of these five participants during the year ended June 30, 2012. We questioned the federal share of the payments, or $13,617 (63.59 percent).

- Citizenship was not verified during determination of eligibility for one Medicaid participant reviewed. This participant's grace period expired May 21, 2012, at which time the eligibility should have ended. The ineligible payments made on behalf of this participant after expiration of the grace period totaled $326 during the year ended June 30, 2012. We questioned the federal share of the total payments, or $207 (63.59 percent).

Recommendation:
The DSS ensure all information required to determine participant eligibility is obtained, verified, and retained to ensure compliance with applicable federal requirements. In addition, the DSS should resolve questioned costs with the grantor agency.

Status of Finding:
The FSD reviewed the case record of the five participants identified and have since located a signed application allowable for Medicaid. Therefore, no adjustment to federal reports is necessary since the cases were determined to be correct.

On March 12, 2013, the FSD issued Income Maintenance memorandum IM-31 "MO HealthNet Case Maintenance" to clarify required documentation.

Effective January 1, 2014, the FSD will electronically verify eligibility factors using the Federal Services Data Hub exchange system through the Mo Eligibility Determination & Enrollment System for households requiring eligibility determinations based on modified adjusted gross income methodology, which will eliminate much documentation.

Status of Questioned Costs:
The DSS will resolve the questioned costs with the grantor agency.

2012-18D. Participant Eligibility

Federal Agency: Department of Health and Human Services
Federal Program: 93.767 Children's Health Insurance Program
2010 - 1005MO5021 and 2011 - 1105MO5021
93.778 Medical Assistance Program
2011 - 1105MO5MAP and 1105MO5ADM
2012 - 1205MO5MAP and 1205MO5ADM
State Agency: Department of Social Services (DSS) - Family Support Division and MO HealthNet Division

The DSS did not ensure at least four monthly supervisory case reviews of eligibility determinations were completed as required by internal policy for 4 of 60 eligibility specialists reviewed.

Recommendation:
The DSS ensure case reviews are performed as required by internal policy. In addition, the DSS should clarify written case review policies as needed to ensure case reviews are consistently and accurately completed.

Status of Finding
To clarify written case review policies and to ensure case reviews are consistently and accurately completed, on October 2, 2013, the DSS Family Support Division issued email memorandum #064, "Clarification of Case Review Expectations". The policy includes requirements for management to ensure case reviews are performed by supervisors.

2012-19A. Report Reviews

Federal Agency: Department of Health and Human Services
Federal Program: 93.767 Children's Health Insurance Program
2010 - 1005MO5021 and 2011 - 1105MO5021
93.778 Medical Assistance Program
2011 - 1105MO5MAP and 1105MO5ADM
2012 - 1205MO5MAP and 1205MO5ADM

State Agency: Department of Social Services (DSS) - MO HealthNet Division (MHD)

The MHD did not review daily exception reports of the Medical Assistance Program and Children's Health Insurance Program claims requiring post-payment reviews during the year ended June 30, 2012.

Recommendation:

The DSS review the report of claims that have been identified for post-payment reviews to ensure erroneous billings are properly recouped.

Status of Finding:

The MHD is currently working to verify the need for any exception to have a status of 4 (requiring a post-payment review). Unit program managers are being contacted to make the decision for their specific program areas. Thus far, we have received confirmation from the managers to change many status 4 exceptions to a different status because reporting the claims is not necessary. The size of the daily report has decreased from an average of 2,200 pages to 150 pages or less. Of this amount, many of the exceptions are utilized by Xerox through the CMSP contract (Clinical Management Services and System for Pharmacy Claims and Prior Authorization). The MHD is currently reviewing the CMSP exceptions to determine the need to continue using a status of 4.

One Unit (Third Party Liability) has chosen to continue to review the report for several exceptions which they feel may be of benefit to the MHD. If they decide it does not benefit the MHD, they will request a status change.

The next step in this process will be to submit a request to change the way report GMCM6500-R018 is produced. We want to eliminate repetition of claim Internal Control Numbers (ICN) on the report. Currently, if an ICN posts more than one exception (up to 25) and any of the exceptions have a status of 4, the ICN will repeat on the report for every exception listed. For example, the report lists ICNs for EXC 715. The status of this exception was changed to 5 at the request of the pharmacy unit supervisor but still is reported because other exceptions on the same ICN posted. We only want to see the ICN reported one time.

We continue our efforts to confirm the necessity of this report as it applies to our claims processing and payment systems today. We are finding that the majority of this report is simply outdated, while newer, more advanced system tools provide the required editing for the MHD.

2012-19B. Report Reviews

Federal Agency: Department of Health and Human Services
Federal Program: 93.767 Children's Health Insurance Program
2010 - 1005MO5021 and 2011 - 1105MO5021
93.778 Medical Assistance Program
2011 - 1105MO5MAP and 1105MO5ADM
2012 - 1205MO5MAP and 1205MO5ADM
State Agency: Department of Social Services (DSS) - MO HealthNet Division (MHD)

Reports identifying participants shown as eligible to receive Medical Assistance Program and Children's Health Insurance Program benefits in both Missouri and another state were generated incorrectly and were not fully reviewed by MHD personnel during the year ended June 30, 2012.

Recommendation:
The DSS update programming for the interstate match report to ensure Missouri eligibility dates are displayed correctly. In addition, the MHD should determine the full extent of the issue and determine how much, if any, in improper claims were paid due to this programming error. The MHD should also ensure matches are properly investigated in the future.

Status of Finding:
The programming for the interstate match report was updated in September 2012 to ensure Missouri eligibility dates are displayed correctly.

The DSS reviewed information during the time in which the reporting error occurred and determined no improper claims were made.

Contact Person: Kimberly O'Hara
Phone Number: (573) 751-8980

2012-20. Pharmacy Dispensing Fees

Federal Agency: Department of Health and Human Services
Federal Program: 93.767 Children's Health Insurance Program
2010 - 1005MO5021 and 2011 - 1105MO5021
93.778 Medical Assistance Program
2011 - 1105MO5MAP and 1105MO5ADM
2012 - 1205MO5MAP and 1205MO5ADM
State Agency: Department of Social Services (DSS) - MO HealthNet Division (MHD)
Questioned Costs: $6,319,991

The MHD periodically changed the rate paid to pharmacies for dispensing prescription drugs under the Medical Assistance Program (Medicaid) and the Children's Health

Insurance Program (CHIP); however, the state regulation authorizing these dispensing fees had not been updated since 1988, and the current rate paid exceeded a 1991 settlement agreement that increased the pharmacy dispensing fee. The MHD did not have adequate documentation to support the determination of the current dispensing fee structure. The MHD paid pharmacies base dispensing fees totaling $64,137,459 during the year ended June 30, 2012. Had the dispensing fees been paid in accordance with the 1991 settlement agreement, the fees would have totaled $54,198,803, a difference of $9,938,656. We questioned the federal share of the difference, or $6,319,991 (63.59 percent).

Recommendation:

The MHD ensure state regulations related to administration of the Medicaid program and the CHIP are updated when changes are justified, and resolve questioned costs with the grantor agency. In addition, the MHD should ensure increases in payment rates are adequately supported and actuarially sound, as required by federal guidelines.

Status of Finding:

The MHD disagreed with the finding. The MHD makes payments in accordance with the Department of Health and Human Services, Centers for Medicare and Medicaid Services approved state plan. Furthermore, pharmacy dispensing fees paid under Title XIX and CHIP are communicated in documents during the budget process and authorized by the General Assembly through the appropriations process.

The MHD will work with the grantor agency to resolve any questioned costs. The proposed rule was published on November 1, 2013, Volume 38, No. 21, page 1768, for the regulatory changes necessary to reflect the current pharmacy dispensing fee.

Status of Questioned Costs:

This finding is the subject of future discussions with the grantor agency, but no resolution has yet been finalized.

Historic Preservation Tax Credit Program

March 2014

Report No. 2014-018

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Historic Preservation Tax Credit Program

Background

The Department of Economic Development (DED) Missouri Historic Preservation Tax Credit (HPTC) program was established in 1998 to provide an incentive for the redevelopment of commercial and residential historic structures statewide. In fiscal year 2013, the HPTC had approximately $79 million in redemptions, making it the state's third largest tax credit program. The HPTC provides state tax credits (which may be used to offset tax liability) equal to 25 percent of eligible costs and expenses of the rehabilitation of approved historic structures. The HPTC credit can be transferred, sold or assigned, but is not refundable. Missouri is one of at least 30 states that have established state tax credits for historic preservation. Eighteen of these 30 states have established an overall annual program limit, of which Missouri has the highest. As part of our audit, we interviewed DED and State Historic Preservation Office officials and staff and various external parties. We obtained information from the National Trust for Historic Preservation and contacted applicable state agency representatives from several other states. We also reviewed ten tax credit project files, reviewed historical trends, and visited several completed HPTC projects.

Program Cost

With redemptions of over $1.1 billion in the past decade, Missouri's historic preservation program is the largest in the nation. Missouri leads the nation in qualified rehabilitation expenses for historic preservation purposes and program redemptions have exceeded fiscal note estimates. The General Assembly imposed a $140 million annual program limit, which went into effect in 2010, but Missouri could reduce this limit to $75 million, as recommended by the Governor's Tax Credit Review Commission November 2010 report, and still have the largest state historic preservation program in the nation.

Program Efficiency and Effectiveness

While the goals of the program are laudable in some respects, the state's HPTC program is an inefficient use of state resources. Only 49 cents to 85 cents of every tax credit dollar issued actually goes toward rehabilitation costs. The remainder goes to investors, tax credit brokers or syndicators, and the federal and state government in the form of income taxes. HPTC applicants generally sell the credit to third parties and use the proceeds to reduce construction-related debt, but the sale of a HPTC certificate creates taxable income, resulting in additional income tax due by the seller. Our audit identified several options to improve the efficiency of the current HPTC program, including making the HPTC refundable to make the credit more attractive to investors and reduce the incentive to sell the certificates at a discount; requiring credits be assigned to a state agency, local political subdivision or other not-for-profit organization that would sell the credits in

the market and grant the proceeds to the project; or eliminating the use of the state tax credits in favor of direct appropriations through a state agency to fund historical rehabilitation projects.

Too much time passes between project completion and the tax credit certificate issuance, which increases interest costs incurred by developers and reduces equity going toward construction.

The use of HPTC on owner-occupied residences may not be a needed, reasonable, or effective use of taxpayer dollars. The audit noted several instances where the credit was used for renovations to homes with high property values and high renovation costs. Because the tax credits represented a small percentage of total renovation costs, the credits may not have been a significant determining factor in the decision to redevelop the properties. The Governor's Tax Credit Review Commission December 2012 report recommended limiting the maximum tax credit allowed for owner-occupied residences to $50,000 and prohibiting the tax credit for owner-occupied residences if the home was purchased for more than $150,000.

The HPTC program is not subject to a sunset provision, and state law does not prohibit claiming the same project costs under two or more tax credit programs. This "stacking" of tax credits allows additional tax credits to be issued while no additional economic activity or state benefit is generated.

Program Administration

The DED could improve its oversight. State agency personnel do not conduct site visits, and the DED's cost certification work is inefficient and redundant. The DED does not monitor project approval time to ensure compliance with state law, and program activity projections appear to overstate the economic impact of the HPTC program. The DED's economic activity projections contain several flawed assumptions, and the DED does not verify or review the accuracy of the number of jobs reported on the preliminary application. The DED is not consistent with respect to the eligibility of certain costs, which often leads to disputes.

In the areas audited, the overall performance of this program was **Fair***

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Sara Parker Pauley, Director
Department of Natural Resources
and
Mike Downing, Director
Department of Economic Development
Jefferson City, Missouri

We have audited certain operations of the Historic Preservation Tax Credit Program in fulfillment of our duties under Chapter 29, RSMo and Section 620.1300, RSMo. The scope of our audit included, but was not limited to, the 2 years ended June 30, 2013. The objectives of our audit were to:

1. Analyze the costs and benefits of the program to determine if it is an effective and efficient use of state resources.

2. Evaluate the internal controls over significant management and financial functions related to the program.

3. Evaluate compliance with certain legal requirements related to the program.

4. Evaluate the economy and efficiency of certain management practices and operations.

For the areas audited, we (1) determined the current program structure is an inefficient method of funding preservation activities, but due to weaknesses in program data, other aspects of program effectiveness and efficiency could not be adequately determined, (2) identified deficiencies in internal controls, (3) identified no significant instances of noncompliance with legal provisions, and (4) identified the need for improvement in management practices and procedures.

Except for the matter discussed in the last paragraph of the Scope and Methodology Section, we conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Management Advisory Report presents our findings arising from our audit of the Missouri Historic Preservation Tax Credit Program.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Robert Showers, CPA, CGAP
In-Charge Auditor:	Travis Owens, MBA, CPA, CFE
Audit Staff:	Joshua Shope, M.Acct

Historic Preservation Tax Credit Program
Introduction

Background

The Missouri Historic Preservation Tax Credit (HPTC) program was established in 1998 under Sections 253.545 to 253.559, RSMo, and has no sunset or expiration date. The program was designed to supplement the federal HPTC program, which began in 1976. The purpose of the credit is to provide an incentive for the redevelopment of commercial and residential historic structures statewide. The Department of Economic Development (DED) administers the program and is responsible for the issuance of all tax credits based upon final certification of the rehabilitation project by the Missouri Department of Natural Resources, State Historic Preservation Office (SHPO). With approximately $79 million in redemptions in fiscal year 2013, the HPTC is the state's third largest tax credit program. See Appendix B for redemption information on all state tax credits.

The HPTC provides state tax credits equal to 25 percent of eligible costs and expenses of the rehabilitation of approved historic structures. An eligible property must be (i) listed individually on the National Register of Historic Places, or (ii) certified by the Missouri Department of Natural Resources as contributing to the historical significance of a certified historic district listed on the National Register, or located within a local historic district that has been certified by the U.S. Department of the Interior. Eligible costs include, but are not limited to, qualified rehabilitation expenses (QRE) as defined under the federal program. Generally QRE are limited to rehabilitation expenses of the original historic structure, while expenses for additions to the property, acquisition costs, and personal property are generally unqualified. To qualify for credits, QRE associated with the rehabilitation must exceed 50 percent of the acquisition cost.

The HPTC credit can be freely transferred, sold, or assigned, but is not refundable.[1] Section 253.557.1, RSMo, allows the credits to be carried back 3 years to offset prior tax liability or carried forward for 10 years to offset future tax liability. The tax credits can be applied against the taxes imposed pursuant to Chapter 143 and Chapter 148, RSMo, except for Sections 143.191 to 143.265 for the succeeding ten years, including the insurance company premium tax, and the financial institution tax. Any taxpayer is eligible to participate but nonprofit entities are ineligible.

Legislative changes

In 2009, the General Assembly passed legislation imposing new annual limits on the amount of tax credits authorized by the DED and established a more detailed, multi-step application and approval process. Effective July 1, 2010, the General Assembly imposed an annual program limit of $140 million. Prior to 2010 there was no annual limit for the HPTC program.

[1] The taxpayer must have a tax liability the credit can be offset against.

Approval process

Applicants submit a preliminary application to the DED detailing the project and its expected costs. The DED reviews the application for completeness and forwards the application to the SHPO for approval. After the SHPO approves the project, the DED notifies applicants of the authorization of a specific amount of tax credits. These authorizations of tax credits are the basis for calculating the annual dollar limit for the program.

Applicants have 2 years from the date of preliminary authorization to begin rehabilitation. When the rehabilitation project is completed, applicants are required to obtain a cost certification prepared by a Certified Public Accountant (CPA) licensed in Missouri. If total project costs are less than $250,000 the CPA must compile a schedule of project expenses. If total project costs are $250,000 or greater the CPA must perform a 100 percent examination of expenses and issue an opinion as to the eligibility of the expenses. The applicant then submits a final application and the CPA cost certification to the DED. After the SHPO performs a final review of the technical project work, the DED performs a review of the cost certification and issues a tax credit certificate equal to 25 percent of QRE.

Credits in other states

According to a December 2011 report issued by the National Parks Service, Missouri is one of at least 30 states that have established state tax credits for historic preservation. The following table summarizes statistics on state credit programs, including Missouri.

State Historic Tax Credit Programs

	Commercial Buildings	Owner-Occupied / Residential
States with credit programs	30	25
Credit percentage[1]	5 - 50%	20 - 50%
States with per-project cap	17	15
Per-project cap (minimum)	$25,000	$25,000
Per-project cap (maximum)	$5 million	$5 million

[1] Percent of QRE awarded in state tax credit.

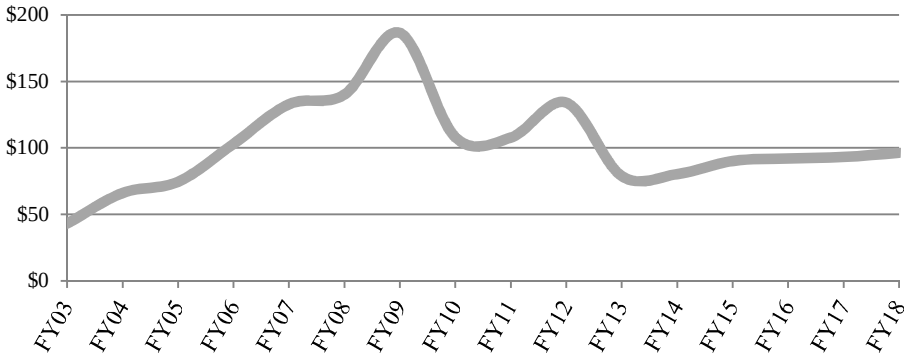
Source: National Trust for Historic Preservation and SAO analysis

Eighteen of 30 states, including Missouri, have established an overall annual program credit limit. The lowest annual limit we identified is $700,000, while Missouri's limit ranks highest among the states with an overall limit. In addition, 14 states (including Missouri) allow credits to be transferred or sold to third parties.

Projection of future credit activity

Based on actual tax credits awarded in recent years, we projected tax credit redemptions through 2018. The chart on the next page shows actual credits redeemed annually for fiscal years 2003 through 2013, and projected redemptions for 2014 through 2018. Based on our projections, redemptions are expected to stay below $100 million through fiscal year 2018.

Actual and Estimated Tax Credits Redeemed - Fiscal Years 2003 to 2018 (in millions)



Source: DOR data and SAO analysis.

Reporting

The DED provides the General Assembly and the public key program information for the HPTC program through the tax credit activity report.

Agencies administering tax credit programs are required under Section 33.282, RSMo, to submit the estimated amount of tax credit activity for the next fiscal year to the State Budget Director for submission to the Chairmen of the Senate Appropriations and House Budget Committees. In addition to the estimates of tax credit activity, the agencies must also include a cost-benefit analysis of the program for the preceding fiscal year. The annual estimates and cost-benefit analyses are submitted on forms called tax credit activity reports. State law requires the tax credit activity report be submitted to the State Budget Director by October of each year and to the Chairmen of the Senate Appropriation and House Budget Committees by January 1 each year.

Scope and Methodology

To gain an understanding of the performance of the HPTC program, we interviewed DED and SHPO officials involved in the application and approval process. We interviewed various external parties involved in all aspects of the program, including five developers and their representatives; three tax attorneys; an architect; two historic preservation consultants; and representatives of two syndication firms who specialize in buying and selling tax credit certificates, three CPA firms involved in the cost certification process, and a city development agency. Our review also included visits to several completed HPTC projects.

To determine whether required procedures were followed, we reviewed ten tax credit project files, interviewed DED staff, and reviewed documentation submitted by the applicants. The DED issued a total of $8.7 million in credits for these 10 projects. The projects included three owner-occupied residences and seven commercial buildings, including buildings used for residential purposes such as loft apartments.

To understand how the economic impact of the HPTC program is calculated, we met with representatives of the DED responsible for generating the economic impact estimates. We interviewed DED staff regarding assumptions provided by the companies to calculate the economic impact of the tax credit. We also interviewed a representative of a county assessor's office to understand the impact of rehabilitation on property values, and the lead researcher on a third-party study[2] of the economic impact of the Missouri HPTC.

To understand how Missouri's HPTC program compares to programs in other states, we obtained information from various sources, including the National Trust for Historic Preservation, and contacted applicable state agency representatives in Arkansas, Iowa, Kansas, Kentucky, Oklahoma, Illinois, Minnesota, Ohio, and Virginia. We also contacted a tax attorney familiar with the program in Minnesota.

To develop projections of future tax credit activity and liability, we reviewed historical trends in tax credits authorized, issued, and redeemed including data presented in Appendix A. We based projections for future years on historical trends, with an emphasis on recent history. Future activity is dependent on trends in the overall economy and is difficult to project.

To evaluate potential improvements to the program, we reviewed reports from the Tax Credit Review Commission. The commission was created by the Governor in July 2010 and charged with reviewing the state's tax credit programs and making recommendations for greater efficiency and enhanced return on investment. The commission released reports in November 2010 and December 2012.[3]

We obtained aggregate totals of annual tax credit redemptions from the DOR. In accordance with the Missouri Supreme Court decision in the case of *Director of Revenue v. State Auditor* 511 S.W.2d 779 (Mo. 1974), auditors are not provided individual tax returns. As a result, auditors were not able to verify the completeness and accuracy of redemption data provided.

[3] The December 2012 report included a supplemental report that we also reviewed.

Historic Preservation Tax Credit Program
Management Advisory Report
State Auditor's Findings

1. Program Cost

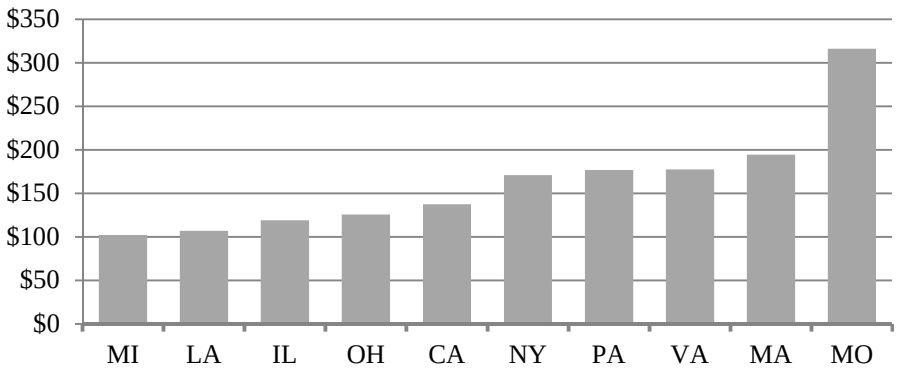
There is no dispute the Historic Preservation Tax Credit (HPTC) has been a significant factor in helping rehabilitate hundreds of the state's historic properties. However, with redemptions of over $1.1 billion in the past decade, Missouri's historic preservation program is the largest in the nation, has exceeded fiscal estimates provided to the legislature at its passage, and has a statutory annual limit that is so high that it does not contain actual spending.

Program activity

Missouri leads the nation in qualified rehabilitation expenses (QRE) for historic preservation purposes. Program redemptions have averaged $123 million per year for the past 5 fiscal years, and have totaled over $1.1 billion in the past decade. To compare Missouri's historic preservation program relative to other states we relied on federal historic preservation data. According to the National Park Service (NPS), an average of $316 million of QRE was reported in Missouri from 2001 through 2012. In contrast, the next highest state averaged $194.4 million (38.5 percent less).

The chart below shows the average annual federal QRE reported to the NPS for the period 2001 through 2012 for the top ten states nationally.[4]

Average Annual Federal QRE for Top Ten States - Years 2001 to 2012 (in millions)



Source: National Park Service data

As noted in Report No. 2010-47, *Tax Credit Cost Controls*, issued in April 2010, the HPTC program has greatly exceeded the original fiscal note estimates. The original fiscal note for Senate Bill 1 in 1997, when the program was established, estimated an annual cost of $14.3 million. Program redemptions have significantly exceeded this estimate since 2002.

Several historic preservation consultants we spoke with attributed the level of historic preservation activity in Missouri to the large supply of historic

[4] California, Michigan, and Pennsylvania do not have state credit programs. The remaining states shown have state credit programs with varying credit percentages as a percentage of QRE as noted above.

buildings in the state, particularly in the metropolitan areas, and the existence of the state credit, which makes the rehabilitations more financially feasible.

Program limits and exemptions

Missouri's program limit is the highest among the 18 states that have established annual limits. Under state law the program is limited to $140 million in authorizations each year, but projects receiving less than $275,000 in tax credits are exempted from the annual program limit. As a result, owner-occupied residential projects that have project limits of $250,000, are exempted when calculating the program limit. For fiscal year 2013, the DED authorized approximately $93.9 million in credits, of which $86.5 million was subject to the statutory cap. Tax credit authorizations have remained well below the $140 million statutory cap since the annual program limit was established in 2010, averaging about $91 million for the 3 fiscal years ended June 30, 2013. While 12 of 30 states with HPTC programs have not established an annual limit, those states have a significantly lower level of activity than Missouri.

Based on our review of other state's programs, if the General Assembly reduced the current $140 million annual statutory cap to $75 million, as recommended in the November 2010 report of the Tax Credit Review Commission, Missouri would still have the largest state historic preservation program in the nation.

Recommendation

The General Assembly re-evaluate the annual program limit for appropriateness.

2. Program Efficiency and Effectiveness

While the goals of the program are laudable in some respects, the HPTC program is an inefficient use of state resources. Only 49 cents to 85 cents of every tax credit dollar issued goes toward rehabilitation costs, with the remainder going to investors, tax credit brokers or syndicators, and the federal and state government in the form of income taxes. Several options exist to improve the efficiency and effectiveness of the credit. In addition, the program has no sunset provision and applicants can receive multiple tax credits for the same expenditures.

2.1 Inefficiency of credit

The HPTC program structure is inefficient in part because only a portion of each dollar of tax credit goes toward historic preservation. Based on information provided by tax attorneys, while the final user of the HPTC certificate typically pays a price in the low 90-cent range, for every dollar of HPTC issued, only 49 cents[5] up to 85 cents,[6] goes toward project costs. The

[5] Assumes credit is sold to a third-party for 90 cents on the dollar and the seller(s) is in the highest state and federal tax brackets applicable to tax year 2013.

remaining portion of each dollar is lost to the federal and state government in the form of income taxes generated from selling the credit, investors who demand a return, and tax credit brokers or syndicators who sell the credits.

Tax implications

HPTC applicants generally sell the credit to third parties and use proceeds from the sale to reduce construction related debt. The sale of a HPTC certificate creates taxable income, requiring the payment of additional income taxes by the seller. Attorneys we spoke with said several factors impact the net amount of equity going toward the project, including the current tax bracket of the individual(s) selling the credit, how long the credit was held before sale, and the selling price.

According to our interviews, it is relatively common for developers to use a loss partner, which allows developers to receive approximately 80 to 85 cents in equity for every dollar of credit. A loss partner has losses from other businesses that allows them to apply the taxable gains from selling the tax credit certificates without incurring a tax liability. Tax attorneys estimated over half of projects in Missouri were using the loss partner structure in recent years. However, recent IRS rulings have made the use of the loss partner structure more risky, reduced the number of developers using this structure, and increased the rate of return demanded by loss partners, resulting in reduced equity applied to projects. In the event a loss partner is not available or not used, developers typically receive approximately 49 cents for each dollar of state tax credit awarded after income taxes.

2.2 Options to improve efficiency

Our research identified several options to improve the efficiency of the HPTC model in place, including making the credit refundable, and allowing not-for-profit organizations to be involved in the process.

Refundable credit

Legislative changes to make the HPTC refundable would increase the attractiveness of the credit by allowing the holder of the certificate to receive the full value of the credit in the first year, regardless of their tax liability. According to tax attorneys interviewed, in addition to improving the overall attractiveness of the certificates to investors, a refundable credit reduces the necessity to sell the certificates, and would help increase the amount of equity going toward project expenses. Nine of 30 states (30 percent) offer a refundable provision with their state credit program. Attorneys indicated timing is a significant consideration because applicants prefer not to hold the credit until they file a tax return; thus, credits are often sold to third parties, if allowed, even if the state has a refundable provision.

[6] Assumes the use of a loss partner and assumes credit is first allocated to a partner, usually a limited partner investor entity, who has operating losses to offset the taxable gain generated when the credit is sold to a third party. The partner provides a capital contribution to the partnership in exchange for the credits, but the capital contribution is less than the market rate of the credit that is assumed to be 90 cents on the dollar.

Credit to government entities or not-for-profit organizations

Several tax attorneys suggested an alternative model to the tax law committee of the Tax Credit Review Commission. These alternatives are discussed in an October 2012 committee report. The model would require credits to be assigned to a state agency, local political subdivision, or other not-for-profit organization that would then sell the credits in the market and grant the proceeds to the project. Based on our discussions with the co-chair of the commission, this option further increases the complexity of partnership structuring and would not result in a significant increase in equity for developers who are already using a for-profit loss partner, though it would increase equity for others. Several developers told us this option would increase the supply of loss partner entities, which would subsequently increase equity to projects. Given the reduced usage of for-profit loss partners, this model appears to be a viable option to increase the amount of equity to projects.

Direct appropriation

Eliminating the use of state tax credits and utilizing direct appropriations through a state agency to fund historic rehabilitation projects would be the simplest and the most administratively efficient means of improving the efficiency of the state's historic preservation program. According to interviews with tax attorneys, not-for-profit organizations would need to be involved in a direct appropriation model to avoid federal tax consequences and for 100 percent of the state's money to go towards preservation. We identified one state, Minnesota, that offers a grant in lieu of credit option.[7] Minnesota officials indicated legislators primarily included this provision because it helps ensure a minimum price floor, not to minimize taxation, though it has been popular with not-for-profit organizations.

Conclusion

Improvements to the efficiency of the tax credit model are possible, however, state law would have to be modified. The various changes proposed would result in more tax credit dollars being used for the preservation of historic buildings, giving the state significantly higher return on its HPTC investment. If Missouri wishes to continue to make significant investments in the preservation of historic buildings, steps need to be taken to ensure state funds are invested as efficiently as possible.

2.3 Program design

Because the General Assembly established the HPTC program as an entitlement up to the current authorization limit; the DED is not allowed to limit tax credits to projects that represent a good investment for taxpayers, or to only projects that need tax credits to be financially feasible.

[7] The grant amount is equal to 90 percent of the value of what the tax credits would be, if that option is elected. This helps ensure minimum equity of at least 90 cents, ignoring potential tax consequences.

Some other state tax credits, including the Low Income Housing Tax Credit, are established statutorily as discretionary programs. While most states have established their historic credit program as an entitlement program to mirror the federal program, we identified at least two states that have a competitive project selection process. These two states require the administrative agency to review the merits of each proposed project and select the projects that are most beneficial.

Ohio distributes credits through a biannual competitive application process, ranking proposals based on economic benefit and regional distributive balance. Ohio officials indicated the competitive process ensures the limited amount of annual funding is distributed to the historic rehabilitation projects with the best merits. Additionally, they indicated this type of process allows agency officials and legislators to establish priorities for historic preservation activities. The priorities can be updated periodically based on need and market conditions. Arkansas also ranks applications according to various objective criteria.

A competitive award process coupled with a reduced program funding cap would help ensure only projects that represent a good investment receive funding.

2.4 Timeliness of credit issuance

The amount of time between project completion and the issuance of tax credit certificates is excessive, and results in increased project costs due to accrued interest costs. Additional interest costs incurred after completion of the CPA cost certification are not a qualified expense and do not result in any additional credits being issued; however, increased interest costs result in more equity going toward borrowing costs and less tax credit equity going toward the project, which further reduces the efficiency of the credit.

Average issuance time

The DED has established an informal benchmark that indicates the final review should take no longer than 60 business days. Based on our review of a sample of projects, the DED does not meet this benchmark. For the 10 projects we reviewed the final review took the DED between 3 and 12 months, with an average of 6 months. A portion of this time represents time to obtain the SHPO's final approval and time for the applicant and/or CPA to answer questions or submit additional documentation.

A statutory change to allow a partial issuance of tax credits upon the completion of the CPA cost certification would help reduce project interest costs, allowing more of the tax credit to go toward project costs. The Tax Credit Review Commission's December 2010 report recommended the use of a partial tax credit certificate after the applicant submits a complete application and the SHPO provides final approval of the completed work. The recommended partial issuance would be calculated as a percentage of the total amount of credits for which the applicant is eligible as reported in

the CPA cost certification. The DED could then issue the remaining credit amount after the final review of the cost certification.

By adopting provisions that would require a partial issuance of credits, the General Assembly can help ensure more equity goes toward projects, ensure projects are not put at risk of failure due to financial constraints, and make the program more attractive to developers.

2.5 Owner-occupied residences

The use of the HPTC on owner-occupied residences does not always appear to be a needed, reasonable, or effective use of taxpayer dollars. We reviewed two owner-occupied projects that received credits for rehabilitating lavish and expensive private residences. These two projects resulted in a minimal economic impact and, based on the level of rehabilitation expenses, the tax credit was likely not a dispositive factor in the applicants' decision to perform the rehabilitation.

In 2010, the DED issued $250,000 in credits to an applicant who rehabilitated the top portion of a 35-story building to create a private luxury residence. A different applicant previously received credits for rehabilitating the building's exterior, including windows, and remaining floors of the building. The applicant purchased the upper four floors of the building for $2 million and reported about $1.2 million in qualified rehabilitation expenditures. The residence is approximately 6,100 square feet and includes a private elevator, rooftop garden, movie theatre, and various other amenities. Total rehabilitation costs, including expenditures not eligible for tax credits, averaged about $251 per square foot, which is extremely costly as compared to other projects reviewed. The total credits awarded on this project represent approximately 8 percent of the final cost of the residence and renovation and, therefore, do not appear to have been a significant cost driver on the project.

In 2011, the DED issued about $296,000 in credits to an applicant who renovated a 3-story, 5,400 square foot home in an affluent neighborhood in a metropolitan area. The applicant purchased the home in 1993 for nearly $300,000 and reported about $1.2 million in qualified rehabilitation expenditures. The home has a fair market value of approximately $434,000. The majority of qualified expenditures consisted of upgrades to the electrical, mechanical, and plumbing systems to comply with current building codes, replacement of a heavily damaged slate roof, and repair of extensive fire damage to the third floor of the home. Total rehabilitation costs, including expenditures not eligible for tax credits, averaged about $238 per square foot, which is extremely costly as compared to other projects reviewed. Due to the high level of rehabilitation costs the owner invested in the property, the tax credit does not appear to have been a significant cost driver on the project.

Officials with a city development agency and several developers indicated the option to use this credit for owner-occupied residences is critical to the continued success of the program. While there are significant benefits to using the credit as an incentive to revitalize historic neighborhoods, particularly those with a high percentage of vacant or dilapidated homes, it does not appear the two projects discussed above fit within that category.

Other states

Although owner-occupied residences do not qualify for federal historic tax credits, six of the nine other states we obtained information from issue state rehabilitation credits for owner-occupied residences. Oklahoma, Illinois, and Minnesota do not issue credits for owner-occupied residences.

Per-Project Cap (Owner-Occupied)

State	Tax Credit Per-Project Limit
Arkansas	$25,000
Kentucky	$60,000
Missouri	$250,000
Ohio	$5,000,000
Iowa	No limit
Kansas	No limit
Virginia	No limit

The Tax Credit Review Commission's December 2010 report recommended the General Assembly reduce the maximum tax credits allowed for owner-occupied residences to $50,000 per residence, a significant reduction from the current $250,000 limit. Additionally, the Commission recommended the General Assembly prohibit tax credits for owner-occupied residences if the home was purchased for more than $150,000. If enacted these changes would help ensure the credit is used to revitalize historic neighborhoods, particularly those with a high percentage of vacant homes, rather than be used to rehabilitate homes with high market values.

2.6 Sunset provision

As noted in Report No. 2010-47, *Tax Credit Cost Controls*, issued in April 2010, state law does not include a sunset provision for many tax credits, including the HPTC program. The Sunset Act, passed in 2003, provides for new programs to sunset after a period of not more than 6 years unless reauthorized by the General Assembly or the program is exempted from the Sunset Act. The Act requires the Committee on Legislative Research to review applicable programs before the sunset dates and present a report to the General Assembly regarding the sunset, continuation, or reorganization of each affected program. However, the HPTC program was created prior to the Sunset Act and is exempted.

By adopting a sunset provision for the HPTC program, the General Assembly can better determine whether the program is achieving its intended purpose and whether program funding should be increased, decreased, or eliminated.

2.7 Use of multiple incentives

As noted in Report No. 2012-117, *Division of Business and Community Services*, issued in September 2012, state law does not prohibit claiming the same project costs under two or more tax credit programs. This "stacking" of tax credits can be lucrative for developers and additional tax credits are issued while no additional economic activity or state benefit is generated.

Companies may claim certain project costs under the Historic Preservation, Low Income Housing, Brownfield Remediation, and the Neighborhood Preservation Tax Credit programs. Between fiscal years 2000 and 2011, the state issued tax credits totaling approximately $738 million for 117 projects that received funding from two or more of these tax programs.

The Tax Credit Review Commission's December 2010 report recommended changes when Brownfield, Historic Preservation, and Low Income Housing Tax Credits or any combination thereof are awarded to a single project. The Commission recommended a specific ordering process and Brownfield credits would be calculated first based on eligible remediation expenditures. Next, the eligible Historic Preservation credit expenditures would be reduced by the amount of Brownfield credits. Finally, the Brownfield and Historic Preservation credits would be deducted from the total expenditures eligible for the Low Income Housing Tax Credit. The DED should work with the General Assembly to establish cost containment provisions regarding project costs claimed under multiple tax credit programs.

Recommendations

The General Assembly:

2.1&
2.2 Consider modifying state law to improve the efficiency of the current tax credit model.

2.3 Require the DED to evaluate the merits of potential projects before credits are authorized.

2.4 Require the DED to issue partial credits upon submission of a completed cost certification and confirmation of SHPO approval.

2.5 Establish more strict eligibility criteria for owner-occupied residences receiving historic credits.

2.6 Establish a sunset provision for the HPTC program.

2.7 Establish cost containment provisions regarding project costs claimed under multiple tax credit programs.

3. Program Administration

Opportunities exist to improve the administration of the HPTC program. Oversight of projects could be improved, the DED does not have adequate controls to ensure reported costs are reasonable, and the DED needs to

ensure cost eligibility criteria are applied consistently. In addition, the economic impact of the HPTC being reported to the General Assembly does not accurately measure the economic impact of the program.

3.1 Project oversight

The DED's oversight of projects could be improved. State agency personnel do not conduct site visits to verify work has been completed, and the cost certification work performed by DED is inefficient and redundant.

At the completion of the project the SHPO and DED review before and after photographs and floor plans, and determine whether the completed work is consistent with the applicant's rehabilitation plan and the Secretary of the Interior's Standards for Rehabilitation. The DED then reviews the CPA's cost certification and determines the final qualified expenditures and the allowable tax credit amount. The DED's review of the cost certification includes reviewing selected invoices for projects with total costs of $250,000 or greater and all invoices for projects with total costs of less than $250,000.

Site visits and square footage cost analysis

Neither DED nor SHPO personnel typically perform site visits of completed projects to verify the planned work has been completed, or perform square footage cost analysis to determine if costs claimed appear reasonable. Officials from both agencies said they typically do not perform site visits, though SHPO officials stated they will perform a site visit if they have concerns regarding the completed work. DED officials indicated they do not analyze costs on a square foot basis or compare categories of costs with past projects of similar size. DED officials also indicated the cost of historic rehabilitations can vary greatly and there is no industry standard regarding cost per square foot for a historic building.

Virginia fraud

Officials in Virginia indicated they recently discovered several large cases of developer fraud involving at least three developers that resulted in millions of dollars in tax credits issued for fraudulently reported expenditures. These developers had submitted cost certifications prepared by independent CPA firms; however, the CPA firms did not detect the falsified invoices and are not required to assess the reasonableness of costs or perform independent confirmations of the invoiced amounts. Virginia officials indicated the majority of fraudulent expenditures consisted of items that would not be readily identifiable in the photographs submitted such as mechanical, electrical, and plumbing repairs or upgrades. Virginia officials indicated the fraudulent projects were identified when they calculated a cost per square foot for the projects that was significantly more than expected based on past rehabilitations of similar size.

Virginia now requires a site visit by a state construction inspector prior to the issuance of the state tax credits. The inspector meets with the developer to discuss the work completed on the project and then reviews the project

costs as reported by the CPA to determine if there are any obvious discrepancies and whether reported costs appear to be reasonable given the scope of the rehabilitation, age of the building, size of the building, and other factors. Additionally, Virginia officials now calculate the cost per square foot for every project and will perform additional review if this calculation exceeds a certain threshold, which may include additional review of invoices or confirmation of invoiced amounts directly with the contractor or vendor.

Utilizing a risk-based approach to project oversight and performing site visits to verify project costs, and reducing the amount of cost certification work performed, would allow the DED to increase the efficiency and timeliness of the review process. Keeping a database of previous costs and calculating average costs by type and size of project would help the DED identify projects with potentially inflated costs, and would help determine if project costs are reasonable, or whether a project should be subject to additional review. Current DED procedures that duplicate a significant portion of the CPA cost certification process do not appear to be an efficient use of DED resources.

3.2 Average approval time

The DED does not currently monitor project approval time to ensure compliance with state law. Statutory changes in 2009 included provisions mandating timely issuance of credits. Section 253.559.8, RSMo, requires the DED to issue credits within 12 months of project completion. This standard was not met for two of ten projects reviewed; however, these applicants did not submit the final application and cost certification until 4 months and 9 months after project completion. The DED analyzed approval time during 2011 and found the average approval time, which includes the time from when the applicant submits the final application and cost certification to when credits are issued, had decreased from 6.8 months to 6.4 months in fiscal year 2010 and decreased again to 5 months in fiscal year 2011. In 2012, the DED increased the number of cost reviewers and modified procedures in an effort to reduce the time necessary for the final review, but because the DED has not continued to monitor approval time, it is not clear if the increased staffing has improved approval time by any significant measure.

Officials stated it is not always feasible for the DED to meet the statutory deadline due to delays in the applicant's submission of the cost certification or significant delay by the applicant in responding to questions or additional requests. Several CPA firms indicated it generally takes them several months to complete the cost certification, though one firm indicated the larger projects can take up to a year to complete.

Monitoring approval time on an ongoing basis would allow the DED to assess compliance with state law and help ensure projects are approved in a timely manner.

3.3 Program activity projections

Program activity projections reported to the General Assembly annually on the tax activity report appear to overstate the economic impact of the HPTC program. While the primary purpose of the HPTC program is to redevelop state historic structures, reliable and reasonable economic projections should be reported to the General Assembly.

The fiscal year 2012 tax activity report for the HPTC indicates that over the next 10 years the projects authorized for credits in fiscal year 2012 will return $0.41 in state revenue for every dollar of tax credit authorized, create $2.2 billion in new economic output, and create approximately 2,400 new jobs. The economic activity projections reported are based on data provided in the preliminary project applications. Applicants must report the estimated project construction expenditures and estimated number of permanent jobs that will be created as a result of the project.

Level of activity

The economic activity projections provided by DED contain several flawed assumptions regarding the level of activity. DED projections assume *no* historic preservation activity would take place if not for the state credit, and also assume 100 percent of authorizations will be utilized.

With the existence of the federal historic credit, the assumption of zero historic preservation activity in the absence of the state program is unreasonable. While there is little doubt the existence of a state program increases the amount of preservation activity in a given state, some level of activity would occur without a state program. Several states including Michigan, California, and Pennsylvania have no state tax credit program but still ranked among the top ten states nationally for average federal QRE. Moreover, while there were 14 projects completed in the first year of Minnesota's recently implemented historic preservation program, there were 4 projects completed in the previous year when no state credits were available.

DED projections assume 100 percent of authorizations will be utilized; however, our review of HPTC program data shows a small portion of original authorizations are not utilized since some projects require less tax credits than planned or do not proceed with construction. It is unreasonable to assume all applicants will complete their projects because some applicants voluntarily withdraw or fail to proceed with construction for various reasons such as lack of financing, changes in economic conditions, or discovery of additional damages to the building.

Number of jobs

The DED does not verify or review the accuracy of the number of jobs reported on the preliminary application. While the number of jobs used for economic impact purposes is intended to represent only new, permanent jobs, it is not clear whether applicants may be reporting jobs that existed in the same building prior to the rehabilitation or reporting jobs for businesses that move from a nearby location. For example, the preliminary application for one project reviewed reported 30 new jobs would be created; however, this amount included jobs of a business that moved into the renovated space from its existing location across the street. In addition, while the DED report included 30 jobs based on the preliminary application, the applicant reported only 17 jobs on the final application submitted after the project was completed, a decrease of about 43 percent.

3.4 Cost eligibility

Several developers, historic preservation consultants, and representatives of CPA firms indicated they commonly observe disagreements between applicants and the DED regarding eligibility of certain costs. These parties indicated it is common for applicants to report higher QRE when applying for the federal credit than the state credit because the DED is inconsistent in what it considers QRE. Minor differences between the federal and state QRE are expected because the DED has chosen to apply percentage limits to certain types of soft costs; however, parties we spoke to said other differences including types of costs eligible are not reasonably explained by the DED.

Missouri's definition of QRE uses the federal definition as a baseline, and permits certain other expenses to qualify. The federal rehabilitation tax credit program defines qualified rehabilitation expenditures in 26 USC 47(c)(2)(A) of the Internal Revenue Code of 1986. Generally, permanent improvements made within the footprint of a building are considered eligible costs and soft costs, such as architect's fees, that are directly related to the rehabilitation also qualify. The DED publishes a list of potentially qualifying and non-qualifying expenditures in application materials, though this information is not intended to be a comprehensive list.

DED officials indicated they allow the developer and CPA firm to submit additional documentation to support why disputed expenditures should be considered QRE, but the DED retains the right to make the final decision. The SHPO indicated disagreements with applicants involving approval of proposed or completed rehabilitation work are somewhat rare.

To ensure developers are treated fairly and to eliminate future disagreements, the DED should review procedures currently in place to ensure cost eligibility decisions are consistent.

Recommendations

The DED:

3.1 Implement procedures requiring mandatory site visits and square footage cost analysis.

3.2 Monitor approval time on an ongoing basis to assess compliance with timeframes required by state law.

3.3 Establish procedures to ensure the economic benefit projections reported to the General Assembly reflect the most realistic assessment of program performance.

3.4 Review procedures to ensure decisions regarding the eligibility of costs are consistent.

Auditee's Response

3.1 DED and SHPO oversight of the Missouri Historic Preservation Tax Credit Program is designed to ensure that tax credits are issued only for eligible costs and expenses, including through independent verification of cost certification documentation, review of extensive photographic evidence of completed work, and periodic site visits by SHPO. DED will work with SHPO to evaluate additional opportunities to employ site visits in the oversight process. However, there is currently no legal authority to deny tax credits based on a mandatory cost per square foot limit, making the value of such an analysis is unclear in light of the numerous other oversight techniques employed to detect fraud and refer any such fraud for prosecution.

*One such example is the independent verification of documentation supporting the cost certification submitted by a tax credit applicant's CPA. DED disagrees with the audit's statement that such verification is "inefficient and redundant" and the suggestion that DED should instead rely on the applicant's CPA in determining the amount of tax credits to issue. Indeed, DED is required to independently verify all costs and expenses in order to faithfully discharge its duties under Section 253.559.7, RSMo (requiring that "the approval of all applications and the issuing of certifications of eligible credits to taxpayers **shall be performed by the department of economic development**.") (emphasis added).*

*3.2 DED issues Historic Preservation Tax Credits in compliance with state law and will continue to monitor approval time on an ongoing basis to assess compliance. Section 253.559.8, RSMo, provides that tax credits "shall be issued in the final year that cost and expenses of rehabilitation of the project are incurred **or** within the twelve-month period immediately following the conclusion of such*

rehabilitation." (emphasis added). Pursuant to this provision, DED issues tax credit certificates for the year of project completion following review of a complete application and supporting documentation. Approval times are directly impacted by the completeness of the application and supporting documentation submitted by the applicant to substantiate the eligibility of costs and expenses of rehabilitation. For example, as pointed out in the audit, it can take CPAs up to a year to submit the necessary documentation to DED, which directly impacts the time in which tax credits are issued.

3.3 The economic benefit projections performed by DED related to the Missouri Historic Tax Credit Program are performed in accordance with Section 33.282.2, RSMo and based on information submitted by tax credit applicants pursuant to Sections 253.550 to 253.559, RSMo and the Tax Credit Accountability Act of 2004, Sections 135.800 to 135.830, RSMo.

3.4 DED administers the Missouri Historic Preservation Tax Credit Program in accordance with state law to ensure that tax credits are only issued for costs and expenses that are actually eligible for tax credits and not simply for all costs and expenses an applicant claims for tax credits. The State Auditor is correct that developers will occasionally try to claim tax credits for costs and expenses that are not eligible for tax credits under state law, which does create disagreements between DED and developers when such claims are denied. Based on a review of files from the past two years, some of the most common reasons for a portion of claimed tax credits being denied include that the credits were claimed for non-qualifying purchases such as supplies and equipment (i.e. tangible personal property) or that the applicant failed to provide proofs of payment for the costs and expenses claimed. As indicated in the audit, DED affords applicants every opportunity to provide documentation substantiating the claimed costs and expenses and will continue to do so in order to ensure consistency.

Auditor's Comment

3.1 We are not suggesting the DED should "deny tax credits based on a mandatory cost per square foot limit," but that the DED could improve the efficiency of program oversight by implementing a more risk-based approach by making site visits and reviewing costs analytically. In addition, the DED's contention that Section 253.559, RSMo, requires it to independently verify all costs and expenses is not accurate as the statute requires the DED to determine the amount of eligible costs but does not specify the procedures the DED must utilize to make that determination.

Missouri Historic Preservation Tax Credit Activity

The following table lists the Missouri Historic Preservation tax credits authorized, issued, and redeemed for fiscal years 2003 through 2013. The figures presented reflect amounts provided as of our fieldwork completion and may not reflect amounts reported by DED on past or future tax credit activity reports.

Fiscal Year		Amount Authorized	Amount Issued	Amount Redeemed
2003	$	106,928,335	96,906,086	43,153,986
2004		107,245,788	76,348,131	66,089,980
2005		94,161,535	80,192,409	74,532,355
2006		208,213,201	107,470,280	103,134,226
2007		142,714,495	172,693,813	132,841,728
2008		133,125,322	161,621,537	140,111,002
2009		181,629,134	119,914,948	186,426,164
2010		55,579,398	107,196,640	107,973,542
2011		80,108,743	116,244,410	107,767,393
2012		98,542,596	105,272,651	133,937,747
2013		93,923,652	71,495,994	78,814,711
Totals	$	1,302,172,199	1,215,356,899	1,174,782,834

Missouri State Auditor

Review of 2013 Property Tax Rates

March 2014

Report No. 2014-019

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the Review of 2013 Property Tax Rates

Background	Section 137.073, RSMo, requires the State Auditor's office to annually review the local property tax rates of all taxing authorities in the state to determine whether taxing authorities levied taxes in accordance with Missouri law and adjusted property tax rates to keep property reassessments from affecting revenue.
Results	We reviewed 4,844 property tax rates for 2,823 taxing authorities. The following three taxing authorities, all in St. Louis County, levied tax rates greater than the tax rate certified, resulting in excess property taxes levied of $4,123: Elmwood Park Street Light District, Kinloch Fire Protection District, and the City of Kinloch. In accordance with Section 137.073.6(2), RSMo, we referred the three non-compliant taxing authorities to the Missouri Attorney General's office.
Additional Comments	The State Auditor's office has no authority to determine or review individual tax assessments. All individual tax assessment matters are the responsibility of the county assessor and board of equalization. Appeals to the state on tax assessment matters are handled by the Missouri State Tax Commission.

Because of the limited objective of this review, no overall rating is provided.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The State Auditor's office is required by Section 137.073, RSMo, to annually review local property tax rates of all taxing authorities in the state. The primary objectives of this review were to determine whether:

1. Local governing boards levied taxes in accordance with the Missouri Constitution and state law.

2. Local property tax rates were adjusted to ensure property reassessments were revenue neutral.

Reassessments of existing property are not intended to increase property tax revenue but to equitably reallocate the existing tax burden based on the relative value of property owned by taxpayers.

For 2013, we received substantiating data and issued a finding on 4,844 property tax rates of 2,823 taxing authorities. Three taxing authorities levied tax rates that exceeded the tax rate certified, resulting in excess property taxes levied of $4,123. The number of taxing authorities levying a non-compliant tax rate is 0.11 percent of all taxing authorities.

Property taxes are the main source of revenue for many of Missouri's special purpose political subdivisions and county boards. The bulk of property taxes, however, fund public schools. General acceptance of these taxes is dependent on fair and equitable assessment practices and public understanding and input regarding the setting of rates. If the tax burden is increased without voter approval, confidence in the fairness and assessment practices is often eroded.

Thomas A. Schweich

Audit Staff:	Dana Wansing, MPA

2013 Property Tax Rates Results

Summary

The State Auditor received substantiating data and reviewed 4,844 property tax rates for 2,823 taxing authorities. Of the rates reviewed, 493 are debt service tax rates, 173 are new property tax rates approved by voters, and 28 are existing property tax rates that were increased by voter approval. The remaining 4,150 tax rates are existing tax rates and were reviewed for compliance with tax rate ceiling rollback requirements only. Three taxing authorities (0.11 percent of all taxing authorities) levied tax rates that are non-compliant. Varying factors contributed to these violations. All four non-compliant rates, resulting in $4,123 excess property tax revenues levied, are from St. Louis County. Taxing authorities wholly in St. Louis County are required to use the four-rate system of levying a separate rate for each subclass of property. Uncertainty with the implementation of the four-rate system originates from a lack of statutory guidance on the handling of elections, recoupments, voluntary reductions, and debt service levies. In the absence of statutory guidance specifically addressing ballots posed under the four-rate system, the State Auditor's office has reviewed all ballots under the assumption that all elections apply to all property.

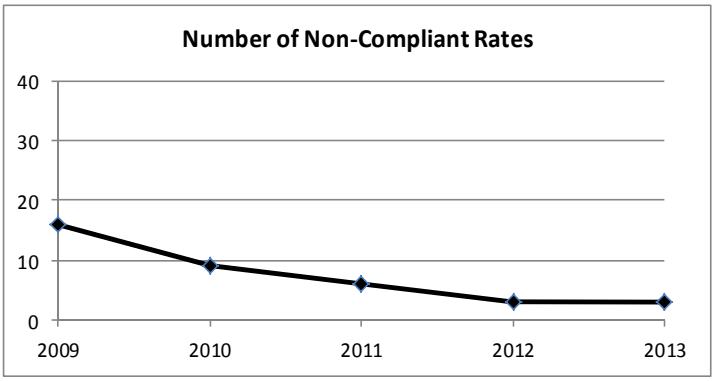
In compliance with Section 137.073.6(2), RSMo, the three non-compliant taxing authorities were referred to the Missouri Attorney General's office. The table below lists the taxing authorities that levied tax rates in excess of the legally permissible tax rate provided by state law.

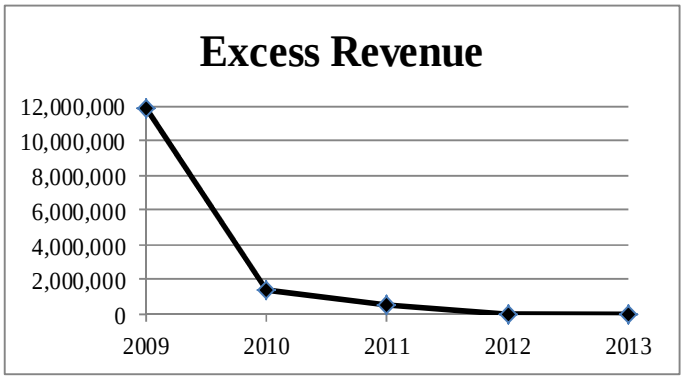
County	Political Subdivision	Levy Purpose	Assessed Valuation	(1) Certified Rate	Actual Rate Levied	(2) Excess Property Tax Revenue
St. Louis	Elmwood Park Street Light District	General Revenue				
	Residential		1,793,160	0.0000	0.1000	1,793
	Commercial		127,750	0.0000	0.1000	128
	Personal Property		382,880	0.0000	0.1000	383
St. Louis	Kinloch Fire Protection District	General Revenue				
	Residential		1,086,590	0.8810	0.9000	206
	Commercial		822,820	0.8560	0.9000	362
	Personal Property		519,175	0.8700	0.9000	156
St. Louis	Kinloch Fire Protection District	Dispatch				
	Residential		1,086,590	0.0000	0.0400	435
	Commercial		822,820	0.0000	0.0400	329
	Personal Property		519,175	0.0000	0.0400	208
St. Louis	City of Kinloch	General Revenue				
	Commercial		823,000	0.9850	1.0000	123
Total						$4,123

(1) The Certified Rate column represents the rates determined to be legally permissible based on the information submitted by the taxing authority.

(2) The excess property tax revenue is computed by multiplying the excess tax rate (actual rate levied minus the certified rate) by the assessed valuation and dividing by 100.

The following graphs illustrate the 5-year history of non-compliant rates and revenue. The high excess revenues in 2009 was due to St. Louis County levying $11,447,230 in excess revenues.





Methodology

The State Auditor's office and county officials assist local government officials in determining the data necessary to complete the tax rate computations. Taxing authorities are required to file data supporting the proposed property tax rates with the county, using forms prescribed by the State Auditor. The counties submit the substantiating data received to the State Auditor for review. The data is reviewed and a finding is returned to both the county and the taxing authority advising whether the proposed rates comply with Missouri law.

The 2013 tax rate ceilings were determined based on the requirements of Section 137.073, RSMo, and Article X, Section 22, Missouri Constitution (commonly referred to as the Hancock Amendment). Each tax rate ceiling is determined annually and is adjusted to ensure revenue neutrality. The review of each tax rate ceiling is based on the assessed valuation for the entire political subdivision and is not calculated on an individual taxpayer basis.

To ensure taxing authorities do not receive a windfall from reassessment, the review of property tax rates begins with the prior year allowed revenue. Current year tax rates must be set to yield the same gross revenue as allowed in the prior year. In addition, an adjustment is made for additional revenue permitted for assessment growth. That adjustment is the lower of (1) the actual growth rate, (2) the inflation rate, or (3) 5 percent. Factors such as new construction and improvements, newly added territory, newly separated territory, and changes from locally assessed to state assessed property also affect the tax rate ceiling calculation. The counties use this rate to assess taxes on all property including new construction and improvements.

Voters may authorize increases beyond the annual revenue neutral tax rate ceiling. Voter-approved increases are reviewed for compliance with applicable laws and stated ballot restrictions. In addition to reviewing new and existing property tax levies for revenue neutrality, the State Auditor's

office also reviews debt service tax rates. A tax levied to meet the annual debt service requirement is compliant if the revenue to be generated plus the existing fund balance does not exceed the current payment requirements plus a reserve for the following year's payments.

A taxing authority's total assessed valuation submitted by the County Clerk or a representative of the taxing authority is used in the State Auditor's office review of property taxes. The State Auditor's office does not review the assessed valuation of individual pieces of property. Chapter 138, RSMo, governs the appeals process for assessed valuations. Citizens may appeal their individual assessed valuations calculated by the County Assessor to the local Board of Equalization. Citizens not satisfied with the resolution by the Board of Equalization may appeal the decision to the Missouri State Tax Commission. Any decision of the Missouri State Tax Commission may be reviewed by a court of law.

As assessed valuations increase, tax rate ceilings generally decrease, depending on the amount of the increase, to produce substantially the same amount of revenue as allowed in the prior year. As assessed valuations decrease, tax rate ceilings may increase to produce substantially the same revenue as allowed in the prior year from existing property, limited by voter authorization. See Appendixes I and II for a summary of the changes in assessed valuation by type of taxing authority, and Appendixes III and IV for a summary of changes in tax rate ceilings by type of taxing authority. In addition, Appendix V is a map that provides a statewide geographical perspective of total county valuation changes prior to adjustments. This map reflects the change in total assessed valuation from the previous year prior to any adjustments for new construction and reassessment. Appendix VI is a map of the adjusted assessed valuation by county. This map reflects the inflationary change in each county's valuation from the previous year. A significant inflationary change generally indicates a major reassessment occurred. However, 2013 assessed valuations indicate the majority of county adjusted assessed valuation changes were less than the Consumer Price Index, which does not indicate a major reassessment. The comparison of assessed valuations and tax rate ceilings from 2012 to 2013 for Appendixes I through VI give consideration to revisions that taxing authorities submitted to the State Auditor's office for changes to assessments that occurred after setting the 2012 property tax rate.

Taxing authorities are listed by primary county (as designated by the taxing authority when established) in Appendixes VII, VIII-A, and VIII-B and categorized by type of taxing authority. The counties are listed alphabetically (Adair through Wright, followed by the City of St. Louis). A taxing authority located in more than one county is listed under the primary county only. The assessed valuations presented for taxing authorities in Appendixes VII, VIII-A, and VIII-B, except school districts, include all

taxable locally assessed and state assessed property. The assessed valuations presented for school districts include only taxable locally assessed property. The abated portions of property valuations that are not taxable under various economic development programs are omitted from the taxable assessed valuations used to compute the annual tax rate ceiling. The 2012 assessed valuations, tax rate ceilings, and tax rates levied as listed in Appendixes VII and VIII-B, represent amounts and rates certified in 2012 and presented in our Report No. 2013-012, *Review of 2012 Property Tax Rates*, with no adjustment for revisions that taxing authorities submitted to the State Auditor's office for changes to assessments that occurred after setting the 2012 property tax rate.

Sales tax rollbacks required by law for some county levies were not reviewed as part of this report. Any concerns in that area would be addressed in State Auditor's office reports of individual counties. Sales tax (Proposition C) rollbacks for school levies were subjected to a limited review to ensure the district did not waive all or part of the rollback without voter approval in order to generate additional local revenues. A majority of the 518 school districts have obtained voter approved waivers of the required sales tax rollback of their 2013 property tax, including 443 with a full waiver and 40 with a partial waiver. Appendixes VII and VIII-A indicate the 483 school districts that have either full or partial waivers of Proposition C (sales tax) reductions.

Legislative Issues

Sections 137.073.5(3) and 137.073.5(4), RSMo, were revised in 2008, which provides a voluntary reduction taken in a non-reassessment year (even numbered year) results in a reduced tax rate ceiling during the following reassessment year (odd numbered year). These provisions also allow taxing authorities that voluntarily reduce a tax rate in a previous even numbered year to undo that voluntary reduction in the following even numbered year. To increase the tax rate in the following even numbered year, the taxing authority must conduct a public hearing, and adopt an ordinance, a resolution, or a policy statement justifying its action prior to setting and certifying its tax rate.

Sections 137.180.3 and 137.180.4, RSMo, were revised in 2010 to reschedule the date new estimated tax rates had to be calculated and mailed for taxing authorities not partially in first class charter counties or the City of St. Louis. Effective dates were changed from January 1, 2011, to January 1, of the year following receipt of software necessary for implementation provided by the State Tax Commission. As of December 31, 2013, such software has not been provided.

Section 137.073.2, RSMo, was revised in 2011 to change the maximum authorized levy definition for some taxing authorities. This affects taxing authorities that had elections impacting tax rate year 2009 or after that experienced a decrease in assessed valuation in the election year.

APPENDIX I
2013 PROPERTY TAX RATES
SUMMARY OF CHANGES IN ASSESSED VALUATION FOR LOCAL GOVERNMENTS LEVYING A SINGLE TAX RATE ON ALL PROPERTY

Type of Taxing Authority	Number of Taxing Authorities	Number of Tax Rates Authorized	Number of Tax Rates

LEGEND:

* Levy was not certified due to insufficient substantiating data; however, it does not appear that a rate was levied.
** Levy did not exist in the given year.
A A new voter approved tax rate, newly formed district, or a levy voted to replace an expired levy.
B A voter approved increase or decrease to an existing levy.
C Levy includes a recoupment rate authorized by state law.
D Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see the Results Section for 2013 levies and Report No. 2013-12, Review of 2012 Property Tax Rates. All non-compliant rates in 2012 and 2013 are taxing authorities wholly in St. Louis County and therefore not listed in this appendix.
E School district has a full Proposition C (sales tax) waiver allowing the district to reduce its required Proposition C reduction to $0.0000 and levy up to its calculated tax rate ceiling.
F School district has a partial Proposition C (sales tax) waiver allowing the district to waive a portion of its required Proposition C reduction to the extent necessary to collect $2.7500 or the amount stated on the ballot.
G Article X, Section 11(g) of the Missouri Constitution allows the Kansas City 33 School District School Board to set its tax levy at a rate that is lower than the court-ordered rate for the 1995 tax year ($4.96). The rate so established may be changed from year to year by the School Board.

NOTES:

Taxing authorities are listed by primary county and categorized by type of taxing authority. The counties are listed alphabetically (Adair through Wright followed by the City of St. Louis). When a taxing authority is in more than one county, it is listed under the primary county only.

This Appendix does not list taxing authorities that levied a separate tax rate for each subclass of property. Previous legislation required taxing authorities wholly in St. Louis County and allowed the City of Gladstone in Clay County to calculate a separate tax rate on each subclass of property. Taxing authorities partially in St. Louis County, whether the primary county is St. Louis County or another county, are required to levy a single rate on all property when one or more counties opted in and one or more counties opted out of the provisions requiring the multi rate calculation. See Appendixes VIII-A and VIII-B for a listing of 2013 and 2012 taxing authorities that calculated separate tax rates for each subclass of property.

All rates in the levied column represent the rate extended and certified to the State Auditor's office by both the taxing authority and the county or counties in which the tax rate is levied.

Assessed Value column presents only the assessed valuation the property tax is levied against.

The revenue generated is computed by dividing the assessed valuation by 100 and multiplying the quotient by the tax rate levied.

LEGEND:

* Levy was not certified due to insufficient substantiating data; however, it does not appear that a rate was levied.
** Levy did not exist.
A A new voter approved tax rate, newly formed district, or a levy voted to replace an expired levy.
B A voter approved increase or decrease to an existing levy.
C Levy includes a recoupment rate authorized by state law.
D Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see the Results Section for the 2013 levies.
E School district has a full Proposition C (sales tax) waiver allowing the district to reduce its required Proposition C reduction to $0.000 and levy up to its calculated tax rate ceiling.
F School district has a partial Proposition C (sales tax) waiver allowing the district to waive a portion of its required Proposition C reduction to the extent necessary to collect $2.7500 or the amount stated on the ballot.
G Levy includes a recoupment rate authorized by state law. School district has a full Proposition C (sales tax) waiver allowing the district to reduce its required Proposition C reduction to $0.0000 and levy up to its calculated tax rate ceiling.

NOTES:

This Appendix contains levy information for political subdivisions wholly in St. Louis County and the City of Gladstone in Clay County. Previous legislation required taxing authorities wholly in St. Louis County and allowed the City of Gladstone in Clay County to calculate a separate tax rate on each subclass of property. Political subdivisions partially in St. Louis County and partially in another county(ies) were also required by previous legislation to levy a single rate on all property when one or more counties opted in and one or more counties opted out of the provisions requiring the multi rate calculation. See Appendix VII for a listing of 2013 and 2012 taxing authorities that calculated a single tax rate to apply to all property.

All rates in the levied column represent the rate extended and certified to the State Auditor's office by both taxing authority and the county or counties in which the tax rate is levied.

Assessed Value column presents only the assessed valuation the property tax is levied against.

The revenue generated is computed by dividing the assessed valuation by 100 and multiplying the quotient by the tax rate levied.

APPENDIX VIII-B
2013 PROPERTY TAX RATES
LISTING OF 2012 TAX RATES FOR LOCAL GOVERNMENTS LEVYING A SEPARATE TAX RATE FOR EACH SUBCLASS OF PROPERTY

		Residential Real Estate			Agricultural Real Estate			Commercial Real Estate			Personal Property		
Political Subdivision	Purpose	Assessed Value	Ceiling	Levied	Assessed Value	Ceiling	Levied	Assessed Value	Ceiling	Levied	Assessed Value	Ceiling	Levied

LEGEND:

* Levy was not certified due to insufficient substantiating data; however, it does not appear that a rate was levied.
** Levy did not exist.
A A new voter approved tax rate, newly formed district, or a levy voted to replace an expired levy. No newly approved tax rates were passed in St. Louis County in 2012 and therefore none are listed in this appendix.
B A voter approved increase or decrease to an existing levy.
C Levy includes a recoupment rate authorized by state law.
D Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see Report No. 2013-012, Review of 2012 Property Tax Rates.
E School district has a full Proposition C (sales tax) waiver allowing the district to reduce its required Proposition C reduction to $0.000 and levy up to its calculated tax rate ceiling.
F School district has a partial Proposition C (sales tax) waiver allowing the district to waive a portion of its required Proposition C reduction to the extent necessary to collect $2.7500 or the amount stated on the ballot.
G Levy includes a recoupment rate authorized by state law. School district has a full Proposition C (sales tax) waiver allowing the district to reduce its required Proposition C reduction to $0.000 and levy up to its calculated tax rate ceiling.
H A voter approved increase or decrease to an existing levy. School district has a full Proposition C (sales tax) waiver allowing the district to reduce its required Proposition C reduction to $0.000 and levy up to its calculated tax rate ceiling.

NOTES:

This Appendix contains levy information for political subdivisions wholly in St. Louis County and the City of Gladstone in Clay County. Previous legislation required taxing authorities wholly in St. Louis County and allowed the City of Gladstone in Clay County to calculate a separate tax rate on each subclass of property. Political subdivisions partially in St. Louis County and partially in another county(ies) were also required by previous legislation to levy a single rate on all property when one or more counties opted in and one or more counties opted out of the provisions requiring the multi rate calculation. See Appendix VII for a listing of 2013 and 2012 taxing authorities that calculated a single tax rate to apply to all property.

All rates in the levied column represent the rate extended and certified to the State Auditor's office by both taxing authority and the county or counties in which the tax rate is levied.

Assessed Value column presents only the assessed valuation the property tax is levied against.

Thirteenth Judicial Circuit, Callaway County
Follow-Up Report on Audit Findings
Table of Contents

State Auditor's Letter 2

Status of Findings

1. Missing Funds and Other Questionable Transactions 3
2. Accounting Controls and Procedures 3

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge and Court en Banc
and
Circuit Clerk of the
Thirteenth Judicial Circuit
Callaway County, Missouri

We have conducted follow-up work on audit report findings contained in Report No. 2013-110, *Thirteenth Judicial Circuit, Callaway County*, issued in October 2013, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the court about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the court, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. As part of the AFTER work conducted, we reviewed supporting documentation provided by the Circuit Clerk and met with relevant court officials. Documentation included a report from the Circuit Clerk on the status of the recommendations, new court financial procedures, monthly independent reviews of transactions, daily and monthly financial reports from October 2013 through January 2014, and manual receipt slip books. This report is a summary of the results of this follow-up work, which was substantially completed during February 2014.

Thomas A. Schweich
State Auditor

Thirteenth Judicial Circuit, Callaway County
Follow-Up Report on Prior Audit Findings
Status of Findings

1. Missing Funds and Other Questionable Transactions

In September 2012 the Office of State Courts Administrator (OSCA) performed a routine accounting review of the circuit court and identified 60 questionable transactions between January 1, 2012, and September 13, 2012, totaling $8,845 for which monies could be missing. Based on these discrepancies, the Presiding Judge contacted the State Auditor's office to request an audit of court operations.

In addition to the amounts identified by OSCA, our audit determined from January 2011 through December 2011, receipts totaling at least $355 were received but not deposited, and additional funds totaling at least $2,447 were likely missing, based on voided cash receipts, unsupported non-monetary transactions, and improper reduction or non-assessment of fines and court costs in the computerized system. Further, some manual receipt slips were removed from the receipt slip books and could not be located, indicating possible additional missing funds during 2012 and 2011.

The Clerk Supervisor primarily responsible for the cases with identified problems was placed on administrative leave on September 14, 2012, and was subsequently terminated on October 6, 2012. The OSCA information was turned over to the Callaway County Sheriff's office and a Special Prosecutor after the OSCA review was completed.

Recommendation

The Court en Banc and the Circuit Clerk continue to work with law enforcement officials regarding criminal prosecution related to the missing funds and other questionable transactions, including restitution of missing funds.

Status

Implemented

The Circuit Clerk indicated a case has been filed by the Special Prosecutor and a Judge has been assigned to the case. Three Class C Felony charges for forgery were filed against the former Clerk Supervisor on November 1, 2013. The case remains ongoing.

2. Accounting Controls and Procedures

Significant weaknesses were identified with accounting controls and procedures. As a result, some receipts were not accounted for properly.

2.1 Segregation of duties and supervisory review

The Circuit Clerk had not adequately segregated the duties of receiving and recording receipts, preparing deposits, and disbursing funds and had not established supervisory reviews to detect errors.

Neither the Circuit Clerk nor clerk personnel independent of the cash custody and record-keeping functions provided adequate supervision or review of the work performed by various clerks to ensure transactions were appropriate.

Because of inadequate supervision over receipts, questionable transactions were not identified and monies were missing. Additionally, checks from the bank account could be issued by any court clerk, required only one signature, and were not reviewed by a person independent of the disbursement function.

Recommendation

The Circuit Clerk segregate accounting duties to the extent possible and implement appropriate reviews and monitoring procedures. In addition, the Circuit Clerk should require dual signatures on all checks.

Status

Implemented

The Circuit Clerk has implemented additional accounting controls and procedures to segregate duties and increase supervisory reviews. A Clerk Supervisor, with no receipting capability, is now responsible for reviewing accounting records on a monthly basis, including lists of liabilities, outstanding checks, deposits, manual receipt slips, voided receipts, and non-monetary transactions. The Circuit Clerk is also responsible for periodic reviews of voided receipts, non-monetary transactions, and manual receipt slips. Checks now can only be signed by the Circuit Clerk or the Clerk Supervisor. In addition, the Circuit Clerk established a positive pay system with the bank to reduce the risk of check fraud. As of our February follow-up meeting, monthly reviews of October 2013 through January 2014 accounting records had been documented.

2.2 Non-monetary transactions

Non-monetary transactions, voids, and adjustments in the Justice Information System (JIS), the Missouri courts automated case management system, were not properly documented and the Circuit Clerk had not established procedures for review and approval of such transactions by persons independent of the receipting process. Additionally, the Circuit Clerk's office did not maintain documentation for numerous non-monetary transactions, voids, and adjustments that occurred during the audit period. Some of these transactions were possibly used to conceal missing monies.

Recommendation

The Circuit Clerk require an independent review and approval of non-monetary transactions, voids, and adjustments made in the JIS, and retain adequate documentation to support these transactions.

Status

In Progress

Clerks must now include documentation supporting all non-monetary transactions, voids, and adjustments with daily cashier session reports. The Clerk Supervisor is responsible for reviewing voids, adjustments, and select non-monetary transactions on a monthly basis. As of our February follow-up meeting, monthly reviews of October 2013 through January 2014 accounting records, including voids, adjustments, and select non-monetary

transactions, had been documented. The Circuit Clerk indicated a quarterly report of all non-monetary transactions will be generated and reviewed on a test basis.

2.3 Manual receipt slips

The Circuit Clerk had not established proper controls or procedures for manual receipt slips. Manual receipt slips issued were not recorded timely in the JIS, reviewed by a supervisor, or reconciled to the JIS, and the related monies were not deposited timely. In addition, the method of payment was not always indicated and these receipt slips were not accounted for properly.

Recommendation

The Circuit Clerk continue to ensure manual receipt slips are prenumbered and their use is limited. The Circuit Clerk should also ensure manual receipt slips are recorded timely in the JIS and deposited timely. In addition, the method of payment should be indicated for all manual receipts and the numerical sequence should be accounted for properly. Further, manual receipts should be reviewed and reconciled to the JIS and to the related deposits by someone independent of the receipting process.

Status

Implemented

Use of manual receipt slips is now limited to when the JIS is unavailable or with written permission from the Presiding Judge, in accordance with the September 2013 revisions to Supreme Court Operating Rule 4.53. According to court procedures, on a monthly basis the Clerk Supervisor reviews all manual receipt slips issued, accounts for the numerical sequence, and ensures all manual receipt slips have been recorded timely in the JIS and deposited timely. This review includes ensuring a JIS receipt number is recorded on all manual receipt slips. We reviewed the prenumbered manual receipt slip book for 2013 and noted JIS receipt numbers, method of payment, and the monthly supervisory reviews were documented. In addition, the number of manual receipt slips issued during 2013 decreased significantly. The Circuit Clerk took action to further reduce the use of manual receipt slips when she became aware of the proposed revisions to the Supreme Court Operating Rule. The court has not issued any manual receipt slips since August 2013.

2.4 Receipting and deposit procedures

The Circuit Clerk had not established procedures to log or restrictively endorse mail receipts immediately upon receipt or issue receipt slips immediately for these monies. In addition, garnishment receipts were not always maintained in a secure location and deposits of garnishment receipts were not made intact or on a timely basis.

Recommendation

The Circuit Clerk require an initial record of monies received by mail be prepared and reconciled to the JIS, restrictively endorse checks and money orders immediately upon receipt, and require receipt slips be issued for all monies on a timely basis. In addition, the Circuit Clerk should maintain

garnishment monies collected in a secure location and deposit these receipts timely and intact.

Status

Partially Implemented

The Circuit Clerk implemented procedures to restrictively endorse all checks and money orders immediately upon receipt and to store monies collected in the locked safe. Garnishment monies collected are now receipted and deposited at least once a week. The Circuit Clerk indicated she is implementing new procedures to ensure garnishment monies collected will be receipted and deposited at least twice a week. However, she also indicated staffing limitations will not allow the court to receipt and deposit garnishment monies intact with other receipts. In addition, due to time constraints, the Circuit Clerk indicated it would not be feasible for court personnel to prepare an initial record of monies received by mail and she does not plan to implement such a record.

2.5 Accrued costs

The Circuit Clerk did not periodically review accrued costs owed totaling $1,014,529 as of December 31, 2012, to the court (fines and court costs, incarceration costs, and court-ordered restitution). The court did not follow its formal administrative plan for collection of court debt, including establishing payment plans and reviewing outstanding balances to write off amounts deemed uncollectible. In addition, the court had not consistently enforced collection of the time payment fee.

Recommendation

The Circuit Clerk follow established policy and ensure collection of accrued costs and fees in accordance with court operating rules.

Status

In Progress

Effective August 28, 2013, the Thirteenth Judicial Circuit, Boone and Callaway counties, adopted a revised formal administrative plan for collection of court debt to improve debt collection and ensure compliance with Supreme Court Operating Rule 21. A report is run weekly to identify and assess the time payment fee to all cases not paid within 30 days of disposition. In addition, the Circuit Clerk is working with the Court en Banc to review accrued costs owed, write off amounts deemed uncollectible, establish payment plans, and participate in tax intercept and debt collection programs.

2.6 Open items

Prior to February 2013 the court did not adequately review monthly lists of liabilities to ensure bonds were disbursed in a timely manner.

Recommendation

The Circuit Clerk continue recent efforts to review the status of liabilities to determine the appropriate disposition of funds.

Status

Implemented

The Clerk Supervisor continues to be responsible for reviewing the lists of liabilities on a monthly basis to ensure the appropriate disposition of bonds and other funds. We observed the documented monthly review of the January 2014 list of liabilities, which indicated any dispositions and other actions taken as a result of the review.

2.7 Case entry and disposition

Court personnel did not always properly record the initial entry and final disposition of each case in the JIS. Some cases had been suspended and had been inactive for periods ranging from 8 to 14 months because court personnel canceled a future court date and did not reschedule a new court date. Personnel caused other case errors by entering incorrect case numbers in the JIS. In addition, we identified several cases in which court costs totaling $374 were not assessed prior to disposition.

Recommendation

The Circuit Clerk implement procedures to ensure the initial entry and disposition of cases and associated costs are properly recorded in the JIS. Various case reports should be reviewed on a monthly basis to detect erroneously entered and suspended cases and to ensure proper treatment of disposed cases.

Status

In Progress

The Clerk Supervisor is responsible for reviewing fee adjustments, cases disposed, and cases with no scheduled court dates on a monthly basis. Monthly Case Age reports showing old outstanding cases are printed and reviewed to ensure all cases on the report have a scheduled court date or have reasons for not having a court date scheduled. Because the reviews of the fee adjustments and disposed cases are done within the JIS, it is difficult to document these reviews. We observed a screen print of the query run for fee adjustments during the month of January 2014 and the review of one case from that query. The Circuit Clerk indicated she has requested the OSCA to develop reports to facilitate reviews performed. We confirmed with the OSCA that a report of fee adjustments was developed within the last 6 months and was shared with the Circuit Clerk. The OSCA personnel indicated they are currently working on a report of cases disposed with no costs or fees.

Thomas A. Schweich

Missouri State Auditor

ADMINISTRATION

Reemployment of State Retirees

March 2014

Report No. 2014-021

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Reemployment of State Retirees

Background

This audit reviewed issues associated with state retirees reemployed in state government positions and procedures to ensure compliance with state laws regarding reemployment of retirees. Most full-time state employees participate in defined-benefit public employee retirement plans. General state employees participate in plans operated by the Missouri State Employees' Retirement System (MOSERS) and employees of the Missouri Department of Transportation and the Missouri State Highway Patrol participate in plans operated by the Missouri Department of Transportation and Highway Patrol Employees' Retirement System (MPERS). State laws permit the reemployment of state retirees in state government benefit eligible and non-benefit eligible positions. When reemployed in a non-benefit eligible position, the retiree receives no employment benefits, the reemployment has no impact on an individual's retirement payments, and the retiree receives a monthly retirement payment in addition to compensation for work performed. To be benefit eligible, the employee must be assigned to a position that normally requires the performance of duties during not less than 1,040 hours per year. Currently, state law requires most retirees' retirement payments be suspended while the retiree is actively reemployed in a benefit eligible position.

According to various state agency and retirement system personnel, there are both benefits and costs associated with reemploying retirees. During the 2 years ended December 31, 2012, at least 1,662 state retirees worked as employees in state government positions. During this period, 189 of these retirees were reemployed in full-time, benefit eligible positions; 1,487 were reemployed in part-time, non-benefit eligible positions; and 14 were reemployed in both types of positions. In addition, at least 15 state agencies utilized 132 retirees as vendors during the 2 years ended December 31, 2012.

Statewide Oversight of Reemployed Retirees

There is no statewide oversight of retirees rehired in state government positions, and our review noted instances of noncompliance with reemployment restrictions and incorrect benefit eligibility classifications. Personnel of the various state agencies are responsible for classifying benefit eligibility and tracking and monitoring reemployments of retirees, but procedures used are not always sufficient. Several state agencies that reemployed a significant number of retirees do not fall under Office of Administration (OA) oversight and OA has provided no guidance for ensuring proper benefit eligibility classification.

State Law Allowing Retirement Payments while Reemployed Full-Time in Benefit Eligible Positions	State law pertaining to certain plans allows some retirees reemployed in full-time state government positions to receive their retirement payments while reemployed. Thirty-one of the 189 retirees working in full-time benefit eligible state positions drew wages and retirement payments simultaneously, receiving $2.8 million in retirement payments in addition to $3.1 million in wages during the 2 years ended December 31, 2012. By providing these retirees with wages and retirement payments simultaneously, the state is providing extra compensation to a small select group of state employees, which is generally prohibited for most state employees. Many current and future retirees of certain plans could similarly avail themselves of these provisions.
Retirees Reemployed Part-Time in Non-Benefit Eligible Positions	Many state agencies lacked adequate procedures to ensure retirees reemployed part-time are properly classified. Some reemployed retirees may have been incorrectly classified as part-time, and therefore received their retirement payments while reemployed, when not eligible to do so. Audit staff found 107 of the 1,487 (7 percent) retirees working in part-time, non-benefit eligible positions worked 1,040 or more hours during their anniversary year(s). When a retiree working in a non-benefit eligible position works 1,040 hours or more in a year, agencies should determine whether (1) the employee has exceeded this limit due to short-term, unforeseen circumstances and should continue to be classified as non-benefit eligible, or (2) the position has effectively changed and should be reclassified as benefit eligible. Our review noted numerous weaknesses and inconsistencies among state agency procedures. Several state agencies had centralized procedures or tracking systems to monitor actual hours worked by part-time retirees, while some state agencies delegated monitoring procedures to individual divisions or units within their agencies. Two state agencies tracked hours separately by position, which appears to violate state law when collectively the positions require 1,040 or more hours; state agencies defined work year inconsistently and did not always comply with state law; and some state agencies had established hour maximums other than the maximum provided by state law. State laws do not require a standard or minimum separation period between retirement and reemployment.
Retiree Vendors	State laws and regulations that address hiring retirees as vendors are inadequate, and most state agencies lacked adequate procedures to ensure these vendor arrangements are proper. Several retirees were hired as vendors when it appears they should have been classified as full-time, benefit eligible employees; and, as a result, these retirees received retirement payments that would have been suspended if they had been classified as employees.

Because of the compound nature of this audit report, no overall rating is provided.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
and
Douglas Nelson, Commissioner
Office of Administration
Jefferson City, Missouri

Due to concerns regarding inconsistencies and weaknesses in state laws and policies governing reemployment of state retirees, we have conducted an audit of the Reemployment of State Retirees. The objectives of our audit were to:

1. Identify retirees reemployed in state government positions.

2. Evaluate state laws governing reemployment of state retirees.

3. Evaluate internal controls related to reemployment of state retirees.

4. Evaluate compliance with certain legal provisions.

For the areas audited, we identified (1) at least 1,662 state retirees reemployed in state government positions during the 2 years ended December 31, 2012, (2) inconsistencies and weaknesses in state laws and policies governing reemployment of state retirees, (3) deficiencies in internal controls, and (4) noncompliance with legal provisions.

While Missouri laws concerning state retiree reemployment generally limit the retirement payments of retirees reemployed in state positions, our review identified some inconsistencies in the laws that allow certain reemployed retirees to receive benefits not afforded to most state retirees. In addition, our review identified instances where laws containing restrictions were likely violated, and state agencies lacked adequate procedures to ensure compliance with the laws. We also identified ways the laws could be strengthened.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

Reemployment of State Retirees
Introduction

Background

In recent years, the General Assembly has made changes to reduce the state's share of costs of retirement benefits as well as retirement benefits provided to future employees. This audit reviewed issues associated with retirees reemployed in state government positions and procedures to ensure compliance with state laws regarding reemployment of retirees. Our audit focused on retirees of the two state employee retirement systems, and did not include retirees of other public employee retirement systems. The retirement systems and plans referenced in this report include:

Missouri State Employees' Retirement System (MOSERS)

Missouri State Employees' Plan (MSEP)
MSEP 2000
Judicial Plan
Administrative Law Judges and Legal Advisors' Plan (ALJLAP)

Missouri Department of Transportation and Highway Patrol Employees' Retirement System (MPERS)

MPERS Closed Plan
MPERS Year 2000 Plan

Retirement Plans

Most full-time state employees participate in defined-benefit public employee retirement plans administered by the MOSERS or MPERS. General state employees participate in MOSERS and employees of the Missouri Department of Transportation (MoDOT) and the Missouri State Highway Patrol (MSHP) participate in MPERS. Each system administers multiple plans including the original plan (also called the Closed plan), the Year 2000 plan, and the 2011 tier of the Year 2000 plan. Generally, all full-time state employees hired before July 1, 2000, are eligible for membership in the closed plans: MSEP or MPERS Closed Plan. These employees and full-time employees first hired on or after July 1, 2000, and before January 1, 2011, are eligible for membership in the Year 2000 plans: MSEP 2000 or MPERS Year 2000 Plan. Employees first hired on or after January 1, 2011, are eligible for membership in the 2011 tier of the respective Year 2000 plan.

In addition, MOSERS administers the Judicial Plan for judges. Judges first hired before January 1, 2011, are eligible for membership in the Judicial Closed Plan. Judges first hired on or after January 1, 2011, are eligible for membership in the Judicial 2011 tier of the Judicial Plan. The Administrative Law Judges and Legal Advisors' Plan (ALJLAP), also administered by MOSERS, was terminated; and individuals first hired in these positions after April 26, 2005, participate in the MSEP or MSEP 2000. The MOSERS contracts with a third party provider to administer the College and University Retirement Plan for education employees at regional colleges and universities. The various state employee retirement plans are governed by Chapters 104, 105, 287, and 476, RSMo.

Retirement benefits are funded through a combination of state contributions, investment earnings, and employee contributions (2011 tier members only). State contribution rates are determined annually through actuarial valuations. During fiscal year 2012, the state contributed approximately 14 percent of employees' (other than judges) salaries to MOSERS; and approximately 45 percent to MPERS for civilian members and 59 percent for uniformed members. State contributions to the Judicial Plan were 57 percent in fiscal year 2012. Members of the 2011 tiers are also required to contribute 4 percent of their salary to the applicable plan. Required state contributions to the MOSERS and MPERS for approximately 59,200 state employees during fiscal year 2012 totaled approximately $455 million, or a little less than 2 percent of the state's budgeted expenditures.

Members of the closed and Year 2000 plans can retire with regular benefits as early as age 48, with age and service years equaling 80 or more (Rule of 80); and members of the 2011 tier of the Year 2000 plans (other than uniformed members of MPERS) can retire as early as age 55, with age and service years equaling 90 or more (Rule of 90). Active uniformed members of MPERS 2011 can retire at age 55 with 10 years of service. Judges can retire with regular benefits as early as age 55 (Judicial Plan) or 62 (Judicial 2011), with 20 years of service. Members of closed plans can choose to retire from the closed plan or the applicable Year 2000 plan. Additional information regarding various plan provisions and benefits is available on the systems' websites (<www.mosers.org> and <www.mpers.org>). At December 31, 2012, MOSERS had approximately 35,300 retirees and MPERS approximately 6,100 retirees.

Benefit Eligibility

State employees and reemployed retirees classified as benefit eligible receive various employment benefits including subsidized health care coverage, vacation leave, sick leave, and participation in a state retirement plan. Non-benefit eligible employees generally do not receive these benefits and do not earn creditable service towards a retirement benefit. To be benefit eligible, the employee must be assigned to a position that normally requires the performance of duties during not less than 1,040 hours per year. Considering a standard 2,080 hour work year, benefit eligible employees are generally expected to work at least half time. State law governing Year 2000 (including 2011 tier) plan retirees who are reemployed defines a work year as the 12-month period beginning on the first day of employment; while state laws governing the closed plans do not define work year.

For purposes of this audit, benefit eligible employees (those classified in positions that normally require a minimum of 1,040 hours of work per year) are called "full-time" employees and non-benefit eligible employees (those classified in positions limited to less than 1,040 hours per year) are called "part-time" employees.

Reemployment of Retirees

State laws permit the reemployment of state retirees in state government benefit eligible and non-benefit eligible positions. When reemployed in a non-benefit eligible position, the retiree receives no employment benefits, the reemployment has no impact on the individual's retirement payments, and the retiree receives a monthly retirement payment in addition to compensation for work performed. Some state laws have been revised over the past 13 years to restrict the ability of certain state retirees to simultaneously receive retirement payments and be reemployed in benefit eligible positions. There are no restrictions on retirement payments when state retirees take positions outside of state government.

Currently, statutory provisions applicable to most state retirees (other than those plans noted at MAR finding number 2) require the retiree's retirement payment be suspended while the retiree is actively reemployed in a benefit eligible position. While reemployed, the benefit eligible employee may accrue additional service credit towards another retirement benefit. For example, MSEP and MSEP 2000/MPERS Year 2000 (including 2011 tier) retirees reemployed in MSEP/MSEP 2000-covered positions and MSEP 2000/MPERS Year 2000 retirees reemployed in MPERS-covered positions, generally must be reemployed continuously for at least 1 year in order to earn an additional benefit. MSEP retirees reemployed in MPERS-covered positions and MPERS Closed Plan retirees reemployed in MOSERS-covered positions must work at least 5 additional years to earn an additional benefit. MPERS officials indicated MPERS Closed Plan retirees are not allowed to be reemployed in an MPERS-covered position. Once the employee retires again, he or she will receive his or her original monthly retirement payment, plus any additional monthly benefit earned during the reemployment period(s).

As noted in MAR finding number 2, reemployment laws for some plans have not been revised, allowing situations where certain retirees' retirement payments are not suspended during the period of reemployment in benefit eligible positions.

Cost-Benefit

According to various state agency and retirement system personnel, there are both benefits and costs associated with reemploying retirees. Determining whether the benefits outweigh the costs can be difficult because of the complexity of valuing benefits and quantifying costs. State agencies can benefit by reemploying retirees who possess skill sets, experience, and institutional knowledge necessary for the positions. When temporary part-time positions become available, agencies often look to experienced retirees to avoid costs associated with training.

The costs of employing retirees instead of new employees in full-time or part-time positions may be higher, lower, or cost neutral, and the costs will vary in each situation because of factors specific to each retiree and

position. Such factors include position classification (full-time or part-time), rate of pay, purpose and length of reemployment, and retiree vesting status and years of service. Reemployed retirees are sometimes paid more than new employees, resulting in higher salary, employment taxes, and retirement contribution costs. In addition, state laws governing reemployment of retirees provide an additional retirement benefit when retirees are reemployed full-time as little as 12 months; while non-retired employees currently have a 5 or 10-year vesting period.

Scope and Methodology

The scope of our audit included statewide, state agency, MOSERS, and MPERS internal controls over reemployment of retirees; state laws, policies and procedures; and other management functions in place during, but not necessarily limited to, the 2 years ended December 31, 2012.

Our methodology included conducting interviews with appropriate officials and staff of MOSERS, MPERS, and 21 different state agencies/divisions; obtaining and reviewing available policies and procedures; reviewing applicable state laws and other information; researching other states' laws and procedures regarding reemployment of retirees; and performing data analysis and testing.

To identify state retirees reemployed in state government positions during the 2 years ended December 31, 2012, we obtained retiree data from MOSERS and MPERS for this period as of December 31, 2012. We matched these retiree records to the employment records in the state's human resources accounting system for all state employees who worked at some point during the 2 years ended December 31, 2012. Our match results included all retirees reemployed in state positions, except employees of universities, because those employees' payroll records are maintained separately from the statewide accounting system.

To identify the benefit eligibility status of each reemployed retiree, we obtained documentation of state retirement contribution payments made to MOSERS and MPERS from the statewide accounting system for the 2 years ended December 31, 2012. Those reemployed retirees for which state retirement contributions were made while reemployed during this period were identified as full-time, benefit eligible employees. Reemployed retirees for which retirement contributions were not made were determined to be part-time, non-benefit eligible employees.

To review for proper benefit eligibility classification, we obtained records of hours worked for each reemployed retiree from the state's human resources accounting system for the 2 1/2 year period ended June 30, 2013. We then calculated the hours each retiree worked during each of their anniversary years within that period. Each retiree's calculated hours worked were compared to the number of required hours for his/her benefit eligibility

classification. Payroll and retirement data for retirees reemployed full-time were analyzed to ensure retirement payments were suspended upon reemployment, unless the applicable statutory provisions did not require such suspension.

To identify state retirees hired as vendors (rather than employees) during the 2 years ended December 31, 2012, we matched the retiree records obtained from MOSERS and MPERS to vendor payment records in the statewide accounting system during this period. These match results were limited to those retirees whose vendor number on the statewide accounting system is the same as their retiree number. The match results were analyzed based on the assigned accounting system object code. Retiree vendor payments from the nine consulting services object codes with the highest total payments to retirees were selected for review. These object codes included educational services, other professional services, program consultant services, physical exam services, attorney services, medical and dental services, other business services, medical assistance services, and agriculture related services.

Officials from state agencies interviewed or contacted regarding retiree reemployment and vendor practices, and data included: Missouri Department of Agriculture (MDA), Office of Attorney General (AGO), Missouri Department of Conservation (MDC), Department of Corrections (DOC), Department of Economic Development (DED), Department of Elementary and Secondary Education (DESE), Department of Health and Senior Services (DHSS), House of Representatives, Judiciary, Department of Labor and Industrial Relations (DOLIR), Department of Mental Health (DMH), Office of Administration (OA), Department of Social Services (DSS), State Auditor, MoDOT, Senate, Committee on Legislative Research, Department of Natural Resources (DNR), Department of Public Safety (DPS), Missouri State Highway Patrol (MSHP), and Missouri Gaming Commission.

To verify the correctness, we provided personnel of most state agencies that hired retirees with data regarding the retirees reemployed or hired as vendors at their agencies during the 2 years ended December 31, 2012. This verification process confirmed approximately 96 percent of the total retiree reemployment data and 85 percent of the total identified retiree vendor data. The remaining agencies, which we did not ask to verify data, each had only a few instances of reemployed retirees or vendor retirees.

This report outlines the general benefit requirements of the various retirement plans. For more information refer to each plan's specific provisions.

Reemployed Retirees

During the 2 years ended December 31, 2012, at least 1,662 state retirees worked as employees in state government positions. These retirees represented approximately 4 percent of the total retirees and approximately 3 percent of the state employee workforce as of December 31, 2012. As noted in the following table, 189 (11 percent) of these retirees were reemployed in full-time, benefit eligible positions; 1,487 (89 percent) were reemployed in part-time, non-benefit eligible positions; and 14 of these retirees were reemployed in both types of positions during the period reviewed. Many of these retirees began their reemployment prior to 2011.

Reemployed Retirees - Full-Time vs. Part-Time

	Reemployed during year(s) ended December 31,			
	2011 Only	2012 Only	2011 and 2012	Total
Full-Time	34	34	121	189
Part-Time	284	362	841	1,487
Both	0	0	(14)	(14)
Total	318	396	948	1,662

Of these 1,662 retirees, over half (928 or 56 percent) were hired by 5 state agencies: DMH, DPS, MDC, DESE, and Judiciary.

Reemployed Retirees - Hiring State Agency

State Agency	Part-Time	Full-Time	Both	Total
Mental Health	303	21	(3)	321

Total	1,487	189	(14)	1,662

[1] Includes MSHP, Missouri Gaming Commission, and other DPS divisions.
[2] Includes Committee on Legislative Research, House of Representatives, and Senate.

State agencies hired retirees for various types of full and part-time positions. For example, the DMH, the largest employer of retirees, hired retirees for a number of different positions including nursing staff and direct care aides. The MSHP hired approximately 150 part-time temporary employees for a statewide communications project, of which almost half were retirees. Nearly all of DESE's reemployed retirees had retired from the DESE, and approximately half were reemployed as substitute teachers. MoDOT personnel indicated MoDOT retirees are typically hired part-time to perform seasonal work, such as snow plow drivers, and to work on special projects. DHSS and DOLIR personnel indicated retirees are sometimes hired after their retirement to train their replacement. DSS personnel stated retirees are employed for various short-term special projects or efforts to reduce

excessive workloads. Retired judges (Senior Judges) hear cases on an as-needed basis when determined by the Supreme Court.

State agency personnel provided various reasons for hiring retirees, including (1) retirees already possess the knowledge and skills necessary for the positions, (2) retirees can work more efficiently because they are familiar with agency procedures and computer systems, (3) retirees are needed to train their replacement, and (4) retirees possess required licenses for certain professional positions.

Our analysis found 43 percent of reemployed retirees returned to work in state government positions within 1 month of their retirement, and another 29 percent returned between 1 month and 1 year after retirement. Our analysis identified 7 state agencies in which at least 50 percent of their reemployed retirees were hired within 1 month of retirement. These state agencies include MDC, DMH, Secretary of State, DESE, Legislature, State Treasurer, and AGO. The MDC had the highest percent, with 78 percent of retirees rehired within 1 month of retirement (see Appendix A). In addition, these retirees were reemployed an average of 4 years, with a range of less than 1 month to more than 9 years (see Appendix A).

Reemployment of State Retirees
Management Advisory Report
State Auditor's Findings

1. Statewide Oversight of Reemployed Retirees

There is no statewide oversight of retirees rehired in state government positions. As a result, our review noted various instances of noncompliance with reemployment restrictions and incorrect benefit eligibility classifications.

The state lacks centralized procedures to track and monitor the extent and costs associated with the reemployment of retirees; and as a result, trends and the associated costs and impact to the state are unknown. Because no statewide record or list is maintained, we performed various data matches and analyses to identify reemployed retirees. The state's lack of historical data regarding reemployments limited our ability to analyze this data.

In addition, there are no statewide procedures to ensure proper benefit eligibility classification of reemployed retirees and compliance with reemployment laws. State agency personnel are responsible for classifying benefit eligibility and tracking and monitoring reemployments of retirees, but procedures used are not always sufficient. While OA personnel approve the benefit eligibility classification of positions at the time employees are hired by those state agencies for which the OA has oversight, the OA performs no further monitoring to ensure employees are classified properly based on time actually worked. Several state agencies that reemployed a significant number of retirees do not fall under OA oversight. In addition, the OA has provided no guidance to the state agencies for ensuring proper benefit eligibility classification.

Centralized statewide oversight of reemployed retirees would reduce the risk of noncompliance with laws regarding reemployment of retirees. Such oversight could include tracking and monitoring of retiree reemployments and associated costs, providing guidance and policies to state agencies, and monitoring for compliance with reemployment laws.

Recommendation

The Office of Administration work with the General Assembly to establish oversight of and policies regarding retirees rehired in state government positions.

Auditee's Response

The Office of Administration provided the following response:

For background purposes, the decentralized human resources (HR) structure within Missouri state government limits the ability of the OA to dictate and enforce specific HR practices that have not been codified into the Missouri Constitution, state statutes or regulations. OA's authority is further limited by the need to respect built in separations between the various branches of state government. Specifically, the legislative and judicial branches maintain even more independence in their actions than some of the executive branch departments. In addition, the Missouri Constitution provides enhanced

autonomy to particular executive branch departments such as the MDC and the MoDOT.

OA is in a position to advise and consult with state agencies. For example, one tool is the monthly State Human Resource Management Council meetings hosted by OA. These meetings provide an opportunity for dialogue regarding some of the concerns raised through this audit. If needed, additional meetings could be planned with key stakeholders in the state HR community.

Some of the statutory changes recommended in the audit report involve sensitive and complex issues, and may require a thorough legal review regarding possible Constitutional implications of retroactively changing retirement provisions. Also, changes to the retirement systems seem to lie within the purview of the legislative process. While considering several changes to the retirement statutes, legislators have had several relatively recent opportunities to address any desired changes to these statutes. In those instances, statutes were not changed to address some of the concerns raised through this audit. OA will, of course, work with the legislature on these issues by providing technical assistance in order to provide background and resources to advance the understanding of possible impact to the state.

The decentralized human resource structure also limits OA's ability to verify the audit figures for each of the various state agencies regarding the number of reemployed retirees and the hours each individual worked, other than our own internal figures. OA understands the State Auditor's office has been in contact with the other agencies regarding their data. Further, each agency is in the best position to evaluate the cost benefits of rehiring retirees.

The audit report also discusses the use of the term "not normally" in context of the 1,040 hour mark for retirees working in non-benefit eligible positions. The use of this term may require further exploration as to the parameters.

In response to Audit Finding 1, although OA may currently lack statutory authority to require compliance in this area, OA is in a position, working with the retirement administrators, to help facilitate reporting tools to assist agencies to better monitor the work provided by reemployed retirees. At this point, some preliminary investigation is underway, including identifying an appropriate counting period (year) for hours worked, accurately calculating hours worked for salaried employees versus those employees paid on an hourly basis, automating a report protocol in order to minimize the resources needed to run the

report, and acquiring and using data sets from different retirement systems to ensure all retirees are identified in reports, etc.

2. State Law Allowing Retirement Payments while Reemployed Full-Time in Benefit Eligible Positions

State law allows some retirees reemployed in full-time state government positions to receive their retirement payments while reemployed.

During the 2 years ended December 31, 2012, 189 reemployed retirees were working full-time. These persons were reemployed by 21 different state agencies with DOC, DPS, and DMH hiring approximately 43 percent of the total full-time reemployed retirees. Personnel of some state agencies, such as MoDOT, MSHP, and MDC, told us they have a policy or practice generally prohibiting reemployment of retirees full-time, and permit only part-time reemployments.

State law allowed 31 of the 189 retirees working in full-time benefit eligible state positions during the 2 years ended December 31, 2012, to draw wages and retirement payments simultaneously. These persons received retirement payments totaling approximately $2.8 million in addition to wages totaling approximately $3.1 million, an average of $96,000 annually per retiree. Annual payments to these retirees during the period of reemployment ranged from approximately $1,500 to $191,000.

State laws prohibit most state retirees from receiving retirement payments while reemployed in full-time, benefit eligible positions. While several state laws have been revised within the past 13 years to prohibit this practice for most plans some statutes allowing these payments continue to exist for certain closed plan retirees, including the MPERS Closed Plan, Judicial Closed Plan, and the ALJLAP. For example, prior to 2001, both the MOSERS (MSEP) and MPERS closed plans (Chapter 104, RSMo) prohibited this practice for retirees reemployed in full-time positions covered by the same plan from which they retired. However, this practice was not initially prohibited for retirees reemployed full-time in positions covered by the other system (e.g., MSEP retirees reemployed in MPERS-covered positions and MPERS Closed Plan retirees reemployed in MOSERS-covered positions). A 2001 revision to the MSEP (Section 104.380, RSMo) prohibited these payments for future full-time reemployments of MSEP retirees in any MPERS-covered positions. No similar revision has been made to the MPERS Closed Plan, and therefore MPERS Closed Plan retirees are still permitted to receive retirement payments while reemployed full-time in MSEP/MSEP 2000-covered positions.

Similar prohibitions were instituted with the implementation of the MSEP 2000 and MPERS Year 2000 Plans (Section 104.1039, RSMo), the Judicial 2011 Plan (Section 476.521, RSMo), and the termination of the ALJLAP (Section 287.813, RSMo). The various new provisions require that

retirement payments be suspended while retirees of these particular plans are reemployed full-time in positions covered by any of these plans.

The following table summarizes the retirees who received retirement payments while reemployed full-time during the 2 years ended December 31, 2012, because they retired from plans that did not prohibit such payments. Information by retiree is detailed at Appendix C.

Retirees Who Received Retirement Payments during Full-time Reemployment

		Pension and Pay During Reemployment 2 Years Ended December 31, 2012			
Retirement Plan - First Retirement	Retirees	Total Pension	Total Pay	Total Pension and Pay	Average Annual Payments per Retiree
ALJLAP	3	$ 286,712	214,578	501,290	83,548
Judicial Plan	5	371,435	701,061	1,072,496	107,250
MPERS Closed Plan	23	2,180,265	2,189,194	4,369,459	94,988
	31	$ 2,838,412	3,104,833	5,943,245	95,859

As noted at Appendix C, these 31 retirees worked at 12 different state agencies, with almost half reemployed at the DPS. The Missouri Gaming Commission reemployed 10 of these retirees, other DPS divisions reemployed 4 of these retirees, and other state agencies each reemployed between 1 to 4 retirees. All four of the AGO's retirees reemployed full-time were in plans that provide retirement payments during full-time reemployment. Our analysis of the retirement dates and reemployment dates for these 31 retirees noted 17 were reemployed during the month following retirement.

The following sections further discuss the information listed in the table. As of December 31, 2012, 5 of the 31 retirees had retired in 2 different retirement plans with 2 reemployed again and earning service credit toward a third retirement benefit.

MPERS Closed Plan retirees reemployed in MSEP/MSEP 2000-covered positions

A total of 23 MPERS Closed Plan retirees were reemployed full-time in MSEP/MSEP 2000-covered positions during the 2-year period reviewed. Because the MPERS Closed Plan does not prohibit retirees from receiving retirement payments while reemployed full-time in these positions, these retirees simultaneously received retirement and wage payments totaling approximately $4.4 million, or an average of $95,000 annually, while working during this period.

Three of these retirees (Retirees 29, 30, and 31 at Appendix C) retired a second time during the period reviewed and began receiving additional

monthly retirement payments from MOSERS of $1,476, $828, and $748, respectively, for the service credit earned during the period reemployed.

Of these 23 MPERS Closed Plan retirees, 21 were uniformed patrol members and 2 were civilian members. Ten of the 23 (43 percent) retirees were reemployed by the Missouri Gaming Commission, and 7 of those 10 retirees were reemployed immediately after retirement. Commission personnel told us the commission has a close relationship with the MSHP and the agency frequently hires MSHP retirees to various positions, such as investigators, electronic gaming device specialists, and senior staff. The personnel indicated MSHP retirees often possess the knowledge, skills, and abilities needed for these positions.

All existing MPERS Closed Plan retirees, as well as active and terminated vested members who can elect the MPERS Closed Plan upon retirement, are similarly eligible to receive retirement payments during future full-time reemployment in MOSERS-covered plans because the MPERS Closed Plan statutes have not been amended. As of December 31, 2012, there were 3,243 MPERS Closed Plan retirees. As of June 30, 2012, there were 5,650 MPERS active and terminated vested members eligible to retire from the MPERS Closed Plan because they were first hired in an MPERS-covered position prior to July 1, 2000. Because 43 percent of individuals retiring in fiscal year 2013 chose the MPERS Closed Plan, we estimate about 2,400 of the 5,650 active and terminated vested members might choose the MPERS Closed Plan upon retirement. Although many of these current and future MPERS Closed Plan retirees will not choose to return to work, each of them would currently be eligible to receive retirement payments during full-time reemployment.

Judicial Closed Plan retirees reemployed in MSEP 2000 or ALJLAP-covered positions

Four Judicial Closed Plan retirees were reemployed full-time in MSEP 2000-covered positions and one was reemployed full-time in an ALJLAP-covered position during the 2 year period reviewed. As previously noted, the Judicial Closed Plan does not prohibit these retirees from simultaneously receiving retirement payments and wages while reemployed full-time in positions covered by those plans. These retirees received retirement and wage payments totaling approximately $1.1 million, or an average of $107,300 annually, during this period. One of these individuals (Retiree 8 at Appendix C) retired a second time during the period reviewed and began receiving additional monthly retirement payments of $805 from MOSERS for service credit earned during the period reemployed.

As of December 31, 2012, there were 366 Judicial Closed Plan retirees and 432 active and terminated vested members eligible to retire from the Judicial Closed Plan who could benefit similarly.

ALJLAP retirees reemployed in MSEP 2000-covered positions

Three ALJLAP retirees were reemployed full-time in MSEP 2000-covered positions during the 2 year period reviewed. As previously noted, the ALJLAP does not prohibit these retirees from simultaneously receiving retirement payments and wages while reemployed full-time in positions covered by the MSEP 2000. These retirees received retirement and wage payments totaling approximately $500,000, or an average of approximately $83,500 annually, while working during this period. One of these individuals (Retiree 3 at Appendix C) had also retired in the Judicial Closed Plan prior to the period reviewed, and continued to receive retirement payments from both of these plans while working and earning service credit toward a third retirement in the MSEP 2000.

As of December 31, 2012, there were 32 ALJLAP retirees and 68 active and terminated vested members eligible to retire from the ALJLAP who could benefit similarly.

MSEP retirees reemployed in MPERS-covered positions

Our review found 9 years after applicable MSEP statutes were amended, there are no longer any MSEP retirees reemployed full-time in MPERS covered positions and receiving retirement payments while reemployed. As of January 1, 2011, none of the retirees grandfathered in when statutes were amended in 2001 were still reemployed full-time in MPERS-covered positions. Section 104.380, RSMo, as revised in 2001, provides that a retiree who becomes reemployed full-time as an employee on or after August 28, 2001, in a position covered by MPERS, shall not be eligible to receive retirement payments or additional creditable service from MOSERS while reemployed.

Conclusion

By providing these retirees with wages and retirement payments simultaneously, the state is providing extra compensation to a small select group of state employees, which is generally prohibited for most state employees. Many current and future retirees could similarly avail themselves of these provisions. Furthermore, eligible employees may forego continued employment in their current positions to instead retire and utilize these provisions, which may be more expensive to the state. To provide fair and equitable treatment to all state employees, the General Assembly should consider legislation to amend the applicable statutes.

Recommendation

The Office of Administration work with the General Assembly to review statutes that allow retirees to return to work full-time and receive wages and retirement payments simultaneously, and consider revisions to these statutes to provide consistent reemployment requirements for all state retirees.

Auditee's Response

The Office of Administration provided the following response:

As previously discussed, some of the statutory changes recommended in the audit report involve sensitive and complex issues, and may require

a thorough legal review regarding possible Constitutional implications of retroactively changing retirement provisions. Also, changes to the retirement systems seem to lie within the purview of the legislative process. While considering several changes to the retirement statutes, legislators have had several relatively recent opportunities to address any desired changes to these statutes. In those instances, statutes were not changed to address some of the concerns raised through this audit. OA can work with the legislature on these issues by providing technical assistance in order to provide background and resources to advance the understanding of possible impact to the state.

3. Retirees Reemployed Part-Time in Non-Benefit Eligible Positions

Many state agencies lacked adequate procedures to ensure retirees reemployed part-time are properly classified. As a result, some reemployed retirees may have been incorrectly classified as part-time, and therefore received their retirement payments while reemployed.

During the 2 years ended December 31, 2012, 1,487 reemployed retirees were working in part-time, non-benefit eligible positions. These retirees were reemployed by 22 different state agencies; with DMH, DPS, MDC, and DESE, hiring over 50 percent of the part-time reemployed retirees.

Our review found most retirees reemployed part-time worked less than 1,040 hours during their anniversary years ended during the period January 1, 2011 to June 30, 2013. However, 107 of these 1,487 (7 percent) retirees worked 1,040 or more hours during their anniversary year(s) ended during this period, with 45 working more than 10 percent over that threshold (1,144 hours or more).

Various state laws require that state retirees (other than retirees of plans identified in MAR finding number 2 that allow retirement payments during full-time reemployment) reemployed in positions normally requiring 1,040 or more hours per year shall have their retirement payments suspended while reemployed. Determining compliance with these laws and evaluating whether part-time employees are properly classified can be difficult because the law is based on position requirements rather than actual hours worked. While a position may normally require less than 1,040 hours per year, there are reasons a retiree may work 1,040 or more hours in a year, such as project extensions, employee illnesses, or delays in hiring replacements. When a retiree working in a non-benefit eligible position works 1,040 hours or more in a year, agencies should determine whether (1) the employee has exceeded this limit due to short-term, unforeseen circumstances and should continue to be classified as non-benefit eligible, or (2) the position has effectively changed and should be reclassified as benefit eligible. None of the agencies contacted regarding instances of part-time retirees working significantly more than 1,040 hours per year had re-evaluated those positions to ensure proper classification.

Most of the state agencies we contacted indicated compliance should be ensured by tracking and monitoring actual hours worked during a 1-year period by each part-time employee. MDC officials indicated because all retirees are hired in non-benefit eligible positions, there has been no demonstrated need to monitor their hours related to retirement benefits. Without monitoring actual hours worked, state agencies are unable to ensure retirees are properly classified.

Some of the retirees noted above who worked more than 1,040 hours in their anniversary year may have been improperly classified and received retirement payments while reemployed, when not eligible to do so. Our review noted there are no statewide monitoring procedures to ensure proper benefit eligibility classification of reemployed retirees and many state agencies lacked sufficient procedures to ensure these retirees were properly classified. In addition, some state agencies classified certain retirees as part-time although they were allowed to work 1,040 or more hours a year. The following table shows information regarding the part-time retirees who worked 1,040 or more hours during one or both anniversary years ended in the period January 1, 2011 to June 30, 2013:

Part-Time Retirees Reemployed during the 2 years ended December 31, 2012

State Agency	Retirees	Retirees who worked 1,040 or more hours[1]	Retirees who worked 1,144 or more hours[1]	1,144 or more hours Range	
				Low	High
Mental Health	303	41	24	1,158	2,048
Labor and Industrial Relations	89	14	7	1,174	1,691

[1] Hours worked during one or both anniversary years ended in the period January 1, 2011 to June 30, 2013.

[2] Judiciary, Natural Resources, Public Defender, Secretary of State, State Auditor, State Treasurer, Transportation, Revenue, and Corrections (Higher Education had no retirees reemployed part-time)

[3] The employee worked 1,144 or more hours in only one of the anniversary years.

The hours worked by the 45 retirees who worked significantly over the 1,040 hour threshold ranged from 1,158 to 2,048 hours per anniversary year.

Varied monitoring procedures

Most instances of retirees working 1,040 or more hours in a year appeared to occur because of inadequate state agency monitoring procedures. Our review noted numerous weaknesses and inconsistencies among state agency procedures.

Several state agencies had centralized procedures or tracking systems where the human resources or other administrative department monitored actual hours worked by part-time retirees on a monthly or bi-monthly basis. For example, MoDOT human resources personnel prepare monthly reports of retiree hours worked to date, and send notices to those retirees (and their supervisors) who have exceeded 700 hours in their anniversary year. The time tracking system maintained by the MSHP automatically sends emails to those retirees (and their supervisors) who have exceeded 920 hours in their anniversary year. DHSS, DED (excluding Missouri Public Service Commission), and House of Representatives human resources personnel maintain spreadsheets of hours worked by a retiree during his/her anniversary year and notify the retiree's supervisor when nearing 1,040 hours. The Missouri Gaming Commission, AGO, DOLIR, and the Senate also have centralized monitoring procedures.

Some state agencies, including DESE, DPS, MDA, and OA delegate monitoring procedures to individual divisions or units within their agencies. The Office of State Courts Administrator (OSCA) delegated monitoring of reemployed retirees, other than Senior Judges, to the various appointing authorities in the circuit courts. Some state agencies, such as DSS and DMH, delegate monitoring procedures to individual employee supervisors. MDC personnel indicated although they believe monitoring of actual hours worked is not necessary, individual supervisors have the ultimate responsibility for monitoring and ensuring retirees do not work more than the maximum allowed number of hours.

Our analysis determined some state agencies with centralized procedures had no or less significant instances of part-time retirees who worked 1,040 or more hours per anniversary year. Conversely, some state agencies that lacked centralized procedures had the highest number of retirees who worked 1,040 or more hours. DMH personnel indicated many of their instances resulted from supervisors' failure to appropriately monitor hours worked, and corrective action was being taken to improve monitoring procedures and prevent future occurrences. Likewise, OA personnel indicated they plan to take a more proactive, centralized approach to monitoring future work hours for reemployed retirees. Because the MDC delegated the monitoring responsibilities to supervisors, MDC central office

personnel were unable to explain why certain reemployed retirees were allowed to work significantly more than 1,040 hours.

Benefit eligibility

We noted one retiree classified improperly as part-time, although he was required to work in excess of 1,040 hours per year. As a result, this retiree received retirement payments while reemployed.

The Committee on Legislative Research made an arrangement with an employee under which he would retire and continue to work in the same position for at least 3 years while the committee hired, and the retiree trained, a replacement. Under this arrangement, the retiree is to work at least 30 hours per week (1,560 hours a year) at a salary of $60,000, and be classified as non-benefit eligible.

Because the retiree was required to work in excess of 1,040 hours per year, this arrangement appears to violate state law requiring retirees reemployed in positions normally requiring 1,040 or more hours per year to be classified as benefit eligible, and retirement payments be suspended while reemployed. Committee personnel indicated this employee is considered a contract employee rather than a part-time employee. They further indicated because state statutes do not prohibit the employment of contract employees, regardless of their status with the state retirement system, they believe no violation of law has occurred. State law does not differentiate between contract and normal employees, therefore it appears the law applies to all employees and requires this retiree to be classified as benefit eligible.

Multiple positions

While most state agencies tracked total hours worked by retiree for a year, two state agencies tracked hours separately by position, which appears to violate state law when collectively the multiple positions constitute a single position that normally requires 1,040 or more hours.

Both DOLIR and DMH reemployed retirees simultaneously in multiple positions within the department and tracked and monitored the hours worked by those retirees separately by position. As a result, several reemployed retirees at each of these state agencies worked less than 1,040 hours in each position, but more than 1,040 hours in total during their respective anniversary years. This practice accounted for 9 of 14 (64 percent) of DOLIR's reemployed part-time retirees who worked in excess of 1,040 hours in their anniversary years. Similarly, multiple positions accounted for 14 of 41 (24 percent) of DMH's reemployed part-time retirees who worked in excess of 1,040 hours. For example, our review of 5 of these 14 DMH reemployed retirees noted they worked as direct care aides or nurses in multiple units simultaneously within a DMH facility. Subsequent to our review, DOLIR officials told us the department changed procedures in October 2013 and began tracking and monitoring hours worked in total by employee for all positions.

Sections 104.010.1(21)(d), RSMo, (MSEP and MPERS Closed Plan), and 104.1003.1(13)(c), RSMo, (Year 2000 plans) provide that a person who is employed in multiple positions simultaneously within a single agency should be considered to be working in a single position for purposes of determining whether the person is or is not benefit eligible.

Work year definitions

State agencies defined work year inconsistently and did not always comply with state law. While most state agencies defined a work year as the 12-month period beginning on the first day of reemployment (anniversary year), some state agencies defined a work year as a calendar year (ending December 31), a fiscal year (ending June 30), or another period. For example, the DESE defines work year as the calendar year and the MDC defines work year as the fiscal year. The MDA's practice and DSS's employment policy defines a work year as the 12-month period beginning with the month of retirement. Personnel at the House of Representatives indicated they switched from anniversary year to calendar year in January 2013.

Some state laws governing reemployment of retirees do not define work year. Section 104.1003.1(13)(d), RSMo, which governs the MSEP 2000 and MPERS Year 2000 Plans, defines a work year as the 12-month period beginning on the first day of employment. However, the state laws governing the MSEP and MPERS Closed Plan do not define work year.

Maximum number of hours

Most state agencies' policies or practices provided that reemployed retirees working in part-time positions must work less than 1,040 hours per year, as provided by reemployment laws. However, some state agencies had established other hour maximums.

The maximum for reemployed retirees of the MSHP and OSCA employees (other than Senior Judges) is 1,000 hours, while the maximum for most MDC employees is 975 hours. DHSS's letter to part-time employees states they cannot exceed 1,040 hours in a 12-month period.

In addition, our review noted many instances of retirees who worked exactly 1,040 hours, or only a few hours more than 1,040 in a year. These instances included most retirees who worked 1,040 or more hours at the DPS and House of Representatives, and most retirees who worked less than 10 percent in excess of 1,040 hours at the OA and DHSS. While it is evident these agencies are generally monitoring the hours worked by retirees reemployed part-time; the individuals performing the monitoring may not have a clear understanding of the requirements since many instances were noted where retirees worked exactly 1,040 hours.

Sections 104.010.1(21) and 104.1003.1(13), RSMo, define benefit eligible employees as those who are employed in a position normally requiring the performance of duties of not less than 1,040 hours.

Separation of employment

State laws do not require a standard or minimum separation period between retirement and reemployment.

Most state agencies did not have requirements regarding separation of employment before reemployment, and the policies varied for the few agencies that had such requirements. MSHP personnel told us they require at least one pay period to lapse after retirement before rehiring retirees; and retirees are hired for a 1-year term with a 5-day separation between each term. DESE personnel indicated there is no separation requirement for most reemployed retirees. DESE personnel further indicated retirees who were Directors must wait 1 year prior to becoming a DESE vendor, and retirees of the Disability Determinations Division must wait 1 month. MDA staff stated retirees typically have a waiting period of 30 days, but there are some instances where this policy is not followed. There are no state guidelines regarding separation of employment before reemployment.

Conclusion

Guidance to state agencies and improved state agency procedures are necessary to reduce the risk of noncompliance with laws regarding reemployment of retirees, and to provide for fair and equitable treatment of retirees and state employees. State agencies should be encouraged to establish uniform policies regarding maximum hours of employment and separation requirements, as well as, procedures requiring periodic review of all retiree positions to ensure proper classification. The laws regarding the MSEP and MPERS Closed Plan should be revised to clearly define work year.

Recommendation

The Office of Administration provide guidance to state agencies for implementing consistent monitoring procedures for reemployed retirees. In addition, the Office of Administration should work with the General Assembly to revise state laws specifically to define work year for the MSEP and MPERS Closed Plan retirees and address the separation period between retirement and reemployment. The Office of Administration should work with state agencies to review employment arrangements with reemployed retirees working 1,040 or more hours per year to ensure benefit eligibility classifications are proper. If it is determined an employee has been incorrectly classified or the nature of a position has changed, corrections should be made to ensure compliance with state laws.

Auditee's Response

The Office of Administration provided the following response:

As mentioned above, the decentralized HR structure within Missouri state government limits the ability of the OA to dictate and enforce

specific HR practices that have not been codified into the Missouri Constitution, state statutes or regulations. OA's authority is further limited by the need to respect built in separations between the various branches of state government. Specifically, the legislative and judicial branches maintain even more independence in their actions than some of the executive branch departments. In addition, the Missouri Constitution provides enhanced autonomy to particular executive branch departments such as the MDC and the MoDOT.

OA is in a position to assist agency staff with a report that could assist with monitoring the work of retirees that have returned to work, and work with the legislature on these issues by providing technical assistance in order to provide background and resources to advance the understanding of possible impact to the state.

4. Retiree Vendors

State laws and regulations that address hiring retirees as vendors are inadequate and most state agencies lacked adequate procedures to ensure these vendor arrangements are proper. As a result, several retirees were hired as vendors when it appears they should have been classified as full-time, benefit eligible employees. In addition, these retirees received retirement payments that would have been suspended if they had been classified as employees. While some vendor relationships reviewed appeared appropriately classified, others did not.

At least 15 state agencies utilized 132 retirees as vendors during the 2 years ended December 31, 2012. As vendors, they were paid at least $2.1 million, or an average of almost $16,000 each, for services provided. Many retirees were paid in multiple years.

Retiree Vendors receiving payments during the 2 years ended December 31, 2012

State Agency	Retiree Vendors	Payments	Average per Retiree
Elementary and Secondary Education	31	$ 553,805	17,865
Social Services	21	552,959	26,331
Judiciary	8	189,568	23,696
Conservation	21	187,128	8,911
Insurance, Financial Institutions, and Professional Registration	2	168,100	84,050
Mental Health	17	147,426	8,672
Public Defender	8	145,261	18,158
Economic Development	1	118,720	118,720
7 Other State Agencies[1]	23	43,108	1,874
Total	132	$ 2,106,075	15,955

[1] Natural Resources, Public Safety, Office of Administration, MoDOT, Agriculture, Health and Senior Services, and Labor and Industrial Relations.

Our review of selected retiree vendor arrangements noted these vendors provide a variety of services on either a full-time or part-time basis. For example, 13 retirees provide driver, reader, and monitoring services on a part-time basis for the DSS Family Support Division, Rehabilitation Services for the Blind. Additionally, DESE contracts with hundreds of vendors, of which 15 were retirees, to evaluate individuals applying for disability services.

State Laws and Regulations

State laws and regulations regarding classifying individuals as vendors or employees do not provide state agencies sufficient guidance to properly classify retirees providing services to the state. We noted most state agencies lacked adequate procedures for classifying individuals as vendors or employees.

Section 288.034.5, RSMo, and 8 CSR 10-4.150(1) provide when determining the existence of an employee or vendor relationship, the common law rules under 26 USC 3306(i) should be applied and the applicable case law, IRS regulations and IRS letter rulings should be considered. However, the statute and regulation provide no additional details or reference to specific IRS guidance. Most state agencies personnel interviewed were not familiar with the statute, regulation, or IRS guidance.

OA personnel provided us copies of memos dated 1996 from a former OA Commissioner to state agency directors providing guidance, similar to IRS guidance, for classifying individuals as contractors and employees. However, this guidance has not been formalized in a policy or current guidance available to state agencies. The MoDOT has developed a policy/guideline for determining whether individuals are employees or vendors. AGO personnel stated they only hire retirees as hourly employees, not vendors.

The 1996 memos outline issues that could result from incorrectly classifying an individual as a contractor instead of an employee, including (1) risk of violating state agency appropriation limitations for specific purposes (such as personal services or expense and equipment), (2) penalties from the IRS and U.S. Department of Labor, (3) liabilities associated with employee rights and benefits not afforded to individuals, and (4) perceptions of unfairness and inconsistency.

Without adequate laws and regulations, there is a risk of state agencies misclassifying retirees as vendors when they should be classified as employees. In addition, the lack of adequate laws and policies increases the possibility of vendor contracts being established simply to circumvent reemployment law limitations.

Improperly Classified Vendors

We reviewed 16 different types of vendor contracts from which payments totaling approximately $1.5 million were made to 41 retiree vendors during the 2 years ended December 31, 2012. Our review of these contracts and selected related payments noted some retirees who we believe, based upon the nature of the arrangements and the work performed, should have been hired as employees rather than vendors. In making this determination, we utilized IRS Ruling 87-41 (IRS 20 Factor Test) and IRS Publication 15-A, which provide guidance for determining whether an individual is an employee or a contractor. Factors the IRS indicates should be considered are included in three categories: behavioral control, financial control, and the type of relationship of the parties.

Because these retirees are paid as vendors, documentation of time worked is not always maintained, making it difficult to determine whether the retiree worked on a full-time or part-time basis. Improperly classifying retiree and non-retiree vendors who work on either a full-time or part-time basis is problematic. Misclassifying retiree vendors who provide services on a full-time basis is even more significant because those retirees are generally required to have their retirement payments suspended if classified as an employee. Examples of retiree vendor relationships we believe should have been considered full-time employees are noted below:

- The highest paid retiree vendor has been working since he retired in July 2003. Prior to his retirement, the retiree served as a DHSS senior official, and among other duties, was responsible for oversight of the Missouri Senior Rx Plan. After retirement, he was reemployed part-time by the DHSS to continue to manage the plan. In October 2005, when the plan was transitioned to the Missouri Rx Plan and transferred to the DSS, he continued to manage the plan as a DSS contractor. This retiree was the only bidder when bids were sought for the contract. Procurement documents indicate the retiree is eminently qualified for the role because he has been continuously associated with the leadership of the program since its inception.

  Classifying this retiree as a vendor rather than an employee is questionable because (1) services provided are a key aspect of regular DSS operations, (2) services are provided full-time, solely for DSS, and on an ongoing basis, (3) the retiree works from space in a DSS office building, and is provided annual leave and all state holidays.

- The DED contracted with a DPS retiree from June 2011 to December 2012, to serve as project manager for a federally funded program to clean up property damaged by the May 2011 Joplin tornado and flooding in southeast Missouri. According to contract documents, the retiree worked in a full-time capacity through May 2012, and less than full-time from June to December 2012. DED personnel indicated they

contracted with this retiree, rather than hiring him as an employee, because the retiree was only needed for this special project, which had limited grant funding. This contract is the only one DED had with a retiree during the time period reviewed. Although the arrangement with this retiree was temporary for a special project, we believe it should be considered an employment because services were provided on a full-time basis, the retiree provided services solely to the DED for this project, and he was paid by the month or hour depending on whether he worked full-time or part-time.

IRS Ruling 87-41 outlines the IRS 20 Factor Test to be used by employers to determine whether their workers should be classified as employees or independent contractors. Those factors are (1) instructions; (2) training; (3) integration; (4) services rendered personally; (5) hiring, supervising, and paying assistants; (6) continuing relationship; (7) set hours of work; (8) full-time required; (9) doing work on employer's premises; (10) order or sequence set; (11) oral or written reports; (12) payment by hour, week, month; (13) payment of business and/or traveling expenses; (14) furnishing of tools and materials; (15) significant investment; (16) realization of profit or loss; (17) working for more than one firm at a time; (18) making services available to general public; (19) right to discharge; and (20) right to terminate. More recently, in addition to the IRS 20 Factor Test, IRS Publication 15-A sets forth the broader categories of (1) behavioral control, (2) financial control, and (3) relationship of the parties. In summary, employees typically have a dependent relationship and work solely for the state agency, while vendors are independent/autonomous and often provide the same or similar services to other entities.

When state agencies misclassify retirees as vendors rather than full-time employees, there is a violation of state law, which prohibits most retirees from receiving retirement payments during full-time reemployment. In addition, this practice denies the individual benefits to which they might be entitled if they were classified as employees rather than vendors; and provides for inconsistent treatment of state employees. Potential liabilities exist when employees are misclassified as vendors, including tax liabilities to the federal government, claims for fringe benefits from misclassified employees, workers compensation claims, and costs associated with not complying with the Fair Labor Standards Act.

Recommendation

The Office of Administration work with the General Assembly to improve state laws and regulations, and establish guidelines for state agencies to follow when classifying individuals as an employee or a vendor. A comprehensive review of all existing retiree and non-retiree vendor arrangements should be performed, state agencies should consult with legal counsel to evaluate if individuals have been properly classified as vendors, and when necessary reclassify them as employees.

Auditee's Response

The Office of Administration provided the following response:

As discussed more fully in response to Audit Finding 1, the concept of OA providing state agencies with guidance related to the distinctions between employees and vendors and the possible consequences is certainly not new. OA has provided general guidance regarding this issue in the past. Similar guidance was provided by Commissioner Hansen several years ago. Although each respective agency would probably retain the authority to address these issues and the accountability for incorrect assessments, OA will provide guidance and reiterate concerns to the various agencies.

[1] Closed (C), Uniformed (U)

[2] Agency where most recently reemployed as of December 31, 2012.

[3] These amounts include only pension and pay received while reemployed during the 2 year period. Any pay received before retirement or pension received while not reemployed was not included.

[4] Retiree terminated employment at the State Auditor's office on January 10, 2011. Pay includes work performed from December 16, 2010 to January 10, 2011, and unused annual leave.

[5] Retiree had retired from two different retirement plans, and was reemployed again and working toward a third retirement benefit as of December 31, 2012. Retiree 3 received retirement payments from both retirement plans while reemployed. Retiree 31 received retirement payments from only one of the retirement plans while reemployed, because one plan prohibited the monthly $748 retirement payments while reemployed.

[6] Retirees 8, 29, and 30 retired a second time during the 2 years ended December 31, 2012, and began receiving additional monthly retirement payments of $805, $1,476, and $828, respectively.

Brownfield Remediation Tax Credit Program

April 2014

Report No. 2014-023

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Brownfield Remediation Tax Credit Program

Background

The Brownfield Remediation Tax Credit (BRTC) Program was established in 1995. The Department of Economic Development (DED) manages this program, which provides financial incentives for the redevelopment of commercial/industrial sites that are contaminated with hazardous substances and have been abandoned or underutilized for at least 3 years. To be eligible for BRTCs, the Missouri Department of Natural Resources (DNR) must accept the project into the Voluntary Cleanup Program (VCP) and approve the applicant's remedial action plan. Applicants cannot have intentionally or negligently caused the release or potential release of hazardous substances at the project. The DED must project at least 10 new jobs will be created or at least 25 jobs will be retained as a result of the completed BRTC project. Applicants may receive BRTCs for up to 100 percent of the eligible costs of demolition and remediation, but under state law BRTCs are limited to the least amount necessary for the project to occur and limited to the projected state economic benefit as determined by the DED. BRTCs are non-refundable but transferable and may be carried forward for 20 years. The DED authorized over $185 million in BRTCs for 115 projects during fiscal years 2003 to 2013. Audit staff reviewed 15 BRTC projects and interviewed DED staff involved in those projects.

Program Administration and Oversight

The DED has not conducted a formal evaluation of the BRTC to determine whether authorizing BRTCs for 100 percent of eligible costs is the most advantageous to the state, and this practice results in developers having little incentive to minimize remediation and demolition costs. In addition, the DED has not (1) designed a formal procurement process that requires the lowest and best bids to be accepted and restricts conflict of interest situations, (2) compiled a historical listing of reasonable prices for various remediation activities, and (3) required an engineer, architect, or certified public accountant to certify eligible project costs. These weaknesses provide little assurance that projects are completed at a fair and reasonable cost to taxpayers.

For one project, the DED reduced the amount of authorized BRTCs after discovering the developer had obtained, but not submitted to the DED, a lower bid. For that same project, the DED did not reduce the authorized BRTCs for the proceeds from the sale of scrap materials generated during demolition. For another project, the DED issued BRTCs for activity not included in the remedial action plan, and the DNR did not conduct independent verification and testing prior to certifying remediation activities were properly completed.

Program Efficiency and Effectiveness

The DED does not always require developers to enter into clawback agreements in the event the project does not create the projected number of jobs. Audit staff reviewed 15 projects and found, for the 10 projects with completed remediation activities, developers projected 2,500 jobs would be created, but only 116 full-time and 322 part-time jobs were actually created. Because the DED uses these job creation estimates in the annual cost-benefit analysis submitted to the General Assembly, the state economic impact of the BRTC program is significantly overstated.

The General Assembly has not established annual or cumulative limits on BRTCs, or a sunset provision for the BRTC program. State law does not prohibit claiming the same project costs under two or more tax credit programs. This "stacking" of tax credits can be lucrative for developers without generating additional economic activity or state benefit. Previous DED and DNR officials did not require parties responsible for environmental damage to be fully responsible for remediation costs. As a result, state taxpayers will end up primarily funding the remediation costs for a project through the issue of $12.275 million in BRTCs. The DNR also did not hold previous owners responsible for environmental damages for 4 additional projects where some hazardous materials were likely generated by former owners.

In the areas audited, the overall performance of this program was **Poor***

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Mike Downing, Director
Department of Economic Development
and
Sara Parker Pauley, Director
Department of Natural Resources
Jefferson City, Missouri

We have audited certain operations of the Brownfield Remediation Tax Credit Program in fulfillment of our duties under Chapter 29, RSMo and Section 620.1300, RSMo. The scope of our audit included, but was not limited to, the 3 years ended June 30, 2013. The objectives of our audit were to:

1. Analyze the costs and benefits of the program to determine if it is an effective and efficient use of state resources.

2. Evaluate the internal controls over significant management and financial functions related to the program.

3. Evaluate compliance with certain legal requirements related to the program.

4. Evaluate the economy and efficiency of certain management practices and operations.

For the areas audited, we (1) determined certain aspects of program effectiveness and efficiency could be improved, but due to weaknesses in program data, other aspects of program effectiveness and efficiency could not be adequately determined, (2) identified deficiencies in internal controls, (3) identified significant instances of noncompliance with legal provisions, and (4) identified the need for improvement in management practices and procedures.

Except for the matter discussed in the last paragraph of the Scope and Methodology Section, we conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Management Advisory Report presents our findings arising from our audit of the Brownfield Remediation Tax Credit Program.

Thomas A. Schweich
State Auditor

Brownfield Remediation Tax Credit Program
Introduction

Background

The Brownfield Remediation Tax Credit (BRTC) Program was established in 1995 as a part of the Brownfield Redevelopment Program under Section 447.708, RSMo. The redevelopment program included the BRTC, the jobs/investments tax credit, and the demolition tax credit. The Department of Economic Development (DED) manages this tax incentive program. The program provides financial incentives for the redevelopment of commercial/industrial sites that are contaminated with hazardous substances and have been abandoned or underutilized for at least 3 years.

The BRTC is a discretionary tax credit. Eligible projects must be abandoned or underutilized property to be acquired, established, expanded, remodeled, rehabilitated or modernized for industry, commerce, distribution or research, or any combination thereof, the operation of which, alone or in conjunction with other facilities, will create new jobs or preserve existing jobs and employment opportunities. If the property is not owned by a public entity, the city or county must endorse the project. The Missouri Department of Natural Resources (DNR) must accept projects into the Voluntary Cleanup Program (VCP) to be eligible for BRTCs. Participants in the VCP must submit a remedial action plan, which identifies the known or suspected environmental hazards and how the applicant will remediate those hazards. The DNR must approve the remedial action plan. Applicants cannot be a party who intentionally or negligently caused the release or potential release of hazardous substances at the project. The DED must project at least 10 new jobs will be created or at least 25 jobs will be retained as a result of the completed BRTC project.

Applicants may receive BRTCs for up to 100 percent of the costs of materials, supplies, equipment, labor, professional engineering, consulting and architectural fees, permitting fees and expenses, demolition, asbestos abatement, and direct utility charges for performing voluntary remediation activities for preexisting hazardous substance contamination and releases. Eligible costs may also include up to 100 percent of the costs of demolition that are not directly part of the remediation activities, provided that the demolition is on the property where the voluntary remediation activities are occurring, the demolition is necessary to accomplish the planned use of the facility where the remediation activities are occurring, and the demolition is part of a redevelopment plan approved by the municipal or county government and the DED. The amount of the credit available for demolition cannot exceed the total amount of credits approved for remediation.

Under Section 447.708.3(2), RSMo, BRTCs are limited to the least amount necessary for the project to occur and under Section 447.701.1, RSMo, the total amount of BRTCs for each eligible project shall be limited to the projected state economic benefit, as determined by the DED. The DED estimates the net state economic benefit by using the projected number of new or retained jobs and investments as inputs into an economic modeling

software program. The DED determines the authorized credit amount based on the lesser of the estimated amount of eligible remediation and demolition costs, the proven gap in financing, or the net state economic benefit.

The DED issues BRTCs for actual eligible project costs up to 75 percent of the authorized amount through the completion of remediation and demolition activities. The DED issues the remaining 25 percent (also known as the holdback) after the DNR VCP has issued a certificate of completion letter. The DED may increase the authorized amounts if project remediation costs exceed the estimated costs as long as the total credits do not exceed the financing gap or projected net state economic benefit. The DED, before issuing any BRTCs, requires the developer to submit invoices and proof of payment for any for eligible costs.

BRTCs are non-refundable,[1] but transferable. The credits may be carried forward for 20 years and may be redeemed against the income tax imposed by Chapter 143, RSMo, excluding withholding tax imposed by Sections 143.191 to 143.265, RSMo, the corporate franchise tax imposed by Chapter 147, RSMo, and the financial institution tax imposed by Chapter 148, RSMo.

The DED authorized over $185 million in BRTCs for 115 projects during state fiscal years 2003 to 2013. Ninety-one of those projects were located in the St. Louis metropolitan area, 10 projects in the Kansas City metropolitan area, and 14 projects in other parts of the state.

Credits in other states

According to a recent report,[2] Missouri is one of 13 states that have established state tax credits for brownfield remediation. Nine states treat the credits as an entitlement program and in four states, including Missouri, the credits are discretionary and based upon a needs test. Tax credit percentages for site assessment and remediation costs vary from 12 to 100 percent. Two states base the credit on total investment rather than remediation costs. Six states have established per-project caps ranging from $150,000 to $500,000. Florida has established an annual program cap of $2 million. Iowa has recently increased its annual cap to $10 million. Connecticut, which limits its program to large industrial projects, has set an aggregate cap of $500 million. The report noted Michigan had recently eliminated its Brownfield tax credit because of fiscal concerns. Missouri does not have a per-project, annual or aggregate program cap. In addition, 8 of these 13 states, including

[1] The taxpayer must have a tax liability the credit can be offset against.

[2] Redevelopment Economics, "Analysis of the Economic, Fiscal, and Environmental Impacts of the Massachusetts Brownfield Tax Credit Program," October 2012, <http://www .redevelopmenteconomics.com/yahoo_site_admin/assets/docs/Mass_impact_report_final _NBP.196220244.pdf>, accessed January 3, 2014.

Missouri, allow credits to be transferred or sold. Many other states have some form of incentive for environmental remediation such as direct grants, loan programs, or property tax abatement.

Reporting

The DED provides the General Assembly and the public key program information for the BRTC program through the tax credit activity report.

Agencies administering tax credit programs are required under Section 33.282, RSMo, to submit the estimated amount of tax credit activity for the next fiscal year to the State Budget Director for submission to the Chairmen of the Senate Appropriations and House Budget Committees. In addition to the estimates of tax credit activity, the agencies must also include a cost-benefit analysis of the program for the preceding fiscal year. The annual estimates and cost-benefit analyses are submitted on forms called tax credit analysis forms. State law requires the tax credit activity report be submitted to the State Budget Director by October of each year and to the Chairmen of the Senate Appropriation and House Budget Committees by January 1 of each year.

In addition, Section 135.805, RSMo, requires companies receiving tax credits to submit an annual report to the DED for a period of 3 years after issuance of the credits. This report is required to include the actual number of jobs created as a result of the tax credits for each month of the preceding 12-month period; whether the property is used for residential, commercial, or governmental purposes; the projected or actual project cost and labor cost; and date of completion. The DED makes this information available to the public, as required by Section 135.805, RSMo.

Scope and Methodology

To gain an understanding of the program, we interviewed DED officials involved in the application and approval process as well as staff involved in monitoring these projects. We also interviewed officials of the DNR VCP and officials of a city development agency involved in one remediation project.

To understand how Missouri's BRTC program compares to other states, we obtained information from various Internet searches.

We analyzed BRTC activity for 62 remediation projects that had BRTCs authorized or issued during fiscal years 2010 through 2013. We selected 15 BRTC project files for further review, interviewed DED staff involved in those projects, and determined if DED staff followed required procedures on those projects.

To evaluate potential improvements to the program, we reviewed reports from the Missouri Tax Credit Review Commission. The commission was created by the Governor in July 2010 and charged with reviewing the state's tax credit programs and making recommendations for greater efficiency and

enhanced return on investment. The commission released reports in November 2010 and December 2012.[3]

We obtained aggregate totals of annual tax credit redemptions from the DOR. In accordance with the Missouri Supreme Court decision in the case of *Director of Revenue v. State Auditor* 511 S.W.2d 779 (Mo. 1974), auditors are not provided individual tax returns. As a result, auditors were not able to verify the completeness and accuracy of redemption data provided.

[3] The December 2012 report included a supplemental report that we also reviewed.

Brownfield Remediation Tax Credit Program
Management Advisory Report
State Auditor's Findings

1. Program Administration and Oversight

The DED has not conducted a formal evaluation of the BRTC program to determine whether authorizing BRTCs for 100 percent of eligible costs is the most advantageous to the state, and this practice results in developers having little incentive to minimize remediation and demolition costs. In addition, the DED has not (1) designed a formal procurement process that requires the lowest and best bids to be accepted and restricts conflict of interest situations, (2) compiled a historical listing of reasonable prices for various remediation activities, and (3) required an engineer, architect, or certified public accountant to certify eligible project costs. These weaknesses provide little assurance that projects are completed at a fair and reasonable cost to taxpayers.

For one project, the DED reduced the amount of authorized BRTCs after discovering the developer had obtained, but not submitted to the DED, a lower bid. For that same project, the DED did not reduce the authorized BRTCs for the proceeds from the sale of scrap materials generated during demolition. For another project, the DED issued BRTCs for activity not included in the remedial action plan, and the DNR did not conduct independent verification and testing prior to certifying remediation activities were properly completed.

1.1 Eligible cost percentage and per-project caps

The DED has not conducted a formal evaluation of the BRTC to determine whether authorizing BRTCs for 100 percent of eligible costs is the most advantageous to the state. The DED issues BRTCs for up to 100 percent of the eligible costs, subject to limitations of the proven financing gap and the state net economic benefit provisions. State law[4] provides the DED with the authority to base the credit on a lower percentage. For 6 of 15 projects reviewed, the DED authorized BRTCs for 100 percent of eligible costs. In addition, Missouri has not established a per-project cap. Of the 13 states with brownfield remediation programs, only Missouri and Connecticut authorize tax credits for up to 100 percent of eligible costs. The rates noted for the other states ranged from a low of 12 percent for some types of projects in Iowa to 75 percent in New Jersey. Six states have established per-project caps ranging from $150,000 to $500,000.

The practice of authorizing BRTCs at 100 percent of eligible costs provides little or no incentive for developers to minimize remediation and demolition costs. To contain the cost of the BRTC program, the DED should evaluate and consider lowering the percentage of eligible costs qualifying for BRTCs, and the General Assembly should consider establishing caps on individual projects.

[4] Section 447.708.3(1), RSMo

1.2 Procurement of Project Services

The DED does not require developers to solicit bids for project services on a competitive basis, require detailed unit price/quantity bids, or require bids for some project costs. The DED does not have policies to restrict potential conflicts of interest on BRTC projects. The DED does not compile historical unit costs. As a result, the DED has little assurance BRTC project activities are completed at a fair and reasonable cost.

Competitive procurement

The DED does not require developers to conduct a formal procurement process that includes advertising and posting public notices of bid opportunities, distributing requests for proposals to interested parties, ensuring requests for proposals are sufficiently detailed, requiring the use of sealed bids, publicly opening bids, establishing appropriate conflict of interest policies, ensuring bids are only accepted from qualified and capable contractors, and using a formal bid evaluation process that considers all relevant criteria.

The DED requires applicants to submit three informally obtained cost estimates (bids) for remediation, demolition, and related services that are to be included as BRTC eligible costs. The DED uses the bids to help support the amount of BRTCs authorized for projects. DED staff base the authorized amount on the lesser of the estimated eligible costs, the proven gap in financing, or the net state economic benefit. The DED does not require the bids to be awarded to the lowest and best bidders.

Competitive bidding would help contain the cost of BRTCs by ensuring remediation and development activities are completed at a reasonable cost, and would help ensure all interested parties are provided an opportunity to participate in projects funded by BRTCs.

Unreported bids

The DED does not have adequate procedures in place to ensure developers submit the lowest bids received. In February 2012, the developer for the Northwest Plaza Project (NWP) submitted 3 bids for asbestos abatement, 3 bids for household hazardous waste disposal, and 3 bids for demolition. Using the lowest bid in each category, the DED authorized BRTCs totaling $7,761,225 for the project in October 2012. In October 2013, the DED reduced the amount of authorized BRTCs for the NWP by $288,000 because the developer had not submitted the lowest asbestos abatement bid received.

In August 2012, the NWP developer obtained a substantially lower demolition bid of $1.8 million from the another contractor. The DED had used the previously lowest demolition bid of $3.335 million to determine the authorized amount of BRTCs. The DED eventually learned from a third party the developer had not reported this lower demolition bid. DED officials indicated they did not consider this bid to be a responsive bid. However; this bid raises concerns regarding whether the original bid process

resulted in the least amount necessary for the project to proceed. To ensure the amount of BRTCs issued are limited to the least amount necessary, as required by state law, the DED should establish formal procedures that require developers to submit all bids the developer obtains.

Unit price/quantity bidding

The DED often receives bid documents from developers that do not contain detailed information. For 8 of the 15 projects reviewed, developers submitted lump sum (fixed price) bids that did not include detailed quantities, unit/prices, and unit price adjustment factors.

For the ongoing NWP project, the bids included an estimate to remediate over 1.1 million square feet of asbestos materials. The lowest bid, to remediate the asbestos at the time the developer submitted his application to the BRTC program, was submitted by the environmental consulting firm and totaled approximately $3.7 million. This amount was included in the amount of BRTCs authorized by the DED. The DNR, while conducting VCP monitoring questioned the need for the remediation of the entire estimated quantity of asbestos because the developer decided to remodel rather than demolish 3 large buildings. The environmental consultant revised the estimated quantity of asbestos remediation to about 540,000 square feet, about half of the original amount. DED officials indicated they are aware of the significant change in the quantity of asbestos remediation required for this project. However, since the bid summary did not include unit price adjustment factors for the various types of asbestos abatement, it is unclear what impact, if any, the change in quantity will have on project costs and the amount of BRTCs issued.

To help ensure project cost estimates and related BRTCs issued are reasonable, the DED should require contractors to submit bid information that includes detailed quantities, unit/prices, and unit price adjustment factors.

Project cost analysis

The DED does not compile a historical listing of unit prices for various types of remediation activities to determine if amounts bid are reasonable. Maintaining a database with historical cost information would help the DED to determine the reasonableness of amounts bid.

Other project costs

The DED does not require some project costs to be competitively procured. Examples of project costs not requiring competitive proposals included environmental consulting, monitoring, and testing. These additional project costs can range from a few thousand dollars on smaller projects to several hundred thousand dollars on large projects.

Conflict of interest

In 6 of 15 projects reviewed, the environmental consultants that obtained and evaluated bids for the developer also submitted bids and/or subsequently performed substantial portions of project activities. On one project, the environmental consultant assisted a contractor to prepare a bid

totaling about $6.9 million for remediation services. After the DED required 2 additional bids, the developer submitted bids from the consulting firm for about $14.4 million and from another contractor for about $14.1 million. However, these 2 bids were based on a different technology. The developer selected the environmental consultant as the general contractor for the project. This firm subsequently also performed the remediation activities for which the $6.9 million in BRTCs were authorized. For 2 of these 6 projects, the environmental consultant did not submit a bid but subsequently performed the services and submitted invoices totaling the amount of BRTCs authorized. These 2 projects received BRTCs totaling $1.275 million.

Allowing environmental consultants to obtain and evaluate bids, select firms from which bids are solicited, submit competing bids, and/or then perform project activities creates a conflict of interest and results in little assurance that the BRTCs issued are the least amount necessary for the projects to be completed.

Tax Credit Review Commission

In its 2012 report,[5] the Tax Credit Review Commission recommended the General Assembly "provide agencies more authority to require government procurement and bidding practices of recipients of tax credits for expenses incurred relative to tax credit projects with the intent to assure competitive costs." The commission also recommended the General Assembly "provide agencies more authority to define related party transactions and provide applicable limitations to benefits provided to related parties."

1.3 Cost certification

The DED does not require certification of the actual project costs by a licensed engineer, architect or certified public accountant.

The DED requires the developer to submit source documentation showing actual project costs including invoices and proof of payment prior to issuance of the BRTCs. The developer is also required to attest to the accuracy of all information provided. DED personnel indicated they review the documentation to determine whether the remediation activities invoiced are likely activities included in the remedial action plan and compare invoices to amounts bid. However, personnel indicated invoiced costs often do not agree to specific remediation activity line items in the bid since the

[5] In July 2010 the Governor created the Tax Credit Review Commission to review various tax credit programs and make recommendations concerning how the programs should be changed to achieve greater efficiency and provide a positive return on Missouri's investment. The commission's report was issued November 30, 2010. Neither the 2011 nor the 2012 legislative sessions resulted in any tax credit reform. In September 2012, the Governor asked the commission to review and update its 2010 report. The commission's follow-up report was issued December 15, 2012.

line items are based on estimates and subject to change. In addition, as noted previously, the DED does not require bids to contain enough detailed information.

The DED requires a certification of eligible costs by a certified public accountant (CPA) in other tax credit programs including the Historic Preservation and Low Income Housing Tax Credit programs. Both Iowa and Florida require an independent CPA firm to review eligible costs prior to issuance of Brownfield tax credits. Given the lack of incentive for developers to control costs coupled with the lack of a formal procurement process and the existence of conflict of interest situations, the DED should consider requiring project costs be certified by the project architect, engineer, and/or certified public accountant to help ensure BRTCs issued are reasonable.

1.4 Scrap values

The DED authorized BRTCs for $2,265,000 more than the financing gap for the NWP project because the DED did not reduce the authorized BRTCs for the proceeds from the sale of scrap materials generated during demolition. As a result, the DED authorized BRTCs for more than the least amount necessary for the project to proceed as required by state law. In addition, the DED has not established policies and procedures to handle such situations.

On October 1, 2012, the DED authorized BRTCs totaling $7,761,225[6] for the estimated remediation and demolition costs of the NWP project. Based on bids the developer submitted to the DED to establish the amount of BRTCs authorized, scrap rights were to be retained by the demolition contractor. However, the developer and the contractor entered into a separate agreement requiring the contractor to segregate and deliver the scrap materials to third parties. The third parties were required to submit payment for the scrap materials directly to the developer. The agreement required the contractor to pay the developer any difference if scrap payments amounted to less than $2,265,000, and allowed the contractor to receive any proceeds in excess of $2,265,000. However, the developer did not include scrap proceeds in the sources and uses of funds analysis used by the DED that identified a project financing gap of $7,781,225. DED officials indicated they were aware of the scrap agreement, but produced no documentation to support this statement. DED officials also acknowledged the scrap value was not included in the financing gap calculation. If the scrap proceeds were included in an analysis of sources and uses, the financing gap would have been $5,516,225, and the DED would have authorized $2,265,000 less in BRTCs.

[6] The DED subsequently reduced the authorized amount to $7,473,225 in October 2013 when the developer presented the DED with a lower remediation bid.

The DED, also, does not consider the proceeds of the sale of scrap as a reduction or offset to the eligible demolition costs. The DED limits authorization of BRTCs to estimated remediation and demolition costs and limits issuance of BRTCs to actual remediation and demolition costs. As of January 31, 2014, the DED had not yet issued BRTCs because the project was still in progress.

DED officials indicated this project is the only one that had significant scrap value; however, the DED has not established policies and procedures to handle such situations. The DED is required by Section 447.708.3(2), RSMo, to limit the BRTCs to the least amount necessary to cause the project to occur. The DED has determined the least amount necessary is the lesser of the amount of eligible remediation and demolition costs or the proven gap in financing. It appears reasonable to limit authorization and issuance of BRTCs for demolition to net demolition costs (demolition costs less the proceeds from the sale of scrap, or $5,516,225).

The DED should reduce the authorization award associated with the NWP project by $2,265,000 and establish appropriate policies and procedures to handle scrap proceeds in the future.

1.5 Remediation oversight

The DED authorized BRTCs totaling $1,814,976 for one project in September 2008 and in March 2009 authorized additional BRTCs totaling $604,038. In February 2011, the DNR, unaware of the additional remediation work for which the additional tax credits were authorized, issued a certificate of completion for the project and the DED, unaware that the certificate of completion did not encompass the additional remediation activities, issued BRTCs totaling $2,419,014. In early 2012, after receiving a complaint from a subsequent owner, a joint DNR and DED review determined (1) the site was still contaminated, (2) the developer had not properly completed some remedial activities required by the remediation plan, and (3) the DNR had not approved alternative remediation activities that included repainting rather than removing windows.

The DNR subsequently rescinded its certificate of completion for the project and in September 2012, the Attorney General's office filed a lawsuit against the project developer to recover BRTCs issued. However, in March 2014 the parties agreed to dismiss the case. Also, the DED authorized $462,481 in additional BRTCs for the subsequent owner to perform further remediation activities.

Section 447.708.3(1), RSMo, indicates the DED, with the approval of the DNR, may grant a remediation tax credit to an applicant provided the remediation activities are included in a plan submitted to and approved by the DNR. Section 260.573, RSMo, requires the DNR to issue a letter stating

that no further action need be taken at the site after remedial action has been taken in accordance with the approved remedial action plan.

Lack of communication between the DED and the DNR allowed BRTCs to be issued for a project that was not properly remediated. The DED implemented new procedures to require a copy of the DNR approved remediation plan to be on file with the DED prior to authorization of BRTCs, and to confirm the DNR had approved activities for which the developer requested any additional BRTCs. The DNR modified its project monitoring procedures to include verification of cleanup test results through independent sampling and testing by DNR personnel.

Recommendations

The DED:

1.1 Evaluate and consider decreasing the percentage of eligible costs qualifying for BRTCs.

1.2 Promulgate state regulations to establish procedures requiring BRTC applicants to procure project activities competitively and to select the lowest and best bid, and rules to define and limit conflicts of interest. We also recommend the DED maintain a database of historical cost information for BRTC projects.

1.3 Require certification of actual project costs by a licensed engineer, architect, and/or certified public accountant.

1.4 Reduce the authorization award associated with the NWP project by $2,265,000 and establish policies and procedures to handle scrap proceeds.

The DED and DNR:

1.5 Comply with newly implemented procedures to ensure approved remediation activities are properly completed before issuing BRTCs.

The General Assembly:

1.1 Consider establishing per-project caps for individual projects.

Auditee's Response

The DED and the DNR provided the following responses.

1.1 *As required by law, DED evaluates each application individually for eligibility and to determine the appropriate amount of tax credits that may be awarded. The amount of tax credits awarded may be less than one-hundred percent of the full amount of eligible*

costs consistent with the statutory requirement that any tax credit award be limited to the "least amount necessary to cause the project to occur." Section 447.709.3(2), RSMo.

In determining the least amount necessary to cause the project to occur, DED evaluates the developer's sources and uses, internal rate of return (IRR), market rates for eligible costs, industry employment and wages, and a determination of whether the developer' private debt and equity has been maximized. Eligible projects are awarded tax credits equal to the lesser of:

- *The amount necessary to achieve a positive net fiscal benefit to the state;*
- *The amount of the project financing gap;*
- *The lowest cost estimate provided by qualified firms; or*
- *The actual amount of eligible costs for the project.*

As the audit indicates, nine of the 15 projects reviewed in this audit were awarded tax credits in an amount less than one-hundred percent of eligible costs. Additionally, the projects that were denied were also awarded less than one-hundred percent of eligible costs. For the six projects funded at one-hundred percent of eligible costs, the amount of the award was limited to the least amount necessary to cause the project to occur as required under the statute.

1.2 *As the audit recognizes, DED bases the award of tax credits under the Brownfield Remediation Tax Credit program on the lowest of at least three responsive bids obtained by the applicant from a party unrelated to the developer. Although the developer is not required to contract with the lowest responsive bid, it is the amount of the lowest responsive bid that governs the award of tax credits, even if the eligible costs ultimately end up being higher. To further formalize the required procurement process and conflict of interest prohibitions, DED has filed regulations with the Secretary of State. See 4 CSR 85-10.010-85-10.060.*

The audit references a bid submitted in August 2012 to the NWP developer as raising concerns regarding whether the original bid process resulted in the least amount necessary for the project to proceed. However, this referenced bid was submitted eight months after the applicant's deadline to receive responsive bids, after all of the other bids had been opened, and after the amounts of the others bids had become known. In addition, this bid was offered to the

developer unsolicited and without reference to any bid specifications. Accordingly, this bid was not considered responsive.

The audit also takes issue with the fixed-price contract utilized by the NWP project for certain remediation work. However, under the circumstances, awarding tax credits based on the fixed-price contract provided the maximum protection for taxpayers by ensuring that any cost overruns on the project were the sole responsibility of the developer. Although the NWP project is not yet complete, to date it has experienced an estimated $700,000 in additional costs over and above the fixed-price contract upon which the award of tax credits was based, including an asbestos coated gas main (unearthed by another contractor) that required the removal of 3,000 linear feet of gas line; the mandatory removal of 15,240 square yards of asphalt paving to meet municipal specifications; structural, mechanical, electric and plumbing conditions encountered during interior demolition; a difference in the quantity and size of footings and foundations at two structures beyond the size provided by architectural drawings; remobilization of various buildings to remove remnant floor tile in formerly inaccessible areas exposed by remodeling; and full containment of 18,775 square feet to remove black mastic found under multiple layers of flooring. Because the tax credit award was based on the fixed-price contract, these additional costs will be borne by the developer and will not result in additional tax credits to complete the work.

1.3 *DED has filed rules with the Secretary of State requiring involvement by a licensed engineer in various aspects of a project, including inspection of property, determination of hazardous materials in type and quantity, development and drafting of any remedial action plan, development and drafting of any preliminary cost estimate, developing and drafting and bid specifications and solicitation of bids. See 4 CSR 85-10.050.*

1.4 *By law, DED is required to limit the amount of any tax credit award to the least amount of state assistance necessary to cause the project to occur. Section 447.709.3(2), RSMo. The referenced scrap value was taken into account in DED's analysis of the least amount necessary and is already reflected in the amount of tax credits awarded for the NWP project. Applying the audit's recommendation to reduce the authorization would result in the scrap value being double-counted.*

DED accounted for the scrap value as a property sale revenue in the first two years of the project, along with all of the developer's

additional property sale revenues and lease income the developer would realize as part of the project, in determining the internal rate of return (IRR), an evaluation tool commonly used in real estate development projects that involve discretionary public funding. DED evaluates the IRR to ensure that it is reasonable—if the IRR is too high, the amount of the tax credit award is lowered. If the developer can achieve a reasonable IRR without state funding, then no tax credits are awarded. Accordingly, the IRR is a component in the required determination of the "least amount necessary to cause the project to occur." See Section 447.709.3(2), RSMo. Because DED included the scrap value in the IRR to determine the least amount of tax credits necessary to cause the NWP project to occur, further reducing the amount of tax credits authorized by including the scrap value as a developer's source in the developer's sources and uses would result in the scrap value being counted twice in determining the tax credit award.

Additionally, to provide greater clarity for future projects, DED has filed rules with the Secretary of State that address salvage rights in detail. See 4 CSR 85-10.050.

Auditor Comment

DED officials, after multiple requests by auditors, failed to provide any documentation to support their claim scrap value was accounted for as property sale revenue. We noted in the project file an email from an attorney for the developers to the DED project manager stating the property sales line on the IRR shows sales revenues from the sale of lots. It appears the scrap value was not reflected in the amount of BRTCs issued.

The DED's proposed rules were first published March 17, 2014. Under proposed rule 4 CSR 85-10.020(3)(D)(2), salvage rights must be considered as part of the cost of remediation. The applicant may retain the salvage in which case the reimbursable costs should be reduced by the value of the salvage retained. If this rule had been in effect at the time the DED authorized the BRTCs for the NWP project, the BRTC eligible costs and the amount of BRTCs authorized would have been reduced by $2,265,000.

1.5 DED and DNR will continue to comply with all procedures to ensure approved remediation activities are properly completed before issuing tax credits.

2. Program Efficiency and Effectiveness

The DED does not always require developers to enter into repayment agreements in the event the project does not create the projected number of jobs. The BRTC does not have an annual or cumulative limit, or a sunset provision. BRTC eligible costs may also be eligible costs under other tax credit programs. DED and DNR officials made decisions that resulted in parties responsible for environmental damage not being held fully

accountable for the remediation costs. As a result, taxpayers paid remediation costs through the BRTC program.

2.1 Job Creation

The DED does not require developers to enter into legally binding clawback agreements requiring repayment of the value of the BRTCs issued in the event that projected economic activity does not occur.

For the 15 projects we reviewed, no project had the amount of authorized BRTCs limited because of the state economic benefit calculation. The economic benefit calculation seldom impacts the amount of BRTCs authorized, because developers overestimate the number of jobs to be created. Most BRTC projects do not create the projected number of new jobs. Of the 15 projects reviewed, 10 had completed remediation activities. For these 10 projects, developers projected approximately 2,500 jobs would be created, however only 116 full-time and 322 part-time jobs actually were created according to the annual reports developers submitted to the DED. Only 1 of the 10 projects created the number of proposed jobs indicated in the initial application used by the DED to determine the state's economic benefit. In addition, because the DED uses the developers' estimates in the annual cost-benefit analysis submitted to the General Assembly, the state economic impact of the BRTC program is significantly overstated.

Clawback provisions

The DED does not usually include clawback provisions that require developers to repay portions of the BRTCs if the number of projected new jobs are not created. According to DED personnel, the DED has required clawback provisions for only three projects since programs inception. DED officials indicated the clawback provisions are only used when they determine there is an unusually high risk the project will not create the estimated number of jobs. The DED placed additional restrictions on the following projects we reviewed.

- On December 17, 2010 (and later amended March 26, 2012), the DED entered into a redemption agreement for one project (Carondelet Coke) that allows the DED to withhold previously authorized BRTCs if the 400 projected jobs were not created by December 31, 2017. DED officials indicated this agreement was the first usage of a clawback provision.

  The redemption agreement; however, amounts to only $1,393,750, or approximately 11.4 percent of the total BRTC authorizations for this project. If the environmental contractor cleans up the properties in accordance with the remedial action plan, but the developer never creates a single new job, the developer will own the project and the DED will have issued BRTCs totaling approximately $10.9 million.
  DED officials indicated another project that we did not select for review had a similar redemption agreement.

- For another project (NWP), the DED required the developer to enter into a repayment agreement totaling up to $6,850,000 (88 percent of credits authorized) if the developer did not create the 500 projected jobs in certain parts of the development within 5 years. DED officials said at the time of the agreement, the developer did not have letters of intent from businesses interested in occupying the development, so the DED required a repayment agreement to mitigate the risks associated with additional phases of the project.

Tax Credit Review Commission

In its 2012 report, the Tax Credit Review Commission reaffirmed its recommendation from its 2010 report that the General Assembly impose a statutory clawback on the program requiring repayment of the value of the credits in the event that estimated jobs and investment do not occur.

The commission recommended that strict statutory clawbacks be enforced in cases of non-compliance with program requirements and applicants for state incentives be required to enter into a contract with the agency administering the tax credit specifying standards of performance, program requirements, and penalties in the event of non-compliance.

Clawback provisions are needed to ensure state economic benefits are received in return for BRTCs issued.

2.2 Annual and cumulative limits

The General Assembly has not established annual or cumulative limits on the BRTC. During the period of state fiscal years 2003 through 2013, the DED issued BRTCs totaling approximately $174 million and redemptions have totaled approximately $168 million. The General Assembly should consider implementing annual and cumulative limits on the BRTC to better contain the cost of this tax credit program.

2.3 Sunset Provision

As noted in Report No. 2010-47, *Tax Credit Cost Controls*, issued in April 2010, state law does not include a sunset provision for many tax credits, including the BRTC program. The Sunset Act, passed in 2003, provides for new programs to sunset after a period of not more than 6 years unless reauthorized by the General Assembly or the program is exempted from the Sunset Act. The Act requires the Committee on Legislative Research to review applicable programs before the sunset dates and present a report to the General Assembly regarding the sunset, continuation, or reorganization of each affected program. However, the BRTC program was created prior to the Sunset Act and is exempted.

By adopting a sunset provision for the BRTC program, the General Assembly can better determine whether the program is achieving its intended purpose and whether program funding should be increased, decreased, or eliminated.

2.4 Use of multiple incentives

As noted in Report No. 2012-117, *Division of Business and Community Services*, issued in September 2012, state law does not prohibit claiming the same project costs under two or more tax credit programs. This "stacking" of tax credits can be lucrative for developers and additional tax credits are issued while no additional economic activity or state benefit is generated.

Companies may claim certain project costs under the Historic Preservation, Low Income Housing, Brownfield Remediation, and the Neighborhood Preservation Tax Credit programs. Between fiscal years 2000 and 2011, the state issued tax credits totaling approximately $738 million for 117 projects that received funding from two or more of these tax programs.

In December 2012, the Tax Credit Review Commission recommended changes when Brownfield, Historic Preservation, and Low Income Housing Tax Credits or any combination thereof are awarded to a single project. The commission recommended a specific ordering process and Brownfield credits would be calculated first based on eligible remediation expenditures. Next, the eligible Historic Preservation credit expenditures would be reduced by the amount of Brownfield credits. Finally, the Brownfield and Historic Preservation credits would be deducted from the total expenditures eligible for the Low Income Housing Tax Credit. The DED should work with the General Assembly to establish cost containment provisions regarding project costs claimed under multiple tax credit programs.

2.5 Carondelet Coke Project

Previous DED and DNR officials did not require parties responsible for environmental damage to be fully responsible for remediation costs. As a result, state taxpayers will end up primarily funding remediation costs for one project through the issue of $12.275 million BRTCs.

Project History

In 1992, the St. Louis Land Reutilization Authority (LRA), acquired 42 acres in the City of St Louis through a tax foreclosure sale. The LRA operates under the oversight of the St. Louis Development Corporation (SLDC), a governmental economic development agency. The property is known as the Carondelet Coke or Broadway Business Center project. A local utility company had owned the site from 1902, developed it into a manufactured gas plant by 1915 and operated it through 1950. The plant converted coal into coal gas for use in the utilities gas supply system and industrial coke. In 1950, the plant was sold to another company that concentrated on coke production. In 1980, the plant was again sold to an owner that continued producing industrial coke and then abandoned the site in 1987.

When the LRA acquired the property, it contained several buildings that needed to be demolished, known surface and aboveground hazardous conditions, and suspected significant subsurface hazardous conditions. In August 1995, the DNR notified the three former owners the hazardous waste cleanup would be enforced under the Comprehensive Environmental

Response, Compensation and Liability Act (CERCLA), also known as Superfund, unless the former owners entered the site into the VCP.

In October 1995, the local utility enrolled the site in the VCP and undertook some site assessment activities to determine the nature and extent of the subsurface contamination. The utility indicated the expectation was for other responsible parties to participate in the cost of conducting the site investigation and cleanup. In early September 1996, the LRA also applied to the VCP to demolish the above ground structures and clean up the surface of the site. In September 1996, the DNR Superfund Section completed a site investigation documenting surface and subsurface contamination, and potential risks to human health and the environment. The investigation documented the site had Hazard Ranking System score of 28.5 or greater, making it eligible to be proposed to the National Priorities Listing and enforcement under CERCLA. The DNR in a letter to the U.S. Environmental Protection Agency (EPA) indicated, "Should [this responsible party] become ineligible or withdraw from this voluntary cleanup program, the Carondelet Coke site should be addressed under Superfund authority." In October 1996, the EPA agreed to allow the cleanup to remain in the VCP "as long as [this responsible party] entered into an agreement with the state for site evaluation and remediation, as determined necessary by the state." The utility performed additional assessment and monitoring activities; however, it was unwilling to undertake remediation activities unless other responsible parties were included.

In August 2004, the Land Clearance Redevelopment Authority (LCRA), also under the oversight of the SLDC, submitted an application to the DED requesting $6.7 million in BRTCs to remediate the structures on the site. In April 2005, the DNR approved an amendment to the VCP agreement allowing the SLDC to address the subsurface contamination. The SLDC indicated it continued to negotiate an agreement with the local utility and second previous owner for financial assistance. In March 2009, the DED authorized issuance of BRTCs totaling $150,000 to fund additional site investigation activities. The DED indicated the SLDC would be required to have a fully executed remediation agreement between the City of St. Louis and the two companies for their financial participation in the cleanup efforts and agreements with the developer and the environmental remediation contractor before approving additional BRTCs. The SLDC remediation agreement with two responsible parties required the two companies to contribute a total of $942,500, about 8 percent of the total cleanup costs, and in exchange, the companies were relieved of further liability related to the remediation project. As part of the agreements, the LCRA purchased an additional 7.5 acres from the local utility for $500,000 and the developer also purchased 4.1 acres from the utility.

In August 2009, the DED authorized $6.7 million of BRTCs for the project. In December 2010, the DED authorized an additional $5.575 million in BRTCs to address subsurface conditions for the original and additional acreage and surface conditions on the additional acreage. The BRTCs of $12.275 million funded about 93 percent of total cleanup costs.

In December 2013, the DNR issued a certificate of completion for 9 acres of the 53.6 acre site. Test results on the remaining acreage indicated remediation efforts had not reduced the contamination to acceptable levels and the DNR is requiring the environmental consultant to continue groundwater monitoring for at least one year. As of December 2013, the DED has issued approximately $9.1 million in BRTCs. Issuance of the remaining credits is subject to the issuance of a DNR certificate of completion and a repayment agreement if the projected number of jobs are not created.

Past decisions

In retrospect, a number of past decisions made several years ago by the DED and DNR appear questionable. While documentation to fully explain the analytic processes no longer exist, these decisions resulted in previous owners not being required to pay the majority of the cost to remediate environmental issues. Instead, the DED will issue $12.275 million in BRTCs to fund the cleanup costs through the BRTC program, while the 2 of 3 responsible parties will pay a total of $942,500. Questionable decisions include:

- Not taking legal action against the most recent owner that produced industrial coke.

- Not requiring the other 2 previous owners to fund more of the costs to remediate the site. One option available to the DNR was to request the EPA to enforce the cleanup under Superfund authority.

DED officials indicated former DED officials had discussed the adequacy of the financial commitments by the two companies and the failure to include the third company or its officials in the agreement. However, the former DED officials, in consultation with former DNR officials, determined seeking additional compensation from those parties would likely require legal action (with no certain outcome) resulting in several years delay to address the environmental concerns. DNR personnel indicated the third and most recent owner refused to engage in negotiations, had filed for bankruptcy, and was believed to have no resources that could be accessed to fund the remediation. However, according to media reports, the owner also owned several industrial coke plants in other states at the time.

Other projects

The DNR also did not hold previous owners responsible for environmental damages caused. Of 15 projects reviewed, the DNR had identified 4 project

sites that had some hazardous materials that were likely generated by former owners. These projects included (1) the sites of automotive repair shops previously operated by prominent national chains, (2) a former site of a major automotive manufacturer, (3) a former site of a regional brick manufacturer, and (4) a project site that had large quantities of asbestos containing materials that had been buried during prior demolition activities and other hazardous substances left untreated by former owners. The DNR has identified at least 10 other former manufactured gas plants that warrant a site investigation.

Section 260.375(29), RSMo, requires the DNR to clean up any hazardous wastes placed into or on the land in a manner that may endanger the health of humans or the environment, and to recover remediation costs from the person responsible for the waste. Section 447.700(3), RSMo, prohibits parties that intentionally or negligently caused the release or potential release of hazardous substances from receiving BRTCs. The DED did not authorize BRTCs to parties causing the environmental issues for any of the projects reviewed. The DED and the DNR should take all reasonable efforts to hold responsible parties accountable for environmental damages on BRTC projects.

Recommendations

The DED:

2.1 Include clawback provisions for BRTC projects.

The General Assembly:

2.2 Evaluate and consider implementing an annual limit on the amount of BRTCs awarded.

2.3 Establish a sunset provision for the BRTC program.

2.4 Establish cost containment provisions regarding project costs claimed under multiple tax credit programs.

The DED and the DNR:

2.5 Ensure all reasonable efforts are made to hold responsible parties accountable for environmental damages on BRTC projects.

Auditee's Response

The DED and the DNR provided the following responses.

2.1 Section 447.708.4, RSMo, outlines a procedure for terminating and revoking tax credits awarded under the program. As recognized by the audit, DED has also required applicants to enter into repayment agreements that require repayment of the value of any tax credits

issued upon a failure to perform. DED has also filed rules with the Secretary of State requiring mandatory repayment agreements for all Brownfield tax credit projects. See 4 CSR 85-10.030.

2.5 DNR will continue to work to hold responsible parties accountable for environmental damages as warranted while working with DED to assist in the remediation of contaminated properties in order to protect the environment and return such properties to productive reuse. As indicated in the audit, DED has not authorized tax credits to any parties causing environmental issues for any of the projects reviewed. A number of decisions regarding efforts by DNR to hold potentially responsible parties liable for contamination in the project primarily discussed in the audit were made during the 1990s. DNR will continue to insure the remediation of contaminated properties.

Brownfield Remediation Tax Credit Activity

The following table lists BRTCs authorized, issued, and redeemed for fiscal years 2003 through 2013.

Fiscal Year		Amount Authorized	Amount Issued	Amount Redeemed
2003	$	18,770,621	15,600,763	5,669,489
2004		9,647,043	4,250,346	16,101,975
2005		15,515,319	14,808,297	10,627,870
2006		32,148,894	14,159,740	10,611,324
2007		32,737,068	33,012,124	16,710,519
2008		23,481,361	20,424,920	26,466,007
2009		10,527,923	22,121,637	29,194,784
2010		21,710,015	13,978,902	17,590,273
2011		5,734,035	18,410,524	11,432,109
2012		3,234,873	7,717,895	16,967,400
2013		11,913,711	9,851,350	6,378,613
Totals	$	185,420,863	174,336,498	167,750,363

Source: Department of Economic Development annual reports on tax credits administered.

Tax Credit Redemptions

The following table shows redeemed tax credits for fiscal years 2010 through 2013 for all state tax credit programs. We did not audit the information.

Program	Year Ended June 30, 2010	2011	2012	2013
Adoption (Special Needs)	$ 1,894,187	1,346,454	1,036,226	744,155
Affordable Housing Assistance	11,647,956	4,880,797	5,629,466	7,406,988
Agricultural Product Utilization Contributor	114,674	466,048	1,468,156	1,267,239
Alternative Fuel Vehicle Refueling Property[1]	0	23,365	45,690	69,454
Bank Franchise	2,013,584	4,233,673	2,333,619	2,559,444
Bank Tax Credit for S Corporation Shareholders	1,823,612	2,787,708	5,523,276	4,533,837
Brownfield Jobs/Investment	1,650,222	1,620,384	1,660,626	68,693
Brownfield Remediation	17,590,273	11,432,109	16,967,400	6,378,613
Business Use Incentives for Large-Scale Development (BUILD)	8,306,413	10,976,914	6,591,948	8,212,533
Business Facility	2,883,729	5,682,965	4,867,041	4,572,711
Certified Capital Business[2]	495,459	586,135	411,014	590,235
Charcoal Producers[1]	14,642	521,380	59,595	0

HIGHER EDUCATION

St. Charles Community College

April 2014

Report No. 2014-024

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Higher Education, St. Charles Community College

Budget Procedures and Subsidy	The college did not prepare budget documents for several operating funds, including, the Unrestricted Funds, Federal Financial Aid Fund, Plant Fund, Agency Fund, 29 restricted funds, and 4 auxiliary funds. Budget documents approved by the Board of Trustees for the year ended June 30, 2013, did not include some budgetary information required by law. The college subsidizes the operating costs of the Child Development Center (CDC), which is a state-licensed on-campus facility. In fiscal year 2013, the college transferred $87,000 (from the General Revenue Fund and bookstore operations) to cover the CDC's operating shortfalls. The college should analyze ways to make the program more cost-effective and maximize program resources and review the adequacy of the fees currently charged.
Accounting Controls and Procedures	CDC personnel do not account for the numerical sequence of receipt slips. Cashier's office and bookstore personnel allowed students and employees to cash personal checks from daily cash receipts, which prevents daily receipts from being deposited intact. The college bookstore maintains a change fund of $6,100, which may be excessive, and the bookstore has not performed an analysis to determine if such a large change fund amount is necessary during slower months.
Rental Fees, Disbursements, Bids and Contracts	The college rents its facilities to the public, but lacks supporting documentation detailing how it determined what fees to charge. The college has not conducted a formal cost study or reviewed the amounts charged since 2006. The college did not always solicit bids for professional services or other goods and services and did not always enter into formal written agreements. The college has continued to renew its contract for legal services since March 2002 without soliciting competitive proposals, does not solicit bids for fuel purchased, and has not entered written contracts with either textbook buy back vendor.
Capital Assets	The college needs to improve its procedures and records to account for college property. An annual inventory of all capitalized assets costing greater than $5,000 and all technology equipment is performed. However, inventory worksheets are not maintained and the missing assets report for the fiscal year ended June 30, 2013, could not be located; and personnel did not always update the manual capital asset log to document assets had been properly tagged and identified as college property.
Credit Card Convenience Fees	The college absorbs the credit card fees rather than passing them on to the students who pay with credit cards. The college paid $139,000 in related credit card fees during fiscal year 2013.

Vehicle Usage and Fuel Logs	The college needs to improve controls and procedures over fuel purchases and usage. The college operated 28 non-street licensed vehicles and equipment and maintains one diesel tank and one gasoline tank that are not metered. The grounds supervisor does not maintain a log documenting fuel purchases, usage, or on hand and no procedure is performed to periodically reconcile those items.
College Foundation	The college subsidizes certain operating expenses of its not-for-profit foundation, which may violate the Missouri Constitution. The college covered approximately 84 percent of the money the foundation spent in fiscal year 2013 and could not quantify the amount of salary and benefit costs for other college employees providing operational support attributable to foundation activities. The college does not have a formal agreement or contract with the foundation, which would clarify the duties and responsibilities of both parties. The foundation does not timely adopt a budget, and its budgets do not include the actual beginning and estimated ending available resources or a budget message.

In the areas audited, the overall performance of this entity was **Good**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Appendixes

A Revenues, Expenses, and Changes in Net Assets, Year Ended June 30, 2013 17
B Organizational Chart, June 30, 2013 18

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Board of Trustees of the St. Charles Junior College District
and
Dr. Ronald Chesbrough, President
St. Charles Community College
Cottleville, Missouri

We have audited certain operations of the St. Charles Junior College District (St. Charles Community College), in fulfillment of our duties under Chapter 29, RSMo. The college engaged Schmersahl Treloar and Company, Certified Public Accountants (CPAs), to audit the college's financial statements for the year ended June 30, 2012, and June 30, 2013. To minimize duplication of effort, we reviewed the report and substantiating working papers of the CPA firm for the year ended June 30, 2012, since the year ended June 30, 2013, audit had not been completed at the time we started our audit. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2013. The objectives of our audit were to:

1. Evaluate the college's internal controls over significant management and financial functions.

2. Evaluate the college's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

4. Evaluate selected records and activities of the college's foundation.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the college as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the college's management and was not subjected to the procedures applied in our audit of the college.

For the areas audited, we identified (1) deficiencies in internal control, (2) noncompliance with legal provisions, (3) the need for improvement in management practices and procedures, and (4) weaknesses with the procedures of the college's foundation. The accompanying Management Advisory Report presents our findings arising from our audit of the St. Charles Community College.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Chris Vetter, CPA
In-Charge Auditor:	Steven Re', CPA
Audit Staff:	David Olsen
	Gina Henley, MBA
	Mariam Ahmedbani
	Devin Jackson
	Andrew Roley

1. Budget Procedures and Subsidy

The college budget documents did not include some operating funds and did not include some information required by state law. In addition, the college has to subsidize the Child Development Center (CDC) due to the program's annual operating losses.

1.1 Budgets

State law requires each political subdivision of the state to prepare an annual budget, which shall present a complete financial plan for the ensuing budget year. The college is subject to these provisions. A review of the college's compliance with budgetary law and its budgetary practices disclosed the following concerns:

- The college budget documents did not include several operating funds of the college for the fiscal year ended June 30, 2013. Annual budgets were not prepared for the Unrestricted Funds, Federal Financial Aid Fund, Plant Fund, Agency Fund, 29 restricted funds, and 4 auxiliary funds. College officials stated these funds have not been budgeted in the past. In addition, although budgets are prepared and reviewed for the General Revenue Fund, Corporate & Community Development Fund, Capital Improvements Fund, four restricted funds, and three auxiliary funds, the board only approves the General Revenue Fund.

- The budget documents approved by the Board of Trustees for the year ended June 30, 2013, did not include some budgetary information required by state law. Required information missing in the approved budget included the beginning and estimated ending available resources for each fund, comparative statements of actual or estimated revenues and expenditures for the two previous years, and amounts related to the debt service requirements.

Section 67.010, RSMo, requires the budget to present a complete financial plan for the ensuing budget year and outlines the various information to be included in the budget. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost expectations for each area.

1.2 Subsidy

The college subsidizes the operating costs of the CDC. The college transferred $55,000 from the General Revenue Fund and $32,000 from bookstore operations during the year ended June 30, 2013, to cover operating shortfalls. The CDC generated revenues of approximately $1 million during the year ended June 30, 2013.

The CDC is a state-licensed on-campus facility, which provides child care and learning services for children of students, college faculty and staff, and members of the community. The CDC offers programs for infants/toddlers, 2 year old children and 3-5 year old children. Fees charged are based on the age group with college employees and students receiving a 20 percent

discount from the fees charged to the general public. As of June 30, 2013, the CDC had 18 full-time employees and 11 part-time employees.

Operating the CDC at a deficit requires other college funds to subsidize its operations and activities. The college should perform a cost-benefit analysis to evaluate ways to make the CDC more cost effective and ensure program resources are maximized. In addition, the college should also review the adequacy of fees currently charged for these services.

Recommendations

The Board of Trustees:

1.1 Ensure the budget documents prepared by the college include all planned financial activity of the college and all budgetary information required by state law.

1.2 Review operations of the CDC to determine how the program can be operated as a self-sustaining entity.

Auditee's Response

1.1 The Board of Trustees concurs with the finding and recommendation, and is satisfied that this recommendation has already been adopted. The Fiscal Year 2014 budget process, completed in June 2013, included all budgetary information required by state law.

1.2 The Board of Trustees is aware of the subsidy of the CDC and is aware of ongoing efforts to reduce the subsidy. Operations of the CDC are reviewed regularly, including during the annual budget process and following the completion of each fiscal year. Rates for childcare services are reviewed annually and adjusted frequently. As a result, subsidies for the CDC have been reduced by 68% from Fiscal Year 2009. Efforts will continue to make the operations of the CDC self-sustaining.

2. Accounting Controls and Procedures

CDC personnel do not account for the numerical sequence of receipt slips. In addition, the bookstore maintains a large change reserve throughout the year and the bookstore and cashiers office cash personal checks.

2.1 Receipts

CDC personnel do not account for the numerical sequence of receipt slips. The CDC's automated accounting system issues single copy prenumbered receipts slips, but does not generate a management report that accounts for the numerical sequence of receipt slips issued. The CDC had receipts of approximately $999,000 for the year ended June 30, 2013.

To properly account for monies received and reduce the risk of loss, theft, or misuse of funds, the numerical sequence of receipt slips should be accounted for and receipt slip amounts reconciled to deposits.

2.2 Personal checks

Cashier's office and bookstore personnel allowed students and employees to cash personal checks, despite the availability of an on-campus ATM machine. As a result, monies receipted are not always deposited intact. Cashier's office personnel indicated 112 personal checks totaling approximately $2,200 were cashed during the year ended June 30, 2013. Bookstore personnel were unable to provide information concerning the number or amount of personal checks cashed due to system constraints.

Cashing personal checks from daily cash receipts is a poor practice and reduces the accountability of monies received. To help ensure cash receipts are accounted for properly, daily receipts should be deposited intact. If the college wishes to continue providing check-cashing services for its students and employees, the checks should be cashed from a separate cash drawer maintained on an imprest basis and not from daily cash receipts.

2.3 Bookstore change fund

The college bookstore maintains a change fund of $6,100, which may be excessive. The bookstore manager indicated the bookstore maintains this amount to ensure cash reserves are adequate for making change and refunds during the months when the semesters begin and end due to the high volume of transactions. However, the bookstore has not performed an analysis to determine if such a large change fund amount is necessary during slower months.

To reduce the potential for fraud or theft occurring any excessive change fund amounts should be decreased for months with low sales transactions.

Recommendations

The Board of Trustees:

2.1 Update the CDC accounting software to account for the numerical sequence of receipt slips.

2.2 Discontinue the practice of cashing personnel checks for students and employees.

2.3 Determine the minimum amount of monies needed for book store change fund.

Auditee's Response

2.1 The accounting software for the CDC does generate a report of all funds for which a receipt was issued to a parent that includes an itemized listing of those payments. This report is used by CDC personnel to reconcile the monies receipted to the funds deposited. The CDC software will be evaluated to determine if a report showing receipt numbers in sequential order can be implemented.

2.2 The Board of Trustees is satisfied that the practice of cashing personal checks was discontinued in August 2013.

2.3 The Board of Trustees is satisfied that the amount of monies needed for the bookstore was reduced in October 2013.

3. Rental Fees, Disbursements, Bids, and Contracts

The college's procedures for determining rental fees charged, soliciting bids for goods and services and entering into written agreements are in need improvement.

3.1 Rental fees

The college could not provide supporting documentation for the procedures utilized to determine the rental fees charged. The college has annual rental agreements with three entities and rents the use of college facilities to the public for daily meetings or events. The college received rental revenue totaling $57,000 for the year ended June 30, 2013.

The college has not conducted a formal cost study or reviewed the amounts charged since 2006. As a result, there is no assurance fees charged for renting out college facilities are adequate. College personnel indicated the amount of rent charged is comparable to fair market value in the area or slightly below.

To ensure property rentals are cost effective or represent fair market value, the college should establish procedures to periodically determine the amount of the rent to be charged and maintain the related documentation.

3.2 Soliciting bids and contracts

The college does not always solicit bids for professional services or other goods and services or enter into formal agreements. We noted the following problems:

- The college does not solicit competitive proposals for legal services and the college has continued to renew this contract since March 2002 without periodically requesting or reviewing proposals from other firms. The fee is renegotiated when the contract is renewed. Any changes in fees charged are reviewed and approved by the board of trustees. The college paid $23,000 for legal services for the year ended June 30, 2013.

  College officials indicated they follow Chapter 34, RSMo, for bidding requirements, but the chapter does not specifically address professional services. In addition, the officials stated they have continued to use the same legal firm due to the firm's expertise in higher education and knowledge of the college's legal history. While professional services, such as attorneys, are not subject to standard bidding procedures, the college should solicit proposals for professional services to the extent practicable.

- The college does not solicit bids for fuel purchased. The college purchases fuel from two vendors for licensed vehicles and refilling fuel tanks located at the college for non-licensed vehicles and equipment. College officials indicated they do not seek bids due to the small amount of fuel purchased and their preference to utilize vendors in close proximity to the campus. In addition, the college has not entered into written contacts with either vendor. The college purchased approximately $21,000 in fuel for the year ended June 30, 2013.

- The college obtains the services of two vendors to conduct textbook buy backs at the end of the fall and spring semesters. The vendors are allowed to purchase books directly from students for resale and in return the college receives a 10 percent commission. No written contract has been entered into with either vendor documenting the amount of commission to be paid or how it is calculated. The bookstore manager indicated the bookstore has verbal agreements with the vendors. The college received $6,000 in commissions for the year ended June 30, 2013.

Soliciting proposals and subjecting such services to a competitive selection process does not preclude the college from selecting the vendor or individual best suited to provide the service required. Such practices help provide a range of possible choices and allow the college to make a better-informed decision to ensure necessary services are obtained from the best-qualified vendor at the lowest and best cost. In addition, formal agreements are necessary to ensure the college and the vendor are aware of their duties and responsibilities and to provide protection to both parties.

Recommendations

The Board of Trustees:

3.1 Periodically conduct formal cost studies to ensure the amount of the rent charged for the use of college facilities is reasonable.

3.2 Ensure competitive proposals are solicited for good and services to the extent practicable and enter into a written agreements with vendors detailing the goods or services to be provided.

Auditee's Response

3.1 The Board of Trustees is satisfied that rates charged for the use of college facilities were evaluated in February and March 2014. Adjustments for recurring leases will be made at the time of renewal. Future rate evaluations will occur no less frequently than every three years as part of the budget process.

3.2 The college is strongly committed to soliciting competitive proposals and entering into formal written agreements, in accordance with Board policy and applicable laws. Exceptions

noted in the State Auditor's findings will be addressed by the end of Fiscal Year 2014. The Board of Trustees finds the opening language of this section of the auditor report - "The college does not always solicit bids for professional services or other goods and services or enter into formal agreements" - to be potentially misleading and excessive in relation to the very limited finding of evidence to that effect. As correctly stated in the finding in this section, "professional services, such as attorneys, are not subject to standard bidding procedures." The Board of Trustees has routinely evaluated the quality of current legal services and has placed a priority on retaining the highest quality of service possible in this area. We will evaluate whether a voluntary formal bid process for legal services will provide an advantage to the college in this regard. The Board of Trustees is satisfied that the competitive selection process, including written contract, for textbook buy-back services was completed in March 2014. The remaining item cited in the audit report - fuel purchases - will be addressed by the end of Fiscal Year 2014.

4. Capital Assets

Procedures and records to account for college property are not adequate. The current threshold for capitalizing assets is $5,000; however, assets with a minimum cost of $1,000 and all technology assets are tagged as college property. According to college records capital assets totaled $103 million as of June 30, 2013.

4.1 Annual inventory

The college conducts an annual inventory of all capitalized assets costing greater than $5,000 and all technology equipment. However, documentation of the inventory worksheets are not maintained and the missing assets report for the fiscal year ended June 30, 2013, could not be located.

Annual physical inventories are necessary to ensure the accuracy of capital asset records and to detect the loss, theft, or misuse of assets. The college should conduct annual physical inventories, reconcile the results of the inventories to the detailed capital asset records, and maintain supporting documentation.

4.2 Capital asset tags

College personnel did not always update the manual capital asset log to document the asset had been properly tagged and identified as college property. The purchasing department maintains a manual capital asset log documenting items to be added to the college's master capital asset listing. The log includes the asset number, description, date purchased, acquisition cost, asset identification number, and the tag number. A review of the log for the fiscal years 2007 through 2013 indicated several items had not been assigned an asset tag number. The purchasing director indicated all assets are tagged; however, the log is not always updated to reflect tagged assets

because testing of the asset is required prior to installation and some assets are delivered directly to other buildings.

Complete and accurate records are essential to reduce the potential for the loss, theft, or misuse of capital assets.

Recommendations

The Board of Trustees:

4.1 Ensure college officials reconcile the inventory results to the detailed capital asset records and maintain all supporting documentation.

4.2 Ensure all capital assets are properly recorded in the capital asset log.

Auditee's Response

4.1 The Board of Trustees is satisfied that the college will continue to conduct an annual physical inventory of capitalized assets. The college defines capitalized assets as assets with an initial acquisition cost of $5,000 or more and a useful life of more than one year. This annual inventory practice reconciles over 95% of the total value of the college's recorded assets. By the end of Fiscal Year 2014, the college will develop procedures to document physical inventories and reconciliations of all assets, capitalized and non-capitalized.

4.2 The Board of Trustees is satisfied that all capital assets are properly recorded in the college's official capital asset system. The log referenced in the State Auditor's findings is an unofficial, working document. It has been modified to avoid confusion in the future.

5. Credit Card Convenience Fees

The college allows student accounts to be paid with personal credit cards; however, credit card users are not charged a convenience fee to offset the related costs to the college. Currently, credit card fees are absorbed by the college. The college paid approximately $139,000 in related credit card fees for the year ended June 30, 2013.

According to the college personnel, the cost of credit card convenience fees is considered a cost of doing business and indicated the cost of convenience fees would be very complex to calculate and pass on to the students.

The college should reconsider if absorbing credit card fee costs outweighs the benefits of not charging credit convenience fees.

Recommendation

The Board of Trustees reconsider its decision to absorb credit card convenience fees.

Auditee's Response

The Board of Trustees believes credit card fees are a necessary cost of doing business. When students pay with credit cards, the transactions are processed quickly and efficiently; labor costs for staff to process payments are reduced when transactions are processed through the college website; students can make payments during times when the college is closed; the funds are available to the college quickly; and collections issues associated with payments made by check are avoided. The college surveyed the other eleven community colleges in Missouri and none charge a convenience fee for accepting credit cards. In a competitive higher education environment, it is rare to find the imposition of a credit card convenience fee for student payment of bills. The Board feels that to impose a credit card convenience fee in this environment would place the college at a competitive disadvantage. The college feels its current practice regarding credit card acceptance is in the best interest of students and the institution.

6. Vehicle Usage and Fuel Logs

The College needs to improve controls and procedures over fuel purchases and usage by the campus facility and grounds departments.

The college operated 28 non-street licensed vehicles and equipment as of June 30, 2013. The campus-only vehicles include tractors, utility vehicles, and micro minivans. The college maintains one diesel tank and one gasoline tank that are not metered for fueling these campus only vehicles and equipment. The grounds supervisor does not maintain a log documenting fuel purchases, usage, or on hand and no procedure is performed to periodically reconcile those items. As a result, there is less assurance fuel usage is accounted for, invoices for fuel purchased are correct, and theft would be detected promptly. The college purchased approximately $9,500 of fuel for these tanks during the year ended June 30, 2013.

Procedures for reviewing fuel used and reconciling use to fuel purchases are necessary to ensure the reasonableness and propriety of fuel use and disbursements. Mileage logs are necessary to document the appropriate use of vehicles, to support fuel charges, and to ensure vehicles are being utilized. The failure to account for fuel use could result in theft and misuse going undetected.

Recommendation

The Board of Trustees ensure a documented periodic reconciliation of fuel purchased to fuel used is performed, and investigate any significant discrepancies. In addition, the Board should ensure mileage logs are maintained for all college vehicles.

Auditee's Response

Though there is no indication of loss, theft or misuse, the college agrees to implement a reconciliation process, including fuel usage logs. The Board of Trustees is satisfied that this process was implemented in March 2014.

7. College Foundation

The college subsidizes certain operating expenses of its foundation, which may violate the Missouri Constitution. In addition, the college has no formal contract or agreement with the foundation to document the duties and responsibilities of both parties. Also, the foundation's budget was not approved timely for the fiscal year ended June 30, 2013.

The St. Charles Community College Foundation, established in 1991, is a not-for-profit 501(c)(3) tax exempt public benefit corporation. Its mission is to improve the quality of life in the community by securing private and public funds to strengthen educational and cultural opportunities, and to enhance community awareness of the college and the foundation The business and affairs of the foundation are managed by a board of directors that includes a college official and community and business leaders.

7.1 Subsidies

The college subsidized a substantial portion of the operating costs of the foundation, financing approximately $240,000 of $287,000 (84 percent) spent during the year ended June 30, 2013. In addition, the college could not quantify the amount of salary and benefit costs for other college employees providing operational support actually attributable to foundation activities.

- The college does not receive reimbursement from the foundation for the foundation's Vice President for College Advancement Director, the Development and Foundation Relations Manager, and two foundation assistants. During the year ended June 30, 2013, the college paid $232,000 in salary and benefits to foundation personnel.

- The college paid $8,000 for some operating costs associated with the foundation that included advertising and printing, community activities, supplies, and other miscellaneous expenses for the year ended June 30, 2013. In addition, the college provides office space and equipment on campus for the foundation.

- Several finance office employees including the Director of Financial Services perform minimal work for the foundation and are paid entirely by the college. In each instance, college officials indicated employee timesheets do not indicate the hours worked on foundation versus college activities nor has the college performed a time study to serve as a basis for allocating these costs. Therefore, it is unclear exactly how much of each employee's time was related to foundation activities and should have been reimbursed by the foundation.

The practice of subsidizing the foundation with college funds may constitute the granting or lending of public funds to a private entity, which is prohibited by Article III, Section 38(a) and Article III, Section 39(1), Missouri Constitution.

7.2 No formal agreement

The college has not entered into a formal agreement with the foundation.

A formal agreement is necessary to ensure the college and foundation are aware of their duties and responsibilities and to provide protection to both parties. Such an agreement might include, but not necessarily be limited to, the overall goals and objectives of the partnership between the entities; anticipated activities, such as scholarship and other direct support provided to the college by the foundation; accounting system services, and equipment management services provided to the foundation by the college.

7.3 Budgets

The foundation prepared a budget that does not include the actual beginning and estimated ending available resources or a budget message. In addition, the foundation does not always adopt budgets in a timely manner. The budget for the fiscal year ended June 30, 2013, was approved at the August 29, 2012 board meeting. As a result, the foundation's board is not using all available information in a timely manner to assist in effectively managing foundation finances.

A complete and well-planned budget along with effective budgetary monitoring procedures can serve as useful management tools by establishing specific revenue and expenditure expectations. In addition, the budget should be approved prior to the beginning of the fiscal year.

Recommendations

The Board of Trustees:

7.1 Discontinue the practice of subsidizing salaries and benefits for college employees who perform activities for the foundation. The college employees should track actual time worked for each activity or perform time studies to determine an allocation basis and request reimbursement for the foundation-related costs.

7.2 Enter into a written agreement with the foundation that documents the duties and responsibilities of both parties.

The Foundation Board:

7.3 Ensure annual budgets are approved timely and contain the actual beginning and estimated ending available resources and a budget message.

Auditee's Response

7.1 The Board of Trustees finds it puzzling that the state audit report indicates that the college subsidization of certain operating

expenses of its foundation "may violate the Missouri constitution." It would seem incumbent upon the auditors in this case to provide a definitive statement in this regard. That said, the Board of Trustees is satisfied that the college will evaluate the practice of subsidizing certain costs of the foundation and will seek to ascertain on its own whether this practice is or is not a violation of the Missouri Constitution. If it is determined that a violation has occurred, the college and foundation will remedy the situation.

7.2 The Board of Trustees is satisfied that the college and foundation will enter into a written agreement by the end of Fiscal Year 2014.

7.3 The foundation's budget for Fiscal Year 2015 and going forward will comply with the requirements noted in the State Auditor's findings.

St. Charles Community College
Organization and Statistical Information

The St. Charles Junior College District was established as a result of a public election on April 1, 1986, in accordance with enabling legislation by the Missouri General Assembly (Section 178.770, RSMo). The district was given the legal designation, the St. Charles County Community College District in February 1987. Its main campus is located in Cottleville. The residents within the district pay a property tax to support the operations of the college.

The college first opened for classes in the summer of 1987 and operated in several temporary locations for 5 years. In February 1989, the Board of Trustees authorized the purchase of a 135 acre tract that was destined to be located directly in the county's center of population growth for the year 2000. The campus has expanded to include 12 buildings, which have been constructed in four phases from June 1990 to August 2006. The Board of Trustees purchased adjacent parcels of land in 1998, 1999, and 2003 to increase the campus size to 235 acres. The land and construction costs have been funded through bond issuances approved by district voters.

The college is a comprehensive 2-year community college with associate degrees and certificate programs in the arts, business, sciences and career-technical fields. The college provides workforce training and community-based personal and professional development as well as cultural, recreational and entertainment opportunities. In addition to the main campus the district executed a 5 year lease in March 2013 with Lindenwood University at an offsite location to provide classes associated with its Nursing and Allied Health programs. In addition, the college offers a variety of courses on-line.

In the spring of 2013 and fall of 2012, the college's student enrollment totaled 7,242 and 7,724, respectively. However, due to numerous part-time students, the full-time equivalent student enrollment totaled 4,609 and 5,080 in each of those semesters, respectively. The college employed 411 full-time and 527 part-time employees as of June 30, 2013.

The college is governed by a 6-member Board of Trustees, who are elected in the April general election on even-numbered years, with each term running for 6 years. These individuals serve without compensation; however, they receive reimbursement for any expenses incurred in performing their duties. The Board functions as the legislative and policy-making body of the district, charged with the oversight and control of the college. The Board is responsible for defining the purpose of the college, developing and adopting the mission statement, appointing the president of the college, and approving all personnel and financial dealings. Board of Trustees meetings are held the third Monday of each month in the Social Sciences Building and are open the public.

Board of Trustees

The Board of Trustees as of June 30, 2013, consisted of the following members:

Name	Position	Term Ends
Ryan Robertson	President	April 2016
Robert R. Proost	Vice President	April 2014
Rose Mack	Secretary	April 2016
Judge William Lohmar	Treasurer	April 2014
Jean Ehlmann	Member	April 2018
William R. Pundmann	Member	April 2018

Executive Officers

The direction of daily operations is the responsibility of the administrative employees who serve under the leadership of the college president. These employees and their annual compensation as of June 30, 2013, were as follows:

Name	Position	Compensation
Dr. Ronald Chesbrough	President	$ 205,980 (1)
Donna Davis	Vice President for Human Resources	104,671
Todd Galbierz	Vice President for Administrative Services	135,417
Chris Breitmeyer	Vice President for Academics and Student Affairs	131,183
Heather McDorman	Vice President for Marketing and Communications	90,236
Kasey McKee	Vice President for Advancement	90,480
William Strecker	Associate Vice President for Technology and Online Learning	91,768

(1) Includes $198,900 salary, $6,000 automobile allowance, and $1,080 phone allowance.

*Includes selected findings

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Buckner, Missouri

We have conducted follow-up work on certain audit report findings contained in Report No. 2013-022, *City of Buckner*, issued in March 2013, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the city about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the city, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. As part of the AFTER work conducted, we met with the City Administrator and reviewed city documents. Those documents included bank reconciliations, city budgets, meeting minutes, and credit card statements and supporting documents. This report is a summary of the results of this follow-up work, which was substantially completed during December 2013 and March 2014.

Thomas A. Schweich
State Auditor

City of Buckner
Follow-Up Report on Prior Audit Findings
Status of Findings

1.1 Accounting Controls and Procedures - Accounting records

The city failed to ensure all financial transactions were posted to the accounting system. Transactions and financial reports were not monitored to ensure all activity was properly recorded in the accounting system. The city developed a fund accounting system, but did not maintain accurate records to allow monthly financial reports to be prepared by fund, showing receipts, disbursements and cash balances. The city engaged a private accounting firm to compile financial statements for the year ended September 30, 2011, but the compilation report indicated the balances and activity reported for some city funds may have been inaccurate and the discrepancies had not been resolved. Receipts, disbursements, and cash balances reported on the monthly financial statements prepared by the city were not accurate.

Recommendation

The Board of Aldermen ensure accounting records and financial reports accurately reflect the financial activity of the city.

Status

In Progress

The City Administrator indicated the city hired an accounting firm to help with its bank reconciliations after the city purchased and installed a new accounting software package in May 2013. She also indicated all transactions are being properly recorded in the system and city personnel are becoming familiar with the system. She believes the accounting records and financial reports are now accurate.

1.2 Accounting Controls and Procedures - Bank reconciliations

Bank balances had not been reconciled to book balances for the operating bank account since 2008 and several other bank accounts had not been reconciled in the past several years. The city last attempted to reconcile the operating bank account in October 2010, and at that time a $247,349 difference existed between bank records and balances in the individual cash ledgers. No efforts were made to resolve the difference and no other attempts to reconcile the operating account had been made. In addition, a reconciliation of the payroll bank account was last performed in March 2011.

Bank reconciliations for the other six city bank accounts were not current as of September 30, 2011, but the city hired a local accountant to help reconcile these accounts for the period November 2011 through April 2012 and reconciliations for these accounts were current as of April 2012.

Recommendation

The Board of Alderman ensure bank reconciliations are performed each month and any differences are investigated. If adjusting entries are needed, documentation of the adjustments should be retained.

Status

Implemented

We reviewed the October 31, 2013, bank reconciliation for the pooled account and verified the balance reconciled to the general ledger. This reconciliation required no adjustments. The City Administrator indicated bank reconciliations are now performed monthly for all bank accounts.

1.3 Accounting Controls and Procedures - Fund accounting

The city did not properly track and record various restricted monies and did not properly allocate some payments for services and expenses to various funds. Water and sewer monies were deposited into the general operating bank account instead of a separate bank account. The city maintained a separate accounting of water and sewer fees; however, a cash balance for each type of fee was not maintained. As a result, the city could not determine at a point in time what portion of the Water/Sewer Fund represented restricted water or sewer monies.

In addition, law enforcement training (LET) monies were deposited into the General Fund, and while LET receipts and disbursements were tracked, the cash balance of LET monies was not tracked.

Recommendation

The Board of Aldermen establish separate funds for the water and sewer activities and maintain those monies in a separate bank account. Records should also be maintained in a manner to account for the receipts, disbursements, and accumulated balance of LET monies.

Status

Partially Implemented

Water and sewer monies are now deposited into their own bank account, although both utilities are still accounted for within the same fund. The City Administrator indicated the city is still considering establishing separate funds for these activities. LET monies are still accounted for within the General Fund.

1.4 Accounting Controls and Procedures - Segregation of duties and monitoring

There was insufficient segregation of duties and no supervisory review of the work performed by the City Administrator or her staff. Detailed financial reports were not prepared monthly for review by the Board of Aldermen. The City Administrator, Administrative Clerk, and City Clerk were responsible for all record-keeping and accounting functions of the city and independent reviews of their work were not performed. While some segregation of duties was possible with the number of staff available, each of these employees had the ability to receipt monies and post transactions without any review or oversight by other employees or elected officials.

Recommendation

The Board of Aldermen segregate accounting duties to the extent possible and implement appropriate and documented reviews and monitoring procedures.

Status

In Progress

The City Administrator indicated the Board is now reviewing monthly reports of financial activity and the City Clerk is performing a review of deposits prepared by the Administrative Clerk. The City Clerk has the ability and does occasionally receive payments. The City Administrator indicated an alderman has been designated to periodically review receipts to deposits and bank reconciliations; and although reviews have yet to occur, they are scheduled to begin soon.

1.6 Accounting Controls and Procedures - Budgets

While annual budgets were prepared and adopted, they did not contain all elements required by state law and were prepared by city department, rather than by fund. The budget for the year ended September 30, 2011, did not include a budget message and general budget summary or actual beginning and ending cash balances.

Recommendation

The Board of Aldermen ensure budgets are prepared for each city fund and contain all information required by state law.

Status

Not Implemented

We reviewed the budget for fiscal year 2014 and while funds have been established, these funds do not correlate to the various funds the city maintains. For example, Fund 25 includes receipts and disbursements for streets and park capital improvements; however, each of these activities involve restricted monies and should be maintained in its own fund. The budget did not contain a budget message, summary of budgets, or beginning and estimated ending cash balances for each fund.

2. Water and Sewer System

Significant weaknesses existed in control procedures over providing water and sewer services. Rate studies had not been conducted and procedures for reviewing transactions and performing various reconciliations were not sufficient. The city had not obtained required annual audits.

2.1 Water and sewer rates

In both October 2010 and October 2011, the city increased water rates by 9 percent because the water supplier had increased its rates. However, a rate study had not been completed for several years to determine the cost of operating the water and sewer system. Approximately $500,000 was budgeted to replace some of the existing sewer system and install an ultraviolet disinfection system, but the city had not documented a multi-year capital improvement plan for either the water or sewer system. Without a current cost study to support the rates charged for water and sewer services, it was unclear whether the rates assessed for these services were set at an appropriate level.

Recommendation

The Board of Aldermen review water and sewer rates periodically to ensure revenues are sufficient to cover all costs of providing these services, but not set at a level that results in excessive fund balances. In addition, the Board

should prepare a formal capital improvement plan for the water and sewer system.

Status

Partially Implemented

The city hired a new Superintendent for the utility system in November 2013, who is in the process of preparing a capital improvement plan for the water system. However, formal cost studies have yet to be performed for the operation of the water and sewer system and city officials provided no timetable for when these studies would be performed.

2.2 Non-monetary transactions

Non-monetary transactions were not reviewed by an independent person. The Administrative Clerk, City Administrator, and City Clerk all receipted and posted utility payments, and also had the ability to post non-monetary transactions. Additionally, the City Administrator and City Clerk could approve non-monetary transactions. Because these employees were responsible for collecting utility monies and had the ability to alter or delete individual utility account information, there was an increased risk that unsupported or unauthorized changes could be made in the utility system. The city did not produce reports of non-monetary transactions for the Board to review and approve. Approval for non-monetary transactions by the City Administrator and City Clerk was not documented.

Recommendation

The Board of Aldermen ensure a documented review of all non-monetary transactions posted to the water and sewer system is performed by an independent person.

Status

Not Implemented

Non-monetary transactions are still not reviewed by an independent person. The City Administrator indicated the alderman designated to oversee accounting operations will review these transactions in the future.

2.3 Utility deposits

A list of customer deposits was maintained in the computer system, but this listing was not reviewed for accuracy or compared to the adjusted bank balance. According to the September 30, 2011, bank reconciliation for the utility deposit account, there was a shortage of $11,100.

Recommendation

The Board of Aldermen ensure customer deposits are reconciled to the cash balance and differences are investigated.

Status

Not Implemented

The City Administrator indicated she has worked on this reconciliation with the accounting firm hired to assist the city, but did not provide documentation of a reconciliation being performed.

2.4 Reconciliations

Monthly reconciliations of total amounts billed, payments received, and amounts unpaid for water and sewer were not performed. The accounting system was used to prepare a monthly billing summary for the Water/Sewer Fund, which documents the beginning balance, current charges, payments, and the ending balance. City personnel indicated the ending balance was reviewed for reasonableness, but the city did not retain the billing summary. Therefore, the city could not and did not reconcile payments collected and non-monetary transactions to the monthly billing summary.

Recommendation

The Board of Aldermen ensure monthly reconciliations of amounts billed to amounts collected and delinquent accounts are performed. In addition, the Board should ensure adequate documentation to support reconciliations is retained.

Status

Not Implemented

The City Administrator could not provide documentation that these reconciliations are now being performed.

2.5 Water shutoff

Late charges and shutoffs of service were not in accordance with city ordinances for elected officials and city staff. We reviewed the August 2011 water billings and related payments, and noted the Mayor and one alderman paid their bills over 30 days late, and their water was not shut off as required by City Ordinance 700.070. In addition, for the ten August 2011 billings of elected officials and staff we reviewed, we noted $12 of late charges were not assessed.

Recommendation

The Board of Aldermen ensure utility shutoff procedures are followed and late charges are applied in compliance with city ordinances for all utility customers, including elected officials and city staff.

Status

Implemented

The City Administrator indicated the city is no longer allowing any special treatment for Board members or other city staff when paying utility bills. She indicated late fees are assessed when necessary and shutoff procedures are being followed for all city utility customers.

2.6 Audits

The city did not obtain statutorily required annual audits of its water and sewer systems. Although an accounting firm prepared compilation reports for the city, this work was not an audit.

Recommendation

The Board of Aldermen obtain annual audits as required by state law.

Status

Not Implemented

The City Administrator indicated the Board is not planning to get a financial statement audit until the city has completed one full fiscal year on the new accounting system, which was installed in May 2013. The first full fiscal year completed on this system will be the fiscal year ended September 30, 2014.

3. Disbursements

Disbursement controls and procedures including approval by the Board, obtaining supporting documentation, and usage of credit cards needed improvement.

3.1 Board approval

The Board did not approve all disbursements. The City Administrator indicated she presented only non-recurring payments to the Board for approval. During Board meetings, the Board approved disbursements listed on a council approval report. Our testing determined that recurring disbursements were not treated consistently. Some recurring payments were included on the council approval report for one month and not included in another month. We also identified non-recurring disbursements that were not included on the council approval report.

Recommendation

The Board of Aldermen review and approve all disbursements and ensure approval of disbursements is documented.

Status

Implemented

The City Administrator indicated that all disbursements are now included on the council approval report, and this report is reviewed monthly and approved by the Board.

3.2 Supporting documentation

Adequate supporting documentation was not obtained for some credit card disbursements. Additionally, the city held the Park Board bank account and made distributions at the Park Board's request, but did not receive supporting documentation from board officials for some items purchased.

Recommendation

The Board of Aldermen require adequate, detailed supporting documentation be obtained and retained for all disbursements.

Status

Implemented

The Administrative Clerk is responsible for reviewing all credit card statements monthly and ensuring supporting documentation is on hand for all disbursements. We reviewed various credit card statements for the period April through October 2013 and verified each item on the statements was supported by documentation of the disbursement. The Administrative Clerk is also responsible for ensuring supporting documentation is available to support all payments made by the city on behalf of the Park Board. We

reviewed a disbursement made in February 2014 for the Park Board and supporting documentation was available.

3.3 Credit cards

Controls over credit cards needed improvement. The city had 20 credit cards from 7 vendors issued to 7 employees. The city had not adopted formal policies and procedures documenting who should maintain a credit card, appropriate usage for the credit cards, and required documentation to support credit card disbursements.

Recommendation

The Board of Aldermen adopt formal policies and procedures for credit card usage that include criteria for identifying employees that should be assigned a card, require adequate documentation be maintained and reconciled to billing statements, and require purchases be approved by someone other than the card user.

Status

In Progress

The Board has not adopted any formal policy regarding credit card usage, but the Mayor and City Administrator indicated the city planned to do so. New procedures have been put in place to ensure the cards are used for appropriate purposes and all items are supported. The Administrative Clerk is now reconciling billing statements to supporting documentation and presents the statements and support to the City Administrator for review each month. We reviewed various credit card statements from April through October 2013 and saw evidence the Administrative Clerk ensured documentation was on hand to support charges and the City Administrator had reviewed the statements.

4. Capital Assets

The city had not implemented adequate procedures to account for city property and ensure proper insurance coverage. The city did not maintain overall property records, or affix asset tags to city property. While city personnel indicated an annual physical inventory was conducted using insurance records as property records, the inventory was not documented.

Recommendation

The Board of Aldermen ensure complete and detailed property records are maintained, assets are properly tagged for identification, and annual physical inventories are performed and compared to detailed records. Additionally, the comparison should be documented.

Status

In Progress

The City Administrator indicated the city is currently working to prepare a current asset listing by utilizing the listings of assets maintained for insurance purposes. However, some assets have still not been tagged, and a physical inventory cannot be performed until the asset listing is completed.

6.2 Payroll - Bonuses

One-time merit bonuses totaling $21,100 were paid to 17 employees in October 2011. These payments appeared to represent additional compensation for services previously rendered and, as such, were in violation of Article III, Section 39, of the Missouri Constitution, and Attorney General's Opinion No. 72, 1955 to Pray.

Recommendation

The Board of Aldermen discontinue granting bonuses to employees.

Status

Implemented

The City Administrator indicates no bonuses were granted during the fiscal years ended September 30, 2012, and 2013.

7. Closed Meetings

The vote to close a meeting and the purpose of the closed meeting was not documented in the open meeting minutes as required by state law, and minutes of closed meetings were not prepared.

Recommendation

The Board of Aldermen ensure open meeting minutes properly disclose the votes and reasons for closing a meeting, and minutes are prepared and retained for closed meetings.

Status

In Progress

We reviewed the open session minutes for Board meetings held in October 2013 and March 2014, both of which properly disclosed the votes and specific reason for closing a portion of the meetings. Minutes for the October 2013 closed session were not taken, but minutes of the March 2014 closed session were provided for our review. The City Clerk indicated he will ensure minutes are maintained for all future closed sessions.

Thomas A. Schweich

Missouri State Auditor

City of Coffey

April 2014

Report No. 2014-026

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Coffey

Accounting Controls and Procedures	The Board of Aldermen has not segregated duties or performed adequate reviews of the work performed by the City Clerk. The City Clerk does not record the method of payment (cash or check) for utility monies received, so the composition of receipts cannot be reconciled to the composition of deposits. The city's profit and loss financial statements contained errors and did not include cash balances, and the city's 11 separate bank accounts complicate recordkeeping. The city does not maintain capital asset records, does not tag assets for specific identification, and does not conduct an annual physical inventory. The city has not established or documented job expectations or duties for some city employees.
Budgets	The city's budget documents did not include any information for 7 of the city's 11 funds and did not contain all elements required by state law. The City Clerk does not provide budget-to-actual information to the Board at its meetings, so the Board does not ensure disbursements remain within budgeted appropriations. The Board approved some budget amendments after the city's year end.
Utility Controls and Procedures	The city has not performed a formal review of water and sewer rates and, as a result, there is less assurance utility rates are set at an appropriate level. The city does not prepare a monthly list of utility deposit liabilities and reconcile it to the Utility Deposit bank account balance, and it had no record of deposits for 43 of 69 (62 percent) customers on the list of current customers. The city does not regularly reconcile total gallons of water billed to gallons of water pumped. The report for the year ended June 30, 2013 showed the city billed for 682,215 gallons (22 percent) less than it pumped, which is indicative of water loss issues and/or possible unbilled usage. The city does not obtain annual audits of the water and sewer system.

In the areas audited, the overall performance of this entity was **Good**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Management Advisory Report - State Auditor's Findings

1. Accounting Controls and Procedures 4
2. Budgets 6
3. Utility Controls and Procedures 7

Organization and Statistical Information 10

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Coffey, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Coffey. We have audited certain operations of the city in fulfillment of our duties. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2013. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Coffey.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Lori Melton, M.Acct., CPA
In-Charge Auditor:	Terri Erwin, MBA, CGAP

1. Accounting Controls and Procedures

There are numerous weaknesses with accounting controls and procedures.

1.1 Segregation of duties

The Board of Aldermen has not segregated duties or performed adequate reviews of the work performed by the City Clerk. The City Clerk is responsible for receiving, recording, and depositing monies; reconciling bank accounts; preparing invoices for payment and preparing checks; and posting entries in the accounting system. Additionally, the City Clerk performs utility billing procedures and payroll related duties. Many of these duties would normally be performed by a City Treasurer and City Collector; however, the city does not have individuals serving in these positions.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. Attorney General's Opinion No. 24, 1955 to Dodds, concluded that in a fourth-class city, the holding of the positions of City Clerk, City Treasurer, and City Collector, or any two of these offices, by the same person at the same time would be incompatible. If segregating duties is not possible, a timely supervisory review by the Board of Aldermen should be performed and documented.

1.2 Receipts

The City Clerk does not record the method of payment (cash or check) for utility monies received. Therefore, the composition of receipts cannot be reconciled to the composition of deposits.

To ensure all monies are properly recorded and deposited intact, the method of payment should be recorded and the composition of monies received should be reconciled to the composition of deposits.

1.3 Accounting records

The city's profit and loss financial statements contained errors and did not include cash balances. The City Clerk did not reconcile the profit and loss financial statements to the check registers and did not identify errors in the statements. The Board does not review the profit and loss financial statements or compare to supporting records to ensure accuracy.

To be of maximum assistance to the Board and to adequately inform the public, the city's records should accurately report financial activity and account balances.

1.4 Bank accounts

The city has 11 separate funds and maintains 11 corresponding bank accounts, resulting in cumbersome record keeping. Several transfers from one account to another were necessary for cash flow purposes during the year ended June 30, 2013.

To help simplify city records, reduce the number of account transfers, and minimize the risk of errors, the Board should consider reducing the number of bank accounts.

1.5 Capital assets

The city does not maintain records for its capital assets including buildings, utility system infrastructure, equipment, and other property. Additionally, assets are not tagged for specific identification, and an annual physical inventory is not performed.

Adequate capital asset records and procedures are necessary to provide controls over city property; safeguard city assets that are susceptible to loss, theft, or misuse; and provide a basis for proper financial reporting and insurance coverage.

1.6 Job descriptions

The city has not established or documented job expectations or duties for some city employees. For example, the city does not have an ordinance or documentation of what duties are expected to be performed by the Water and Sewer Operator, who receives $350 per month.

Documentation of duties and job descriptions would clarify the duties and responsibilities of each employee and help prevent misunderstandings.

Recommendations

The Board of Aldermen:

1.1 Adequately segregate the duties of the City Clerk. At a minimum, there should be a documented supervisory review of the city records and reconciliations.

1.2 Require the method of payment be recorded, and the composition of receipts be reconciled to the composition of deposits.

1.3 Establish procedures to ensure accounting records accurately report financial activity and account balances. In addition, the Board should review these reports to effectively monitor the city's financial activity.

1.4 Consider reducing the number of city bank accounts.

1.5 Ensure property records are maintained that include all pertinent information for each asset such as tag number, description, cost, acquisition date, location and subsequent disposition. The Board should also properly tag, number, or otherwise identify all applicable city property and conduct and document an annual inventory.

1.6 Establish and document the duties of all city employees.

Auditee's Response

The Board of Aldermen provided the following responses:

1.1-1.3 We agree and will implement the recommendations.

1.4 We agree. We will review the accounts to identify accounts which can be closed.

1.5 &1.6 We agree and will implement the recommendations.

2. Budgets

The city has not established adequate procedures to ensure budgets were prepared for all funds, and included all elements required. Budget-to-actual receipts and disbursements were not adequately monitored.

2.1 Budget preparation

The city did not prepare complete budget documents for the years ended June 30, 2014, and 2013; the budgets did not include any information for 7 of the city's 11 funds and did not contain all elements required by state law. As a result, the Board is not using all available information to assist in effectively managing the city, and the public is not provided a complete overview of city finances. Budgets for the years ended June 30, 2014, and 2013, did not include a budget message, actual and budgeted amounts for the 2 preceding years, and beginning and ending actual and estimated cash balances. The budgets only included projected receipts and disbursements for the coming year.

Section 67.010, RSMo, requires the budget present a complete financial plan for the ensuing budget year and also sets specific guidelines for the format. A complete budget should include the beginning available resources and a reasonable estimate of the ending available resources. A complete and well planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific financial expectations for each area of city operations. It also assists in setting tax levies and utility rates and informing the public about city operations and current finances.

2.2 Budget monitoring

The Board does not adequately monitor budget-to-actual receipts and disbursements. As a result, budget amendments were approved after the city's year end for some funds. Additionally, actual disbursements exceeded budgeted disbursements (appropriations) for some funds.

The City Clerk does not provide budget-to-actual information to the Board at its meetings. Therefore, the Board is not reviewing information to ensure disbursements remain within budgeted appropriations. According to accounting records, the city overspent 3 of the 4 funds budgeted (General, Sewer, and Water) prior to amending the budgets. On July 9, 2013, the

Board approved an ordinance amending the budgeted appropriations for these 3 funds for the year ended June 30, 2013, after the fiscal year ended.

Section 67.040, RSMo, requires political subdivisions to keep disbursements within amounts budgeted, but allows for budget increases if the governing body officially adopts a resolution setting forth the facts and reasons. In addition, Section 67.080, RSMo, provides that no disbursement of public monies should be made unless it is authorized in the budget. Proper monitoring and amending prior to disbursing funds is necessary for the budget to be an effective management tool and comply with state law.

Recommendations

The Board of Aldermen:

2.1 Prepare annual budgets for all funds that contain all information as required by state law.

2.2 Properly monitor actual disbursements compared to budgeted disbursements, and ensure actual disbursements do not exceed budgeted disbursements.

Auditee's Response

The Board of Aldermen provided the following responses:

2.1 We agree. We have been working to improve the budget and will take your recommendation under advisement while we continue to make improvements.

2.2 We agree and will implement the recommendations.

3. Utility Controls and Procedures

There are weaknesses in city operations related to utility services. The city provided utility services to 74 customers per the May 2013 billing report. According to the city's profit and loss financial statement, the city collected approximately $28,700 in water fees and $15,500 in sewer fees during the year ended June 30, 2013.

3.1 Utility rates

The city has not performed a formal review of water and sewer rates, and as a result, there is less assurance utility rates are set at an appropriate level. The city increased water and sewer rates in September 2013. According to the city's profit and loss financial statement, the Water Fund and Sewer Fund incurred an operating loss of $393 and $5,057, respectively, for the year ended June 30, 2013.

Section 67.042, RSMo, provides that fees may be increased if supported by a statement of costs, which shows the increase is necessary to cover costs of providing the service. Water and sewer fees are user charges that should cover the cost of providing the related services. The city should perform a detailed review of its utility costs, including depreciation and debt service

costs, and set rates to cover the total cost of operation. Preparing a statement of costs would not only allow the city to determine the rates necessary to support current and future operations, but also provide documentation to customers of the rationale behind the rates. Such rate studies should be performed periodically.

3.2 Utility deposits

The city does not prepare a monthly list of utility deposit liabilities and reconcile the list to the Utility Deposit bank account balance. New customers are required by ordinance to pay a refundable deposit before receiving utility service. At our request, the City Clerk prepared a list of current customers as of January 13, 2014, including any information available regarding utility deposits. The city had no record of deposits for 43 of 69 (62 percent) customers shown on the list prepared. Deposits for the remaining 26 customers listed totaled $3,842, and the reconciled balance in the Utility Deposit bank account totaled $3,279, resulting in a shortage of $563.

Maintaining a list of deposits and reconciling this list to the bank balance is necessary to ensure deposits are properly recorded and are sufficient to meet liabilities. Any discrepancies should be promptly investigated and resolved.

3.3 Water reconciliation

The city does not regularly perform a reconciliation of total gallons of water billed to gallons of water pumped, although the information is available to perform this reconciliation. A monthly report showing gallons pumped and billed is available from the system but not reviewed by city personnel. We reviewed the year ended June 30, 2013, report and identified unaccounted for water. The report showed the city pumped 3,115,010 gallons of water and billed customers for 2,432,795 gallons, a difference of 682,215 gallons or 22 percent of water pumped. This significant difference is indicative of water loss issues and/or possible unbilled usage, and indicates a need for follow up.

Monthly reconciliations of gallons of water billed to gallons of water pumped and tracking city water usage is necessary to help detect significant water loss and ensure all water use is properly billed. According to the United States Environmental Protection Agency, the water industry goal for unaccounted for water is 10 percent or less.[1]

[1] United States Environmental Protection Agency, "Using Water Efficiently: Ideas for Utilities," <http://www.epa.gov/WaterSense/docs/community508.pdf>, accessed February 12, 2014.

3.4 Annual audits

Annual audits of the water and sewer system are not performed.

Section 250.150, RSMo, requires the city to obtain annual audits of the combined water and sewer system. In addition to being required by state law, annual audits of city funds help ensure monies are properly handled and financial transactions are properly recorded.

Recommendations

The Board of Aldermen:

3.1 Document formal reviews of utility rates periodically to ensure revenues are sufficient to cover all costs of providing these services and to support any rate increases.

3.2 Ensure a list of utility deposits on hand is prepared and reconciled monthly to the Utility Deposit reconciled bank balance. Any discrepancies should be promptly investigated and resolved.

3.3 Ensure all water use is properly metered, gallons of water pumped is reconciled to gallons billed monthly, and investigate any significant differences.

3.4 Obtain annual audits of the water and sewer system as required.

Auditee's Response

The Board of Aldermen provided the following responses:

3.1 When the rate was raised, an informal review was performed. A Board member performed the review and kept documentation. However, only the results of the review were presented to the full Board at a Board meeting. Formal documentation will be presented to the Board based on the Board member's review. The Board will ensure formal reviews of future rate determinations.

3.2 &3.3 We agree and will implement the recommendations.

3.4 The Board was not aware of the state statute requiring an audit of the combined water and sewer system. The Board will implement the recommendation.

City of Coffey
Organization and Statistical Information

The City of Coffey is located in Daviess County. The city was incorporated in 1965 and is currently a fourth-class city. The city employed four part-time employees on June 30, 2013.

City operations include utilities (water, sewer, and solid waste removal).

Mayor and Board of Aldermen

The city government consists of a mayor and a four-member board of aldermen. The members are elected for 2-year terms. The mayor is elected for a 2-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen at June 30, 2013, are identified below. The Mayor and the Board of Aldermen members are paid $20 per regular meeting. In addition, the Mayor receives a $35 mileage stipend monthly. The compensation of these officials is established by ordinance.

John Eacret, Mayor
John Vondran, Mayor Pro Tem
Paul Chair, Alderman
Virgil Griffin, Alderman
Ermagene Welty, Alderwoman

Financial Activity

A summary of the city's financial activity for the year ended June 30, 2013, follows:

City of Coffey

Missouri State Auditor

Interstate 44 and Highway 47 Triangle Transportation Development District

April 2014

Report No. 2014-027

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Interstate 44 and Highway 47 Triangle Transportation Development District

Financial Monitoring and Reporting	The Interstate 44 and Highway 47 Triangle Transportation Development District (TDD) Board is not properly monitoring the financial obligations of the district and is not reviewing supporting documentation for disbursements made by the City of St. Clair on behalf of the district. Due to the lack of monitoring of its financial obligations, the TDD Board did not identify inaccuracies in the outstanding obligations reported in the district's 2011 and 2012 financial statements. The TDD Board should be monitoring its financial transactions and outstanding obligations more closely to ensure financial statements are accurate and the TDD sales tax is timely repealed once all obligations of the TDD are satisfied.

In the areas audited, the overall performance of this entity was **Good**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 6

THOMAS A. SCHWEICH
Missouri State Auditor

Josh Kasper, Chairman
and
Board of Directors
Interstate 44 and Highway 47 Triangle Transportation Development District
St. Clair, Missouri

We have audited certain operations of the Interstate 44 and Highway 47 Triangle Transportation Development District in fulfillment of our duties under Section 238.272, RSMo. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2012. The objectives of our audit were to:

1. Evaluate the district's internal controls over significant management and financial functions.

2. Evaluate the district's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the district's management and was not subjected to the procedures applied in our audit of the district.

For the areas audited, we identified (1) deficiencies in internal controls, (2) no significant noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our finding arising from our audit of the Interstate 44 and Highway 47 Triangle Transportation Development District.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Rex Murdock, M.S.Acct
Audit Staff:	Wayne Kauffman, MBA

Interstate 44 and Highway 47 Triangle Transportation Development District
Management Advisory Report - State Auditor's Findings

1. Financial Monitoring and Reporting

The Interstate 44 and Highway 47 Triangle Transportation Development District (TDD) Board is not properly monitoring the financial obligations of the district and is not reviewing supporting documentation for disbursements made by the City of St. Clair on behalf of the district. In addition, the TDD Board did not identify inaccuracies in the 2011 and 2012 financial statements filed with the State Auditor's office.

The Missouri Department of Transportation (MoDOT) and the City of St. Clair are the local transportation authorities for the TDD project. The city's portion of the project was financed through a direct loan of approximately $1.65 million from the Missouri Transportation Finance Corporation (MTFC) and approximately $200,000 the city paid for the project. The intergovernmental agreement between the city and the TDD requires the city to handle the financial and administrative functions of the TDD and maintain the related accounting records. It also pledges the district's sales tax revenues to repay the city for the project costs. Ultimately the TDD will be required to repay the city for the MTFC loan, the city-paid portion of project costs, and ongoing administrative costs, such as court filing fees and legal fees or other professional services fees, paid by the city on behalf of the district.

The TDD Board is not reviewing a summary of financial transactions or cash balances of district funds, and is not monitoring the outstanding obligations due to the city. In addition, the TDD Board has not requested the city provide supporting documentation, such as invoices, to support the accrued administrative costs paid by the city, or exercised its ability to inspect such information as allowed under the terms of the intergovernmental agreement. According to city records, these costs totaled approximately $51,000 as of December 31, 2012. Due to the lack of monitoring of its financial obligations, the TDD Board did not identify inaccuracies in the outstanding obligations reported in the district's 2011 and 2012 financial statements. The total obligation reported on the 2012 financial statement was approximately $1.5 million, but the actual obligation as of December 31, 2012, exceeded $1.7 million. The TDD Board has a duty to ensure it provides sufficient oversight to ensure TDD sales taxes are spent appropriately and for allowable purposes.

The TDD Board should be monitoring its financial transactions and outstanding obligations more closely to ensure financial statements are accurate and the TDD sales tax is timely repealed once all obligations of the TDD are satisfied. In addition, reviewing and approving supporting documentation for ongoing administrative costs paid by the city will allow the TDD Board to determine if the amount reported is accurate and that the costs are appropriate and reasonable.

Recommendation

The TDD Board work with the city to determine all of the financial obligations of the district, monitor the amounts outstanding, and ensure financial obligations are accurately reported. In addition, the Board should ensure it periodically reviews supporting documentation and records pertaining to administrative costs.

Auditee's Response

The TDD Board provided the following written response:

The Board of Directors of the Interstate 44 and Highway 47 Triangle Transportation Development District has reviewed the draft report, fully accepts and agrees with the finding as presented. We have already begun implementation of much of the process improvement which has been presented.

Interstate 44 and Highway 47 Triangle Transportation Development District Organization and Statistical Information

The Interstate 44 and Highway 47 Triangle Transportation Development District (TDD) is located in the City of St. Clair. The TDD was organized in February 2009 by petition of the city. The members of the Board of Directors of the district are elected by the registered voters of the district and are all residents and registered voters of the district.

In November 2009, the Board of Directors passed a resolution approving the imposition of a sales tax of 1-cent (1 percent), subject to voter approval, effective July 1, 2010, for 30 years, unless terminated sooner, on all taxable transactions within the boundaries of the district. In February 2010, the qualified voters of the TDD, in this case the registered voters, approved the imposition of the sales tax. The retail establishments within the district collect and remit the sales tax to the Missouri Department of Revenue (DOR). In turn, the DOR distributes the sales tax monies to the district.

The TDD was formed for the purpose of relocating the Interstate 44 north outer road with the east leg aligned to intersect Highway 47 and the west leg aligned to intersect Miller Drive. The Missouri Department of Transportation (MoDOT) and the City of St. Clair are the public entities with jurisdiction over this project. The project was completed in July 2013.

The TDD has a fiscal year end of December 31, and did not have independent audits performed during the 2 years ended December 31, 2012.

District Board

An elected board acts as the policy-making body for the district's operations. The board's four members serve 3-year terms without compensation. Members of the board at December 31, 2012, were:

Josh Kasper, Chairman
Art Viehland, Vice Chairman
Twyla Kasper, Treasurer
Janet Viehland, Secretary

Financial Activity

The MoDOT and the City of St. Clair paid project costs of approximately $5.4 million. The city secured a loan through the Missouri Transportation Finance Corporation for approximately $1.65 million and provided another $200,000 in city funds to pay its share of the project costs. The district was formed to reimburse the project costs incurred by the city. Our audit determined the outstanding obligation to the city exceeded $1.7 million at December 31, 2012.

A summary of the district's financial activity for the 2 years ended December 31, 2012, follows:

	Year Ended December 31,	
	2012	2011
RECEIPTS		
Sales taxes	$ 87,703	85,008
Interest	98	153
Total Receipts	87,801	85,161
DISBURSEMENTS		
Principal and interest	75,000	90,000
Total Disbursements	75,000	90,000
RECEIPTS OVER (UNDER) DISBURSEMENTS	12,801	(4,839)
BEGINNING CASH	26,296	31,135
ENDING CASH	$ 39,097	26,296

5. Disbursements 10

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Chairperson
and
Members of the Board of Trustees
Village of Deerfield, Missouri

We have conducted follow-up work on certain audit report findings contained in Report No. 2013-066, *Village of Deerfield*, issued in August 2013, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the village about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

   - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
   - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
   - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
   - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the village, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. As part of the AFTER work conducted, we spoke with village officials and reviewed documents provided to us by the Village Clerk who also serves as a Village Trustee (Trustee/Village Clerk) and during our audit also served as the Village Collector (Village Clerk/Collector). Those documents included Board of Trustee meeting minutes, agendas, monthly financial reports, bank statements, the Trustee/Village Clerk's bond, letters from the Department of Revenue (DOR), the December 2013 check register, and the cleared check image of the payment to the DOR. This report is a summary of the results of this follow-up work, which was substantially completed during March 2014.

Thomas A. Schweich
State Auditor

Village of Deerfield
Follow-Up Report on Prior Audit Findings
Status of Findings

1. Oversight and Management

The Board of Trustees did not provide adequate oversight and management of village operations and financial activities.

1.1 Meetings and minutes

Village trustees did not attend meetings on a regular basis. In addition, meeting notices and agendas were not prepared, minutes were not adequate, village business appeared to be conducted outside of Board meetings, and a public hearing was not held when setting the property tax levy.

The village did not have a policy regarding absenteeism by trustees. During the year ended December 31, 2012, a quorum was present for only 3 of 12 monthly meetings, which disrupted the conduct of village business. In addition, the village did not prepare and post notices of meetings and related agendas as required by state law. Also, Board minutes did not document a record of votes taken. The minutes also contained limited documentation of decisions made regarding street repair and maintenance or purchases. This information was also not available in other village records.

Village business appeared to be conducted outside of regular open meetings. Payments for mowing services and insurance were made, but their approval was not documented in meeting minutes, and some of these payments were made in months when no Board meeting occurred. In addition, trustees were informally polled for their input regarding the purchase of a used dump truck. Additionally, there was no evidence a public hearing on the village's proposed property tax rate was held in 2012 or that the tax rate was formally approved by the Board.

Recommendation

The Board of Trustees establish a policy regarding absenteeism by trustees. The Board should ensure notices and tentative agendas for Board meetings are posted and retained, minutes contain all required information, and village business is conducted in public meetings. The Board should hold a public hearing each year to determine and set the tax levy.

Status

Partially Implemented

The Board of Trustees has not established a policy concerning absenteeism by trustees. The Trustee/Village Clerk now posts all meeting notices and agendas at the village's community center and retains a copy for the village's records. We reviewed the monthly Board of Trustee's meeting minutes for August 2013 through January 2014. The minutes appeared detailed and contained all required elements; however, a quorum was not present for the August and October meetings. The annual tax rate hearing was scheduled in conjunction with the August 2013 meeting. Due to the absence of a quorum for that meeting, a tax rate hearing was not held for the 2013 tax levy.

1.2 Public access policy

The village had not adopted a formal policy regarding public access to village records as required by state law.

Recommendation

The Board of Trustees develop written policies regarding procedures to obtain access to, or copies of, public village records.

Status

Not Implemented

The Board has not developed a policy regarding access to or obtaining copies of the village's public records. The Trustee/Village Clerk indicated the Board would discuss such a policy at a future Board meeting.

1.3 Budgets

Annual budgets were not prepared for village funds as required by state law.

Recommendation

The Board of Trustees prepare annual budgets which include all information required by state law, and ensure the budget is formally approved and the approval is documented in the Board minutes.

Status

Not Implemented

The Trustee/Village Clerk indicated a budget was not prepared for the year ended December 31, 2014.

1.4 Financial statements

Semiannual financial statements had not been published or posted as required by state law.

Recommendation

The Board of Trustees publish or post semiannual financial statements as required by state law.

Status

In Progress

The Board did not publish or post semiannual financial statements for the year ended December 31, 2013. However, the Trustee/Village Clerk indicated the Board plans to prepare and publish the financial statements for the 6 month period ended June 30, 2014.

1.5 Disbursements

The village had not established a process for the Board to review and approve village disbursements.

The minutes and supporting documentation did not indicate Board review and approval of disbursements. In addition, the Board only held two meetings in 2012 during which village business was conducted. According to the Village Clerk/Collector payment of expenses was made as needed.

Recommendation

The Board of Trustees review and document approval of all disbursements and supporting documentation.

Status	**Partially Implemented** The Trustee/Village Clerk now prepares a detailed monthly listing of receipts and disbursements that is provided to each trustee at Board meetings. The meeting minutes note the Board's review of the monthly financial report and approval to pay current bills; however, supporting invoices are not reviewed by the Board. The Trustee/Village Clerk indicated he would consider bringing the invoices to the Board meetings.
1.6 Ordinances	Village ordinances were not complete, well organized, or up to date. Many ordinances were old and no longer relevant, but had not been rescinded by the Board. Additionally, the village had not adopted an ordinance for the Village Clerk/Collector's job responsibilities, work hours, compensation, etc.
Recommendation	The Board of Trustees ensure ordinances are maintained in a complete, well-organized, and up-to-date manner, new ordinances are passed when appropriate, and an index of all ordinances passed and rescinded is established. The Board should also establish, by ordinance, the Village Clerk/Collector's duties and compensation.
Status	**Not Implemented** The Trustee/Village Clerk indicated no action has been taken regarding the village's ordinances, but the Board would consider the issue at a future date.
1.7 Lease agreement	The village trustees did not properly monitor the lease agreement with the United States Postal Service (USPS), and for the year ended December 31, 2012, the village was underpaid $413.
Recommendation	The Board of Trustees ensure the village receives all appropriate revenues as provided in contracts, and pursue payment of $413 from the USPS.
Status	**Implemented** The village received a lump sum payment of $1,652 from the USPS in January 2014 for the underpayment of the lease agreement, which occurred over the course of 4 years. In addition, we reviewed the village's bank statement and verified the correct lease payment amount was received in January 2014.
2. Sales Tax Exemption	The Board Chairman misused the village sales tax exemption letter. He used the village sales tax exemption to purchase equipment on behalf of a private individual. As a result, this individual effectively avoided paying sales tax on the purchase.

Recommendation

The Board of Trustees should contact the Department of Revenue (DOR) regarding how to resolve this situation and any sales tax due. In the future, the Board should ensure the village sales tax exemption is not used for the benefit of private entities or individuals.

Status

Implemented

The village received a letter from the DOR in October 2013 that indicated a total tax of $377.18 plus penalties and interest was owed by the village due to the improper use of the village's tax exemption certificate. We verified the village paid the DOR $377.18 in taxes and $107.43 in penalties and interest in November 2013. The Trustee/Village Clerk indicated the village would ensure future use of the village's sales tax exemption is in accordance with state law.

3. Internal Controls, Records, and Procedures

There were significant weaknesses in village internal controls, records, and procedures.

3.1 Segregation of duties

There was no independent oversight or adequate segregation of duties related to the Village Clerk/Collector's activities. A trustee served as the Village Clerk/Collector, and was compensated for these duties.

One person serving as both village clerk and village collector did not allow the segregation of duties necessary for a proper evaluation and review of financial transactions. Also, there was no evidence the Board provided adequate supervision or review of the work performed by the Village Clerk/Collector.

Recommendation

The Board of Trustees consider appointing separate individuals, other than a trustee, to the positions of Village Clerk and Village Collector and segregate the duties of the Village Clerk/Collector to the extent possible. If proper segregation of duties cannot be achieved, timely supervision or independent review of the work performed and investigation into unusual items and variances is necessary. The Board should also consider requiring dual signatures on checks or appointing someone other than the Village Clerk/Collector as the check signer.

Status

Partially Implemented

The Trustee/Village Clerk no longer serves as the Village Collector. However, accounting duties have not been adequately segregated. The Trustee/Village Clerk continues to make all deposits when necessary, write all checks, and maintain all financial records without adequate oversight by the Board. In addition, dual signatures are not required for village checks.

3.2 Accounting records

The village did not maintain a current fund ledger showing the beginning balance, monthly receipts by source and disbursements by type, and ending balance. At year-end, the Village Clerk/Collector prepared a manual receipt and disbursement spreadsheet from the bank statements and checkbook register.

The village also had not established a separate fund or separate accounting for motor vehicle-related revenues received from the state, and did not monitor the use of these funds to ensure compliance with state law.

Recommendation

The Board of Trustees ensure a complete financial accounting system is established. Summary financial reports should be prepared documenting monthly receipt sources and disbursement types. This information should be used to compare to budget estimates and monitor village operations.

Status

Partially Implemented

A complete financial accounting system has not been established as current fund ledgers are not maintained throughout the year. Summary financial reports detailing monthly receipt sources and disbursement types are now prepared by the Trustee/Village Clerk and provided to village trustees at the monthly Board meetings; however, this information cannot be used to compare to budget estimates because the village did not establish a budget for 2014.

3.3 Accounting procedures

The village had significant weaknesses in accounting procedures:

- The Village Clerk/Collector did not prepare a receipt log and/or issue receipt slips for monies received.
- The Village Clerk/Collector did not restrictively endorse checks immediately upon receipt.
- The Village Clerk/Collector did not deposit receipts timely.
- The Village Clerk/Collector did not perform bank reconciliations.
- The Village Clerk/Collector did not maintain a current balance in the checkbook.

Recommendation

The Board of Trustees ensure receipts slips and/or a receipt log are prepared for all monies received, checks are restrictively endorsed upon receipt, receipts are deposited timely, monthly bank reconciliations are prepared, and a running checkbook balance is maintained.

Status	**Partially Implemented** Receipt slips are not issued nor a receipt log prepared for all monies received. The Trustee/Village Clerk indicated that when checks are received they are restrictively endorsed and all receipts are deposited timely. Monthly bank reconciliations are not prepared. We reviewed the village's checkbook register and noted a running balance is now maintained by the Trustee/Village Clerk.
3.4 Wage reporting and withholding	The village did not properly report wages, and withhold employee payroll taxes from or pay the employer share of taxes on compensation paid to the Village Clerk/Collector.
Recommendation	The Board of Trustees ensure the compensation paid to the Village Clerk/Collector is subject to payroll taxes and properly reported on a W-2 form. The village should also contact the Internal Revenue Service and appropriate state agencies for guidance regarding prior years.
Status	**Not Implemented** The Trustee/Village Clerk indicated a W-2 form had not been completed to report his 2013 wages. The Trustee/Village Clerk indicated he plans to complete a W-2 form in future years and would obtain additional guidance if necessary.
4. Property Tax	The Village Clerk/Collector needed to improve property tax controls, records, and procedures.
4.1 Method of payment	Although the Village Clerk/Collector made a hash mark next to the tax due when the tax statement was mailed, and recorded the date when monies were received, he did not record the method of payment (cash, check, etc.) on the list of taxes due. As a result, the composition of receipts could not be reconciled to the composition of deposits.
Recommendation	The Board of Trustees require the Village Clerk/Collector to record the method of payment received on his tax list and reconcile the composition of receipts to bank deposits.
Status	**Implemented** The village has turned over all property tax collection responsibilities to the Vernon County Collector.
4.2 Timely deposit	The Village Clerk/Collector did not deposit tax collections in a timely manner.

Recommendation

The Board of Trustees require the Village Clerk/Collector to deposit tax collections in a timely manner.

Status

Implemented

The village has turned over all property tax collection responsibilities to the Vernon County Collector.

4.3 Tax statements

Current tax statements sent to village residents were not adequate. The tax statements did not identify the property being taxed, related assessed valuation, or tax levy. The statements only included the total amount due.

Recommendation

The Board of Trustees require the Village Clerk/Collector to include a description of the property being taxed, related assessed valuation, and tax levy on the tax statements.

Status

Implemented

The village has turned over all property tax collection responsibilities to the Vernon County Collector.

4.4 Account book and delinquent tax list

The Village Clerk/Collector did not maintain an account book to record property tax charges, additions/abatements, collections, and remaining delinquent taxes, and did not prepare and submit to the Board a list of delinquent taxes each year.

Tax records maintained by the Village Clerk/Collector included the property tax list from the county and a list of property owners and taxes due. Although the county list included a description of the property, the assessed valuation, and the tax due, the village list only included the resident's name and tax due. The total taxes charged, added/abated, or collected and delinquent taxes were not summarized.

Recommendation

The Board of Trustees require the Village Clerk/Collector to maintain an account book, and prepare and submit to the Board a delinquent tax list as of January 1 each year. The Board should remit this delinquent list to the county for collection.

Status

Implemented

The village has turned over all property tax collection responsibilities to the Vernon County Collector.

4.5 Bond

The Village Clerk/Collector was not bonded, as required by state law.

Recommendation

The Board of Trustees require appropriate bond coverage for all village officials.

Status

Implemented

We verified the village obtained adequate bond coverage for the Trustee/Village Clerk.

5. Disbursements

There were significant weaknesses in the controls and procedures over disbursements.

5.1 Bidding

According to the Village Clerk/Collector, the village did not have a bid policy and typically did not bid purchases, although trustees may have informally checked prices before a purchase was made. However, there was no evidence in minutes or elsewhere in village records indicating any efforts to check prices or any support for vendors selected in those cases. As a result, the village had little assurance that it was receiving fair value for goods and services and no documentation to support decisions made.

Recommendation

The Board of Trustees establish formal written bidding policies and procedures, including documentation requirements regarding the bids or quotes received, and justification for the bid selected.

Status

Not Implemented

The Trustee/Village Clerk indicated a bidding policy has not been implemented by the Board because the village makes very few large purchases. In addition, the Trustee/Village Clerk indicated the village has made no purchases exceeding $1,000 since the release of the audit report.

5.2 Supporting documentation

Adequate supporting documentation was not available for some disbursements.

Recommendation

The Board of Trustees require adequate, detailed supporting documentation be obtained and retained for all disbursements.

Status

Implemented

The Trustee/Village Clerk indicated that supporting documentation is obtained and retained for all village disbursements.

5.3 Conflict of interest

Because the minutes did not indicate the discussion and approval of mowing services provided by the Board Chairman's daughter, it was not clear if the Board Chairman voted in the Board's approval to purchases these services from her. This arrangement represented an appearance of a conflict of interest. During the year ended December 31, 2012, the Board Chairman's daughter was paid $300 for mowing various village properties.

Recommendation

The Board of Trustees ensure village officials who have a conflict or an appearance of a conflict, fully disclose their interest and not vote on matters

that involve them personally. That action should be documented in the Board minutes. The Board should also consider adopting a code of conduct for city officials.

Status

Partially Implemented

The Trustee/Village Clerk indicated a code of conduct has not been adopted because the Board Chairman identified in the audit report has resigned from the Board and no similar situations have occurred. The Trustee/Village Clerk also indicated village officials will properly disclose conflicts of interest and refrain from voting on such matters in the future.

5.4 Questionable expenditure

The purchase of Sam's Club memberships for village officials did not appear to be a necessary or prudent use of public funds. In August 2012, memberships costing $35 each, were purchased for four trustees; and, instead of a membership, $35 was paid to the fifth trustee. In addition, a membership was purchased for the Board Chairman's daughter. The village was reimbursed for this membership. According to the Village Clerk/Collector, these memberships were provided to the trustees as a "perk" since they are not otherwise paid for serving on the Board.

Recommendation

The Board of Trustees ensure all disbursements of village monies are necessary and a prudent use of public funds.

Status

Implemented

The Trustee/Village Clerk indicated they no longer provide Sam's Club memberships to Board members.

Thomas A. Schweich

Missouri State Auditor

Town and Country Village Transportation Development District

April 2014

Report No. 2014-029

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Town and Country Village Transportation Development District

Comments

The Town and Country Village Transportation Development District (TDD) was organized in October 2009 and is located in the City of Ozark. The TDD was formed for the purpose of constructing roads, parking facilities, and site lighting and utilities near Highway 14 on North 25th and North 22nd Streets, as well as constructing West Diane Street. The Missouri Department of Transportation and the City of Ozark are the public entities with jurisdiction over these ongoing projects. Taxable transactions within the TDD are subject to a 1-cent sales tax. For the areas audited, we identified no significant deficiencies in internal controls, no significant noncompliance with legal provisions, and no significant deficiencies in management practices and procedures.

In the areas audited, the overall performance of this entity was **Excellent**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

State Auditor's Report 2

Organization and Statistical Information 4

THOMAS A. SCHWEICH
Missouri State Auditor

Mike Hejna, Chairman
and
Board of Directors
Town and Country Village Transportation Development District
Ozark, Missouri

We have audited certain operations of the Town and Country Village Transportation Development District in fulfillment of our duties under Section 238.272, RSMo. The scope of our audit included, but was not necessarily limited to, the 4 years ended December 31, 2012. The objectives of our audit were to:

1. Evaluate the district's internal controls over significant management and financial functions.

2. Evaluate the district's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the district's management and was not subjected to the procedures applied in our audit of the district.

For the areas audited, we identified (1) no significant deficiencies in internal controls, (2) no significant noncompliance with legal provisions, and (3) no significant deficiencies in management practices and procedures. No findings resulted from our audit of the Town and Country Village Transportation Development District.

Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Rex Murdock, M.S.Acct
Audit Staff:	Wayne Kauffman, MBA

Town and Country Village
Transportation Development District
Organization and Statistical Information

The Town and Country Village Transportation Development District (TDD) is located in the City of Ozark. The TDD was organized in October 2009 by petition of the owner of property within the proposed TDD. The Board of Directors and officers were elected by the property owner.

The qualified voters of the TDD, in this case the property owner, approved the imposition of a sales tax of up to 1-cent (1 percent) on all taxable transactions within the boundaries of the district. The Board of Directors subsequently passed a resolution in October 2009 that set the sales tax rate at 1-cent (1 percent), and the TDD started collecting sales tax in January 2012. The TDD expects the sales tax to remain in effect for 40 years, unless terminated sooner after all obligations have been paid.

The TDD was formed for the purpose of constructing roads, parking facilities, and site lighting and utilities near State Highway 14 on North 25th and North 22nd Street as well as constructing West Diane Street. The Missouri Department of Transportation and the City of Ozark are the public entities with jurisdiction over these projects. The projects have not been completed.

In April 2010, the developer sold a portion of property within the TDD to a movie theatre company. In October 2012, the developer sold the remaining land the developer owned within the TDD to a financial group. A property owners meeting has not been held since 2012 to elect a new Board of Directors. The attorney representing the TDD indicated a property owners meeting is expected to occur in the second quarter of 2014 and new Board members will be elected at that meeting.

The TDD has a fiscal year end of December 31, and did not have an independent audit performed of its financial statement during the year ended December 31, 2012.

District Board

An elected board acts as the policy-making body for the district's operations. The board's five members serve 3-year terms without compensation. Members of the board at December 31, 2012, were:

Mike Hejna, Chairman
Dean Burns, Member
Steve Stinnet, Member
Anne Klene, Member
Gordon Gundaker, Member

Financial Activity

A summary of the district's financial activity for the year ended December 31, 2012, follows:

		Year Ended December 31, 2012*
RECEIPTS		
Sales taxes	$	24,704
Total Receipts		24,704
DISBURSEMENTS		
Administrative		4,616
Other		20
Total Disbursements		4,636
RECEIPTS OVER (UNDER) DISBURSEMENTS		20,068
BEGINNING CASH		0
ENDING CASH	$	20,068

* No financial activity occurred prior to January 1, 2012.

Thomas A. Schweich

Missouri State Auditor

Morgan County

April 2014

Report No. 2014-030

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Morgan County

County Sales Tax	The county incorrectly certified a tax rate with a voluntary reduction instead of a sales tax reduction for the 3 years ended December 31, 2008, thereby reducing its tax rate ceiling beginning in 2009. The county was apparently unaware of the reduced tax rate ceiling and used incorrect tax rate ceilings when preparing its sales tax reduction calculations for 2009 through 2011, showing an under collection of property taxes each year when there was actually an over collection. The county certified tax rates equal to the lowered tax rate ceiling for each year and reported no sales tax reductions since the county believed its calculated sales tax reduction was already incorporated into the lower tax rates. Also, the county did not prepare a sales tax reduction calculation for 2012. As of December 31, 2012, the county had over collected property taxes by $1.8 million.
Sheriff Controls and Procedures	Despite similar concerns noted in our prior audit reports, significant weaknesses continue to exist in the Sheriff's controls and procedures, and we were unable to determine if all monies were accounted for, deposited, and disbursed properly. The Sheriff has not established adequate segregation of accounting duties and does not perform supervisory reviews. The fee account clerk does not account for the numerical sequence of receipt slips and does not reconcile receipt records to deposits, and office personnel do not deposit monies intact or timely. The inmate account clerk does not maintain a running balance of the inmate refund cash fund, and controls and records for seized cash are not sufficient. Office personnel do not prepare monthly lists of liabilities, the office lacks adequate procedures to ensure monies received are timely disbursed, and the office has not turned over any 2012 commissary profits or any phone card profits to the county treasury.
Property Tax System Controls and Procedures	The County Collector's access to the property tax system is not adequately restricted. The County Clerk does not prepare or verify the accuracy of the delinquent tax books prepared by the County Collector, and neither the County Clerk nor the County Commission adequately reviews the financial activities of the County Collector. As noted in our prior audit report, there is no procedure in place to ensure outlawed taxes and abatements initiated by the County Collector are reviewed by the County Commission, and neither the County Commission nor the County Clerk review and approve the Assessor-initiated property tax additions and abatements report.
County Collector Withholdings and Commissions	The County Collector withheld more from tax collections for the Assessment Fund than allowed by state law during the year ended February 28, 2013, and erroneously calculated assessment withholdings on city tax collections, resulting in amounts owed to cities and other taxing authorities from the Assessment Fund. During the same year, the County Collector also failed to deduct assessment withholdings from the General Revenue Fund's share of property taxes, and incorrectly calculated Proposition C commissions and withholdings for school districts.
Prosecuting Attorney Controls and Procedures	Neither the Prosecuting Attorney nor the office manager reviews adjustments to defendant accounts receivable balances made by the legal assistant, and

adequate documentation is not always maintained to support the reasons for the adjustments. Prosecuting Attorney personnel do not prepare a monthly list of liabilities for the restitution and bad check account, so liabilities are not compared to the reconciled bank balance, and this account contained an unidentified overage of $1,969. At March 31, 2013, 39 checks, totaling $4,018 had been outstanding for over a year in the restitution and bad check account. In addition, at December 31, 2012, the inactive trust account had 14 outstanding checks totaling $773 with issue dates ranging from 3 to 7 years old, and an unidentified balance of $685.

County Procedures and Plans

The county collects a maintenance levy on 13 Neighborhood Improvement Districts, but has not developed a long-term plan regarding the use of the $1.3 million in this account as of December 31, 2012. The road and bridge department, the 911 Administrator, and the Sheriff's office do not have adequate procedures for monitoring fuel usage; the county does not report the value of personal and commuting mileage by some county officials to the Internal Revenue Service; and the county hired two individuals as independent contractors rather than employees without documenting reasons for classifying them as independent contractors.

Senate Bill 40 Board

As noted in our prior audit report, the Senate Bill 40 Board has not adequately segregated accounting duties, and the Executive Director does not prepare monthly bank reconciliations for the account. The Board discussed issues in closed sessions that are not allowable under the Sunshine Law, and open meeting minutes did not document the vote for closing the meeting for 2 of the 4 closed sessions held during 2012.

Additional Comments

Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Poor**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 24

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Morgan County

We have audited certain operations of Morgan County in fulfillment of our duties under Section 29.230, RSMo. In addition, Casey-Beard-Boehmer PC, Certified Public Accountants, was engaged to audit the financial statements of Morgan County for the 2 years ended December 31, 2012. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2012. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

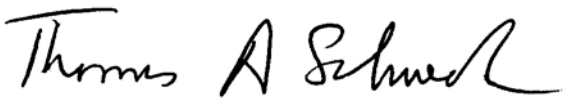
3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Morgan County.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Susan J. Beeler, CPA, CIA
In-Charge Auditor:	Lori Bryant
Audit Staff:	Robert Graham
	Amanda Messick

1. County Sales Tax

The county did not properly report property tax levy reduction amounts to the State Auditor's office for the 3 years ended December 31, 2008. The county calculated a sales tax reduction, but did not report or reduce the property tax levy for the sales tax reduction for the 3 years ended December 31, 2011. In addition, the county failed to calculate a sales tax reduction for the year ended December 31, 2012.

Section 67.505, RSMo, requires the county to reduce property taxes for a percentage of sales taxes collected. Morgan County voters enacted a one-half cent sales tax with a provision to reduce property taxes by 50 percent of sales taxes collected. The county is required to estimate the annual property tax levy to meet the 50 percent reduction requirement and in the following year calculate any excess property taxes collected based upon actual sales taxes collected.

The county is required to certify to the State Auditor's office the annual property tax levy including the amount the levy is reduced for sales tax collections, as well as voluntary reductions, if any. For 2006 through 2008, the county performed sales tax reduction calculations, but incorrectly certified a tax rate with a voluntary reduction instead of a sales tax reduction. The county certified the tax rate ceiling, sales tax reduction, voluntary reduction, and actual tax levy for the General Revenue Fund as follows:

	2008	2007	2006
Tax rate ceiling	$ 0.1916	0.1912	0.2027
Sales tax reduction	0.0000	0.0000	0.0000
Voluntary reduction	0.1216	0.1073	0.1160
Actual tax levy	0.0700	0.0839	0.0867

In calculating the property tax rate ceiling for 2009 through 2012, the State Auditor's office followed Section 137.073.5(4), RSMo (amended in 2008), which provides a voluntary reduction taken in a non-reassessment year (even year) results in a reduced tax rate ceiling during the subsequent reassessment year (odd year). As a result, the tax rate ceiling for the county's General Revenue Fund was lowered for 2009 through 2012 due to the voluntary reduction in 2008. The county subsequently certified tax rates equal to the lowered tax rate ceiling for each year, reporting no reductions as explained below.

The county was apparently unaware of the reduced tax rate ceiling starting in 2009. For 2009 through 2011, the county used incorrect tax rate ceilings when preparing its sales tax reduction calculations. Rather than using the certified tax rate ceilings, the county incorrectly used the tax rate ceilings that would have been in effect if there had been no voluntary reduction in

2008. In addition, the county did not prepare a sales tax reduction calculation for 2012.

The county's incorrect calculations used the following data, which county personnel believed to be correct:

	2011	2010	2009
Tax rate ceiling	0.1992	0.1975	0.1963
Sales tax reduction	0.1265	0.1254	0.1246
Voluntary reduction	0.0000	0.0000	0.0000
Actual tax levy	0.0727	0.0721	0.0717

The county's calculations showed an under collection of property taxes each year when there was actually an over collection, and the county believed its calculated sales tax reduction was already incorporated into the lower tax rates.

However, the county reported no sales tax or voluntary reductions to the State Auditor's office from 2009 through 2012, and certified the tax rate ceiling, sales tax reduction, voluntary reduction, and actual tax levy for the General Revenue Fund as follows:

	2012	2011	2010	2009
Tax rate ceiling	$ 0.0736	0.0727	0.0721	0.0717
Sales tax reduction	0.0000	0.0000	0.0000	0.0000
Voluntary reduction	0.0000	0.0000	0.0000	0.0000
Actual tax levy	0.0736	0.0727	0.0721	0.0717

Based upon the reduced tax rate ceiling required by Section 137.073.5(4), RSMo, and the failure of the county to reduce the tax levy for a sales tax reduction, the over collections of General Revenue property taxes for 2009 through 2012 are as follows:

		Year Ended December 31,			
For Sales Tax Reductions		2012	2011	2010	2009
Required property tax revenue reduction	$	487,930	467,766	456,523	449,348
Actual property tax revenue reduction		0	0	0	0
Over collection		487,930	467,766	456,523	449,348
Prior years over collection		1,373,637	905,871	449,348	0
Total property tax over collected	$	1,861,567	1,373,637	905,871	449,348

Section 137.073.5(4), RSMo, allows a governing body, in a year following general reassessment, to increase a previously voluntarily reduced tax rate, for a reduction taken in a prior non-reassessment year, to the tax rate ceiling that would have been effective in the current year had no voluntary reduction been taken. Therefore, the county could reinstate its property tax

rate ceiling in 2014. In addition, Section 137.073.6(3), RSMo (amended in 2013), allows a taxing authority to submit amended tax rate forms to the State Auditor's office in the event the taxing authority incorrectly completed the forms or made clerical errors.

To ensure property tax levies are properly set and property tax rate ceilings are maintained, the County Commission and County Clerk should ensure property tax levies are adequately reduced by 50 percent of sales tax revenue and are accurately reported and certified as such. Documentation of calculations and tax rate setting decisions is important to demonstrate compliance with statutory provisions and serve as a reference tool should questions arise.

Recommendation

The County Commission and County Clerk properly calculate and report property tax rate reductions (sales tax or voluntary), evaluate if amended forms should be submitted to the State Auditor's office, and develop a plan to incorporate corrected property tax reductions from prior years into the current tax rate. During the tax rate setting process, the County Commission and County Clerk should ensure tax rate information reported back to the county in the State Auditor's office certification letter is consistent with expectations and, if not, promptly follow up on any discrepancies.

Auditee's Response

The County Commission and County Clerk provided the following response:

We have agreed to rollback annually, reinstate the tax rate ceiling, set future rates to incorporate corrected property tax reductions from prior years, and work closely with the State Auditor's office to get a better understanding of the rollback process. We will ensure tax rate information on the certification letter is consistent with expectations. We are considering submitting amended forms to the State Auditor's office, and we will ensure the sales tax reductions are properly reported as a sales tax reduction and not as a voluntary reduction in future years.

2. Sheriff Controls and Procedures

Despite similar concerns noted in our prior audits, significant weaknesses continue to exist in the Sheriff's controls and procedures. With the exception of sections 2.5 and 2.7, we have reported similar findings related to the Sheriff's office in one or more of our prior reports. Due to the concerns noted below, we were unable to determine if all monies were accounted for, deposited, and disbursed properly.

Deposits into the Sheriff's fee account for civil fees, jail phone card sales, bonds, and other miscellaneous receipts totaled approximately $227,000 for the year ended December 31, 2012. Deposits into the Sheriff's inmate account for inmate receipts totaled approximately $231,000 for the year ended December 31, 2012. Additionally, fees collected for concealed carry

permits, which totaled approximately $25,000 for the year ended December 31, 2012, were transmitted to the County Treasurer for deposit.

2.1 Segregation of duties

The Sheriff has not established adequate segregation of accounting duties and does not perform supervisory reviews. One clerk is responsible for receiving, recording, depositing, and disbursing monies, and reconciling the fee bank account. Another clerk is responsible for those same duties for the inmate bank account.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are safeguarded. If proper segregation of duties cannot be achieved, the Sheriff should implement a documented independent or supervisory review to ensure bank records are in agreement with accounting records.

2.2 Numerical sequence and reconciliation of receipt records

The Sheriff's fee account clerk does not account for the numerical sequence of receipt slips and does not reconcile receipt records to deposits. As a result, it is difficult to determine which receipts are included in each deposit to ensure all receipts are actually deposited.

For cash bonds received, a receipt slip is issued by the booking department and placed with the cash in the drop safe for the fee account clerk to pick up. The fee account clerk does not issue receipt slips for cash bonds obtained from the drop safe even though she issues receipt slips for all other types of receipts.

When preparing deposit summaries, the fee account clerk did not always include the corresponding receipt slip numbers or identify which cash bonds were included in the deposits. A comparison of December 2012 bond deposits to booking department bond receipt slips, determined receipt slips totaled $6,052, while deposits totaled $6,622. The fee account clerk was unable to determine the reason for the difference. A possible reason for the difference may have been related to prior months' bond receipts held and not deposited until December. However, because no records are kept showing which bonds are included in which deposit, we also could not determine the reason for the difference.

Procedures to account for all receipt slips issued by both the booking department and by the fee account clerk and reconciliation of receipt records to deposits are necessary to provide assurance all monies are accounted for properly and to reduce the risk of loss, theft, or misuse of monies.

2.3 Deposits

Sheriff's office personnel do not deposit monies intact or timely.

Fee account

The fee account clerk does not deposit monies intact for the fee account. We noted a $40 check for civil fees had been included on a December 27, 2012,

deposit summary report; however, it was not included in the deposit. The check was not actually deposited until January 17, 2013. In addition, there were three $10 checks received on November 8, 2012, November 15, 2012, and November 22, 2012, not deposited until December 3, 2012, when they should have been included in the November 27, 2012, deposit. Further, the December 27, 2012, deposit included two additional $10 checks received on November 29, 2012, and December 13, 2012, that should have been included in the December 3, 2012, and December 18, 2012, deposits, respectively.

Inmate account

The inmate account clerk does not deposit timely for the inmate account. Cash received for inmates from visitors is collected in the lobby kiosk while monies in the possession of inmates when they are booked are either put in the booking department kiosk (cash) or in the drop safe (checks). We reviewed December 2012 receipts for the inmate account and found the following concerns regarding timeliness of deposits:

- The inmate account clerk did not deposit any lobby kiosk receipts during December 2012. On January 9, 2013, she deposited $8,397, which included $2,910 from November 2012, $4,559 from December 2012, and $928 from January 2013.

- The inmate account clerk made a $1,733 deposit on December 12, 2012, for the booking department kiosk receipts. This deposit included $644 in receipts from November and $1,089 in receipts from December. Subsequent December receipts for the booking department kiosk totaling $1,113 were deposited on January 16, 2013.

- The inmate account clerk made a $4,449 deposit on December 12, 2012, for the drop safe receipts. This deposit included $2,308 in receipts from November and $2,141 in receipts from December. Subsequent December receipts for the drop safe totaling $2,059 were deposited on January 14, 2013.

Failure to implement adequate depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected. Proper depositing procedures are necessary to ensure all receipts are handled and accounted for properly.

2.4 Inmate refunds

The Sheriff's inmate account clerk does not maintain a running balance of the cash fund. The Sheriff's office maintains a cash fund to refund monies to U.S. Immigration and Customs Enforcement (ICE) inmates prior to deportation or transfer to another facility. Cash is withdrawn from the inmate account to replenish the cash fund. Released inmates sign for any cash received and the inmate account clerk posts this amount on the computer system. This cash is not reflected in the list of liabilities for the

inmate account (see section 2.6) because the Sheriff's office does not keep records of the balance of the cash fund. At the time of our cash count on March 4, 2013, the cash fund totaled $2,562.

Records to maintain a running balance of the cash fund are necessary to provide assurance cash is handled properly and to reduce the risk of loss, theft, or misuse of monies.

2.5 Seized cash

Controls and records for seized cash are not sufficient and periodic inventories are not conducted. Sheriff's office personnel cannot generate a report of total cash currently on hand from the seized property system. Therefore, a ledger of seized cash is maintained. The seized cash is kept in a safe that only the Sheriff and a clerk can access. We performed a cash count of the seized cash on March 27, 2013, by comparing amounts on the labels of the sealed evidence bags, totaling approximately $72,800, to the ledger amounts totaling approximately $67,900. We determined the ledger did not include 4 evidence bags totaling approximately $4,900.

Considering the often sensitive nature of seized cash, accurate and complete inventory records are essential and would significantly reduce the risk of loss, theft, or misuse of these monies. In addition, the ledger of seized cash should be agreed to cash amounts in the computerized system and periodic physical inventories should be performed and compared to the records of seized cash.

2.6 Liabilities

Sheriff's office personnel do not prepare monthly lists of liabilities for either the inmate account or the fee account, and consequently, liabilities are not compared to the reconciled bank balances. At our request, a list of liabilities for the inmate account was prepared and identified liabilities totaled $78,139, at December 31, 2012. The reconciled bank balance was $87,223, leaving an unidentified balance of $9,084. In addition, at our request, a list of liabilities for the fee account was prepared and identified liabilities totaled $1,129 at April 16, 2013. The fee account book balance on that date was $2,020, leaving an unidentified balance of $891.

Monthly lists of liabilities should be prepared and reconciled to cash balances to ensure records are in balance, errors are detected and corrected on a timely basis, and sufficient funds are available for payment of all liabilities.

2.7 Disbursements

The Sheriff's office lacks adequate procedures to ensure monies received are properly disbursed to the County Treasurer and/or other parties from the fee account. As a result, some monies were not disbursed on a timely basis as follows:

Month of Collection	Totaled Received	Date Disbursed
September	$ 2,695	November 2, 2012
October	2,054	December 19, 2012
November	2,027	December 19, 2012
December	1,768	January 23, 2013

Our review also identified 15 of the 24 bonds (62.5 percent) collected in December 2012 were disbursed to the appropriate court 10 or more days after the date of receipt. We also noted a $2,500 bond was disbursed on July 26, 2012, but it appears the corresponding monies were not deposited until August 6, 2012, or later. The actual deposit date cannot be determined due to poor records; however, this deposit was the first one subsequent to July 26, 2012, to contain sufficient cash to include this bond.

Timely disbursement of fees and bonds collected is necessary to provide adequate controls over account balances and increase the likelihood discrepancies are promptly detected. Sections 50.360 and 50.370, RSMo, require all county officials who receive fees or any other remuneration for official services to pay such monies monthly to the County Treasurer.

2.8 Commissary and phone card profits

The Sheriff's office has not turned over any 2012 commissary profits or any phone card profits to the county treasury. The last turnover, which consisted of only commissary profits, was made in January 2012. The Sheriff's office was holding approximately $61,000 in profits as of December 31, 2012, in the inmate account. The inmate account clerk indicated profits from the phone cards sold to inmates are not turned over to the county treasury because they are used to pay for cable TV and indigent packages for the inmates.

Section 221.102, RSMo (effective August 28, 2013), requires each county jail to keep revenues from its canteen or commissary in a separate account and pay for goods and other expenses from that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (profits) into the county Inmate Prisoner Detainee Security Fund.

Recommendations

The Sheriff:

2.1 Adequately segregate accounting duties to the extent possible or ensure supervisory reviews of accounting records are performed and documented.

2.2 Account for the numerical sequence of receipt slips and reconcile receipt slips issued with deposits to ensure all receipts have been deposited.

2.3 Ensure deposits are made timely and include all monies on hand at the time a deposit is prepared.

2.4 Maintain a running balance of the cash fund. In addition, on a periodic basis, cash on hand should be counted and reconciled to the related records by an independent person.

2.5 Ensure a periodic physical inventory is conducted and reconciled to the various records of seized cash.

2.6 Prepare a monthly list of liabilities for both accounts and compare to the reconciled bank balances. Any differences should be promptly investigated and resolved. Any unidentified monies should be disposed of in accordance with state law.

2.7 Establish procedures to ensure all monies are disbursed to the County Treasurer and other parties on a timely basis.

2.8 Ensure existing and future commissary profits (including phone card profits) not necessary to meet cash flow needs or current operating expenses are turned over to the County Treasurer to be deposited into the Inmate Prisoner Detainee Security Fund.

Auditee's Response

The Sheriff provided the following responses:

2.1 We will have each clerk perform the bank reconciliation for the other bank account. The Sheriff will continue to review bank statements.

2.2 We are preparing deposit summaries, which include receipt numbers for all deposits (including bond deposits). We are using these deposit summaries to account for the numerical sequence of receipt slips and to reconcile all receipts to deposits. The computer system malfunctioned during the audit period, which may have caused some of these issues.

2.3 We will implement this recommendation.

2.4 We will attempt to determine a weekly balance in the cash fund based on ICE inmate account balances and will reconcile these balances to the cash on-hand.

2.5 We are planning to start performing an annual physical inventory of all seized property, including cash. Within the next month, we will start maintaining a log of all seized cash to show date and time of intake and release.

2.6 We will begin to prepare monthly lists of liabilities for both accounts and compare them to the reconciled bank balances. Any unidentified monies will be disposed of in accordance with state law.

2.7 The delay was due to the problems with the accounting software. We will ensure all future disbursements are made timely.

2.8 We have implemented this recommendation. We have started to make transfers of commissary profits to the County Treasurer. A $40,100 transfer was made in December 2013.

3. Property Tax System Controls and Procedures

Controls and procedures over the property tax system need improvement. As a result of the significant control weaknesses identified, there is less assurance property tax monies have been accounted for properly. For the year ended February 28, 2013, property taxes and other monies collected by the County Collector totaled approximately $20.9 million.

3.1 Computer access

Access to the property tax system is not adequately restricted. The County Collector has access in the property tax system to make address changes, enter tax rates, post abatements, and outlaw taxes. Because the County Collector is responsible for collecting tax monies, good internal controls require the County Collector not have access rights to be able to alter or delete tax rates or abate taxes.

Without adequate segregation of incompatible duties, there is an increased risk of loss, theft, misuse, and errors occurring and going undetected. In addition, due to the lack of oversight of the County Collector's office activities (as explained in the following sections), any erroneous or improper changes made in the system by the County Collector could go undetected.

3.2 Tax books

The County Clerk does not prepare or verify the accuracy of the delinquent tax books prepared by the County Collector. A review of the tax books should include recalculating tax book totals and charges. Failure to prepare and review the tax books may result in errors, irregularities, or misuse going undetected.

Section 140.050, RSMo, requires the County Clerk to extend the delinquent tax books and charge the County Collector with the amount of taxes to be collected.

3.3 Review of activity

Neither the County Clerk nor the County Commission adequately reviews the financial activities of the County Collector. The County Clerk does not maintain an account book or other records summarizing property tax charges, transactions, and changes, and no procedures are performed by the

County Clerk or the County Commission to verify the accuracy and completeness of the County Collector's annual settlements. As a result, there is an increased risk of loss, theft, and misuse of property tax monies, and less assurance the annual settlements are complete and accurate.

Section 51.150.1(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable to the county treasury. Maintaining an account book or other records that summarize all taxes charged to the County Collector, monthly collections, delinquent credits, additions and abatements, and protested amounts would help the County Clerk ensure taxes charged and credited to the County Collector are complete and accurate. Such records could also be used by the County Clerk and County Commission to verify the County Collector's annual settlements.

3.4 Changes and reconciliations

The County Commission and County Clerk are not adequately reviewing property tax system changes and activity. The County Assessor prepares and posts additions and abatements to the property tax system. As explained in section 3.1, the County Collector also has the ability to post abatements to the property tax system and to outlaw taxes in the property tax system. The County Collector submits supporting documentation to the County Commission for abatements she initiates and provides the County Commission with total amounts for her outlawed taxes; however, there is no procedure in place to ensure all outlawed taxes and abatements initiated by the County Collector are submitted for review. At the end of each month, the County Collector prints the Assessor-initiated property tax additions and abatements report from the property tax system and provides the report to the County Clerk. However, neither the County Commission nor the County Clerk review and approve these reports, and no comparison to the County Assessor's supporting documentation is performed. As a result, additions and abatements (including outlawed taxes), which constitute changes to the amount of taxes the County Collector is charged with collecting, are not properly monitored and errors or irregularities could go undetected.

Sections 137.260 and 137.270, RSMo, assign responsibility to the County Clerk for making changes to the tax books with the approval of the County Commission. An independent review of approved additions and abatements to changes made to the property tax system would help ensure changes to the property tax system records are proper.

Similar conditions previously reported

Similar conditions to sections 3.3 and 3.4 were noted in our prior audit report.

Recommendations

3.1 The County Commission ensure property tax system access rights are limited to only what is needed for the users to perform their job duties and responsibilities.

3.2 The County Clerk prepare the delinquent tax books, or at a minimum, verify the accuracy of the delinquent tax books prior to charging the County Collector with the property tax amounts to be collected. Procedures performed should be adequately documented.

3.3 The County Clerk maintain an account book with the County Collector. In addition, the County Clerk and the County Commission should use the account book to review the accuracy and completeness of the County Collector's annual settlements.

3.4 The County Commission and the County Clerk develop procedures to ensure all property tax additions and abatements (including outlawed) are properly approved and monitored.

Auditee's Response

The County Commission and County Clerk provided the following responses:

3.1 We will implement a plan to correct by contacting the programmer and appropriate elected officials.

3.2 We have implemented this recommendation. The County Clerk now reviews the delinquent tax books for completeness and reasonableness before the tax bills are mailed to the taxpayers.

3.3 The County Clerk is now keeping an account book and is reconciling with the County Collector monthly. The County Clerk will use her account book to review the County Collector's annual settlement when filed. In addition, the County Commission will review the annual settlement when filed.

3.4 We will develop procedures with the Assessor's office to ensure the additions and abatements are approved and that supporting documentation is retained.

4. County Collector Withholdings and Commissions

The County Collector did not properly calculate some withholdings and commissions for the year ended February 28, 2013.

4.1 Assessment withholdings

The County Collector is not calculating and withholding amounts for the Assessment Fund in compliance with state laws.

- The County Collector did not adequately reduce the percentage used to calculate amounts withheld from tax collections for the Assessment Fund, and as a result, $12,916 more was withheld from tax collections and disbursed to the Assessment Fund than allowed by state law during the year ended February 28, 2013.

  Sections 137.720.1, 137.720.3, 137.082.6, RSMo, each provide a percentage be deducted from property tax collections and deposited into the Assessment Fund (1 percent, 0.5 percent, and 0.2 percent, respectively, for a total of 1.7 percent). However, Section 137.720.3, RSMo, limits the 0.5 percent deduction to $75,000. After this limit is reached, the total percentage used should be reduced to 1.2 percent. Prior to July 1, 2009, this 0.5 percentage was 0.25 percent and was not limited.

  The County Treasurer monitors total collections monthly to determine when the limit has been reached, and notifies the County Collector when that occurs. However, the County Collector reduces the percentage to 1.45 instead of to 1.2, as required. In addition, the $75,000 limit for calendar year 2012 was reached in the middle of February 2012, but the County Collector continued to withhold monies resulting in $835 of excess withholdings over the $75,000 limit. As a result, a total of $13,751 is due from the Assessment Fund to the taxing authorities to correct these errors.

- The County Collector erroneously calculated assessment withholdings on city tax collections. The calculation includes interest on taxes (which is not included in the calculations of assessment withholdings for other taxing authorities), the cities' portion of surtax (which has already had assessment withholding taken), and city motor vehicle fees (which are not based on assessed valuations and thus are not ad valorem property tax collections). As a result of these calculation errors, $623 in excess withholdings is owed to the cities from the Assessment Fund. In addition, no assessment withholdings are taken from the General Revenue Fund's share of property taxes. As a result, $4,186 is owed to the Assessment Fund from the General Revenue Fund.

  Section 137.720.1, RSMo, provides for 1 percent of all ad valorem property tax collections allocable to each taxing authority within the county and the county be deducted from tax collections and deposited into the Assessment Fund.

Adequate monitoring and proper calculation of Assessment Fund withholdings is necessary to ensure compliance with statutory provisions.

4.2 Proposition C commissions and withholdings

The County Collector incorrectly calculated Proposition C commissions and withholdings on real estate and personal property taxes for one school district and on state-assessed railroad and utilities taxes for all school districts.

A total of $3,361 was over withheld from a school district and paid to the county General Revenue Fund ($1,867) and Assessment Fund ($1,494) from December 2012 current tax collections. The County Clerk calculated an incorrect Proposition C ratio for the County Collector, who used the incorrect ratio in the real estate and personal property tax calculations, resulting in the over withholding for December. The same incorrect ratio was used for November 2012, January 2013, and February 2013 and would have resulted in additional amounts being over withheld for those months and those amounts should be determined. In addition, the County Collector made errors when calculating Proposition C commissions and withholdings for state-assessed railroad and utility taxes and over withheld $2,099 from the various school districts ($723 in commissions in the General Revenue Fund and $1,376 in assessment withholdings in the Assessment Fund) for the year ended February 28, 2013.

Section 50.338, RSMo, establishes Proposition C withholding rates for commissions and assessments. Proper calculation of Proposition C adjustments is necessary to ensure compliance with statutory provisions.

Recommendations

The County Collector:

4.1 Recalculate assessment withholdings for current and prior years, disburse amounts owed to the taxing authorities from the Assessment Fund, and transfer amounts owed to the Assessment Fund from the County's General Revenue Fund. The County Collector should also ensure the percentage to be deducted from property taxes for the Assessment Fund is properly reduced in future years once the $75,000 limit is reached.

4.2 Recalculate commission and assessment withholdings for current and prior years and correct distributions from the General Revenue Fund and Assessment Fund to the various school districts. The County Collector should also ensure future commission calculations are accurate and work with the County Clerk to ensure Proposition C ratios are calculated correctly.

Auditee's Response

The County Collector provided the following responses:

4.1 Recalculations have been made and the amounts disbursed in May 2013 to the taxing authorities from the Assessment Fund and also to the Assessment Fund from the General Revenue Fund for County

Collector year ending February 28, 2013. Due to the complexity of the issue, no recalculations will be made for prior years. The proper percentage will be deducted in future years once the $75,000 limit is reached.

4.2 Recalculations have been made for December 2012 and amounts disbursed in May 2013 from the General Revenue Fund and the Assessment Fund to various school districts. November 2012, January 2013, and February 2013 calculations will be reviewed and proper disbursements will be made. Due to the complexity of this issue, no recalculations will be made for prior years. The proper Proposition C ratios and commissions will be calculated correctly in the future.

5. Prosecuting Attorney Controls and Procedures

Independent reviews of adjustments made to defendant accounts are not performed, and controls and procedures over liabilities and outstanding checks are not adequate. The Prosecuting Attorney's office received bad check restitution and fees, and court-ordered restitution totaling approximately $162,000 during the year ended December 31, 2012.

5.1 Adjustments

Neither the Prosecuting Attorney nor the office manager is reviewing adjustments to defendant accounts receivable balances made by the legal assistant. In addition, adequate documentation is not always maintained to support the reasons for the adjustments. As a result, there is little assurance the 51 adjustments totaling $50,652 made during the year ended December 31, 2012, were properly authorized.

Adjustments are sometimes needed because defendants pay the vendor directly or return to the vendor the merchandise purchased with the bad check, defendants are sentenced to serve time in jail or prison in lieu of paying restitution, amounts are deemed uncollectible, or insufficient information is provided on the complaint. We reviewed the 7 largest adjustments totaling $40,657. One of these was a $2,500 adjustment made in October 2012 to decrease a defendant's balance and the only supporting documentation was a handwritten note regarding a telephone call from the vendor.

Proper authorization of adjustments and adequate documentation that fully explains the reasons for the adjustments to accounts receivable balances are necessary to ensure only the proper accounts and amounts are adjusted and to reduce the risk of loss, theft, or misuse of funds.

5.2 Liabilities

Prosecuting Attorney personnel do not prepare a monthly list of liabilities for the restitution and bad check account, and consequently, liabilities are not compared to the reconciled bank balance. At our request, a list of liabilities was prepared for this account and identified liabilities totaled

$352 at April 20, 2013. The book balance was $2,321 at that time, leaving an unidentified difference of $1,969. The Prosecuting Attorney's office also has a trust account that was used to account for bad checks prior to the current restitution and bad check account, but it has not been used for several years. The trust account reconciled bank balance at December 31, 2012, was $685, and the entire balance is unidentified.

Monthly lists of liabilities should be prepared and reconciled to book balances to ensure records are in balance, errors are detected and corrected on a timely basis, and sufficient cash are available for payment of all liabilities.

5.3 Outstanding checks

The Prosecuting Attorney has not established procedures to routinely follow up on outstanding checks. As a result, at March 31, 2013, 39 checks, totaling $4,018, had been outstanding for over a year in the restitution and bad check account. In addition, as of December 31, 2012, the inactive trust account had 14 outstanding checks totaling $773 with issue dates ranging from 3 to 7 years old.

Proper follow-up procedures are necessary to prevent the accumulation of old outstanding checks and ensure monies are appropriately disbursed to the payee or as otherwise allowed by state law.

Similar conditions previously reported

Similar conditions to sections 5.2 and 5.3 were noted in our prior audit report.

Recommendations

The Prosecuting Attorney:

5.1 Perform a documented independent review and approval for all accounting adjustments and ensure adequate documentation is maintained to support all adjustments.

5.2 Ensure a monthly list of liabilities is prepared and compared to reconciled bank balance. Any differences should be promptly investigated and resolved. Any unidentified monies should be disposed of in accordance with state law.

5.3 Establish procedures to routinely investigate outstanding checks. Old outstanding checks should be voided and reissued to payees that can be readily located. If the payee cannot be located, the amount should be disbursed in accordance with state law.

Auditee's Response

The Prosecuting Attorney provided the following responses:

5.1 All adjustments are now initialed and dated by the Prosecuting Attorney along with a review of the supporting documentation.

5.2 We are reconciling monthly to the balance of unidentified monies and will work on identifying these monies in the next few months and will dispose of them in accordance with state law.

5.3 We have reissued checks to payees we could find, and even identified one deceased payee. The remaining balance will be sent to the State Treasurer's office Unclaimed Property Division.

6. County Procedures and Plans

Procedures related to long-term plans for Neighborhood Improvement Districts (NID) monies, fuel and vehicle use, and employment classification are in need of improvement.

6.1 Long-term plans for NID monies

The county has not developed a long-term plan regarding the use of NID maintenance levy monies. The county collects a maintenance levy on 13 NIDs and is currently accumulating these funds to help pay for future asphalt overlay projects for the NIDs. As of December 31, 2012, the combined cash balance of the NID maintenance accounts exceeded $1.3 million, with individual NID balances ranging from approximately $13,000 to $259,000. The County Commission has not performed a formal analysis to determine when or if sufficient monies will accumulate to fund future NID asphalt overlay projects. A formal plan documenting future maintenance costs and available funding sources would help the county monitor and plan for future maintenance projects. Such a plan would demonstrate the county's intentions to the residents within the NIDs.

6.2 Fuel use

The road and bridge department, the 911 Administrator, and the Sheriff's office do not have adequate procedures for monitoring fuel usage. Accounting records indicated fuel purchases totaled approximately $292,000 during the year ended December 31, 2012.

The fuel purchased by the road and bridge department is for bulk tanks at the two county road and bridge sheds. The 911 Administrator and Sheriff's office personnel purchase fuel using fuel cards furnished by the county. We noted the following concerns:

- Road and bridge department employees are not consistently recording odometer readings on the logs maintained for the metered bulk fuel tanks at the road and bridge sheds.

- The County Commission does not have procedures in place to reconcile the road and bridge department's fuel logs with fuel purchase records.

- The 911 Administrator's mileage and fuel use log is not submitted to the County Commission for review nor is it reconciled to fuel purchases on the monthly billing statements.

- The Sheriff's office does not have procedures in place to reconcile mileage and fuel use logs with fuel purchases on the monthly billing statements.

Procedures for maintaining and reviewing mileage and fuel use logs and reconciling log information to fuel purchased and related records are necessary to ensure vehicles are properly utilized; prevent paying vendors for improper billing amounts; and decrease the risk of loss, theft, or misuse of fuel going undetected. Logs should provide sufficient details to enable the county to effectively monitor vehicle and equipment use and fuel costs.

6.3 Commuting mileage

The personal and commuting use of county vehicles by some county officials is not reported to the Internal Revenue Service (IRS). Each County Commissioner is allowed to use a county vehicle to commute to and from home daily. However, none of the County Commissioners complete vehicle logs. Without complete vehicle logs, the county cannot distinguish between business and personal use, and therefore, is unable to properly report personal use.

IRS regulations indicate personal and commuting mileage are reportable fringe benefits and require the full value of the provided vehicle to be reported if the employer does not require the submission of detailed logs that document business and personal use. Because procedures have not been established to ensure IRS regulations are followed, the county may be subject to penalties and/or fines for failure to report all taxable benefits.

6.4 Employment classification

The county did not document the reasons for classifying two individuals hired to perform information technology duties as independent contractors rather than employees. The county did not withhold payroll and income taxes from payments made to these individuals. Rather, these payments, which totaled $45,055 and $18,473, were reported to the IRS on 1099 forms.

The County Commission indicated the county allowed the individuals to choose their hiring status (employee or independent contractor). However, in December 2011, the County Commission approved employment agreements with these two individuals that state the individuals are employees. In addition, these individuals are required to complete timesheets similar to other county employees and submit timesheets to their supervisor, who is a county employee.

Section 105.300, RSMo, defines an elected or appointed officer or employee of a political subdivision as an employee for Social Security and Medicare tax purposes. For employees, the IRS requires employers to report employee compensation on W-2 forms and withhold and remit income and payroll taxes. Similarly, Chapter 143, RSMo, includes requirements for reporting wages and withholding state income taxes. State and federal laws require employers to pay the employer's share of Social Security and Medicare on the compensation paid to employees. Proper classification of employees is necessary to ensure compliance with various state and federal laws and regulations. The failure to withhold and properly report payroll and income taxes for county employees makes the county potentially subject to additional tax liabilities along with penalties and interest.

Similar conditions previously reported

Similar conditions to sections 6.1, 6.2, and 6.3 were noted in our prior audit report.

Recommendations

The County Commission:

6.1 Develop a long-term plan regarding the use of NID maintenance levy monies.

6.2 Require complete mileage and fuel use logs be maintained for the road and bridge department and ensure the 911 Administrator periodically submits his mileage and fuel use log. In addition, fuel use for the road and bridge department, the 911 Administrator, and the Sheriff's office should be reconciled to fuel purchases, and any significant discrepancies should be investigated.

6.3 Comply with IRS regulations for reporting fringe benefits related to commuting and personal miles and require mileage logs that distinguish between business and personal use.

6.4 Ensure all persons hired by the county are properly classified as employees or independent contractors in compliance with state and federal laws and regulations, and all compensation paid is subject to applicable income and payroll taxes and properly reported.

Auditee's Response

The County Commission provided the following responses:

6.1 We will create a long-term NID maintenance plan that will be re-evaluated annually.

6.2 We agree with the recommendation. We will implement procedures to ensure mileage and fuel use logs are consistently maintained and will reconcile fuel use to fuel purchases.

6.3 We will start keeping logs of mileage to comply with IRS regulations.

6.4 We will review these individuals' employment statuses and ensure documentation conforms to independent contractor status.

7. Senate Bill 40 Board

The Senate Bill 40 Board is not adequately reviewing accounting records and Board meeting minutes are in need of improvement. The Board is funded through a property tax levy and a state funded Targeted Case Management (TCM) program. For the year ended December 31, 2012, receipts in the Senate Bill 40 Board bank account totaled $194,000 and receipts in the TCM bank account totaled approximately $270,000.

7.1 Segregation of duties

Accounting duties related to the TCM bank account are not adequately segregated. The Executive Director is responsible for all duties including receipting, recording, and disbursing monies for this account. The majority of disbursements are made through a debit card. Furthermore, the Executive Director does not prepare monthly bank reconciliations for the account. While spreadsheets showing activity for both of the Board's bank accounts and the bank statements are presented to the Board along with the bank reconciliations for the Board's other bank account, there is no documented review of any of these records by the Board. The Executive Director indicated he takes his file of receipt slips for debit card purchases to Board meetings so they would be available if a Board member requested them; however, the records have not actually been given to the Board to review.

Proper segregation of duties is necessary to ensure all transactions are accounted for properly and assets are safeguarded. If proper segregation of duties cannot be achieved, periodic independent or supervisory reviews of accounting records should be performed and documented by the Board. In addition, timely preparation of monthly bank reconciliations is necessary to ensure bank accounts are in agreement with accounting records and to detect and correct errors.

A similar condition was noted in our prior audit report.

7.2 Sunshine Law

The Board discussed issues in closed session such as changing phone service providers, bill paying procedures, bonding an employee, and TCM contract changes that are not allowable under the Sunshine Law. Additionally, for 2 of the 4 closed sessions held during 2012, open meeting minutes did not document the vote for closing the meeting or cite the specific statute and subsection allowing the closure.

The Sunshine Law, Chapter 610, RSMo, requires the question of holding the closed meeting and the reason for the closed meeting to be voted on at an open meeting. Additionally, the Sunshine Law also limits discussion

topics and actions in closed meetings to only those specifically allowed by state law.

Recommendations

The Senate Bill 40 Board:

7.1 Ensure independent or supervisory reviews of accounting records are performed and documented and monthly bank reconciliations are prepared and submitted to the Board for review for the TCM account. In addition, the Board should adopt procedures to ensure supporting documentation is submitted and reviewed for all debit card usage.

7.2 Ensure open meeting minutes document the reason and the corresponding vote for entering closed session and ensure items discussed in closed sessions comply with the Sunshine Law.

Auditee's Response

The Senate Bill 40 Board provided the following responses:

7.1 We have implemented this recommendation. All accounting records and monthly bank reconciliations are being reviewed by the Board at the quarterly meetings The debit card is no longer being used. We now have a credit card for most TCM transactions. All invoices are submitted to the Board for review.

7.2 In the future, we will strive to comply with the Sunshine Law. We will look into obtaining Sunshine Law training.

Morgan County
Organization and Statistical Information

Morgan County is a county-organized, third-class county. The county seat is Versailles.

Morgan County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 122 full-time employees and 24 part-time employees on December 31, 2012.

In addition, county operations include the Senate Bill 40 Board, the Senior Services Board, and the County Law Enforcement Restitution Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2013	2012
James D. Fisher, Presiding Commissioner (1)	$	29,494
Wayne Kroeschen Jr., Associate Commissioner		30,146
Dan Murdock, Associate Commissioner		30,146
Nancy Boles, Recorder of Deeds		45,675
Cathy Daniels, County Clerk		45,675
Dustin Dunklee, Prosecuting Attorney		113,112
Jim Petty, Sheriff		50,570
Louella Pryor, County Treasurer		45,675
Maynard B. Jones, County Coroner		16,240
Ray Forrest, Public Administrator		45,675
Kathy Francis, County Collector (2), year ended February 28,	50,359	
Bob Raines, County Assessor, year ended August 31,		45,675

(1) James Fisher passed away in November 2012. James Vaughan was appointed by the Governor in December 2012 to replace him.
(2) Includes $4,684 of commissions earned for collecting city property taxes.

Financing Arrangements

The county entered into a lease agreement with a not-for-profit corporation (NFP) in September 1998. The terms of the agreement called for the NFP to issue bonds of $4,500,000 for the purpose of constructing a justice center and for the NFP to lease the justice center back to the county for payments

totaling the principal and interest due on the outstanding bonds. An additional $500,000 in bonds were issued in 2000. In 2005, the NFP issued refunding bonds for $3,495,000 to pay off the 1998 and 2000 bonds. In 2010, the NFP issued more refunding bonds to pay off the 2005 refunding bonds. The remaining balance on the bonds at December 31, 2012, was $885,000 in principal and $31,185 in interest. The bonds mature on September 1, 2014. In November 1997, county voters approved a 1/2 cent law enforcement sales tax, which is used in part to make the principal and interest payments. This sales tax is set to expire in 2017.

The county has 13 NIDs. General obligation bonds were issued to finance the projects. Although these are general obligations bonds of the county, special assessments have been levied on the property located in the districts to pay the principal and interest. The remaining balance on the bonds at December 31, 2012, was $703,000 in principal and $107,571 in interest.

The county has entered into a lease purchase agreement for 911 equipment. At December 31, 2012, the balance of the lease purchase was $476,611 in principal and $29,944 in interest. Payments are made from the General Revenue Fund.

The county was notified in January 2012 that the state Department of Revenue had improperly distributed approximately $535,705 to the county in general and law enforcement sales tax that should have gone to the Mid-Mo Ambulance District. In January 2012, the County signed a promissory note with the Mid-Mo Ambulance District agreeing to pay $107,141 per year for 5 years to the ambulance district, starting in 2012. Half of the amount will be paid from the General Revenue Fund and half from the Law Enforcement Sales Tax Fund.

Thomas A. Schweich

Missouri State Auditor

Ash Grove R-IV School District

May 2014

Report No. 2014-031

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Ash Grove R-IV School District

Accounting Controls over Cash Receipts and Change Funds	The district needs to improve its handling of receipts and change funds, a large portion of which are received in cash. The district has not adequately segregated duties. Staff do not properly record all monies received, timely transmit or deposit monies collected, indicate the composition of receipts and maintain copies of receipt slips, and sometimes use monies on hand to pay expenses without obtaining adequate documentation. In addition, the district does not maintain inventory records for concession items. Monies are not always kept in a secured location; auditors found $462 in cash student activity fees in unlocked desk drawers and file cabinets in classrooms and $3,256 in cash in an office closet to which all employees have access. The district does not account for tokens and meal cards or reconcile tokens and meal cards to the monies collected. Each school maintains various change funds, but the district does not include any of this money in its accounting records.
District Compensation	The district lacks adequate procedures for approving employment contracts and does not prepare employment contracts or separately approve salary schedules for tenured teachers. The district gives the Superintendent an annual in-district mileage allowance of $1,500, but has not documented the basis for this additional compensation and did not report it as taxable income. The district did not report on W-2 forms additional compensation paid to the Superintendent for driving a bus to athletic events, additional compensation paid to employees for working the gate at athletic events, additional compensation paid to 3 teachers for awards, and the value of commuting miles for the maintenance/bus mechanic. The district paid $51,000 in step-ladder payments to 43 teachers but lacks adequate policies and procedures to administer the program properly.
Payroll Procedures, Records, and Policies	The district has not established adequate segregation of duties or supervision over payroll functions. Some employees do not prepare timesheets, timecards, and leave requests, and some employees have been allowed to carry negative leave balances. No review of time and leave records prepared by the district bookkeeper is performed, and the district bookkeeper did not properly track hours worked by retired employees. The district does not maintain a list of related employees and Board members, and it lacks adequate policies and procedures regarding the hiring, supervising, and tracking of related employees.
Bond Refinancing, Procurement Procedures, and Construction Projects	The district sold general obligation bonds through a negotiated rather than a competitive sale and did not select the bond underwriter competitively. The district did not always follow its own bidding policy, and has not established policies for the selection of some vendors providing professional services. The Board did not evaluate three construction management firms before contracting with a company for a project begun in 2012 and does not properly monitor construction projects.

Disbursements	The district does not adequately segregate accounting duties over disbursements, and the list of bills approved by the Board each month is incomplete. The district paid $10,610 to a local hardware business owned by Board President Renshaw for purchases made without soliciting bids. The administrative office made numerous disbursements totaling $19,259 from a petty cash bank account which the School Board did not know existed, and the district lacks a formal purchase order policy. The district vendor list contained numerous errors; the district lacks formal policies for employee reimbursements, local meal purchases, and gifts/awards; and the district did not always enter into written contracts or effectively monitor contracts.
Budget Monitoring and Accounting Records and Controls	The district does not maintain complete and accurate information in its accounting system, and the Board does not adequately monitor budget to actual receipts and disbursements. The Secretary to the School Board is able to post adjustments to the accounting system without independent approval, and electronic signatures of the School Board President and Treasurer are not adequately safeguarded.
Attendance Reporting and Computer Controls	The district's attendance system does not adequately track some changes or limit the time frame for making changes. Changes are not reviewed, and audit staff found some inaccuracies. The district has not adequately restricted access to computer systems and has not established security controls to shut down computers after a period of inactivity and detect or prevent incorrect login attempts.
School Board Procedures and Minutes	The School Board reorganized its two elementary schools without thoroughly performing or documenting a cost-benefit analysis and did not track actual costs/benefits. The School Board did not always comply with the Sunshine Law and did not always maintain complete and accurate minutes. District policies are not complete, accurate, up to date, or adequately communicated to district employees.
Capital Assets and Fuel Usage	The district does not maintain a detailed record of district property and has not performed inventories of capital assets held outside of classrooms. The capital asset listings did not include 12 pieces of equipment valued at $56,000, and do not include all necessary information. The district does not maintain fuel and mileage logs and does not reconcile fuel purchased to fuel used.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

To the Board of Education
Ash Grove R-IV School District

The State Auditor was petitioned under Section 29.230, RSMo, to audit the Ash Grove R-IV School District. We have audited certain operations of the district in fulfillment of our duties. The district engaged Davis, Lynn & Moots P.C., Certified Public Accountants (CPAs), to audit the district's financial statements for the years ended June 30, 2013, and 2012. To minimize duplication of effort, we reviewed the audit reports for the year ended June 30, 2013, and 2012, and the substantiating working papers of the CPA firm for the year ended June 30, 2012, audit. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2013. The objectives of our audit were to:

1. Evaluate the district's internal controls over significant management and financial functions.

2. Evaluate the district's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the district's management and was not subjected to the procedures applied in our audit of the district.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Ash Grove R-IV School District.

Thomas A. Schweich
State Auditor

Deputy State Auditor	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Pamela Allison Tillery, CPA
In-Charge Auditor:	Natalie B. McNish, CGAP
Audit Staff:	Alex R. Prenger, M.S.Acct, CPA
	Shannon Spicer

1. Accounting Controls over Cash Receipts and Change Funds

Significant improvements are needed in the handling of student activity, athletic, meal, before and after school program, vending, concession, and library fine receipts, and change funds. These types of receipts are at greater risk since a large portion is received in cash, and there are numerous collection points throughout the schools with a variety of handling and record-keeping methods. Also, written guidance for standard money handling procedures needs improvement. As a result of numerous control weaknesses, there is less assurance all district monies have been handled and accounted for properly.

On March 28, 2013, we observed and reviewed procedures and conducted cash counts of monies on hand at various collection points throughout the district totaling $15,317 ($10,348 cash and $4,969 checks/money orders). The collection points reviewed included the administrative office; the junior high/high school office, classrooms, library, and track concession stand; and the Ash Grove elementary office.

The chart below summarizes the amounts and types of monies collected during the 2012-2013 school year, for those areas subject to our review.

Type of Receipt	Amount
Student activity	$109,769
Athletic	98,980
Meal	78,372
Before and after school program	39,454
Vending	11,141
Concessions	4,757
Library fines	675

This information was obtained from district accounting records.

1.1 Segregation of duties

The district has not adequately segregated duties of receiving, recording, and depositing or transmitting monies at the three schools or the administrative office, and documented supervisory or independent reviews of the accounting records are not performed. Secretaries at the three schools and the Secretary to the School Board at the administrative office receive monies, and prepare and make transmittals or deposits. Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties is not possible, periodic supervisory or independent reviews of the records should be performed and documented.

1.2 Receipting, recording, depositing, and transmitting procedures

The School Board has not established written policies that address the types of records to be maintained and the accounting procedures to be followed by employees for the collection of district monies. We noted several concerns regarding receipting and recording procedures, and identified numerous instances where staff did not transmit or deposit receipts timely and intact.

- The administrative office and schools do not have adequate procedures in place to properly record all monies received. Additionally, some district receipts are handled by several employees before deposit and there is not always adequate documentation to support the transmittal of monies from one district employee to another. Junior high/high school teachers did not always issue receipt slips for student activity monies collected. School secretaries at the three schools did not issue receipt slips for monies collected from students, parents, and teachers (who transmit monies collected from students). The district bookkeeper and Secretary to the School Board did not issue receipt slips for some monies collected in the administrative office or from school secretaries (who transmit monies collected at each of the three schools).

- District personnel use generic rediform manual receipt slips for some monies received. Receipt slips do not always indicate the composition of receipts (i.e. cash, check, or money order), and the district does not reconcile the method of payment on the receipt slips to the composition of receipts recorded in the accounting system or to the deposit or transmittal. In addition, original copies of some voided receipt slips were not retained.

- A cash count conducted of monies on hand in the administrative office on March 28, 2013, identified eight checks, totaling $1,680, dated between January 22, 2013, and March 14, 2013, for which receipt slips were not issued or otherwise recorded. These monies were not deposited until April 16, 2013. In addition, a $120 check for track entry fees, dated March 14, 2013, was held, not recorded or deposited, and was returned to the payee sometime around April 15, 2013, after the Secretary to the School Board determined the payee had overpaid.

- Teachers and school secretaries do not always transmit monies collected to the administrative office in a timely manner. For example, $227 cash was counted on March 28, 2013, in student activity and athletic fees, and was still being held in the junior high/high school office on June 5, 2013, because the responsible sponsors had not instructed the school secretary to transmit these monies.

- Teachers sometimes used student activity fees to pay expenses of events rather than the fees being transmitted to the school secretary for deposit. For example, teachers indicated student activity fees of $40 were paid to a student who painted a mural, and another $40 was used to purchase two $20 gift cards provided to judges for high school cheerleading try-outs. We noted numerous other instances where staff did not transmit student activity fees intact and timely.

- One teacher borrowed monies from district receipts located in the junior high/high school office. During a count of lunch monies, a collection box included an undated IOU signed by a teacher for $10.

- Cash received at the junior high/high school office for caps, gowns and other graduation items ordered by students totaling $446 was paid directly to a vendor without documentation of transmittal.

- The district does not require inventory records of concession items purchased, sold, and on hand to be maintained, and reconciled to concession monies collected. During a cash count conducted of track concessions on March 28, 2013, approximately $1,300 was on hand from concession sales.

To provide guidance to district employees and improve accountability over monies collected, the district should establish written policies for the collection and processing of monies. To properly account for all receipts and ensure monies are accounted for properly and deposited, official prenumbered receipt slips should be issued in numerical order for all monies received, and the method of payment should be recorded on each receipt slip and reconciled to the composition of receipts recorded in the accounting system and deposits or transmittals. The failure to transmit and deposit monies intact and timely and properly document such procedures increases the risk of theft or misuse of funds.

1.3 Security of monies

Monies collected are not always maintained in a secure location, and the district has numerous cash collection points throughout the schools. We noted numerous instances where teachers stored student activity monies in unlocked desks and file cabinets in classrooms at the junior high/high school. At the time of our cash count, student activity fees of $558 ($462 cash and $96 check) were on hand in classrooms. Teachers are also allowed to store monies in a closet in the junior high/high school office, which is accessible to all employees of that school during the school day, and these monies are not tracked or accounted for by the school's secretary. At the time of our cash count, this closet held cash totaling $3,256. Since most teachers failed to issue receipt slips or otherwise account for the receipt of monies, as discussed above, we could not determine how long these monies had been held or who had paid the monies. In addition, checks received are not always restrictively endorsed immediately upon receipt.

To safeguard against possible loss or misuse of funds and to ensure receipts are properly handled, receipts should be maintained in a secure location until deposited, checks and money orders should be restrictively endorsed immediately upon receipt, and the district should review collection procedures at all locations.

1.4 Meal collections

The district does not account for tokens and meal cards or perform a reconciliation of the tokens and meal cards to the related monies collected.

- The junior high/high school secretary does not maintain a daily collection log to account for meals purchased by students, and the

district has not established procedures to account for tokens and meal cards used by students to obtain meals. The junior high/high school secretary collects meal monies from students and issues student meal tokens (one token equals one meal and tokens are different colors for full price, reduced, or free meals) or cards (one card equals five meals). The cards are punched by the contracted meal service cashiers for each meal consumed by the student. If multiple cards are purchased, the secretary issues the current week's card and keeps the remaining cards identified by student in the meal collection box with a note indicating how many cards were purchased and when each card was issued to the student; however, these notes are thrown away once all cards are issued.

- The junior high/high school secretary prepares a weekly meal report; however, it is not complete. The meal report only includes full and reduced price lunches served and charged, but does not include free lunches served, a la carte meal items served, or any dollar amounts collected. As a result, the report cannot be utilized to reconcile to vendor billings for meals and a la carte items served, or to meal collections and monies deposited. Additional monies for a la carte meal items are collected in the cafeteria by contracted meal service cashiers. Monies and tokens collected in the cafeteria are transmitted to the junior high/high school office daily, along with a cash register tape, which records meal, milk, and a la carte collections in the cafeteria. The junior high/high school secretary transmits monies to the Secretary of the School Board for deposit. No meal collection report is prepared to support the transmittal. A contracted meal service employee prepares a monthly report of meals served based upon meal counts for the administrative office.

- Elementary teachers do not use a consistent form of recording student meal collections, and the elementary secretaries do not maintain a complete and accurate daily collection log. Elementary teachers collect meal monies from students and transmit those monies daily (often by a student) to the elementary secretaries, who then transmit those monies to the administrative office for deposit. Some teachers document the amount of meal monies collected from students on attendance sheets, and others do not. The elementary secretaries prepare a monthly report of meals served and collection log for the administrative office; however, the collection log is not accurate. A secretary indicated she records all meal monies received in the adult meal column until it matches adult meals served (even though some teachers charge meals) and then applies the remaining monies on hand to the student meal collections.

- Meal collections are not always transmitted to the administrative office on a timely basis. Our review of deposits indicates the junior high/high

school and Ash Grove elementary school transmit meal collections to the administrative office once a week, and the Bois D'Arc elementary school transmits meal collections once every 2 weeks.

- Due to the lack of records maintained by the junior high/high school and elementary offices, the district does not have an adequate system to track meal accounts receivables or payables. A reconciliation of meals served to meals purchased, charged, and any meal monies on hand is not performed.

  Using district records of meals served during the 2012-2013 school year, we determined the total amount each school should have collected and compared that information to district records of total meal collections deposited in the table below:

	Bois D'Arc Elementary	Ash Grove Elementary	Junior High/High School
Estimated meal collections	$ 22,160	25,106	30,726
Meal collections deposited	21,234	23,698	32,146
Deposits over (under) collections	$ (926)	(1,408)	1,420

  The school secretaries indicated the discrepancies identified and totaling $2,334 at the elementary schools are likely outstanding charges; however, limited documentation exists to identify which students and/or employees may owe these charges. A plausible explanation for the $1,420 discrepancy identified at the high school cannot be determined due to the poor records maintained.

To ensure proper accountability over student meal collections and reduce the potential for loss, theft, or misuse of funds, meal collections should be recorded on a daily log and reconciled to deposits. Any differences should be investigated and resolved. Transmittals should be made timely, and checks and money orders should be restrictively endorsed immediately upon receipt. Further, an adequate system for tracking meals purchased, charged, served, and any meal monies on hand should be established.

1.5 Change funds

Controls over district change funds need improvement. Each school office maintains various change funds for transactions such as making change for students for vending machines, meal tokens or cards, etc. Other change funds are issued temporarily to district personnel for use during sporting events and student activities.

The district does not have a list of approved change funds and the authorized balances, or a written policy regarding change funds. Some change funds are not maintained at a constant amount, some schools

occasionally hold monies out of district receipts to make change, and one teacher indicated he used personal monies to make a change fund for student activities collected in his classroom. Adequate documentation of change funds given to/returned by district personnel for sporting events or student activities is also not maintained.

During our cash counts at various schools and in the administrative office, we identified 12 change funds totaling $2,159. The district's accounting records did not include any of this money.

Written policies should be established outlining the procedures for maintaining, using, and accounting for change funds. The district should also maintain a list of all authorized change funds and amounts, and account for these monies as cash on hand in the district's accounting records. In addition, to safeguard against possible loss, theft, or misuse of funds, change funds should be maintained at a constant amount. Periodically, the funds should be counted and reconciled to the authorized balance by an independent person.

Recommendations

The School Board:

1.1 Segregate accounting duties to the extent possible and ensure periodic supervisory or independent reviews are performed and documented.

1.2 Establish written policies to address the types of records to be maintained and procedures to be followed for the collection of district monies and monitor controls and procedures in all district schools and the administrative office. In addition, the Board should ensure transmittals of monies between employees are documented, checks are issued for purchases, and amounts collected for concessions are periodically reconciled to changes in concession inventory.

1.3 Maintain monies collected in a secure location, restrictively endorse checks and money orders immediately upon receipt, and consider establishing centralized collections points.

1.4 Ensure adequate controls, procedures, and records are established to properly account for meal collections at each school.

1.5 Establish written procedures governing the accounting for change funds. Also, the School Board should maintain a list of each change fund and the authorized balance of each fund, and record the cash on hand in the accounting system. In addition, the School Board

should ensure the change funds are periodically counted and reconciled to the authorized balance by an independent person.

Auditee's Responses

The School Board provided the following written responses:

1.1 As has been noted in our yearly audit for many years, segregation of duties has been an on-going challenge due to the lack of personnel to actually do the work. To meet this challenge, secretaries at each location now count the money and receipt it. The money is then taken to the main office where the money is counted again by a different person and receipted once again by another secretary. The Superintendent then makes all deposits to the bank. This segregates the duties and provides a clear transaction and audit trail through receipts and deposits. This practice started in the second semester of the 2013-2014 school year. This procedure will be written in all applicable handbooks so every employee will know what is expected.

1.2 The district purchased official stamps for each organization in the school district that typically receives money. These stamps are now used to create official and unique receipts whenever monetary transactions take place. Procedures have been put in place so money received by an organization is deposited and receipted with the appropriate office on the day it is received. Money received from clubs and other organizations are not left in classrooms overnight. Deposits are made to the main office on the day that the money is received by the school office. Documentation in the form of identifiable receipt trails are now in place from the time that the money is received by a teacher, deposited with the school office, transferred to the main office, and deposited at the bank. All money collected is deposited with the main office. If expenses need to be paid, they are paid through the main office, not by using collected fees. IOU's are not accepted. Concession inventories will be maintained and reconciled at the end of each sport season to ensure that all sales revenue matches receipts and profits. These procedures will be written in all applicable handbooks so every employee will know what is expected.

1.3 All money received by individuals in each school are receipted and deposited with the appropriate school secretary on the day they are received. No money is to be kept in classrooms. Checks received are to be stamped by the school secretary upon receipt and deposited with the main office where another receipt will be made after counting the money for deposit at the bank. A centralized collection point in each building has been established as the school office. The school is purchasing lockable deposit bags to secure all money

between monetary transactions and deposit. Only administrators and office staff have access to the school safes.

1.4 The district no longer uses a meal card or token system for meals. Each school has gone to a comprehensive computerized system where money is pre-loaded into a student's meal account. No money is transacted in any cafeteria. All monetary transactions take place in the office (the centralized collection point) or on-line with parents loading money to a PayPal account. Each student's finger is scanned in the cafeteria after the student has received his/her food. The program automatically identifies the student and charges the student's account for the appropriate price of the food selected. The names of students, who qualify for free or reduced meals, are pre-loaded in the computer program—nothing different takes place for these students than for any other student. The new computerized system provides for automatic and comprehensive information for accounts receivable and payable information. This system was put in place at the start of the 2013-2014 school year. All meal counts with our contracted food service provider are now tied directly to the computerized food management system so there are no longer any discrepancies between meal counts and what is billed by the provider.

1.5 All cash boxes have been combined into a single change fund in each school office with a set amount in each fund. Each change fund will appear on the school's general ledger and will be counted and reconciled periodically by an administrator. This procedure will be written in all applicable handbooks so every employee will know what is expected.

2. District Compensation

The district needs to improve its employment contract and additional compensation documentation and reporting procedures. In addition, the district needs to improve policies and documentation for the step-ladder compensation program.

2.1 Employment contracts and stipends

The district does not have adequate procedures for approving employment contracts, and does not prepare employment contracts or separately approve salary schedules for tenured teachers. Contract amendments contained errors and were not properly approved and signed, and district procedures for stipends are informal.

- The School Board does not review or approve non-tenured or administrative employees' employment contracts. These employment contracts are prepared and signed by the Secretary to the School Board. The Secretary to the School Board applies the Board President's electronic signature to the contract (see MAR finding number 6.3), and

a subsequent review of the contract is not performed by the Board President or the School Board. Additionally, in some instances, these employment contracts were only signed by the Secretary to the School Board and the employee.

- Salary schedules for tenured teachers (who do not have employment contracts) are not separately approved by the School Board. As a result, the School Board approves compensation of tenured teachers through adoption of the district's annual budget, and three Board members approved compensation of relatives in this manner. Board President Renshaw approved compensation to his wife totaling $41,770 during the 2012-2013 school year. Board member Keith approved compensation to his wife totaling $35,280 during the 2012-2013 school year. Board member Reece approved compensation to her husband totaling $34,110 and to her sister-in-law totaling $42,160 during the 2012-2013 school year. To avoid the appearance of a conflict of interest, the School Board should reconsider the method used to approve tenured teachers' salaries.

- The Secretary to the School Board prepares contract amendments that are not always mathematically correct, are not signed by the employee, and are not reviewed or signed by the Board or the Superintendent. For example, the Superintendent's contract amendment for the 2012-2013 school year incorrectly reported total salary, stipends, and benefits of $116,643, but individual amounts reported in the contract amendment totaled to $121,124 (the actual amount the Superintendent was compensated), resulting in a difference of $4,481 in overall compensation. The contract amendment was also not signed by either the Superintendent (employee) or a member of the School Board. Employment contracts are typically amended annually for the upcoming school year, and the contract amendment serves as the new employment contract. After approval of the district budget in July of each year, the Secretary to the School Board prepares and mails or e-mails contract amendments to employees documenting their salary, stipend and benefit amounts for the upcoming year.

- The school district has not established adequate policies and procedures regarding stipends. The district does not prepare extra duty contracts, defining job duties or additional responsibilities performed for stipends paid. The school district paid approximately $127,000 in stipends to 75 district employees for the 2012-2013 school year. District personnel indicated stipends are paid for services rendered beyond the employee's contractual obligations or normal job responsibilities.

Formal written employment contracts and contract amendments, which clearly define all contractual terms, are necessary to ensure all parties are

aware of their duties and responsibilities, and to prevent misunderstandings. Contracts and amendments should be reviewed for accuracy and signed by all parties. Further, adequate policies and procedures regarding stipends and preparation of extra duty contracts that specify stipend amounts and related duties are needed to adequately support such payments and clarify the process.

2.2 Additional compensation

The school district has no basis for the Superintendent's mileage allowance and did not always report extra compensation to employees or subject the payments to payroll tax withholdings as required.

- The district has not documented its basis for determining the Superintendent's annual in-district mileage allowance totaling $1,500, and the payments were not reported as taxable income. Using the district's current reimbursement rate of 40 cents per mile, the mileage allowance paid represents 3,750 in-district miles per year. In addition to the in-district mileage allowance, the district reimbursed the Superintendent $1,968 for 4,922 documented miles driven outside of the district during the 2012-2013 school year.

  The Internal Revenue Service (IRS) specifically requires expenses not accounted for to the employer (in-district mileage) to be considered as gross income and payroll taxes to be withheld from the undocumented payments. In addition, the district should periodically review the reasonableness of the mileage allowance paid and, if necessary, adjust allowances to reasonably reflect the actual expenses incurred by the Superintendent.

- The district allows the maintenance/bus mechanic to use a district vehicle to commute to/from work, and does not properly report the value of commuting miles as compensation. The maintenance/bus mechanic commutes an estimated 2,100 miles annually. IRS regulations require employers to withhold payroll taxes and include the value of personal automobile (commuting) use in taxable income.

- The district did not report additional compensation totaling $251 paid to the Superintendent for driving a bus to athletic events on his W-2 form and did not withhold payroll taxes.

- The district did not report additional compensation (awards) paid to 3 teachers totaling $1,860 ($620 each) during the 2012-2013 school year on their W-2 forms and did not withhold payroll taxes.

- The district did not report additional compensation paid to several employees totaling $2,650 for working the gate at athletic events during

the 2012-2013 school year on their W-2 forms and did not withhold payroll taxes.

IRS regulations require wages paid to employees be subject to payroll tax and reported on W-2 forms.

2.3 Step-ladder program

The district has not established adequate policies and procedures for the step-ladder program, which gives compensation to teachers who provide student services and assistance beyond the traditional teaching responsibilities. The district paid approximately $51,000 in step-ladder payments to 43 teachers for the 2012-2013 school year.

- The School Board had not approved a step-ladder plan in accordance with board policy prior to disbursing step-ladder payments in May 2013. The step-ladder committee prepared and used a summary plan during an evaluation of step-ladder applications during the 2012-2013 school year; however, we found no documentation this summary plan or other step-ladder plans had been approved by the Board for the 2012-2013 school year.

  Board policy also provides for the Superintendent to revise the step-ladder program plan when state funding for the program is cut or eliminated and to present the plan to the Board for approval. State funding for the program has not been available since the 2010-2011 school year. The district has used local funding for the program in subsequent years.

- Clear and consistent criteria have not been established to evaluate how compensation under the step-ladder program is earned. According to the 2012-2013 junior high/high school teacher handbook, employees must serve a total of 60, 90, or 120 hours for stages I, II, or III compensation, respectively, and performance evaluations must be considered in conjunction with hours completed. However, the step-ladder summary plan prepared and used by the step-ladder committee during the 2012-2013 school year stated only 16, 32 or 60 hours are required for stages I, II, or III compensation, respectively, and did not indicate whether performance evaluations would be considered by the committee. The Superintendent appointed a step-ladder committee of 4 teachers to develop plans, review participating teachers' step-ladder activity lists (allowable activities the teacher plans to complete) and logs (used to document the activity and number of hours worked in that activity for the school year), and approve a final review sheet (documents the teacher's name, stage, total hours documented on the logs, date, signature of the teacher, and approval of the committee and building principal) for all participants for the 2012-2013 school year.

- Some step-ladder logs reviewed reported activities that did not meet the criteria established by the step-ladder committee. For example, a participant claimed hours worked for a student activity that was already compensated through a stipend; another participant claimed hours worked for a student activity "in lieu of being paid a stipend" because the step-ladder compensation ($1,500) was greater than the stipend offered (approximately $350); and another participant claimed hours worked for passing out snacks during standardized testing periods and moving a classroom that were not on the district's approved activity list, and hours served in May 2012, when the school year did not begin until July 1, 2012.

  According to a summary plan prepared by the step-ladder committee (not approved by the Board at the time of our review), a participant cannot claim hours worked for an activity that is compensated through a stipend, not included on the approved activity list, or not completed during the 2012-2013 school year.

- Principals did not always require participants to submit step-ladder logs for review in conjunction with the final review sheet.

- Step-ladder committee member discussions with participants regarding variances between allowable step-ladder activities and step-ladder plans and related decisions were not documented.

- The step-ladder committee provided the district bookkeeper incorrect payment information, and as a result, the district over-compensated eight participants ($4,500 in total) and paid compensation to five employees who were not participants in the program ($2,800 in total). The district was notified of the error by one of the over-compensated participants, and the district subsequently corrected the payments.

Without clear, non-conflicting written guidance, the Board cannot ensure monies spent for the step-ladder program are used efficiently and participants are treated fairly and consistently. Guidance should include establishment of a written plan with criteria for hours required, allowable activities, and performance standards required to earn compensation under this program and should require submission of supporting documentation to those responsible for oversight and approval of payments.

Recommendations

The School Board:

2.1 Ensure employment contracts and amendments are reviewed for accuracy and are signed by either the Superintendent or a Board member and the employee. The School Board should reconsider its process of approving tenured teachers' salaries and establish

adequate policies and procedures requiring extra duty contracts be prepared that specify the stipend amount and duties to be performed.

2.2 Ensure all compensation paid to employees and commuting use of district vehicles is subject to payroll taxes and properly reported on W-2 forms. The Board should also review the vehicle allowance paid to the Superintendent and set the allowance to reasonably reflect the actual expenses incurred.

2.3 Establish a clear and consistent step-ladder policy, require preparation of adequate supporting documentation to support decisions made and amounts paid, and ensure an adequate review is performed of all documentation.

Auditee's Response

The School Board provided the following written responses:

2.1 The school district will ensure that all employment contracts and amendments are reviewed for accuracy and signed by either the Superintendent or a Board member and the employee. Besides approving the salary schedules and extra duty assignments in the budget as a whole, the School Board will also approve the teacher salary schedule for all certificated individuals except related parties. In a separate vote, the same salary schedule will be approved for those related-party individuals, and related parties on the Board will abstain from that vote. The same process will apply for approving extra-duty stipends.

2.2 All compensation paid to school employees is now done through payroll, where there had been some exceptions in the past paid through accounts payable. The in-district mileage allowance previously paid to the Superintendent will be eliminated from the Superintendent's contract and will be added to the Superintendent's base salary and paid through payroll. All employees will continue to be paid the Board-approved rate per mile for travel outside the district for school purposes when using a personal vehicle. When any employee is paid extra to drive a bus or perform duties outside the normal work day, that money will be paid through payroll as taxable income.

The school district allowed its maintenance man to drive the maintenance van home each night because that van contained all of the maintenance man's personal tools that would have been unavailable to him had the van been parked at school each night. The school never provided the maintenance man with compensation

for the use of his personal tools. That maintenance man no longer works for the school and the van is parked at school each night.

2.3 New procedures and policies relating to the step-ladder program were Board approved in March of 2014. These procedures are being put into place to provide for more oversight of the step-ladder program. The step-ladder program guidelines will be Board-approved each year. These procedures will require oversight and approval of all step-ladder approved activities and logs by a committee, an administrator, and ultimately the Board of Education. This procedure will be written in all applicable handbooks so every employee will know what is expected. No teacher will be allowed to forego receiving an extra-duty "stipend" in order to count those normally allowable hours to be counted towards their step-ladder hours.

3. Payroll Procedures, Records, and Policies

Significant improvement is needed related to payroll procedures, records, and policies.

3.1 Payroll procedures

The district has not established adequate segregation of duties or supervision over the payroll functions, and various district personnel do not perform sufficient reviews of time records. Errors were noted with some time and leave records, and some employees were allowed to carry negative compensatory (overtime) leave balances.

- The district bookkeeper is primarily responsible for all payroll functions including preparing time records for bus drivers, receiving time records (time cards, timesheets, and leave requests) prepared by other employees, entering time and leave data into the payroll system, preparation and disbursement of checks, authorizing direct deposits into employees' accounts, and distribution of employee W-2 forms. In addition, the Superintendent's review of direct deposits is not adequately documented and payroll checks issued are not reviewed by the Superintendent.

  Errors went undetected because no one performed a review of time and leave records prepared by the district bookkeeper. For example, bus driver substitute usage reports documented a bus driver was sick; however, the use of sick leave was not documented on the leave records maintained by the district bookkeeper. In two other examples, the district bookkeeper did not correctly calculate payroll disbursements to substitute teachers.

- Some employees, including the Superintendent and principals, do not prepare timesheets, timecards, and leave requests. For these employees, the district bookkeeper enters data into the payroll system without documentation of time worked or leave taken. As a result, any adjustments needed to regular pay amounts are not made and there is less assurance leave records are accurate. Other district employees prepare timesheets, timecards, and leave requests; however, these documents are not always signed by the employees or their supervisor to document approval of time worked and leave used.

- The district has allowed some employees to carry negative leave balances. A review of 13 employees' compensatory records showed 5 employees were carrying negative compensatory leave balances at various times during the 2012-2013 school year and 2 of these 5 employees carried negative leave balances over from the previous year. Had these employees terminated employment, the district would have paid them for hours not worked. A review of time records by the district bookkeeper and/or supervisors would likely have detected these errors.

Proper segregation of duties and independent reviews of payroll transactions and records would help ensure all payroll transactions are accounted for properly and assets are adequately safeguarded. Without a review of payroll documentation, errors, theft, or misuse of district resources could go undetected. Signed and approved time records are necessary to document hours worked, substantiate payroll disbursements, provide the district with a method to monitor hours worked and leave taken, and are beneficial in demonstrating compliance with Fair Labor Standards Act of 1938 (FLSA) requirements.

3.2 Post-retirement employees

The district bookkeeper did not properly track hours worked by employees retired under the Public School Retirement System (PSRS) and Public Education Employee Retirement System (PEERS). As a result, payroll records do not reflect instances when a retired employee exceeded the 550 hour limit. The district is required to report gross pay and actual hours worked to the retirement systems to ensure the limits are not exceeded.

Per Section 169.560, RSMo, a teacher or school employee retired and currently receiving a retirement allowance may be employed in any capacity in a school district on either a part-time or temporary-substitute basis not to exceed a total of 550 hours in any one school year, and through such employment may earn up to 50 percent of the annual compensation payable under the employing district's salary schedule for the position or positions filled by the retiree, given such person's level of experience and education, without a discontinuance of the person's retirement allowance.

- The district bookkeeper stopped recording her actual hours worked on the district's post-retirement log once she neared the 550 hour limit and did not report hours worked in excess of the 550 hour maximum in the 2012-2013 school year to the retirement systems. Timesheets from July 2012 to May 2013 indicated the district bookkeeper worked 606 hours.

  In addition, the district bookkeeper did not maintain a timesheet for June 2013; however, the district paid her normal monthly salary amount, and she performed the same duties in June 2013, as she had performed during the remainder of the school year. The district bookkeeper indicated she discontinued maintaining a timesheet in June 2013, because she was volunteering her time to the district. According to the retirement systems' guidance,[1] volunteering is defined as work performed for which no compensation is received and with duties that are substantially different from any paid work you may perform for the same employer.

- Instead of tracking and recording actual hours worked each day by post-retirement employees, the district recorded 2 hours worked for all bus drivers and 6 hours worked for all teachers per day on the post-retirement log. According to the retirement systems' guidance,[2] employees are required to count all time necessary to complete the requirements of the position worked, including planning periods, lunch breaks (if employee must remain at the school), time grading papers, and time supervising students between events or when traveling.

  For example, a post-retirement teacher recorded actual time worked on monthly time sheets as required by the retirement systems; however, in May 2013, the teacher indicated she was instructed by the district bookkeeper to revise her monthly timesheets for September 2012 to April 2013, and report only 6 hours worked per school day, instead of the actual number of hours worked. The initial time sheets prepared by the teacher for September 2012 to April 2013, indicated the teacher actually worked 552.5 hours. The teacher indicated she did not record actual hours worked on the May 2013 timesheet. Due to these discrepancies in the payroll records reviewed, the district bookkeeper

[2] *Working After Retirement*, Public School Retirement System of Missouri, p. 8, <https://www.psrs-peers.org/psrs/Publications.html>, accessed January 29, 2014. *Working After Retirement*, Public Education Employee Retirement System of Missouri, p. 7, <https://www.psrs-peers.org/peers/Publications.html>, accessed April 15, 2014.

may not have reported hours worked in excess of the 550 hour maximum by this teacher to the retirement systems.

Another post-retirement employee worked as a bus driver and mowed school grounds during the 2012-2013 school year. The district bookkeeper only recorded 2 hours worked per day as a bus driver on the post-retirement log, which totaled 543 hours, and did not include the 155 hours worked by the employee mowing school grounds during the 2012-2013 school year. Due to these discrepancies in the payroll records reviewed, the district bookkeeper may not have reported the hours worked in excess of the 550 hour maximum (148 hours) by this employee to the retirement systems.

- The district did not require at least 3 post-retirement employees to document hours worked, and as a result, could not monitor the 550 hour requirement. According to the retirement systems' guidance,[3] employers are required to maintain records to track hours worked and wages earned for each retiree hired.

The retirement systems require employers to track retiree hours and salary to ensure compliance with state law. The retirement systems can request to review records and if limits are exceeded a person's retirement benefits can be put on hold.

3.3 Related employees

A list of related employees and Board members is not maintained, and the district has not established adequate policies and procedures related to the hiring, supervising, or tracking of related employees. The absence of data on related employees and Board members weakens internal controls and may result in conflicting situations. Identifying and maintaining documentation of related employees is important to determine and monitor conflicting related party situations.

Recommendations

The School Board:

3.1 Adequately segregate payroll duties or ensure a periodic, documented review of these functions is performed by someone independent of the payroll functions. The Board should discontinue the practice of allowing employees to use unearned leave.

[3] *Working After Retirement*, Public School Retirement System of Missouri, p. 4, <https://www.psrs-peers.org/psrs/Publications.html>, accessed January 29, 2014. *Working After Retirement*, Public Education Employee Retirement System of Missouri, p. 3, <https://www.psrs-peers.org/peers/Publications.html>, accessed April 15, 2014.

3.2 Ensure post-retirement employees timesheets reflect actual time worked and gross pay and actual hours worked are reported to the retirement systems to ensure applicable limits are not exceeded.

3.3 Establish procedures to identify and monitor related employees, obtain related party information, verify information with each employee periodically, and ensure individuals are not working in conflicting employment capacities.

Auditee's Response

The School Board provided the following written responses:

3.1 Two individuals now perform payroll duties to cross-check work performed. The Superintendent has checked and will continue to check all payroll direct deposits and the list of physical checks. The main secretary in each building will use a standardized leave request form for all employees working in that building, including administrators. No employee is allowed to carry negative comp-time leave. This practice was started during the second semester of the current school year.

3.2 All post-retirement employees are now required to submit a standardized monthly time log. This log verifies their hours worked each month and will ensure that no post-retirement employee works in excess of the allowable 550 hours each year. This practice was started in the second semester of the current school year. The school will communicate with the retirement system to discuss past hours worked by retired employees noted in the report.

3.3 A comprehensive list of related employees has been created and maintained to monitor conflicting related party situations. This list was formally created at the end of the 2012-2013 school year and has been maintained since that time.

4. Bond Refinancing, Procurement Procedures, and Construction Projects

Bond refinancing, procurement, and construction project practices need improvement.

4.1 Bond refinancing

The school district sold general obligation refunding bonds totaling $3,295,000 in January 2013 through a negotiated instead of a competitive sale. The district issued the bonds to refund bonds originally issued in 2009 for construction and remodeling of schools. The Board did not select the

bond underwriter competitively and used an underwriter it was familiar with. Bonds were sold privately to the underwriter instead of seeking open bids which would ensure the most competitive rate of return for the taxpayers. The underwriter was paid $46,135.

The State Auditor's office completed a statewide review of general obligations bond sales practices[4] that determined negotiated bond sales historically result in increased interest costs. While Missouri law does not require competitive bond sales or competition in selecting bond underwriters, the historically lower interest costs on competitive sales suggest such sales to be in the best interest of the district.

4.2 Bidding

The district did not always follow its own bidding policy. Board policy requires employees to contact multiple vendors for purchases totaling less than $3,000; competitively bid purchases of $3,000 or more, and requires sealed bids for purchases of more than $15,000. However, board policy does not address documentation required for sole source procurement or establish time frames for which threshold amounts will apply. Our review of select disbursements made during the 2012-2013 school year identified the district did not solicit bids in compliance with policy, document sole source procurement, or solicit bids when the district utilized the same vendor for multiple transactions within a short period of time and purchases exceeded the $3,000 threshold.

Item or Service	Cost
Athletic supplies	$20,312
Bus radios	20,299
Web hosting and e-mail services	17,089
Tablet computers	12,334
Food	9,279
Lawn mower	8,744
Copier	7,280
Automotive parts	6,614
Installation of smart boards	5,929
Intercom system	5,520
Fence	4,852

District personnel indicated the district purchased the bus radios and web-hosting and e-mail services from sole source vendors; however, this information was not documented. Also, the district made multiple purchases totaling more than the $3,000 from a single vendor for both the food and fence purchases within a 90 day period without soliciting bids.

[4] Report No. 2013-116, *General Obligation Bond Sales Practices*, issued in November 2013.

Competitive bidding not only ensures the district is complying with board policy, but also helps ensure all parties are given an equal opportunity to participate in district business. Documentation of the selection process and criteria, including sole source procurement, should be retained to support purchasing decisions. Also, a more comprehensive procurement policy establishing time frames for which threshold amounts apply would provide a more effective framework for economic management of district resources.

4.3 Professional services

The district has not established policies for the selection of some vendors providing professional services. Additionally, the district did not solicit requests for proposals for several professional services, including speech therapy services totaling $10,311, occupational therapy services totaling $10,044, physical therapy services totaling $8,064, athletic training services totaling $4,650, and legal services totaling $3,576.

The district did not competitively bid independent auditing services every 3 years as required by board policy, and paid $12,700 for auditing services during the 2012-2013 school year. The district had not solicited proposals from various banking institutions in many years for the deposit of district monies in accordance with board policy.

The district also does not have a written agreement for the speech therapy services, athletic training services, and legal services.

Soliciting proposals for professional services is a good business practice, helps provide a range of possible choices, and allows the district to make better-informed decisions to ensure necessary services are obtained from the best qualified provider after taking expertise, experience, and cost into consideration. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing.

4.4 Construction management

The Board did not procure construction management services for a construction project begun in 2012 in compliance with a board policy that requires construction management services for projects expected to cost no more than $500,000 to be selected in the same manner in which architects are selected, as provided for in Section 8.291, RSMo. That statute requires evaluation of three highly qualified firms; however, the district did not evaluate three firms. Instead, in November 2012 the district placed an advertisement in a local paper requesting bids for construction management services. The district received only one response and therefore evaluated and eventually hired this company. During the period April 2013 through August 2013, the district paid this company $19,118 in construction management fees. In addition, the district also paid $191,179 in construction costs to the company, for subsequent payment to subcontractors.

To ensure compliance with board policy regarding construction management services, the district should follow the guidelines provided in Section 8.291, RSMo, for projects with an estimated project cost of less than $500,000.

4.5 Monitoring of construction projects

The district does not properly monitor construction projects.

- Change orders were not always prepared by the district's construction management company and approved by the Board. For example, in July 2011, the Board approved a construction contract to build a new weight and locker room with budgeted project costs totaling $302,910. After the construction management company received all bids from subcontractors, the cost of the project was reduced to $282,882; however, no change order was prepared and presented to the Board for approval. In addition, change orders increasing construction costs totaling $34,476 were also not prepared and presented to the Board for approval. The final project cost was $317,358.

- The construction management company submitted payment applications to the district with incorrect amounts shown as the original contract amounts. District officials responsible for reviewing and approving payment applications did not identify the differences in the original contract amounts.

- The district paid the construction management company an additional $7,573 as a performance bonus on this construction project without any documented evaluation criteria. The contract provided for payment of a performance bonus of 2.5 percent to be paid based upon criteria set forth by the School Board; however, the district failed to document the criteria used to evaluate the performance of the construction management company or properly calculate the amount of the performance bonus. The district calculated the bonus paid based upon the original contract amount of $302,910.

To ensure the amounts paid are valid, appropriate, and represent the true cost of services, contracts should include specific criteria for the award of any performance bonuses, change orders should be prepared, submitted for review, and approved by the Board prior to the completion of the additional work, and payment applications should be reviewed for accuracy and in conjunction with construction project budgets and change orders.

Recommendations

The School Board:

4.1 Consider a competitive sale for future bond issuances.

4.2 Solicit bids in compliance with board policy and amend the policy to add timeframes for bid thresholds. If sole source procurement is necessary, the district should retain documentation of these circumstances.

4.3 Periodically solicit proposals for professional and banking services, and enter into written agreements for professional services.

4.4 Ensure construction management services are solicited in compliance with board policy.

4.5 Ensure change orders are prepared and submitted for the Board's review and approval, payment applications are reviewed for accuracy, and the criteria to support performance bonus payments is documented.

Auditee's Response

The School Board provided the following written responses:

4.1 Missouri law does not require competitive bidding of bond sales. The last bond refinancing that the school did was approved in November of 2012, while the sale itself took place in January of 2013. By refinancing at a lower interest rate at this time and using the company that we used, it saved the school district and its tax payers $804,092 by reducing our average bond interest rate from 4.73% to 2.17% on $3,295,000 of outstanding bonded debt. In the future, the school district will seek to pursue any sale of bonds using the mechanism deemed to be in the best interest of the school while complying with both state law and School Board policy.

4.2 The district has strived to seek competitive bids, but there were instances where multiple bids were not done or documented. The school district will seek competitive bids for supplies in excess of $3,000. The district will revise its policies relating to competitive bidding to ensure that the policy and practices of the district match.

4.3 Following the audit, the district has solicited proposals for professional, banking, audit, and other professional services. The district now has multi-year contracts on file for professional services.

4.4 The school will strive to obtain multiple bids from various construction management firms if such services are needed in the future.

4.5 During the construction and remodeling phase of all projects, the School Board receives a personal update on financial information

from the construction manager each month. During the construction process, it is sometimes necessary for decisions impacting construction costs to be made so as to not impede the progress of the construction. All future change orders will be approved by the Superintendent and voted on by the Board at the next School Board meeting. The school will strive to ensure that all change orders and payment applications are reviewed for accuracy and all payments are documented appropriately. The performance bonus was awarded to the construction manager because of the additional duties and responsibilities necessary to complete the project in lieu of an architect. In the future, if a performance bonus is awarded, the duties and responsibilities will be outlined in the contract.

Auditor's Comment

4.1 The Board's response shows the importance of ensuring the lowest possible interest costs are obtained when bonds are issued. By utilizing a competitive sale on future general obligation bond sales, the Board can help ensure the district has obtained the lowest interest costs possible.

5. Disbursements

Improvement is needed with regard to the district's disbursements procedures and policies.

5.1 Segregation of duties and approval process

Accounting duties over disbursements are not adequately segregated, oversight by the Superintendent is not adequately documented, and the approval process for disbursements is not adequate.

Disbursement duties

The Secretary to the School Board performs most disbursement duties, including preparing her own expense reimbursement checks. The secretary is responsible for recording all disbursements in the accounting system, applying electronic signatures of Board members to checks issued from the operating bank account, printing and mailing checks, and preparing a disbursement report for the Board's review. A subsequent independent review of the use of the Board member's electronic signatures on checks from the operating account is also not completed. In addition, the secretary has signature authority on the remaining 12 bank accounts (other than the operating account) held by the district, and only one signature is required on these checks.

Approval process

The list of bills approved by the Board each month is not complete, and a comparison of the list to approved invoices and the actual checks written is not performed. The list of bills approved by the Board at each meeting does not include any payroll and debt service payments and some related fringe benefit payments. For example, the list of bills for September 2012 did not include payroll and benefit payments totaling $206,187 or debt service payments totaling $99,706, which together represent 51 percent of total disbursements for the month.

Additionally, the Superintendent indicated he documents his review of disbursements by applying a highlighter mark across check stubs; however, the use of the highlighter does not document the date or by whom approved.

Proper segregation of duties and adequate oversight of accounting functions helps ensure all transactions are accounted for properly and assets are adequately safeguarded. To ensure disbursements are appropriate, the Board should require complete and accurate financial information be provided for its review and approval, and conduct an adequate review of the list of bills, invoices and checks written prior to checks being issued. The Superintendent should also better document his approval of invoices.

5.2 Conflict of interest

The district purchases supplies from a local hardware business owned by Board President Renshaw. During the year ended June 30, 2013, the district paid $10,610 to this business without soliciting bids for these purchases. Board President Renshaw abstained from the approval of these payments; however, his signature appeared on 10 of 13 checks issued to the business. In addition, Board President Renshaw did not file a personal financial disclosure as required by board policy.

Board members of a district serve in a fiduciary capacity. Personal interests in business matters of the district could create actual and the appearance of conflicts of interest. In addition, Sections 105.454 and 105.458, RSMo, prohibit financial transactions between the district and elected officials that involve more than $5,000 per annum, unless there has been public notice to solicit proposals and competitive bidding, provided the bid or offer accepted is the lowest received. Further, the Board's conflict of interest and financial disclosure policy and Section 105.483(4), RSMo, requires Board members to file personal financial disclosure statements to report "each transaction in excess of $500 per year between the district and any business entity in which the individual has a substantial interest."

5.3 Petty cash bank account

The administrative office used a petty cash bank account to pay 61 disbursements totaling $19,259 without School Board approval during the 2012-2013 school year. The School Board was unaware of this bank account and has not established formal policies for the use of the petty cash bank account. Adequate supporting documentation was not obtained for several of these disbursements, and the individual disbursements from the account were not recorded in the accounting system. According to the Secretary to the School Board, the district used the bank account for petty cash and emergency purchases, with monthly replenishment checks being issued from the district's general operating account; however, the use of the account has increased beyond these purposes.

All 61 checks for the petty cash account disbursements were signed by only 1 person (51 by the Secretary to the School Board, 6 by the Superintendent, and 4 by the district bookkeeper), although board policy states both the

President and Treasurer of the Board shall sign all checks issued by the school district. In addition, 22 disbursements totaling $7,914 had no supporting documentation, and 15 disbursements totaling $5,111 had inadequate supporting documentation. For example, an invoice or other supporting documentation (other than a purchase order prepared by a teacher) was not retained by the district for lodging costs totaling $2,496.

If a petty cash bank account is needed, the Board should establish formal petty cash bank account policies, including purchasing limits; and ensure only small and emergency expenditures are made from the account. To ensure payments are valid and proper, the Board should require adequate supporting documentation be maintained, require review and approval of petty cash account disbursements, and ensure board policy is followed.

5.4 Purchase orders

The district has not adopted a formal purchase order policy (other than the one outlined for teachers for the purchases of supplies, instructional materials, and equipment), and administrative staff did not always complete purchase orders as appropriate. In addition, purchase orders are not pre-numbered or accounted for properly and teachers did not complete them for several purchases we reviewed and often completed them following the purchase. Payment of invoices without a properly completed purchase order increases the risk of paying for goods or services not actually received.

5.5 Duplicate vendors

The district vendor list contained 39 duplicate vendor names, each with a separate vendor number. Additionally, the vendor list contained one vendor 10 times and did not include the address for 159 vendors, and 1 vendor was labeled "DO NOT USE." Better controls should be established to ensure only authentic vendors are entered in the payment system and all necessary vendor information such as an address is included. In addition, deleting duplicate vendor names and vendors the district does not intend to use would give the district better control over vendor information and result in a more efficient operation.

5.6 Employee reimbursements, local meal purchases, and gifts/awards

The district does not have formal written policies for employee reimbursements, local meal purchases, and gifts/awards. Some of these disbursements did not have a clear school district or educational purpose or were unsupported.

- The district reimbursed a post-retirement employee, who is employed by the district as a part-time Information Technology Director, $1,123 in February 2013, for professional development travel costs. Costs reimbursed included mileage, lodging, airfare, and a cruise to Cozumel and Progresso, Mexico. During the cruise, the employee was to receive training titled "Wireless Without Limits." While the training may have been beneficial, the cruise and other expenses did not have a clear school district or educational purpose. In addition, the employee did not complete a professional development need assessment form as required

by board policy. The Superintendent indicated he was unaware the costs of the professional development included a cruise when he approved the expense. Also, the district did not obtain a certificate of completion form or any other related documentation from the employee to document attendance at the training.

- The district reimbursed a teacher, who serves as the Future Farmers of America (FFA) sponsor and trap team coach, $1,000 without obtaining supporting documentation (other than a cancelled check).

  In September 2012, the teacher signed a letter of intent for a fundraising event offered by a not-for-profit (NFP) association for scholastic shooting sports. The NFP provided a tablet computer to be raffled, and the letter of intent indicated the teacher would raise and subsequently pay the NFP $1,000 of related proceeds. Raffle ticket sales in December 2012 totaled only $580, which was not sufficient to cover the amount stated on the letter of intent. On February 26, 2013, the teacher wrote a personal check for the entire $1,000, because the NFP required payment by February 28, 2013, in order to provide matching funds. The district reimbursed the teacher the full $1,000 in March 2013, resulting in a loss of $420 to the trap team and the district. The Superintendent approved the reimbursement payment to the teacher, but could not provide an explanation for the purpose of this reimbursement.

  It is unclear why the district paid more than the amount collected by fundraising to the NFP. Further, as part of the fundraising event, the NFP indicated it would match the district funds 6 to 1 and place the $7,000 in an NFP escrow account for the trap team to apply towards equipment grants provided by the NFP; however, neither the teacher nor the district has applied for these grants or has documentation of amounts held in escrow by the NFP.

- Adequate supporting documentation was not always submitted to support purchases of local meal and food purchases or gifts and awards. We identified frequent purchases of meals or food by district employees at local restaurants or other vendors that lacked supporting documentation of these purchases, including individuals in attendance, the business purpose, or reason why food was necessary. In some instances, only a credit card charge slip was submitted rather than a detailed invoice or receipt slip. Further, the district purchased gift cards and other gifts or awards; however, documentation of the recipient and purpose of the gift or award was not maintained.

The lack of written policies (documenting the types of allowable expenses and any limits on them) and detailed supporting documentation makes it difficult for the district to ensure the propriety of payments made for

employee reimbursements, meal or food purchases, and gifts or awards. District funds should be expended only on items that clearly benefit the school district.

5.7 Contracts

The district does not always monitor contracts effectively and does not always enter into written contracts defining services and benefits received.

- The district does not compare the number of meals served to the invoices provided by the food service vendor to ensure amounts paid are reasonable. For example, in November 2012, the district was billed for 874 adult meals; however, district records show only 562 adult meals served. The district paid the full invoice amount, including the 312 unsupported meals costing $578. We also identified additional discrepancies, although not as significant, in other months that district staff did not evaluate. According to the Secretary to the School Board, the difference may be related to the free meals provided to some employees including herself, the district bookkeeper, school secretaries, and cooks. These free meals are not tracked. The district also has not established procedures to ensure amounts paid for a la carte sales are appropriate. The district paid $1,565 to the food service vendor for a la carte sales during the 2012-2013 school year, but only recorded related collections of $510 in the accounting system. The district paid this vendor approximately $125,000 during the 2012-2013 school year.

- The district did not monitor rebates owed to the district. The district entered into a written franchise agreement in June 2010 with a beverage vendor, which required payment of a rebate to the district on a biannual basis. At the time of our review, district officials were unaware of this contract requirement and contacted the vendor to inquire about the rebates. In July 2013, the district received $8,334 in rebates (from the inception of written agreement to June 2013) from this vendor.

- The district had not required two of three contracted therapists to submit current professional licenses and documentation of insurance coverage as required by contract.

- The district did not enter into a written agreement with a local community college to provide vocational technical classes to students. The district paid this college approximately $46,000 during the 2012-2013 school year.

- The district allowed a local university to use its athletic facilities for a multi-district summer football camp without a written agreement and without charge. Participants in the 2-day camp were charged $25 each; however, the district was not aware of the number of participants or revenues generated by the university. The district's facility use policy

requires the district to collect rental fees for the use of district facilities prior to use and the Board to set rental fees annually; however, no rental fees had been established by the Board.

Clear and detailed written contracts, including reporting requirements and provisions to allow for proper monitoring, are necessary to ensure all parties are aware of their duties and responsibilities, prevent misunderstandings, and ensure district monies are used appropriately and effectively. Closely monitoring contractor performance and compliance with contract terms is important to ensure limited district resources and assets are used wisely and that expectations of the Board and the public are met. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing. In addition, to ensure all renters are treated equitably, board policy should be followed and rental fees established annually by the Board.

Recommendations

The School Board:

5.1 Adequately segregate accounting duties to the extent possible or ensure documented supervisory or independent reviews of the disbursement records are performed. In addition, the Board should ensure the list of bills provided for approval at monthly meetings is complete and the Superintendent adequately documents his review of invoices.

5.2 Ensure Board members avoid participation in situations that could result in the appearance of or actual conflict of interest and complete required financial disclosure statements.

5.3 Determine if a petty cash account is needed, establish formal petty cash policies including purchasing limits; ensure only small and emergency expenditures are made from the account, adequate supporting documentation is obtained and reviewed, and checks are signed in accordance with board policy.

5.4 Establish formal policies and procedures to ensure the proper use, accountability, and approval of purchase orders.

5.5 Ensure duplicate vendors and vendors the district does not plan to use are removed from the vendor list and vendor information contained in the system is complete.

5.6 Establish written policies for employee reimbursements, local meal purchases, and gifts/awards, and ensure all disbursements of district monies clearly benefit the school district.

5.7 Establish procedures to properly monitor contract requirements, and enter into written agreements defining services provided and benefits received. In addition, the School Board should ensure board policy is followed for facility usage.

Auditee's Response

The School Board provided the following written responses:

5.1 Starting in the second semester of the 2013-2014 school year, the School Board has been given a list of all checks and transfers between accounts in the monthly board packet (trace number listing in consecutive order). This will continue. In the past, the Superintendent has signed all purchase orders and has reviewed and marked all monthly checks and direct deposit payroll payments. The Superintendent will continue to do this, but will initial with his highlighter on each check rather than just use a check mark. The accounting duties have been segregated to the maximum extent possible with independent reviews taking place by providing each School Board member with a copy of every disbursement and transfer and by the Superintendent reviewing accounting and finance documents. In the future, the Board President or Board Treasurer will periodically match written checks to invoices with viable entities receiving funds through an accounts payable list. Additionally, the district will ensure that there are multiple signatories on each school account.

5.2 Board policy does require board members to fill out personal financial disclosure statements. The school has done business with one business where a Board member is a part owner. The Board member in question abstained from approving any check written to this business and in years past has filed a personal financial disclosure statement. This Board member had not yet filed a personal financial disclosure statement at the time of the audit, but has since done so and will continue to do so.

Any purchases in excess of $3,000 will be bid out according to Board policy. Any purchases from this local business have always and will continue to reflect a minimum of a 10% discount. This arrangement is much more financially beneficial to the district than the labor, mileage, and increased cost associated with driving to Springfield. In the future, bids for products and services available locally will be bid out and will include the costs associated with shipping and/or delivery. If at any time a check much be written to a business or individual who would normally sign checks, then that check will be signed by a Board member other than the payee.

5.3 The petty cash checking account was closed in the fall of 2013.

5.4 It is the practice of the school to have an administrator sign a purchase order for payment. The purchase order is then approved and signed by the Superintendent. After obtaining both signatures, the purchase can then be made either by the main office, the school office, or the teacher. After a copy of the invoice and/or receipt is given to the main office after delivery, the business entity or individual is paid based upon the invoice or receipt. When it is necessary for the Superintendent to make purchases, the Board President will sign the purchase order approving the purchase. All employees have been reminded of the school's purchasing practices. These procedures and practices will be written in all applicable handbooks so every employee will know what is expected and to avoid lapses in practice of obtaining a purchase order as was noted by the auditor.

5.5 Duplicate vendors have been purged from our system.

5.6 Professional development conferences out of state will be formally approved by the Superintendent rather than just approved by the professional development committee as has been the past practice.

Supporting documentation for all reimbursements has been required, but this documentation should be itemized and detailed to ensure that the school is reimbursing for approved activities. Meals have been reimbursed for school employees where the meal takes place at a school related meeting or activity. This will continue to be the school's policy, however, more detailed (itemized) receipts including business purpose and attendees are now being asked for to ensure that the school is only paying for appropriate items. This procedure will be written in all applicable handbooks so every employee will know what is expected.

Moderately priced gifts (clock and gift card) have been purchased for employees retiring from the school district after many years of service. Their service has been of great value to the school district for many years and the practice of purchasing such gifts for retiring employees will continue. In the future, the school will document who received and the purpose of the gifts. This procedure will be written in all applicable handbooks so every employee will know what is expected.

5.7 The new software and meal accountings system now allows the school to more easily compare meal invoices from the contracted food service provider with the meals actually served. All persons eating a meal are entered into the system.

The school had not contacted the vendor to receive its rebate prior to the audit. The school has since done this, received the rebate, and will continue to do so.

The district has received documentation from all contracted employees regarding their professional licenses and insurance coverage.

The district will enter into a contractual agreement with the local community college to provide vocational/technical education for our students.

In July of 2013, the district set a specific monetary amount to be charged when others use our athletic facilities.

6. Budget Monitoring and Accounting Records and Controls

Budget monitoring, accounting record preparation, and accounting controls need improvement.

6.1 Budget monitoring

Information recorded in the district's accounting system is not complete and accurate, and the Board does not adequately monitor budget to actual receipts and disbursements.

- The budgeted information for the 2012-2013 school year was not recorded in the district accounting system correctly, causing budget to actual reports generated to be inaccurate. While the Board approved budgeted appropriations of $2,287,719 for the Operating Fund and $3,940,909 for the Teachers Fund, the district recorded budgeted appropriations of $2,382,293 for the Operating Fund and $3,851,685 for the Teachers Fund in the accounting system.

  Additionally, cash balances of several district bank accounts totaling $279,546 were not recorded in the district's accounting system at June 30, 2013.

- The School Board only reviews budget to actual reports quarterly. Additionally, the report format does not allow Board members to easily review each individual fund's financial activity. Since some funds have restricted uses, budgets are approved by fund, and overspending should be addressed by fund, it is essential the Board monitor the financial activity of each district fund.

Budget documents are an essential tool for the efficient management of district finances. Accurate and complete budget and financial information is

necessary for the Board to make informed decisions and to provide residents with reliable information about district finances. Adequate budget monitoring allows the district to properly react and plan for increased disbursements and decreased revenues. To be of maximum assistance to the Board and to adequately inform the public, accounting records of the district should accurately report budgeted appropriations and activity by fund and include all bank account balances, and should be submitted to the Board for review monthly.

6.2 Adjustments

The Secretary to the School Board has the ability to post adjustments to the district's accounting system without obtaining independent approval. During the 2012-2013 school year, 53 adjustments totaling approximately $1.8 million ($775,000 increase and $1,022,000 reduction adjustments) were made to the accounting system. Adjustments included reclassifying disbursements between account codes, voiding checks issued, recording debt service payments, and correcting inaccuracies in records. To ensure adjustments are valid, someone independent of receipting and recording functions should review and approve all adjustments.

6.3 Electronic signatures

The district does not have adequate controls over electronic signatures.

Electronic signatures of the School Board President and Treasurer are not adequately safeguarded to prevent misuse and are not used in compliance with board policy. Both the Secretary to the School Board and the district bookkeeper have access to these electronic signatures. The School Board President and Treasurer do not perform a subsequent review of the use of their electronic signatures. Board policy provides for electronic signatures to be used to sign checks; however, the Secretary to the School Board frequently signed contracts using the Board President's electronic signature, which is not allowed by policy.

If the Board President and Treasurer are unavailable to sign checks and other documents, they should subsequently document their review of records on which their signature is applied to safeguard against possible loss or misuse of funds. In addition, board policy over electronic signatures should be reviewed and revised, if needed, to provide more comprehensive guidance on the use of electronic signatures.

Recommendations

The School Board:

6.1 Establish procedures to properly monitor actual to budgeted activity in a timely manner.

6.2 Require an independent review and approval of all adjustments.

6.3 Review use of electronic signatures and the related board policy. If needed, revise the policy to address use of electronic signatures.

Auditee's Response

The School Board provided the following written responses:

6.1 The district budget is adopted in June, but final balances (including total expenditures and revenues) are not known until after the year-end audit takes place in July. For the sake of accuracy, what has always been put into the school's accounting software has been the most accurate figures available resulting from the annual audit. The School Board will be given a copy of any differences between what is actually adopted in the annual budget, and the corrected figures resulting from the annual audit or other approved changes made after the printed copy of the budget is finalized. Additionally, all district monies have been recorded in the district's accounting system and will be from this point on. The School Board has also been given budget documents by fund each month. Board members have always had this information provided to them each month, but we are now providing this information separated by fund and in the traditional manner also.

In the past, there have been assets infrequently accessed, which were not placed in the school's accounting system. These accounts include money received from third parties to be used for student scholarships and teacher awards, a FFA account controlled by the FFA advisory committee, money received from a beverage vendor which was put into a Certificate of Deposit for future use, and a Certificate of Deposit for investment purposes. These assets, while not used through the school's accounting system have now been placed on the school ledger to be reviewed by the Board each month. Every bank account holding school assets has been accounted for on the school ledger since the fall of 2013.

6.2 The Superintendent has reviewed adjustments in the past, but will document such reviews in the future. A copy of any and all adjustments has been given to the School Board starting in the second semester of the 2013-2014 school year.

6.3 The School Board President will personally sign contracts rather than use an electronic signature. All documents signed by electronic signature will be made available to those School Board members whose electronic signatures were used. The Board President and Treasurer will periodically review checks using their electronic signature.

7. Attendance Reporting and Computer Controls

Attendance reporting and computer controls need improvement.

7.1 Attendance reporting

The district's attendance system does not adequately track some changes made to attendance records or limit the time frame during which changes can be made and there is no review by district officials to ensure changes made to current school year attendance records are appropriate. Without limiting the time frame during which changes can be made or reviewing changes made, the data is subject to erroneous changes that may significantly affect attendance reports to the Department of Elementary and Secondary Education (DESE). We also identified some inaccuracies in the attendance records.

District procedures require daily student attendance to be recorded in the attendance system by each teacher or by a school secretary when a teacher is absent. A preliminary attendance report is generated each day and reviewed by each school's secretary for accuracy before finalizing the daily attendance. If any changes need to be made before finalizing the daily attendance, or at a later date when a correction needs to be made, the change can be made by school secretaries. Changes to the daily attendance records can be made anytime for the current school year. In addition, if a change is made by the user who originally entered the information, the system does not acknowledge the action as a change and does not report a change of information recorded in the audit trail. Also, an audit trail report or report of changes made is not generated and reviewed by district administrative personnel to ensure all changes made to attendance records are accurate and appropriate, and documentation supporting the changes made is not always maintained.

During our review of Missouri Assessment Program (MAP) testing make-up exams, we compared attendance records for students identified as absent during specific exam dates to the attendance system. We identified 2 of 11 documented absences were not accurately recorded in the attendance system, and 2 other absences for a student were recorded as a "planned absence," thereby allowing the district to receive funding for the student as present while absent; however, the events creating the absence did not qualify as a "planned absence" according to DESE officials.

Correcting attendance data is necessary to ensure accuracy in the reporting process and any changes must be made before attendance can be certified to the DESE. However, review and approval of all changes is necessary to ensure reliability of the attendance data.

7.2 Access restrictions

The district has not adequately restricted access to computer systems and data to only authorized users. Some district employees with no attendance related responsibilities, including a bus driver and an assistant principal, have access to the attendance system. In addition, although the use of passwords to access the attendance tracking and accounting systems is required, passwords are not periodically changed to help ensure they remain known only to the assigned user and to reduce the risk of compromised passwords. Also, some user identifications and passwords for other systems are shared by district employees. As a result, unauthorized access could occur, leading to misuse or unauthorized changes to district financial or attendance data. To prevent unauthorized changes, access should be limited and passwords should be kept confidential and changed periodically.

7.3 Computer inactivity

The district has not established security controls in any of the district offices to shut down computers after a certain period of inactivity and detect or prevent incorrect login attempts. As a result, unauthorized individuals could access an unattended computer and have unrestricted access to programs and data files. To help protect computer files, security controls should be implemented to shut down the system after a certain period of inactivity and to detect and prevent incorrect login attempts.

Recommendations

The School Board:

7.1 Implement additional controls and procedures to ensure student attendance data is accurately recorded and reported, including restricting the time frame during which changes can be made. The School Board should also require an audit trail of changes made to attendance data be prepared and reviewed for accuracy.

7.2 Ensure user access rights to the attendance system are limited, and require unique user identifications and passwords for each employee that are kept confidential, and passwords be periodically changed to prevent unauthorized access to district computer systems and data.

7.3 Establish a security control requiring computers to shut down after a certain period of inactivity and lock computers after a specified number of incorrect logon attempts.

Auditee's Response

The School Board provided the following written responses:

7.1 The district will contact the software provider to see if there is a possible solution that would provide for more of an audit trail of changes made in the system. Teachers mark students as present or absent in their class. Any changes made to attendance information on the database will be made by the school secretary in that

building. The district has, and will continue to train teachers in the proper use and importance of keeping accurate attendance records in the information system. This procedure will be written in all applicable handbooks so every employee will know what is expected. The district will contact DESE to ensure that any time-frame restrictions that the district might adopt in the area of attendance reporting meets the guidelines established and allowed by DESE.

7.2 The district is looking at possible procedures, including more use of passwords, which will ensure that school computers are not misused by individuals who are not authorized users. Teachers will be trained to log-out of all network computer systems after use, which will require the use of a password to start using the system again. Teachers who leave employment as a teacher in the district will be removed immediately from the system as a possible user. A list of all system users will be maintained and approved by the Superintendent each year. This procedure will be written in all applicable handbooks so every employee will know what is expected.

7.3 The software used in each school is password protected. It requires a password each time that the software is initialized. Additionally, there is a timed-out function on this software which will automatically log-out any user and require the use of a password to use the software again. These security controls have always been in place and will continue to be in place. The district will contact the software providers to see if there is a possible setting or solution which would allow the district to view unsuccessful log-in attempts and lock computers after a specified number of incorrect logon attempts.

8. School Board Procedures and Minutes

The School Board did not thoroughly perform or document a cost-benefit analysis of district reorganizations and did not ensure compliance with the Sunshine Law. In addition, improvement is needed with district policies.

8.1 Reorganization

The Board did not thoroughly perform or document a cost-benefit analysis prior to reorganizing the district's two elementary schools for the 2012-2013 school year and again for the 2013-2014 school year, and failed to track the actual costs/benefits of either reorganization to compare with historical costs of operating the two schools or to the reorganization plan.

Prior to the 2012-2013 school year, the district provided kindergarten through 6th grade classes at both the Ash Grove and Bois D'Arc Elementary

School locations based upon student residence. Due to decreased enrollment and in an effort to reduce costs, the district reorganized the elementary schools for the 2012-2013 school year by moving all district kindergarten through 3rd grade students to the Bois D'Arc Elementary School and splitting elementary grades 4-6 between both elementary schools based upon student residence. The district reorganized again for the 2013-2014 school year, moving all 3rd and 4th grade students to the Bois D'Arc Elementary, while all other elementary grades attended the Ash Grove Elementary School.

To ensure the most efficient and effective decision is made, the School Board should ensure a documented plan, including a cost-benefit analysis, is completed and reviewed prior to the reorganization of schools. In addition, to effectively monitor the effects of reorganization, the School Board should require a cost-benefit analysis be completed and updated periodically to support the district's continued decision making process.

8.2 Minutes

The School Board did not always comply with the Sunshine Law, and minutes were not always complete, accurate, or maintained.

- Closed meeting minutes for the July 23, September 24, and December 17, 2012, closed sessions did not document a description of matters discussed in closed session. While documenting details of matters discussed in closed meetings is not required, identification of matters discussed is advisable to better document that meeting discussions are consistent with reasons cited for closure and to demonstrate that only statutorily allowable topics are addressed.

- Open meeting minutes did not record a roll call vote of the Board to enter into the closed sessions held on March 12 and 14, and April 4, 2013.

- Minutes did not always document decisions made by the Board. For example, contract amendments for administrative employees provided for a 3 percent increase in salary, and while meeting minutes indicate the increase in salary was presented to the Board, the meeting minutes did not document the Board's approval (motion or vote) of the salary increase.

- Meeting minutes did not always appear to be accurate. For example, the June 18, 2013, open meeting minutes indicate only one closed session was held when closed session meeting minutes indicate two separate closed sessions occurred.

The Sunshine Law, Chapter 610, RSMo, requires minutes be kept for all open and closed meetings, and that before any meeting may be closed, the

question of holding the closed meeting and the reason for the closed meeting, shall be voted on at an open session by roll call vote and documented in open session minutes. Minutes would be more beneficial to district officials if sufficient information was documented to demonstrate compliance with statutory provisions and support important decisions made.

8.3 District policies

As noted throughout the report, the district's policies are not complete, accurate, up to date, or adequately communicated to district employees. The district has adopted sample policies from the Missouri State School Boards' Association (MSBA) Education Policy Service without customizing the policies to address actual procedures of the district. Since board policies govern district operations, it is important that the policies be maintained in a complete, accurate, and up-to-date manner, and adequately communicated to district employees.

Recommendations

The School Board:

8.1 Ensure a documented plan, including a cost-benefit analysis of the district's reorganization is completed and reviewed prior to future reorganization efforts.

8.2 Ensure minutes provide a complete and accurate record of all important discussion and decisions made by the Board and record the Board's compliance with the Sunshine Law.

8.3 Update and ensure a complete set of district policies is maintained.

Auditee's Response

The School Board provided the following written responses:

8.1 The reorganization of the elementary schools took place for educational purposes as well as financial reasons (i.e. increased collaboration between grade-level teachers; consolidation of grade-level resources per building; equalization of all class sizes per grade, systematic decrease in teaching positions as student enrollment declines, etc.). As a school, every decision made has both a financial impact and educational impact. The School Board looked at multiple options and impacts, looked at multiple years of enrollment and other pertinent data (including financial data), and completed this review prior to making any final decision regarding reorganization. The School Board agonized over the ramifications of these decisions, but eventually a decision had to be made after weighing all the options. In the future, the school will strive to do a better job of documenting specific plans and communicating the information considered, including cost-benefit analyses, as it makes important decisions impacting the district.

8.2 In the future, the closed minutes will include a statement of items discussed in closed session. The School Board Secretary will strive to ensure that the minutes of open meetings are accurate and in compliance with the Sunshine Law. We are now recording this vote in both the open and closed minutes.

8.3 The school district will work with the MSBA to ensure that the practices of the district are consistent with the School Board policies obtained through MSBA. School Board members and administrators will review all School Board policies to ensure that policy and practice align. If they do not, changes will be made to either School Board policy or practice. The district will ensure that all policies or changes in policy are adequately communicated to district employees.

9. Capital Assets and Fuel Usage

Controls and procedures over district property and fuel usage need improvement.

9.1 Capital assets

District officials have not properly maintained a detailed record of the property owned by the district and performed inventories of district capital assets held outside of classrooms at each school. The capital asset listings did not include 12 pieces of equipment (tractors, trailers, mowers, etc.) valued at approximately $56,000 and the listings maintained do not include all necessary information such as the value of assets, or date and method of disposal. In addition, the district has not tagged or otherwise identified all property items as belonging to the district. The district's insurance carrier valued district property, buildings, and contents at approximately $24 million at September 2013.

Adequate property records and procedures are necessary to secure better internal control over district property, and provide a basis for determining proper insurance coverage. Property control tags should be affixed to all property items to help improve accountability and ensure assets are properly identified as belonging to the district.

9.2 Vehicle and fuel use

The district's controls and procedures over fuel use and purchases need improvement. The district utilizes a local gas station for fuel for its 16 buses, 3 vehicles and 8 pieces of equipment. The district purchased approximately $70,000 in fuel during the 2012-2013 school year. Fuel and mileage logs are not maintained for district vehicles and equipment and a reconciliation of fuel purchased to usage is not performed.

Failure to reconcile fuel used to fuel purchased and to maintain mileage logs or other mileage records could result in theft and misuse going undetected. Adequate procedures for monitoring fuel purchases, including mileage logs and comparison of mileage to fuel, are necessary to ensure the

reasonableness of vehicle use and to prevent and detect theft and misuse of fuel.

Recommendations

The School Board:

9.1 Ensure complete and detailed capital asset records are maintained, annual physical inventories are conducted and compared to capital asset records, and property control tags are affixed to all property.

9.2 Ensure a documented periodic reconciliation of fuel purchased to fuel used is performed, and investigate any significant discrepancies. In addition, the Board should ensure mileage logs are maintained for all district vehicles and equipment.

Auditee's Response

The School Board provided the following written responses:

9.1 More detailed records of capital assets will be maintained throughout the district. The district will look at mechanisms available to more adequately mark district property. All items of $200 value or more will be marked. A physical inventory of all district property will be compiled each year using lists created by the building principals, Technology Coordinator, Head of Maintenance, and the Superintendent. This procedure will be written in all applicable handbooks so every employee will know what is expected.

9.2 Mileage logs that identify each user by card with the fuel obtained are currently being kept for school vehicles. Reconciliation of fuel purchases to the logs has been done on a monthly basis since the fall of 2013.

Ash Grove R-IV School District
Organization and Statistical Information

The Ash Grove R-IV School District is located in Greene, Dade and Lawrence Counties.

For the 2012-2013 school year, the district operated one junior/senior high school (grades 7-12) located in Ash Grove, and two elementary schools located in Bois D'Arc (grades K-6) and Ash Grove (grades 4-6). Enrollment was 743 for the 2012-2013 school year. The district employed 94 full-time and 13 part-time employees, at June 30, 2013.

The Ash Grove R-IV School District has been classified under the Missouri School Improvement Program as "Accredited" by the Missouri Department of Elementary and Secondary Education.

School Board

An elected board acts as the policy-making body for the district's operations. The board's seven members serve 3-year terms without compensation. Members of the board at June 30, 2013, were:

Bill Duncan, President
Doug Renshaw, Vice-President
Ron Reed, Treasurer
Kerrie Jackson, Member
Ron Keith, Member
Lisa Reece, Member
Eddie Mulbery, Member

Superintendent

The district's superintendent at June 30, 2013, was Dr. Don F. Christensen. His compensation for the 2012-2013 school year of $108,233 included a base salary of $96,648, the value of health and critical care insurance including family coverage totaling $9,109; $725 in district-paid premiums each year for a $500,000 life insurance policy, and a vehicle allowance of $1,500. Compensation that year also included compensation for driving a district bus totaling $251. The superintendent's compensation is established by the school board.

Thomas A. Schweich

Missouri State Auditor

Eleventh Judicial Circuit

City of New Melle
Municipal Division

May 2014

Report No. 2014-032

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Eleventh Judicial Circuit, City of New Melle Municipal Division

Accounting Controls and Procedures	The audit found 2 cash bonds, totaling $415, received by the Police Department were not deposited. Audit work was made more difficult by the multiple records maintained by the municipal division, Police Department, and city; discrepancies among the various records; and disorganization of and lack of sufficient details in some records. Neither the municipal division nor city personnel adequately supervise or review accounting functions and records. The municipal division lacks adequate procedures to ensure all monies received are receipted, recorded, and deposited properly. The Police Department does not maintain a complete log of bond forms issued, issue bond forms in sequential order, or account for the numerical sequence of bond forms issued. The former Court Administrator did not disburse several bonds to the city or timely issue refunds, and the municipal division does not maintain a complete record of bond activities. The Police Department collects a $15 bond processing fee, but state law does not allow for this fee.
Municipal Division Procedures	The municipal division and the city lack procedures to track traffic tickets issued and the related fines and court costs to determine whether excess revenues should be distributed to the state Department of Revenue per Section 302.341.2, RSMo. Neither the Police Department nor the municipal division adequately accounts for the numerical sequence and ultimate disposition of traffic tickets issued, the Prosecuting Attorney does not sign all tickets processed by the municipal division, and the Municipal Judge does not approve all ticket dispositions. The municipal division could not locate several municipal division records we requested during the audit.

In the areas audited, the overall performance of this entity was **Poor**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 14

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Eleventh Judicial Circuit
and
Municipal Judge
and
Honorable Mayor
and
Members of the Board of Aldermen
City of New Melle, Missouri

We have audited certain operations of the City of New Melle Municipal Division of the Eleventh Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2012. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions.

3. Evaluate the city's compliance with Section 302.341.2, RSMo, which restricts the amount of fines and court costs that may be retained from traffic violations.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) no noncompliance with Section 302.341.2, RSMo. The accompanying Management Advisory Report presents our findings arising from our audit of the City of New Melle Municipal Division of the Eleventh Judicial Circuit.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Kim Spraggs, CPA
In-Charge Auditor:	Nathaniel Fast, M.Acct., CPA, CFE
Audit Staff:	Albert Borde-Koufie, MBA

1. Accounting Controls and Procedures

We identified significant weaknesses in accounting controls and procedures. As a result, there is little assurance all monies were deposited and accounted for properly. Some bond monies received were not deposited and the municipal division cannot account for bonds totaling $415.

The municipal division accepts cash, checks, money orders, and credit card payments for fines, court costs, and bonds. The city's unaudited financial statements for the year ended December 31, 2012, indicate fines and court costs totaled $104,564. Deposits into the bond bank account totaled approximately $12,100 during this period.

The City Clerk is primarily responsible for receiving court monies through the violation bureau prior to court. The Court Administrator is responsible for receiving monies during court, and also receives bond monies collected by the Police Department and other entities on behalf of the municipal division. The Court Administrator transmits all monies received to the City Clerk, who deposits bond monies into the municipal division's bond bank account and all other court monies into the city's General Revenue Fund. All disbursements from the bond account are made by the Court Administrator.

The city and the municipal division have experienced significant personnel changes; and as a result, most current personnel assumed responsibilities after the audit period. There were four different city clerks during 2012, and the current City Clerk was hired in June 2012. The former Court Administrator resigned in July 2013, the former Chief of Police was terminated in April 2013, the interim Chief of Police resigned in June 2013, the former City Prosecuting Attorney resigned in April 2013, and the former Municipal Judge resigned in September 2013. In addition, Police Department operations were significantly scaled back during 2013.

1.1 Unaccounted for bond monies

Our review of municipal division receipts and Police Department bond records identified at least 36 bonds received during the year ended December 31, 2012. We reviewed records pertaining to all 36 bonds and determined two cash bonds received by the Police Department were apparently not deposited. Police Department receipt slip number 314372 indicates $200 was received in cash on February 26, 2012, and receipt slip number 314380 indicates $215 was received in cash on May 5, 2012; however, as of November 2013, these monies had not been deposited into the bond account. The former Court Administrator indicated she did not have a record showing receipt of these bond monies or related information provided by the Police Department, and Police Department personnel could not locate any other records related to these bonds. Despite various audit procedures performed, we were unable to determine the disposition of these monies.

Audit work related to bond monies and determining the eventual disposition of bond monies was made more difficult due to multiple records maintained by the municipal division, Police Department, and city; discrepancies among the various records; and disorganization of and lack of sufficient details in some records. In addition, the municipal division and city experienced significant staff turnover during and after the audit period.

The lack of adequate controls and absence of proper oversight, as discussed in the remainder of this report, resulted in the failure to detect undeposited monies on a timely basis.

1.2 Oversight and reconciliations
